There was here a real source of renewal, as national Romanticism was imperceptibly transmuted into realism and modernism, affording a late 19th-century alternative to, rather than an extension of, the Romantic aesthetic. To a very large extent, Russian music managed to avoid or bypass the expressionist crisis so characteristic of central European music at the turn of the century.

It is to that expressionist crisis we must turn if we are to chart the closing stages of Romanticism in music, at least in its 19th-century guise. Through the uncompromising agency of an *Expressionslogik*, a 'law of feeling', an essentially Romantic subjectivity was finally given its head, resulting in a singularly radical reorientation of musical styles and musical syntax, nothing less than a challenge to several centuries of harmonic tonality. Long established, historically sedimented forms and conventions were all but burnt out in the intensity of this impulse, and nowhere more so than in the fiercely idealistic modernist (and predominantly Jewish) circles of a deeply divided Vienna. This was truly the cusp 'between Romanticism and Modernism', to borrow the title of a thoughtful commentary by Dahlhaus. The massive tensions so characteristic of the music of Mahler and of the Second Viennese School – most obvious in Schoenberg, but discernible in different ways in Berg and Webern too – gave supreme expression to these crucial stages of a disintegrating Romantic heritage in central Europe. They were also the birth-pangs of a new musical world.

Romberg. German family of musicians. Bernhard Anton Romberg (*b* Münster, 6 March 1742; *d* Münster, 14 Dec 1814), a bassoonist and cellist, played in the orchestra of the Prince-Bishop of Münster from 1776 to 1803. His children were (2) Bernhard Heinrich Romberg; Anton Romberg (*b* Münster, 6 March 1771; *d* Munich, 1842), a bassoonist and cellist in the Münster orchestra from 1793 to 1802, active in Vienna 1808–19 under Prince Kinsky and Prince Lobkowitz and in the court opera; and Angelica Romberg (*b* Münster, 21 July 1775; *d* after 1803), a soprano soloist in the Münster Kapelle (1794–1803) and a pianist. His brother Gerhard Heinrich Romberg (*b* 8 Aug 1745; *d* 14 Nov 1819) was a clarinettist and violinist who also played in the orchestra of the Prince-Bishop of Münster in the last quarter of the 18th century. The descendants of (1) Andreas Jakob Romberg and (2) Bernhard Heinrich Romberg are listed below.

(1) **Andreas Jakob Romberg** (*b* Vechta, nr Münster, 27 April 1767; *d* Gotha, 10 Nov 1821). Violinist and composer, son of Gerhard Heinrich Romberg. He learnt the violin with his father and made his début in Münster at the age of seven with his cousin (2) Bernhard Heinrich Romberg. They then accompanied their fathers on concert tours, to Frankfurt (1782) and to Paris (1784 and 1785), where their performances at the Concert Spirituel were applauded. In 1790 the cousins (who sometimes made themselves out to be brothers) joined the electoral orchestra in Bonn, which was then at its peak and included the young Beethoven among its members. When the French army invaded the Rhineland in 1793 they escaped to Hamburg, where they found employment in the opera orchestra of the Ackermannsches Komödienhaus, then under the direction of the actor F.L. Schröder. They also earned a high reputation as soloists and composers, but left the city in 1795 for a two-year concert tour of Italy. A visit to Vienna in 1796 led to friendly relations with Haydn and a concert with Beethoven. They returned to Hamburg and remained there until about 1800.

After another trip to Paris in 1800, Andreas made Hamburg his permanent home; his circumspect temperament made him less enterprising than Bernhard, and he turned his intentions increasingly towards composition. In 1809 he received an honorary doctorate from the University of Kiel. The catastrophic plight of Hamburg under the French occupation put his family into financial difficulties; in the hope of obtaining a regular income he took up the post of Hofkapellmeister in Gotha in 1815, as successor to Spohr. But his health soon began to fail and he died in poverty. Romberg's reputation as a violinist faded early; Rochlitz described his playing as 'robust, rather than fiery, vigorous and grainy, rather than emotionally overwhelming'; Spohr, on the other hand, found his playing 'inexpressibly cold and dry' in Berlin about 1815, but acknowledged him as a 'cultured and thoughtful artist'. He won European recognition as a composer, modelling his technique on Haydn and Mozart and setting himself the task of writing works musically more substantial than the usual run of virtuoso pieces. The success of his setting of Schiller's *Lied von der Glocke* (op.25, published 1809) reached as far as New York; the work was still being performed after 1900, sometimes in its individual sections, and ran to a number of editions. A large number of his songs with piano accompaniment and *a cappella* choral works were popular among amateurs. He had little success as an opera composer; only five of his eight operas were performed. He had two sons: Heinrich Maria (*b* Paris, 4 April 1802; *d* Hamburg, 2 May 1859), who became the leader of the Imperial Opera in St Petersburg in 1827 and later its music director, and Ciprian Friedrich (*b* Hamburg, 28 Oct 1807; *d* Hamburg, 14 Oct 1865), the leading cellist in the orchestra of the German opera at St Petersburg from 1835 to 1845.

WORKS

OPERAS

Das blaue Ungeheuer (3, A.W. Schwick, after C. Gozzi), 1790–93, unperf.
Die Macht der Musik (3), 1791, unperf.
Die Nebelkappen (3), 1793, inc.
Der Rabe (Spl, 4, Schwick, after Gozzi), Hamburg, Gänsemarkt, 7 April 1794
Dom Mendoze, ou Le tuteur portugais (oc, 1), Paris, 15 Feb 1802, collab. B.H. Romberg
Point de bruit (oc), Paris, 1810
Die Ruinen von Paluzzi (romantic op, 3, J.F. Schink), Hamburg, 27 Dec 1811
Die Grossmut des Scipio (heroic op, E. Schlegel), Gotha, 1816

VOCAL

Sacred choral: Der Messias (F. Klopstock); Mass, B♭; TeD, op.61; Der Erbarmer, op.64 (Klopstock); Pater noster, op.24; several psalm settings
Secular: numerous choral settings of texts by Klopstock, F. von Schiller and L. Kosegarten, incl. Das Lied von der Glocke (Schiller), op.25; 18 partsongs on texts by J.W.L. Gleim, C. Westphalen and G.E. Lessing; many lieder to texts by Klopstock, J.G. Herder, J.W. von Goethe, L. Kosegarten, others

INSTRUMENTAL

(2) **Bernhard Heinrich Romberg** (*b* Dinklage, Oldenburg, 13 Nov 1767; *d* Hamburg, 13 Aug 1841). Cellist and composer, cousin of (1) Andreas Jakob Romberg. He learnt the cello from his father, Bernhard Anton Romberg, and until about 1799 followed a career largely identical to that of his cousin, touring in Holland and Germany and in 1785 giving six performances at the Concert Spirituel in Paris. He then played with his cousin in the electoral orchestra in Bonn, 1790–92, and from 1793 at Schröder's Ackermannsches Komödienhaus in Hamburg. While visiting Vienna with Andreas in 1796, Bernhard gave the first performance in that city of Beethoven's two

op.5 cello sonatas with the composer. The two cousins returned to Schröder's theatre in 1797, but left two years later following a contractual dispute.

Romberg then toured London, Portugal and Spain, visiting Boccherini in Madrid. In 1799 he arrived in Paris, where he was active as a cellist and composer and from 1801 to 1803 taught at the Conservatoire. In 1805 he joined the royal court orchestra in Berlin as Jean-Louis Duport's desk partner, but left after the French invasion of 1806. In constant demand as a soloist, he toured continually between 1806 and 1815, visiting Russia and London among other destinations. Romberg returned to Berlin in 1815 as second Kapellmeister, where his duties included the production of E.T.A. Hoffmann's *Undine*; he resigned after Spontini's appointment as Generalmusikdirektor (1819), and resumed his concert tours and entered a piano manufacturing business. He ceased touring in 1836, and in 1839 completed his *Méthode de violoncelle*. Among his pupils were J.J.F. Dotzauer, J.G. Arnold and Count Mateusz Wielhorski; his influence and personal interest extended to many other cellists and composers.

Romberg, who played a 1711 Stradivari, made several significant innovations to cello construction and technique: he introduced 'modern' instrument fittings and Tourte *le jeune*'s bows to Germany and eastern Europe. He adopted a leveraged bow held at the frog, and his 'broad' style of playing initiated modern or Romantic concepts of tone production. Generating widened vibrations from the C string, he consequently altered the curvature of the fingerboard, a modification that Spohr adopted for the violin. He also codified cello notation to modern usage.

Called 'the hero of all violoncellists, the king of all virtuosos' by the *Allgemeine musikalische Zeitung*, Romberg was a charismatic performer, and always played solos from memory. His own cello compositions combined techniques pioneered by earlier Mannheim cellists with those from the French violin school of Viotti. His thumb position fingerings fully exploited the stationary 'block' hand positions familiar to Anton Fils and J.B. Tricklir. By using all four fingers across all four strings, Romberg brought speed, range, dexterity and accessibility to the upper registers of the lower strings, and in his use of natural and artificial harmonics he anticipated Paganini's developments on the violin. He also explored bowing techniques suitable to the Tourte bow, and expanded the use of legato slurring and contrasting dynamics and timbres.

Bernhard Heinrich Romberg: lithograph by ?G.C. Krägen after Angelo Gentili

Romberg's instrumental works remained popular throughout the 19th century and are still used for teaching purposes. Stylistically, they reflect the influences of Mozart and Viotti, although their melodies are often derived from idiomatic figures that exploit Romberg's distinctive fingerings. In spite of abundant passage-work, his music shows structural cohesiveness, and the chamber and solo works richly explore the cello's sonority and technical resources.

WORKS

THEATRICAL

Der Schiffbruch (operetta, J.J. Pfeiffer), Bonn, 1791
Die wiedergefundene Statue (op, A.W. Schwick, after C. Gozzi), Bonn, 1790
Ulysses und Circe (op, 3, after P. Calderón de la Barca), Berlin, 1807; as Alma, Hamburg, 1823
Rittertreue (op, F.W. Trautvetter), Berlin, 1817
Daphne und Agathokles (ballet), Berlin, 1818
Incid music: Heinrich IV. (Francke); Phèdre (J. Racine)

ORCHESTRAL

5 syms., op.23 ('Trauer-Symphonie'), op.28, op.53, 1 without op. no.; Kindersymphonie, op.62; 3 ovs., op.11, op.26, op.34
10 vc concs., op.2, op.3, op.6, op.7, op.30, op.31 ('Military'), op.44 ('Swiss'), op.48 ('Brillante'), op.56 ('Grand'), op.75 ('Brillante'); 6 concertinos, vc, orch; Fl Conc., op.30; Concertino, 2 hn, orch, op.41; Double conc., vn, vc, orch
*c*50 rondos, variations, fantasias, capriccios, divertimentos, potpourris, vc, orch and vc, str orch/str qt; other concert works with solo fl, vn, pf and hp

OTHER WORKS

Chbr: 11 str qts, 3 as op.1, op.12, 3 as op.25, op.37, op.39, op.59, op.60; Pf Qt, op.22; Divertissement, pf trio, op.71; Str Trio, op.8; 3 Trios, 2 vc, va, op.38; 3 sonatas, vn/vc, pf/hp, op.5, op.6, 1 without op. no.; 9 duos, vn, vc, 3 as op.4, 3 as op.9, 3 as op.33; other duos, collab. A.J. Romberg
Vc studies, 3 bks
Variations, dance pieces, pf solo
Vocal: Laudate Jehova, motet (Russ. text); Ich weiss, das mein Erlöser lebt (P. Gerhardt); 3 passion songs; several solo songs

KURT STEPHENSON/R (1), VALERIE WALDEN (2)

Romberg [Rosenberg], **Sigmund** (*b* Nagykanizsa, 29 July 1887; *d* New York, 9 Nov 1951). American composer and conductor of Hungarian birth. He was born into a cultured Jewish household: his father was an amateur pianist who spoke four languages, while his mother was a respected writer of poetry and short stories. Romberg studied at various places in the Austro-Hungarian Empire before eventually going to Vienna, where his parents' intent was for him to study civil engineering. Instead, Romberg focussed on music, working as a coach and accompanist at the Theater an der Wien, and studying composition and orchestration with operetta composer Victor Heuberger, thereby absorbing the world of Viennese operetta. In 1909, he arrived in New York City and found work as a pianist at various restaurants. He formed and conducted a small orchestra at Bustanoby's, a venue frequented by the theatre world, where he came to the attention of the Shubert brothers who, in 1914, employed him as a staff composer for their revues. He contributed to many of their revues, including the famed *The Passing Show* series, and, knowing of Romberg's background, they also contracted him to rework Viennese operettas for American audiences. His first adaptation was *The Blue Paradise* (1915), a version of Edmund Eysler's *Ein Tag im Paradies*. Among Romberg's additions to the score was the waltz *Auf Wiedersehn*, his first hit. Two other adaptations proved to be very successful in subsequent years: *Maytime* (1917; from Kollo's *Wie einst in Mai*) and *Blossom Time* (1921; from Berté's *Das Dreimäderlhaus*). Both works contained waltzes which became among Romberg's most famous compositions: *Will you remember?* from *Maytime* and *Song of Love* from *Blossom Time*.

Romberg's primary significance lies in the original operettas he created during the 1920s. His first original operetta was *The Student Prince* (1924) whose libretto and score both exude the concept of 'nevermore', portrayed musically through the waltz. Three of his most famous songs, *Deep in my heart, dear*, *Golden Days* and *Drinking Song*, are waltzes from *The Student Prince*; other important numbers from the show are *Students marching song* and *Serenade*. *The Desert Song* (1926) romanticized the then-current Riff wars and capitalized on the fame of Rudolf Valentino. (*The Sheik*). Its score uses waltzes such as the title song and *One Alone*, and marches such as *The Riff Song* and *The French Military Marching Song*. *My Maryland* (1927), set during the American Civil War, included the immensely popular march *Your land and My land*, while *The New Moon* (1928), Romberg's last operetta of the decade, included the waltz *One Kiss*, the tango *Softly, as in a morning sunrise*, and the march *Stouthearted Men*. His principal orchestrators during this period were Emil Gerstenberger and Alfred Goodman.

During the 1930s he lived in California, working in the motion picture industry; another of Romberg's most popular waltzes, *When I grow too old to dream*, comes from the film *The Night is Young* (1935). During the 1940s, he formed his own orchestra and travelled throughout the country giving programmes of what he himself termed 'middle-brow music': too low-brow for symphony conductors, too high-brow for jazz conductors. He often included his own music in these concerts. He returned to Broadway operetta later in life. While these shows, which included *Up in Central Park* (1945) and *The Girl in Pink Tights* (1954), possessed some significant single numbers, they did not achieve the same success as his works from the 1920s.

Romberg excelled at writing nostalgic waltzes and stirring marches, two forms which permeate Viennese operetta. His general approach was conservative in terms of form, melody and harmony, but it is melody, fundamentally diatonic and therefore easily remembered, which dominates a Romberg score. He was an amazingly prolific composer, writing all or most of the music for nearly 60 shows. His legacy also includes his adaptation and transformation of the essence of Viennese operetta for American audiences. Romberg, who worked with such legendary librettists as Oscar Hammerstein II and Dorothy Fields, is an important link between Viennese operetta and the mature American musical theatre.

Romberg was also an avid collector of musical scores, and his personal music library, purchased by the University of California after his death, contained over 4500 items. Archives of his manuscripts, performance materials and orchestral materials are held at the Library of Congress, the New York Public Library, the Shubert Archive and the University of California.

WORKS
(*selective list*)

STAGE

all dates are those of first New York performance, and are operettas unless otherwise stated; many early revues and musicals include interpolations by other composers; where different, authors shown as (lyricist; librettist)

The Whirl of the World (revue, H. Atteridge), 10 Jan 1914
The Passing Show of 1914 (revue, Atteridge), collab. H. Carroll, 10 June 1914
The Blue Paradise (H. Reynolds; E. Smith), collab. L. Edwards and C. Lean, after E. Eysler: Ein Tag im Paradies, 5 Aug 1915 [incl. Auf Wiedersehen]
Ruggles of Red Gap (musical play, Atteridge), 25 Dec 1915
Robinson Crusoe, Jr. (musical, Atteridge), 17 Feb 1916
The Passing Show of 1916 (revue, Atteridge), collab. O. Motzan, 22 June 1916
The Girl from Brazil (Smith and M. Woodward), 30 Aug 1916
Follow me (musical, R.B. Smith), 29 Nov 1916
Her Soldier Boy (R.J. Young), 6 Dec 1916
The Passing Show of 1917 (revue, Atteridge), collab. Motzan, 26 April 1917
Maytime (Young and C. Wood), 16 Aug 1917 [incl. Will you remember?]; film, 1937
Over the Top (revue, Atteridge and P. Bartholomae), 1 Dec 1917
Sinbad (musical, Atteridge), 14 Feb 1918
The Passing Show of 1918 (revue, Atteridge), collab. J. Schwartz, 25 July 1918
Monte Cristo, Jr. (musical, Atteridge), collab. Schwartz, 12 Feb 1919
The Passing Show of 1919 (revue, Atteridge), collab. Schwartz, 23 Oct 1919
Poor Little Ritz Girl (musical, L. Hart, G. Campbell and L. Fields), collab. R. Rodgers, 28 July 1920
Blossom Time (D. Donnelly), 29 Sept 1921 [incl. Song of Love]
Bombo (musical, Atteridge), 6 Oct 1921
The Blushing Bride (musical, Wood), 6 Feb 1922
The Rose of Stamboul (Atteridge), after L. Fall: Die Rose von Stambul, 7 March 1922
The Passing Show of 1923 (revue, Atteridge), collab. Schwartz, 14 June 1923

WILLIAM A. EVERETT

Rombouts, Pieter. Dutch violin maker, stepson of HENDRIK JACOBSZ.

Rome. City in Italy, formerly centre of the Roman Empire and, since 1420, the undisputed physical centre of the Roman Catholic Church. Since 1870, when Italy was united, Rome has been its capital.

I. Ancient. II. The Christian era.

I. Ancient

1. Introduction. 2. Music in religion and ritual: (i) The Roman religion (ii) Music in the cults of Cybele, Dionysus and Isis. 3. Secular music: (i) Military music (ii) Folksongs and work songs (iii) Entertainment and theatre (iv) Hellenistic song (v) Mime and pantomime (vi) Other foreign influences. 4. Instruments and theory.

1. INTRODUCTION. Historians of ancient Roman music once devoted themselves almost entirely to two limited areas of investigation, late classical music theory and organology, drawing their evidence from Greek and Roman authors. Consequently, writers of general music histories did not dispute the widely held views of the 'unmusicality' of the Romans and the 'decline' and 'decadence' of music after the Hellenistic period. These views, maintained even after the discovery of musical documents from the Hellenistic and Roman periods, arise from an uncritical bias towards Hellenism and Roman culture.

Since the 1930s, through the systematic evaluation of literary and epigraphical references and archaeological sources, scholars (Machabey, Scott, Wille, Fleischhauer, Baudot, Guidobaldi etc.) have increasingly begun to appreciate the importance of music in Roman life. From the era of the Kings (*c*750–510 BCE) and in the early republic (509–265 BCE), the Romans had liturgical and other public music, military music and work songs.

Moreover, Roman music was subject to foreign influences: at an early date that of the Etruscans, later that of the Greeks, and, during the late republican and the imperial periods, that of the orient. The Romans assimilated, modified and extended the music of the nations they conquered. From the 2nd century BCE, after the subjugation of the Hellenistic kingdoms in Macedonia, Syria and Egypt, various musical genres developed under sustained Hellenistic and oriental influences.

The greatest efflorescence of Greco-Roman music occurred (so far as can be judged from literary, epigraphical and archaeological sources) during the Augustan principate (27 BCE to 14 CE) and under the imperial dynasties of the Julio-Claudians (14–68 CE), the Flavians (69–96 CE) and the Antonines (96–192 CE). Professional virtuosos, mainly of Greek origin, sang and played at festivals; outstanding Egyptian and Syrian *pantomimi* performed in public; Greek and Roman musicians and actors constituted professional guilds at Rome and in all the larger cities; dancers and musicians were imported as slaves from all parts of the Empire; musical instruments

and musical scholarship were developed; and the participation of music lovers in public events increased.

At the same time writers, philosophers and historians, including Seneca, Plutarch, Juvenal and Tacitus, attacked the demoralizing and effeminate effects of theatrical music, and the 'decline' of music in the service of luxury, on national, social, musical and moral grounds. Many actors, dancers and musicians continued, nevertheless, to enjoy public favour, despite their low legal and social position. Even after the fall of the Western Roman Empire in 476 CE they became the means by which the instruments and musical practice of antiquity were transmitted to the itinerant musicians (*joculatores*) of the Middle Ages.

2. MUSIC IN RELIGION AND RITUAL.

(i) The Roman religion. The Romans imputed an extraordinary importance to the magical functions of music in ritual. The companies (*sodalitates*) of priests known as the *Salii* were founded as early as the legendary era of the Kings and survived into imperial times, when the group consisted of 12 members of the nobility; under a leading singer (*vates*) and a leading dancer (*praesul*) they performed archaic armed dances and responsorial *carmina* (songs), in honour of Mars and Quirinus, according to a strict ritual (Livy, i.20.4). Another ancient priestly company, the Arval Brethren (*fratres Arvales*), even as late as the early 3rd century CE, still performed their traditional ritual song, the *carmen Arvale*, intended to banish malevolent influences during a procession around the sacred grove.

Tibia players (*tibicines*), probably originally from Etruria, constituted one of the oldest professional organizations at Rome (Plutarch, *Numa*, xvii) and their participation in the ritual also had a magical function; their playing was intended to render inaudible any maleficent noises during the rigidly prescribed Roman sacrificial rites (Pliny, *Naturalis historia*, xxviii.2.11), to banish evil spirits and to summon up benevolent deities. For similar reasons during the Empire, tibia players invariably accompanied funeral processions and ceremonies and sacrifices, whether made by peasants or on the highest state occasions; they were frequently represented in reliefs on altars, triumphal arches, sarcophagi (For illustration, *see* TIBIA) and on coins (Vorreiter, 1977). The *tibicines* were sometimes supported by lyre players (*fidicines*); however, the tibia (originally a bone pipe with three or four finger-holes, and later, like the Greek aulos, a double-pipe reed instrument with two pipes made from ivory, silver or boxwood) remained the national ritual instrument of the Romans (Wille).

The *tibicines* owed their esteemed position to the part they played in the sacred rite (Ovid, *Fasti*, vi.657–61); they enjoyed state privileges, and commemorated their legendary strike of 311 BCE (Livy, ix.30.5ff) every year in Rome with a guild festival, processions and a public feast in the temple of Jupiter on the Capitol. During the later days of the republic and in the early Empire the members of the municipal Roman *collegium tibicinum* were freedmen (*liberti*), whereas the trumpeters of the state religion (*tubicines sacrorum populi Romani*) held the rank of priest. From the 2nd century BCE choirs of boys and girls sang, after the Greek fashion, in processions of atonement or supplication; during the secular games of Augustus in 17 BCE these choirs sang alternate strophes of the *Carmen saeculare* composed by Horace. Similar choirs sang hymns of mourning at the funeral of Emperor Pertinax in 193 CE.

(ii) Music in the cults of Cybele, Dionysus and Isis. The musical culture of the Romans was influenced by the mystery religions of CYBELE (the *magna mater*), DIONYSUS (Bacchus) and ISIS, which originated in Phrygia, Greece and Egypt respectively.

The cult of Cybele was officially introduced at Rome as early as 204 BCE; festivals, lasting for several days and accompanied by scenic games (*ludi Megalenses*), were held annually to commemorate the dedication of her temple on the Aventine. The priests carried the cult-idol of the goddess in triumphal procession to the music of bronze cymbala, frame drums or tympana, cornua and 'Phrygian auloi' or 'Berecyntiae tibiae' (i.e. tibiae pertaining to Cybele) whose deeper-sounding left pipe had an upturned bell (fig.1; *see also* AULOS, fig.1; and TYMPANUM (i)). These instruments were also played during the orgiastic dances of the priests in the temples (Catullus, lxiii.19ff).

Livy gave an account (xxxix.8.8) of the ecstatic nature of the music in the cult of Dionysus: the loud beating (by hand) of the tympana and cymbala drowned the cries of those being violated. Despite the proscription of Dionysiac festivals by Senate decree in 186 BCE, they were repeatedly held during the last century of the republic and during the early Empire. Pompeiian wall paintings and a few sarcophagal reliefs of the 2nd and 3rd centuries clearly show the orgiastic and cathartic nature of this music in many depictions of different kinds of wind and percussion instruments (tibiae, transverse flutes, cymbala, tympana, foot-clappers, small bells etc.; see Fleischhauer, 1964, 2/1978, figs.39–45).

After the conquest of Egypt in 30 BCE, the cult of Isis also spread through the Roman Empire; this process continued during the reigns of the Flavians, the Antonines and the Severans, in the 1st, 2nd and 3rd centuries CE. The characteristic and traditional instrument of the Isis cult was the sistrum, a bright-sounding metal rattle, which was used to banish the influence of malevolent spirits (*see* ISIS, illustration); Old Egyptian vertical long flutes and angular harps were also played during processions, sacrificial ceremonies and mystery rites of the cult. As in the cults of Cybele and Dionysus, instrumentalists and hymn singers were attached to the temples.

3. SECULAR MUSIC.

(i) Military music. There was an ancient tradition of military music in Rome. Trumpeters (*tubicines*) and horn players (*cornicines*) are mentioned as early as the constitutional reforms (attributed to Servius Tullius) of the 6th century BCE. The Romans inherited their instruments from the Etruscans: the straight tuba, a bronze or iron tube with a small bell (fig.2); the long-stemmed lituus with a hook-shaped bell that was bent back (*see* TIBIA, illustration); and the cornu, which was circular with a crossbar attached diagonally (*see* CORNU, illustration). There are originals and modern reproductions of these instruments in museums in Rome, Naples, Mainz and elsewhere (see Behn, 1912).

The duties of the Roman military musicians were described in the late 4th century CE by Vegetius (*Epitome rei militaris*, ii.22), whose account is corroborated and supplemented by literary and iconographic evidence of earlier centuries, such as the reliefs on Trajan's Column

1. Musicians in a Dionysiac celebration: marble relief, late 1st or early 2nd century CE *(Museo Archeologico Nazionale, Naples): Dionysus (centre) in a drunken daze is supported by a satyr, one maenad (left, with her arms raised above her head) plays the cymbala, and the other (right) the Phrygian auloi (or Berecyntiae tibiae)*

at Rome (*see* TUBA (ii), illustration). The trumpeters gave fixed signals to sound the alarm, break camp, attack or retreat. They signalled changes of the watch and also played on the march, at funerals and in triumphal and sacrificial processions. The lituus players generally belonged to the cavalry and auxiliary cohorts, whereas horn players gave special signals to standard-bearers during the legion's tactical manoeuvres and are therefore frequently represented standing near them (see Fleischhauer, 1964, 2/1978, fig.31).

In battle the sharp ringing sounds of the trumpets would have mingled with the dark, coarse noise of the horns, the combined sound (*concentus*) of the instruments being designed to encourage the Roman ranks and to confuse the enemy (Livy, xxx.33.12; Tacitus, *Annales*, i.68.3). In the army hierarchy, the military musicians ranked among the 'non-commissioned officers' (*principales*); under Septimius Severus (193–211 CE), in order to improve their position, they formed themselves into bodies with common funds. This is attested by inscribed statutes (*leges*) and by membership lists of trumpeters and horn players of the 3rd Augustan Legion in Lambaesis (Numidia) (G. Wilmanns, ed.: *Inscriptiones Africae latinae*, Berlin, 1881, no.2557, p.295).

(ii) Folksongs and work songs. Literary references from several centuries show that the Romans had many folksongs and work songs in everyday use (Varro, *Saturae Menippeae*, 363): singing and instrumental music provided a rhythmical accompaniment for rowing, reaping, treading grapes, weaving and so on. Traditional folksongs of the following types are attested: table songs, songs of mourning (e.g. the *nenia*), lullabies, nursery rhymes, soldiers' victory songs, birthday and wedding songs (e.g. the *fescennini*), songs of love, joy, invective and satire (Wille, 1967; 1997). Satirical songs were popular in pre-literary times, as is shown by their prohibition in the Twelve Tables (the earliest Roman code of laws, drawn up in 451–450 BCE); and they repeatedly served as mass political songs in the last days of the republic (e.g. Cicero, *Pro Sestio*, lv.118).

(iii) Entertainment and theatre. After the Roman expansion during the Punic Wars (3rd and 2nd centuries BCE) and the annexation of kingdoms in the eastern Mediterranean (Macedonia, Syria and Egypt), the Hellenistic and oriental features in Roman musical culture became more firmly established and widespread, and the following centuries saw the development of various genres of theatrical, dance and entertainment music. In Rome, as early as 364 BCE, Etruscan *histriones* or *ludiones* (actor-dancers) had performed pantomimic dances to the accompaniment of tibiae at a sacred festival; the young people of Rome were stimulated to emulate this (Livy, vii.2.4ff).

However, from the middle of the 3rd century BCE, Roman theatrical music was decisively and increasingly influenced by the Greek theatre. Latin adaptations of

2. Trumpeter playing a straight tuba in the triumphal procession of Marcus Aurelius: relief from a ruined triumphal arch, second half of the 2nd century CE *(Palazzo dei Conservatori, Rome)*

Greek dramas were produced in Rome for the first time in 240 BCE, by Livius Andronicus, a Greek from Tarentum. Then Plautus (*c*254–184 BCE) incorporated features of Hellenistic song and Euripidean monody, together with the literary style of Greek comedies, in his Roman comedies, which included sung portions (*cantica*), monodies and duets. *Tibicines* performed a prelude at the beginning, accompanied the *cantica* and various (spoken) verse passages of the actors and singers, and provided music between the acts as well as an accompaniment for dance interludes. *Tibicines* from the slave classes were commissioned to compose the accompanying music for Plautus's *Stichus* and for the six surviving comedies of Terence (*c*190–159 BCE).

After the conquest of Macedonia in 167 BCE and the destruction of Corinth in 146 BCE, Greek actors and musicians came to Italy in vast numbers; initially they appeared in the triumphal games of Roman generals such as L. Anicius Gallus (167 BCE) and L. Mummius (146 BCE). Their organized guilds of 'Dionysiac artists' (*Dionysiaci artifices*, or in Greek *Sunodoi tōn peri Dionuson technitōn*) included all the types of artist necessary for staging public festivals: tragic and comic poets and actors, musicians, players of the kithara and tibia, trumpeters and stage personnel. The existence of these TECHNITAI meant that Roman organizers of games (Sulla, Antonius etc., and later the emperors) could easily present musical and theatrical festivals; the latter increased in numbers and became more widely diffused in the early days of the Empire and caused the founding of local theatrical organizations. The majority of the Dionysiac artists, predominantly Greeks, formed a 'union with all the members of the world' (*sunodos tōn apo tes oikoumenēs peri ton Dionuson ... technitōn*), centred on Rome at least from the time of Claudius (41–54 CE); they cultivated and disseminated theatrical and musical works in festivals, and also in the imperial cult, in all the larger cities of the Empire. Augustus, Claudius, Hadrian, Septimius Severus, Caracalla and Diocletian (*d* 316 CE) granted and confirmed their old privileges of immunity, freedom from taxation etc.

Following the example of the Greek musicians, Roman actors joined together as *parasiti Apollinis*, probably as early as the middle of the 2nd century BCE, to improve their position in society. The growing number of theatrical and musical performances during state-sponsored games (such as the *ludi Romani* or *ludi Apollinares*) also helped to unite these artists. Despite their legally dishonourable status (*infamia*), some outstanding actors, such as Q. Roscius, and some foreign *pantomimi* enjoyed the favour of all classes in the early Empire, and cities and communities issued decrees and erected statues in their honour (H. Dessau, ed.: *Inscriptiones Latii veteris latinae*, Berlin, 1887, no.2113, p.199; no.2977, p.319).

(iv) Hellenistic song. During the later days of the republic, Hellenistic art song was introduced to Rome with immediate success. Women playing string instruments of all kinds, among them harpists (*psaltriae sambucistriaeque*), and itinerant singers (*cantores*, both male and female) from Greece and Asia Minor performed lyric poems to instrumental accompaniment.

Vocal settings were made first of the elegies of Valerius Aedituus, Porcius Licinus and Q. Lutatius Catulus (late 2nd and early 1st century BCE), and soon after of other genres of poetry. Virgil's *Eclogues* came to be interpreted by singers in the theatre; the hendecasyllables of Pliny the Younger (62–113 CE) were sung to the lyre or kithara (Pliny, *Epistulae*, vii, letter 4.8–9) and similar performance may be assumed for some of the lyric poems of Catullus (*c*87–54 BCE) and the odes of Horace (65–8 BCE).

Actor-singers and itinerant kitharodes appeared increasingly as performers of Greek music at public events, such as the musical competitions (*agones*) established at Rome by Nero in 60 CE and Domitian in 86 CE. For their performances of Greek hymns, and of dramatic and pathetic solos from tragedies in concert performance, they received enormous fees (Suetonius, *Vespasian*, 19) and the privileges of honorary citizens. Their audiences praised brilliant performances with enthusiastic applause and criticized mistakes (e.g. rhythmic inaccuracy). Emulating them, many amateurs (among them senators and emperors such as Caligula, Nero, Hadrian, Commodus, Elagabalus and Severus Alexander) cultivated singing and playing solo instruments (kithara, trumpet, tibiae, hydraulis, bagpipes etc.); they took instruction with famous virtuosos (e.g. Terpnus, Diodorus) and even competed, as did Nero, with professional artists in public (Suetonius, *Nero*, 21ff). Some performers were also celebrated composers, such as the Cretan kitharode Mesomedes, who served at the court of Hadrian.

(v) Mime and pantomime. At the beginning of the Augustan principate the pantomime was established in Rome and Italy. Foreign solo dancers represented mythological figures or individual characters, or mimed well-known scenes from Greek tragedy. The instrumental

accompaniment for these dancers ranged from a single pair of tibiae, preferred by the famous Alexandrian *pantomimus* Bathyllus, to an ensemble with chorus, which is supposed to have been introduced by Pylades of Cilicia, his rival, in 22 BCE (Macrobius, *Saturnalia*, ii.7.18).

The pantomime was further developed by dancers from Egypt, Syria and other provinces and during the Empire acquired a stylized repertory of gestures and dance figures for the interpretation of mythological and dramatic material. Even in late Roman times *pantomimi* were accompanied by the tibiae, syrinx, kithara and other instruments; the dancers, singers and instrumentalists were directed rhythmically by tibia players with foot-clappers (*scabillarii*; fig.3).

From the late republican period the mime was the most popular form of Roman theatre, not only with slaves and freedmen but also with citizens. Male and female *mimi* without masks realistically acted scenes from everyday life and also imitated events and characters borrowed in part from Greek comedy. That their acting was sometimes supplemented by interludes of dance and song is confirmed by stage directions of the 2nd century CE which indicate the use of crotala and tympana in the *Charition* mime (B.P. Grenfell and A.S. Hunt, eds.: *The Oxyrhynchus Papyri*, iii, London, 1903, no.413, pp.41ff).

(vi) Other foreign influences. After Roman campaigns and conquests in Greece and Asia Minor, the influx of foreign musical entertainers and street musicians increased in the 1st century BCE. Chrysogonus, a wealthy favourite of Sulla, surrounded himself with singers and *tibicines* by day and night; at the health resort of Baiae the guests took pleasure in vocal and instrumental performances (*acroamata*), and Caesar also enjoyed music at table (Macrobius, *Saturnalia*, ii.4.28). It was mainly the hired slaves who sang and played string instruments at the domestic concerts of Roman music lovers.

The increasing luxury of the ruling classes attracted even larger numbers of foreign artists during the early Empire. Famous (and notorious) female dancers (*saltatrices*) from Egypt, Syria and Spain performed their exotic dances in taverns, on the street and in the squares to the varied accompaniment of crotala, cymbala, tympana, and foreign wind instruments such as the Syrian *ambubaiae* (Horace, *Satirae* [= *Sermones*], i.2.1). Their example, and the impetus that came from the theatrical dancing of the *pantomimi*, furthered dancing in all levels of society, despite the constant criticism of conservative Romans (Cicero, Seneca, Juvenal, Tacitus and others); dancing schools flourished, and the nobility employed dancing and music teachers (Wille, 1967).

The extent of the passion for dancing and music even in late Roman times can be seen from the frequent condemnation of popular music, and of the music of the theatre and the pagan cults, by early Christian ecclesiastical authors, and also from the telling piece of information that, during the famine of 383 CE, foreign tutors of general subjects had to leave Rome, whereas 3000 female dancers were allowed to remain in the city with their choirs and instructors (Ammianus Marcellinus, xiv.6.19).

4. INSTRUMENTS AND THEORY. The multifarious character of Roman musical life is reflected in the musical instruments, as pictorial representations, literary references and some surviving instruments show (Wardle, 1982). The cosmopolitan musical culture of Rome, from the last days of the republic to the fall of the Western Roman Empire in 476 CE, was stimulated by foreign influences fostered by trade and traffic, wars, and by the immigration of musicians, virtuosos and slaves who came to Italy and Rome from all the countries of the Empire, importing their own instruments and music. The Romans adopted Etruscan, Greek and oriental instruments, and perfected and developed them (Scott, 1957). The number of strings on the lyre and kithara was increased, and their bodies were enlarged (fig.4); this was important for the art music of the virtuosos. The angular harp with a vertical soundbox, and the long-necked lute, originating in the orient and popular in late Roman times, were further developed for use on public and domestic occasions. Frame drums or tympana, bronze cymbala and other instruments were introduced to Rome with the Hellenistic mystery cults and were used in the popular music of the theatre, the dance and entertainment in general. Small bells, foot-clappers and transverse flutes were used in the cult of Dionysus, and the sistrum and the Old Egyptian long flute were still used in the Isis cult. The combination of crotala and cymbala produced forked cymbals, whereas foot-clappers (scabella) were favoured for marking dance rhythms in the accompaniment of *pantomimi* (see fig.3). Military instruments of Etruscan origin (the tuba, lituus and cornu) were played by the Romans in processions, at funerals and public games (e.g. gladiatorial combats).

To increase its technical and acoustic possibilities the Phrygian pipes or 'Berecyntiae tibiae', used mainly in the cults of Cybele and Dionysus and in the theatre, were given an attachment of movable metal rings (Horace, *Ars poetica*, 202) by means of which the increased number of

3. Musicians and dancers, probably entertaining guests at an inn: detail of a floor mosaic, end of the 3rd century CE, from the Temple of Diana on the Aventine (Museo Pio Clementino, Vatican City): the group includes a man playing the tibia and scabellum (left), two male dancers with forked cymbals, and a female dancer with two crotala in her raised hands

4. Music lesson on a kithara: wall painting, 1st century CE, *from Herculaneum (British Museum, London)*

finger-holes of both pipes could be opened or closed for transposition (*see* METABOLĒ) when necessary (*see* AULOS, fig.2); this meant that the desired scale could be engaged more easily. Originals from Pompeii and Herculaneum and pictorial representations (reliefs, wall-paintings and mosaics) demonstrate the technical refinement of this widely used wind instrument.

The hydraulis, an invention attributed to Ctesibius, an Alexandrian engineer (3rd century BCE), later came into favour as an instrument for domestic music at Rome and in the provinces, and because of its loud volume it was also used in amphitheatres (*see* HYDRAULIS, and ORGAN, §IV, 1). It was supplemented with a register-like series of open and stopped pipes in various scales (as in the organ of Aquincum near Budapest, dating from 228 CE; *see* ORGAN, fig.23); in the 4th century CE, portable pneumatic (bellows) organs were also in vogue (Wardle, 1982).

Solo instrumental music was practised in public and private by famous virtuosos and by Roman amateurs with the aim of achieving artistic perfection. Groups of instrumentalists formed small ensembles to accompany singers or dancers, or larger ensembles (after the fashion of Alexandria and the orient) to perform in theatres (Seneca, *Epistulae morales*, lxxxiv.10) and at popular spectacles (Vopiscus Carinus, xix.2).

Some Romans tried to make the heritage of Greek music theory their own, to propagate it in their writings and to make it available for other disciplines (rhetoric, architecture and medicine). Music was accorded its distinguished position in the educational system of the liberal arts as early as the 1st century BCE by MARCUS TERENTIUS VARRO (116–27 BCE), in more detail by AUGUSTINE OF HIPPO (late 4th century CE) and, in allegorical guise, by MARTIANUS CAPELLA (early 5th century CE). The tradition of applying an encyclopedic approach to music was continued in late antiquity and the early Middle Ages by CASSIODORUS (*c*480–575) and ISIDORE OF SEVILLE (*c*560–636), whose writings on music transmitted some of the basic definitions, classifications and harmonic knowledge of Greek and Roman antiquity to the Middle Ages.

The poet-philosopher Lucretius (*c*98–55 BCE) devoted himself to the history and psychology of music. Cicero (106–43 BCE) recommended that orators should receive musical education, and expounded Stoic and Epicurean musical aesthetics. The architect Vitruvius (*c*84–14 BCE) described the acoustical problems of theatre construction (*see* ACOUSTICS, §I, 7) and organ building, and Quintilian (*c*35–96 CE) dealt with voice training and musical delivery by orators.

In some later Latin writers on music, such as Censorinus (3rd century CE) and Macrobius, there is a widening gulf between theory and contemporary practice, for Neoplatonic and neo-Pythagorean influence prompted a tendency towards a speculative and mystical attitude. The *De institutione musica* by BOETHIUS (*c*480–524), is the most substantial Latin treatise on music. The work was conceived as part of a series of books on the mathematical arts, and subsequently became the most influential of the ancient music treatises during the Middle Ages.

II. The Christian era

1. Late Antiquity and the Middle Ages. Very little is known about the music of Rome during the first 1000 years of the Christian era. While the evidence allows certain conclusions to be drawn about sacred music and its performers, the loss of documentary material limits what can be learnt about the musical institutions of the medieval city. Secular music has left no trace whatsoever.

From the time of its establishment at Rome, the Christian community had access to places large enough for meeting and celebrating the Eucharist. (The idea that Mass was celebrated clandestinely in the catacombs outside the walls is a 19th-century fantasy.) Although persecution was not a constant threat, it was not possible for a complex liturgy with a lavish musical repertory to develop. Christians met in large houses belonging to wealthy members of their community; churches built later, either on the same property or nearby, came to be known as 'tituli' after the nameplate (*titulus*) of the owner customarily affixed to the outside wall of Roman houses. The names of the benefactors became confused with those of early Christian martyrs, and these benefactors were retroactively 'canonized' in the names of the churches (e.g. the 'titulus Praxidae' became the 'titulus sanctae Praxedis', now S Prassede).

The status of the Church at Rome changed markedly after Constantine attributed his victory over Maxentius in 312 to the intervention of the Christian God. Constantine constructed both an episcopal residence for the bishop of Rome, Sylvester I (314–355), and a magnificent church, the Basilica Salvatoris, later known as S Giovanni in Laterano. The emperor also built another grand basilica on the Vatican hill, the supposed site of the martyrdom of St Peter (later S Pietro). These two basilicas, far distant from each other, were to be the most important ecclesiastical sites of medieval Rome. Towards the end of the 4th century an imperial basilica was erected over the supposed burial site of St Paul, and Pope Sixtus III (432–40) founded a basilica in honour of the Virgin (later S Maria Maggiore). Besides the major basilicas and titular churches there were many smaller churches in medieval Rome, whose diminished population was concentrated in the Tiber bend and across the river in Trastevere.

The location of the Basilica Salvatoris, some distance from the populated areas of medieval Rome, led to the development of a special kind of liturgical observance, known as 'stational liturgy'. On certain days of the liturgical calendar, mostly during Lent, the pope or his representative gathered with the clergy and the faithful – residents and pilgrims visiting Rome – at a 'collect' church. After a short prayer all proceeded singing antiphons, psalms and a litany to the stational church of the day, where Mass was celebrated.

Certain popes founded monasteries at the papal basilicas and at some titular churches to assure the singing of the Divine Office, day and night. Four important monasteries charged with this obligation were situated near the basilica of St Peter. The Office of the basilical monasteries served not only as the model for other Roman churches but also as the Office in the Rule of St Benedict (*c*530). A large number of antiphons and responsories had to be created to accompany psalms and readings in the evolving liturgy. However, monasticism had only a tenuous foothold in Rome, and when Alberich, 'prince' of Rome, commissioned Odo, abbot of Cluny (926–44) to reform the Latin monastic communities in the city, there were few remaining monasteries. Eventually, the monastic foundations attached to the great basilicas were transformed into communities of canons.

Given the large number of liturgical books that must have been required to supply the needs of Roman churches and monasteries during the Middle Ages, comparatively few have survived to the present. Manuscripts earlier than the 11th century are extremely rare. Books that could be put to multiple use (e.g. homiliaries containing patristic sermons or legendaries with the lives of the saints) are preserved in far greater numbers than sacramentaries, books for the Office, or pontificals that could be rendered obsolete by liturgical change (*see* Liturgy and liturgical books, §II). Virtually none of these manuscripts contains musical notation of any kind. Beginning in the 7th century, Roman liturgical practice was emulated in parts of northern Europe, and some manuscripts from these areas preserve early evidence of the Roman liturgy, albeit adapted to different circumstances.

Despite the grave loss of liturgical documentation, five manuscripts (three graduals and two antiphoners) have survived with virtually the entire repertory of medieval urban chant, known to scholars as Old Roman chant. Before the 11th century, this chant was transmitted orally,

and the oldest surviving book of Old Roman chant is a gradual from the church of S Cecilia in Trastevere (*CH-CObodmer* C.74), dated 1071. Even at this early date, however, chants from the Gregorian tradition (e.g. tropes) had been added to the traditional urban repertory. Of slightly later date (11th–12th century) is the gradual *I-Rvat* lat. 5319. Two manuscripts, one from S Pietro (*I-Rvat* S Pietro B.79) and the other believed to be from the Roman church of S Croce in Gerusalemme (*GB-Lbl* Add.28899), preserve the Old Roman repertory for the Office. The last Roman manuscript with the traditional urban repertory for the Mass (*I-Rvat* S Pietro F.22) dates from the 13th century.

Although it shares a common textual basis with Gregorian chant, Old Roman chant differs radically in its musical style, displaying affinities with other old Italian chant repertories. While it seems likely that Old Roman chant was sung outside Rome, particularly in dioceses of *Italia suburbicaria* that were directly under the metropolitan authority of the pope, no conclusive evidence of such dissemination has heretofore come to light. Attempts to portray Gregorian chant as originally 'papal' chant, created to distance the papal court from urban musical practice, have not been convincing. Later, however, clerics who joined the papal court (curia) came from all over Europe, and would have been familiar only with Gregorian chant, not with Old Roman chant. This 'internationalization' of the curia and the many decades during which the popes travelled outside the city led to the eventual neglect of the city's traditional musical idiom by the pope and his circle. By the mid-12th century, the pope's own cathedral, S Giovanni in Laterano, had abandoned the traditional urban repertory for Gregorian chant. By the pontificate of Innocent III (1198–1216), if not considerably earlier, the papal chapel had definitively adopted the Gregorian melodies for the Office. The Franciscans, who had adopted the reformed liturgical books of the Roman curia, also contributed to the dissemination of Gregorian chant in the city. Finally, Pope Nicholas III (1277–80) arranged for the destruction of many older books of the Roman liturgy. By the time the papal court left Rome for Avignon with the French pope, Clement V (1305–14), Old Roman chant was a dying tradition.

Important witnesses to liturgical practice at Rome are the *Ordines romani*, guides to the celebration of Mass, the Divine Office, the observances of Holy Week, clerical ordination and other rituals. All of the *ordines* (*I–XLIX* ed. Andrieu, and *L* ed. Vogel and Elze) were recopied from older Roman originals north of the Alps beginning in about 800. Though very few *ordines* remained untouched by northern emendation, several preserve a nearly 'pure' Roman character. Among the latter is *Ordo romanus I*, a description (*c*750) of the solemn procession on Easter Day to S Maria Maggiore and the subsequent papal Mass. All the chants of the Proper and Ordinary of the Mass are mentioned along with meticulously detailed rubrics to guide the pope and other ministers.

One observance unique to Rome was the splendid Paschal Vespers sung in Old Roman chant on Easter Day and throughout the following week. In 832 a northern visitor to Rome, Amalarius of Metz, described this 'glorious Office' in his *Liber de ordine antiphonarii* (chap.52). All the music for this impressive ceremony has been preserved in one of the Old Roman graduals (*I-Rvat* lat.5319), which can be supplemented by the detailed rubrics of *Ordo romanus XXVII*. Vespers began in S Giovanni in Laterano with three psalms, a great alleluia, the *Magnificat* and a collect. Subsequent parts of the ceremony took place in the baptistery, its chapel dedicated to St John the Evangelist, and at the neighbouring oratory of S Croce (demolished in 1588). In each of these locations a psalm, great alleluia, *Magnificat* and collect were chanted.

Paschal Vespers owed not a little of its grandeur to the singing of the SCHOLA CANTORUM (i), which was of central importance in the creation and stabilization of a fixed musical repertory for the liturgy at Rome. The Schola was a body of singers charged with providing music for papal ceremonies, with training singers and with preparing young clerics to serve the Church of Rome in subordinate functions. (Allegations that several popes graduated from the Schola Cantorum rest on faulty assumptions.) The papal Schola Cantorum, whose administrative structure was modelled on other Roman ecclesiastical bureaucracies, seems to have been officially established, most likely on the basis of an antecedent group of singers in papal service, towards the end of the 7th century. A 9th-century legend crediting Pope Gregory the Great (590–604) with the foundation of the papal Schola cannot be confirmed (a pre-Gregorian foundation of the Schola has been defended by Bernard, 1996). The chief officer of the Schola, the *primicerius*, was assisted by other adult singers of the choir, the *secundus*, *tertius* and *quartus*. The singers were also called *paraphonistae*, but without any necessary suggestion of polyphonic performance (*see* PARAPHONIA). Boy choristers of the Schola (*paraphonistae infantes*) collaborated with the adult singers, at least on some occasions. The prestige of the Schola Cantorum declined from the 9th century, and it was virtually defunct by the end of the 13th before its suppression by Pope Urban V in 1370.

Modern scholars have assigned to the Schola Cantorum an important role in the formulation of the Old Roman chant repertory and the organization of portions of the liturgical year. A legend transmitted by *Ordo romanus XIX* credits eight popes and three abbots (Catolenus, Maurianus and Virbonus, from one of the monasteries of S Pietro) with contributions to the creation of an annual cycle of chants.

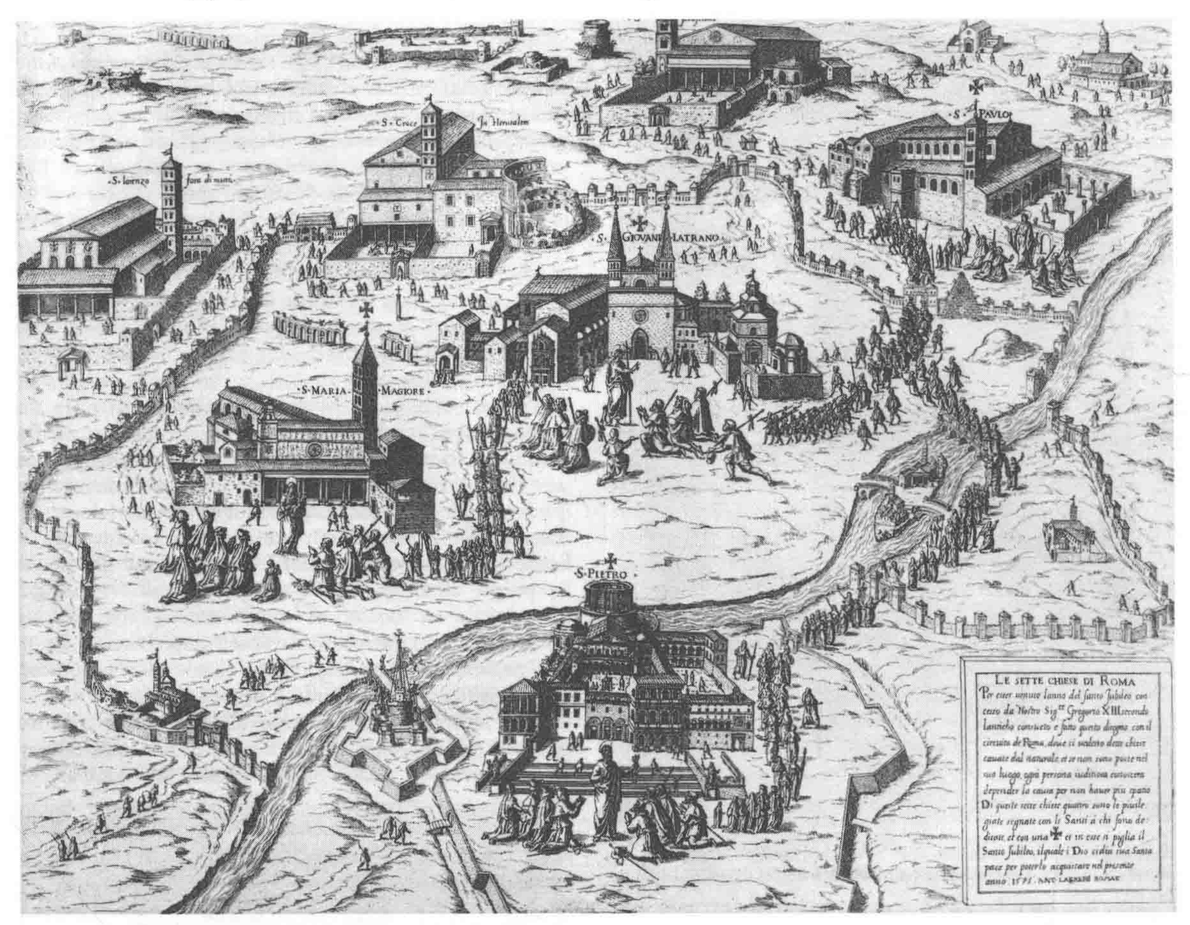
Evidence about the provision of music at the Roman titular churches and churches of lesser importance is rare and difficult to interpret. In many cases members of the clergy with no special musical training formed the choir. For daily services at the smaller churches the 'choir' might have consisted of a single cleric, perhaps an alumnus of the Schola Cantorum. On solemn occasions when the papal court celebrated a liturgical observance at one of the Roman basilicas, the resident canons collaborated with the singers of the Schola. Professional, presumably clerical, singers provided for the more intensive needs of the major basilicas. The 11th-century *Liber politicus* of Canon Benedict of S Pietro claims that four singers were assigned to S Pietro, to S Maria Maggiore and to S Lorenzo for this purpose by Gregory the Great. A description of the Vatican basilica a century later refers to a dwelling for singers near the steps leading up to the church. This dwelling for 'cantores basilicae' was several times restored before being demolished during the pontificate of Pius IV (1559–65).

Rubrics indicate that Roman singers improvised polyphony, probably in the simple note-against-note style attested elsewhere in Italy. Sometimes the occasions on which polyphony was to be performed are specified, but the direction 'sine organo', implying a flexible, widespread practice, is also encountered. Adémar de Chabannes (988–1034) believed that Romans taught the Franks the principle of the *ars organandi*. No manuscript evidence confirms the existence of more elaborate forms of polyphony in medieval Rome.

2. THE RENAISSANCE (1420–1600). On 11 November 1417 the Great Schism ended in Konstanz with the election of Cardinal Oddo Colonna as Pope Martin V. Three years later, in September 1420, the new pontiff made his official entry into Rome, which became once again the permanent home of the papacy. The succeeding two centuries saw the city return to its former architectural and artistic glory and also become one of the most vibrant musical centres in Italy. The principal musical institution of the papacy was the choir of the papal chapel, an organization that existed long before the construction of the Cappella Sistina, which now gives the choir its name. This choir had certain peculiarities. It was made up entirely of adult singers, the soprano part sung at first by falsettists and, from the mid-16th century, increasingly by castratos (at the turn of the 17th century almost all the sopranos were castratos); the two attempts, in 1425–7 and 1436–7, to add boy choristers came to nothing. The choir was unique in singing totally *a cappella* when it performed in the Vatican, although it is still not clear exactly how many singers sang at a time. It has been suggested that the norm was one or two to a part no matter how large the choir was. Although dominated by northerners in the 15th century, by the 16th the choir also included significant numbers of Spanish and Italian singers; by the end of the century they constituted the majority. Beginning in Martin's reign, composers enter the singers' ranks, the most famous of these being Guillaume Du Fay. In the late 15th century other important composers, chief among them Josquin Des Prez, became members of the choir, which tended thereafter to have at least one composer constantly in residence, although the most famous composer of sacred music in 16th-century Rome, Palestrina, stayed in the chapel for only a few months in 1555. Recent studies suggest that it was not until the end of the 15th century that the papal choir became engaged in any serious way with the sustained performance of elaborate polyphony (settings of the Mass Ordinary and motets), although the singers were certainly capable of singing complicated polyphony as the motets of Du Fay composed for papal occasions attest. At least by the 1480s the papal chapel possessed manuscripts containing masses by Busnoys, Ockeghem, Du Fay and others, and in the late 1490s the position of scribe was added to the chapel in order to deal with the ever-increasing library of manuscripts of polyphony. In 1566 the singers declared that their duties included singing the Mass in polyphony every day. Nevertheless, the majority of the music sung by the papal singers continued to be Gregorian chant.

5. Apse of S Lorenzo in Damaso, Rome: painting attributed to Giovanni Paolo Panini, first half of the 17th century (Museo di Roma); the apse was commissioned by Cardinal Francesco Barberini to serve as an auditorium for ecclesiastical music and was inaugurated in 1640; music by Corelli and his contemporaries was performed there under the patronage of Cardinal Ottoboni (the apse was destroyed by fire in the 19th century)

The papal choir was by no means the only sacred musical institution in Rome, although it was always considered to be the most prestigious. S Pietro had a choir which, to judge by the manuscript *I-Rvat* S Pietro B80, was capable of singing polyphony in the mid- to late 15th century. Other major churches and basilicas in the city also supported singers and, in contrast to the Vatican, used boys, organs and instruments in the celebration of the liturgy; the extant evidence of this, beginning in the 16th century, shows an ever-expanding complex of musical institutions. By the late 16th century the choir of S Pietro (since 1513 constituted as the Cappella Giulia) rivalled the Cappella Sistina in size and ability, and major choirs, often led by well-known composers, were to be found in S Maria Maggiore, S Giovanni in Laterano, S Luigi dei Francesi and other churches. Palestrina himself began his career as a choirboy in S Maria Maggiore and ended it as *maestro di cappella* of S Pietro. The cultivation of sacred music in 16th-century Rome was further enriched by the many confraternities, such as Santa Trinità dei Pellegrini, which employed singers on a regular basis when their finances allowed it and often had recourse to papal singers for special celebrations in their personal churches and oratories and for processions (the papal singers developed particularly close relations with the Philippine Congregazione dell'Oratorio). Moreover, the major Jesuit seminaries, such as the Collegio Inglese and the Collegio Germanico, supported music; Victoria, never a member of the papal chapel, was employed by the Collegio Germanico in the 1570s. In 1584 the musicians in Rome formed their own confraternity, the Compagnia dei Musici di Roma, an organization considered such a threat by the papal singers that they forbade their members



6. Pope Paul III being presented with the 1545 constitution by members of the Cappella Sistina: miniature (I-Rvat Cappella Sistina MS 611, f.1v)

to join it. Almost all the major composers in late 16th-century Rome belonged to the confraternity, which is the ancestor of the Accademia di S Cecilia.

Sacred vocal polyphony performed within the liturgy was by no means the only music heard at the papal court. Instrumentalists were always present in the band of *pifferi* attached to the Castel S Angelo. The Medici Pope Leo X (1513–21) not only built up the papal choir to an unprecedented size (about 30 singers), but also appointed a composer (Elzéar Genet, known as Carpentras) to head it and supported a large number of private musicians including singers and instrumentalists. These musicians were heard in non-liturgical settings, at banquets and theatrical performances. On 27 September 1520, for instance, Leo and his guests were entertained by 50 singers and other musicians dressed as doctors (*medici*) on the occasion of the feast of the physician saints Cosmas and Damian. Succeeding popes, with the possible exception of Clement VII and Paul III, did not maintain such large private musical establishments, but Rome, as an international political centre, afforded the opportunity for a wide network of patronage of music and musicians created by cardinals and members of the Roman nobility. Even during the Great Schism, cardinals in Rome were a source of employment for singers. The end of the Schism saw a concentration in the city of cardinals, many of whom lived extremely lavishly. If we can believe the advice given by Paolo Cortesi in his *De cardinalatu libri tres* of 1510, music, both sacred and secular, became an indispensable part of the daily life of princes of the church by the 16th century. In 1544 Cardinal Alessandro Farnese had ten musicians in his service. In the late 16th century the patronage of certain cardinals, like Luigi and Ippolito II d'Este, Aldobrandini and Montalto, was extensive. In these princely households secular music and instrumental music was at least as important as sacred polyphony. The great madrigal composer Marenzio spent a good deal of his career in Rome, never in the employ of a church or of the pope, but always supported by cardinals or members of the nobility. There was also a large underclass of musicians scraping by in the city, including the accomplished cornett player Benvenuto Cellini, who was once drafted into an ensemble to play before Clement VII, and Bernardino Pedroso, a Spanish keyboard player who in 1559 was working as a freelance musician, giving private music lessons and playing at parties. He eventually attempted to elope with one of his female students and was caught, imprisoned and tortured. This last example is a reminder of the still largely hidden world of domestic music in non-noble Roman households (a recent study of household inventories dating from 1590 and drawn up by people of all ranks shows 66 listing some musical instruments or books of music among the various possessions) and the role that women played as consumers and performers. The market for music also supported music printers such as Andrea Antico and later Valerico Dorico, although Rome never rivalled Venice as a centre of music printing. In short, by the end of the 16th century Rome provided a wealth of opportunity for musicians of all types.

From the early 15th century to the middle of the 16th the music sung in Roman sacred venues was probably little different from that sung in similar venues all over Western Europe. Extant Roman sources of the period show a sacred repertory dominated by the great northern composers, some of whom had been members of the papal chapel. But during the years of the Counter-Reformation a more inward-looking and antiquarian approach to repertory seems to have been cultivated, particularly in the papal chapel, with much more emphasis on composers who were 'Roman'. The most 'Roman' of all composers was Palestrina, who never left the city or its close environs, who was appointed official composer to the papal chapel in 1565 (an appointment made without consulting the papal singers), and whose style defined Renaissance music for centuries. But there was still room for influences from other places: for instance, in the 1570s polychoral music (not a Roman invention) became hugely popular. In the realm of secular music, which operated out of the control of ecclesiastical institutions, the Rome–Florence axis created by the Medici popes in the 1520s was instrumental in the development of the Italian madrigal; indeed, Arcadelt, Festa and Verdelot, the three most important composers in the early history of the genre, all worked, or at least were present, at some time in Rome, and the first appearance of the term 'madrigal' is in a Roman print of 1530. It was also in Rome that a long tradition of humanistic scholarship contributed to some of the decisive steps that led to a radical change in musical style about 1600. Vicentino's *L'antica musica ridotta alla moderna prattica* was published in Rome in 1555, and the seminal letter about Greek music that Girolamo Mei sent to Vincenzo Galilei was written in Rome in 1572.

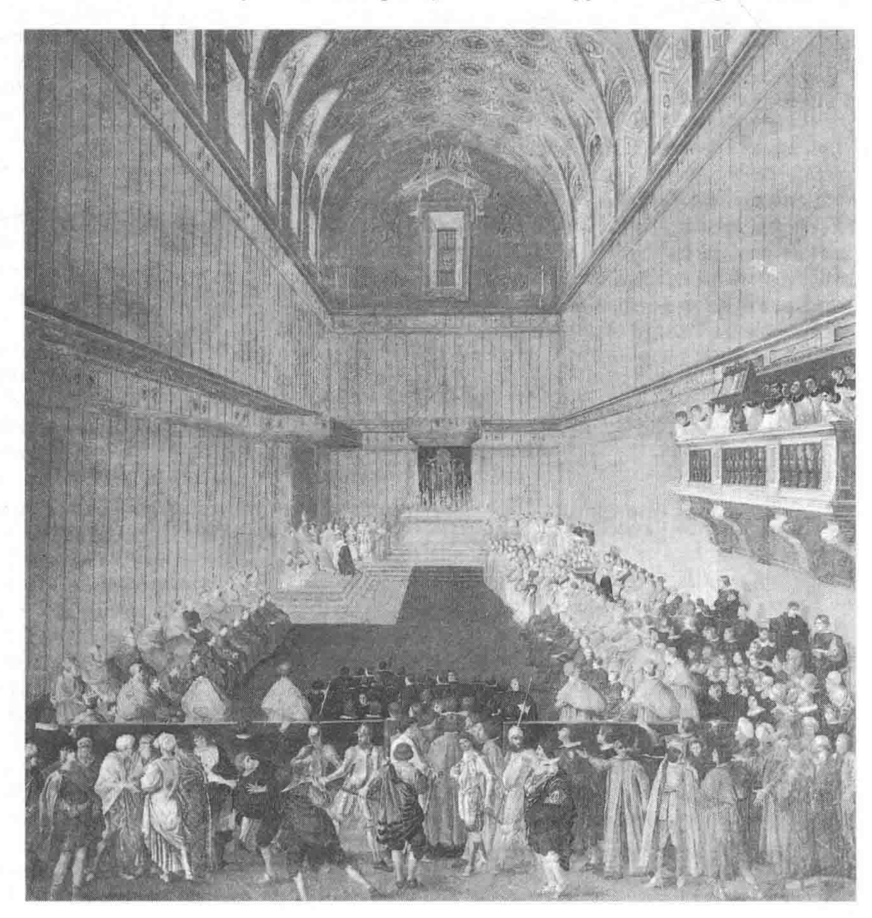
3. THE BAROQUE.



(i) Sacred music. Between the end of the 16th century and the beginning of the 18th, Rome produced more sacred music than any other European city. The new taste of the 16th century – monody with accompaniment and polychorality – developed rapidly, encouraged by a unique set of circumstances. The spiritual revival of the Catholic Church ater the Council of Trent made itself felt in Rome in the founding and development of new congregations, influenced by some outstanding personalities: Robert Bellarmine of the Jesuits, S Filippo Neri and his Oratorians, the nursing order of St Camillus de Lellis, the Scolopi or Order of Clerks Regular of Religious Schools founded by St Joseph Calasanz, and the Theatines. In addition, the Papal States were still profiting by the administrative and financial reforms introduced by Sixtus V (1585–90), and for a century the city developed steadily: the population grew (except during the great plague of 1656); churches, palaces and monasteries were built, restored or decorated; academies and devotional confraternities were founded; and the University of La Sapienza was reformed. In this context sacred music occupied an important place: the ecclesiastical reforms introduced since the Council of Trent encouraged the enhanced 'ornamentation' of liturgical ceremonies. Furthermore, the large staff of the papal court, the Curia, provided a fruitful source of patrons.

(a) The musical chapels. The pope, the great basilicas and a large number of churches maintained permanent musical ensembles. The papal chapel had been reformed by Sixtus V in 1586, and its status hardly changed until the end of the 18th century. It was placed under the protection of a cardinal who exercised sole control over it, and in theory it consisted of 24 choristers in minor orders, engaged for life and recruited by competition every time a place fell vacant. Its 'officers' – the *maestro di cappella*, the *camerlingue* and the timekeeper – were elected annually. During the first 30 years of the 17th century the papal chapel represented an élite of Italian sacred music. Between 1600 and 1610 its members included several composers: G.M. Nanino, Francisco Soto, Arcangelo Crivelli, Orazio Griffi, Ruggiero Giovannelli, Teofilo Gargari and Vincenzo De Grandis (i), as well as Felice Anerio, who was appointed composer to the *cappella papale*. The ensemble sang Mass and the Office daily in the chapel of the palace where the pope was residing (the Cappella Sistina in the Vatican or the Cappella Paulina in the Palazzo del Quirinale, the principal residence of 17th-century popes), and it accompanied the pope when he celebrated divine service in the city. It always sang *a cappella*; this refusal to adopt the use of basso continuo led to a petrification of the repertory, and the composition of new material for both Mass and Vespers ceased in about 1620, except for the 'Secret Vespers' sung four

times a year to the pope in his own apartments, when music written for the occasion by the *maestro di cappella* or other composers was sung to organ accompaniment. The papal chapel had lost its prestige well before the end of the century, as is evident from the fact that composers no longer competed for vacant places in it. Although Stefano Landi was admitted in November 1629 the appointment was by order of Pope Urban VIII, and Landi had to share his salary with Gregorio Allegri, who was appointed by competition a few days later. Only four other composers were admitted to the papal chapel during the 17th century: Mario Savioni by order of the pope in March 1642; Isidoro Cerruti in February 1658, also by order of the pope; Antimo Liberati in November 1661, after two previous rejections; and Matteo Simonelli in December 1662. The staff of the other *cappelle* belonged to the Congregazione dei Musici.

(b) The Congregazione dei Musici di Roma. Claiming that they could acknowledge only one authority, the singers of the papal chapel always refused to join the Congregazione dei Musici di Roma, which was placed under the protection of St Cecilia and was recognized by Sixtus V in 1586. The Congregazione was a kind of professional organization ruling the musical life of the Roman churches, and it united all the city's musicians. It was governed by a *maestro di cappella*, an organist, an instrumentalist and a singer. These 'officers' were elected by the general assembly every year. The organization also had a secretary, a *camerlingue* to manage its finances, and nurses to visit sick or imprisoned musicians. Unfortunately the archives of the Congregazione before 1650 have not been preserved, and there are still large gaps in the archives from 1650 to 1680. The Congregazione di S Cecilia regularly provided music for services in the church where it met, first S Paolo alla Colonna, then the church of S Cecilia, then S Maddalena, and finally S Carlo di Catinari, where it still has its chapel today. Musical responsibility for the weekly litanies and for the Mass for the Forty Hours' Devotion organized by the Congregazione was often entrusted to young musicians enabling the *maestri di cappelle* to assess their abilities. Members paid a joining fee and an annual subscription.

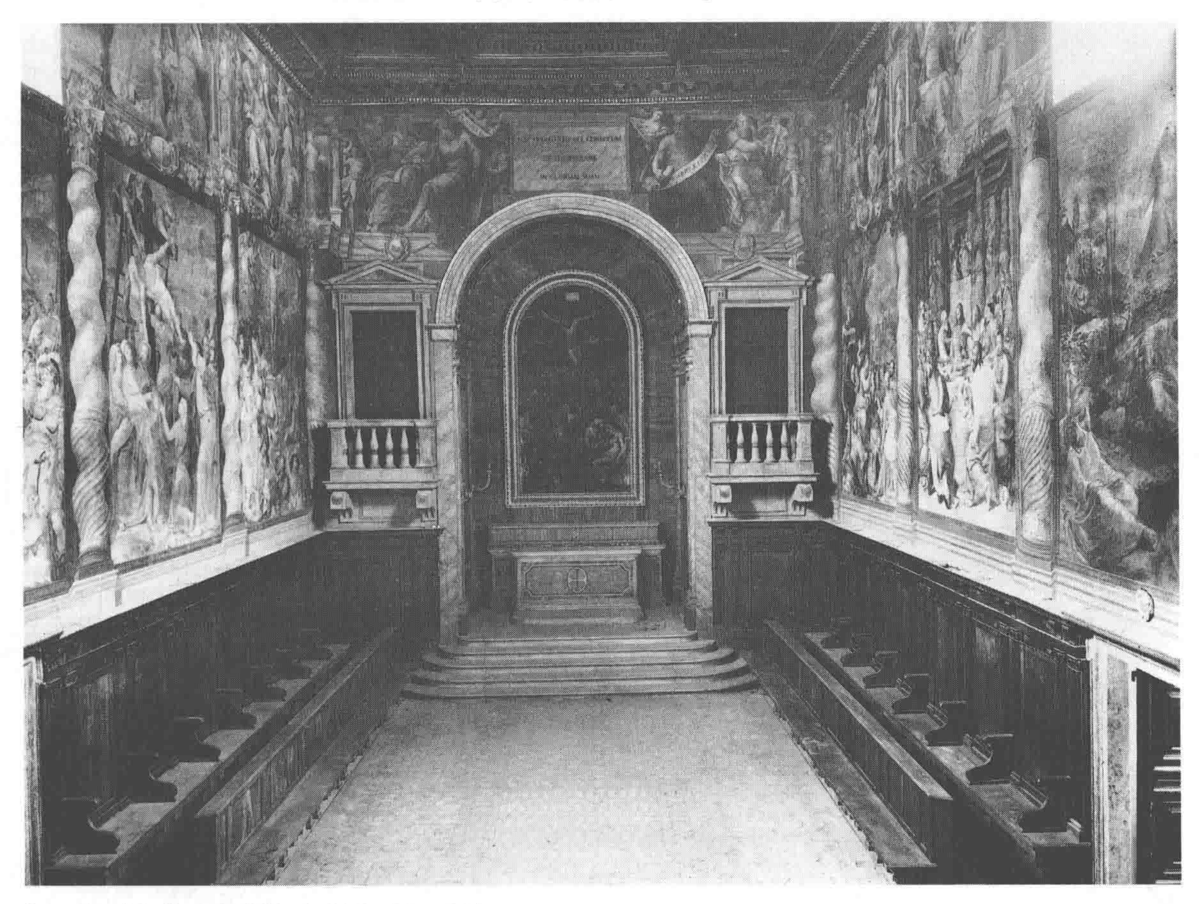
These musicians performed chiefly in the permanent *cappelle* of the Roman churches. A document of the Congregazione di S Cecilia of the year 1666 gives a list of churches where there was a regular musical service at least once a week. The list names 21 churches, to which had just been added the Concerto di Castello, an instrumental ensemble also known as the Trombetti di Campidoglio. With the exception of the Cappella Giulia, which provided music for the basilica of S Pietro and consisted of 18 choristers, a *maestro di cappella* and an organist, the usual number of singers in the *cappelle* ranged from ten to a mere two or three. Apart from their organists, 17th-century Roman churches employed no instrumentalists paid on a regular basis, except for S Luigi dei Francesi, where two instruments were played until 1624. Some churches, including S Giacomo degli Spagnoli, made do with a permanent organist whose responsibility it was to engage further musicians for the great church festivals. While organists often remained for many years in their posts, *maestri di cappelle* and singers tended to

8. Ceremonial investiture of Taddeo Barberini as Prefect of Rome during the papacy of Urban VIII, with the Cappella Sistina in attendance, 1631: painting by an unknown artist (Museo di Roma)

move from one *cappella* to another. Churches engaged extra musicians for certain important festivals. The festival of the patron saint of a church was the occasion for musical performances by several choruses with instrumental accompaniment for the three traditional services – first Vespers, solemn Mass and second Vespers.

Other institutions also employed musicians: for instance, the orphanage of S Maria in Aquiro had a *maestro di cappella*, a singing master and an organist. Certain convents with schools for young girls had music masters who also taught the novices; some nuns were excellent singers and attracted a large congregation to the convent church. The most important cardinals also employed several musicians, who often belonged to a regular church *cappella* as well. The great princely families also maintained a number of musicians.

On average there were at least 20 *maestri di cappelle* active during the 17th century to whom must be added several organists and instrumentalists who were also composers. They had to provide the new music required by the institutions for which they worked and for institutions with no *maestro di cappella* of their own, a situation which led to a certain amount of rivalry.



Musical training began at the age of eight or nine: after a boy had been examined by the *maestro di cappella* he was engaged by the chapter until his voice broke. The large *cappelle* (the Cappella Giulia, S Maria Maggiore, S Luigi dei Francesi etc.) maintained from five to eight children who were supervised by the *maestro di cappella*, assisted by a grammar master. The increasing employment of castrato sopranos in the first half of the 17th century led to changes in the system: the churches ceased to take responsibility for these small schools, which were now personally run by the *maestri di cappelle*. The contracts made between the child's parents and the master always stipulated that any money earned by the boy would remain in the hands of his master, who thus had an interest in ensuring that his pupils could read their parts as soon as possible. As a result, the old system of training in solmization was abandoned in favour of modern solfeggio, which enabled choirboys to learn to read music rapidly. The most gifted children also learned to play the organ and harpsichord.

(c) The confraternities. Associations of laymen for devotional and charitable purposes had existed since the Middle Ages, but the old confraternities now revived their activities at the same time as new associations were being founded, perhaps because of the example set by Filippo Neri and his oratory. The confraternities of S Lucia del Gonfalone, the SS Crocefisso di S Marcello, S Giovanni Decollato, the Orazione e Morte and the more recent confraternity of the Trinità dei Pellegrini were now joined by, among others, those of S Girolamo della Carità, the Oratorio di S Filippo Neri, the Angelo Custode and the Stimmate. In general these confraternities had no permanent *maestro di cappella*; even the SS Crocefisso, famous for the Latin oratorios it performed during Lent, made do with a musical adviser, traditionally chosen from the members of the papal chapel, whose only responsibility was to organize the music for the great annual procession on the evening of Maundy Thursday. Music played an increasing part in the meetings of these confraternities. At the end of the 16th century they still often sang Lauds on the traditional model, but during the Baroque period musicians were increasingly brought in to sing motets, cantatas and later, oratorios.

(d) The repertory. In the strictly liturgical field the *maestri di cappelle* had to provide music for the usual services, in addition to two Vespers services and a Mass for large forces (comprising several choirs and instruments) at least once a year. Plainchant, almost always with organ accompaniment, remained the basis of the repertory for Mass and Vespers, sung every Sunday in many churches, and if there was no regular musical ensemble the chaplains would be required to intone in the fauxbourdon style. Almost all *cappelle* practised strict counterpoint, *contrapunto a mente*, particularly for singing the antiphons at Vespers. In some churches the litanies of the Virgin were sung regularly every Saturday evening, as the list of Roman musicians made by G.P. Colonna in 1694 shows. His list mentions 19 regular *cappelle* and six others which provided only the service of 'la Salve', that is, the litanies. Colonna, who probably obtained his information from the secretary of the Congregazione dei Musici, also mentions the instrumentalists: 40 violinists, seven players of *violette*, 20 cellists and ten double bass players, together with eight players of lute or theorbo, five trumpeters and six trombone players. *Maestri di cappelle* also had to compose new liturgical works to keep the repertory constantly refreshed.

It is difficult to form a precise idea of the repertory sung in Roman churches. Music collections that have been preserved, such as those of the Cappella Giulia, S Giovanni in Laterano and S Maria in Trastevere, have suffered serious losses. Moreover, it seems that the *maestri di cappelle* kept only music that could easily be re-used, and as tastes changed they even threw away compositions that were out of fashion or too complex. This would explain why there are almost no musical sources extant containing psalms or settings of the *Magnificat* in the concertato style, although such settings were regularly sung on special occasions. They could not be simply performed again as they stood, and in any case it was thought better to present something entirely new every year. Nevertheless, these collections are valuable because they contain a number of works in separate manuscript parts and thus provide information on aspects of performing practice in the *cappelle*, particularly relating to the use of the double chorus, which seems to have been widespread as soon as there were at least eight singers in a *cappella*. They also contain compositions by musicians unable to publish their music in the increasingly difficult publishing climate of the 17th century.

(e) Masses. Roman music publishers apparently took little interest in new masses, although if the music collection of S Maria in Trastevere is any indication, such works were regularly written by *maestri di cappelle*. Of the 40 or so masses in separate manuscript parts contained in this collection, some 15 are for double choir in eight or nine parts, a type of work often described as a *messa concertata*. The majority of these are anonymous. Benevolo's masses for two, three or four choirs exist only in manuscript scores probably copied around 1700 or later. Nevertheless, a number of masses were published during the 17th century: those dedicated to the pope by Francesco Soriano in 1609, the first book of masses in four, five and six parts by Arcangelo Crivelli in 1615, the masses for two and three choirs by Vincenzo Ugolni in 1622, the mass for four choirs by A.M. Abbatini in 1627, the mass

9. Interior of the Oratorio di S Lucia del Gonfalone, 16th century

In benedictione nuptiarum by Landi in 1628, three masses by Stefano Filippini in 1656, the two volumes of masses by Francesco Foggia in 1663 and 1675, two posthumous volumes of masses by Bonifatio Gratiani in 1671 and 1674, and the masses of Domenico Dal Pane in 1687. However, this pales by comparison with the published volumes of psalms and settings of the *Magnificat* for Vespers, or in particular the many volumes of motets. This discrepancy is illustrated by the series of collections compiled by Florido de Silvestris and issued by various Roman music publishers between 1643 and 1672. There are 18 such collections, including two of secular music: only one, published by Collini in 1651, is devoted to four masses by four *maestri di cappelle*: Benevolo, Carlo Cecchelli, Silvestro Durante and Graziani. Another collection, published in 1662 by Ignazio de Lazzari, contains 15 psalms for three voices; all the others consist of motets for forces ranging from one to four voices. In 1619 G.F. Anerio published three Masses by Palestrina, one of them the *Missa Papae Marcelli* in an arrangement for four voices. These masses were reprinted six times, probably for educational purposes; similarly, Arcadelt's first book of four-part madrigals had four editions in Rome in the first half of the 17th century. For the most part, however, Mass was sung in plainchant, with alternating interludes for the organ, usually improvised by the organist.

(f) Office music. The importance allotted to Vespers from the beginning of the 17th century is evident from the number of psalms, antiphons and settings of the *Magnificat* published by Roman *maestri di cappelle*. Settings for double choir were particularly apt for this repertory. After 1625, however, the proportion of published psalms for double choir in relation to those written for smaller forces (from three to five parts) rapidly decreased. Roman *maestri di cappelle* published at least 60 volumes of this nature during the 17th century. Of all these published works only one volume, by Paolo Tarditi (Rome, 1620) contains psalms with instrumental accompaniment. There are far fewer psalms for Compline in both the published volumes and the manuscripts. The traditional psalmody of plainchant had not been abandoned by the early 17th century, but ornamented fauxbourdon had become the norm, as we know from the *Passagi sopra tutti li salmi* (Venice, 1607) by G.L. Conforti, a singer in the papal chapel, and the *Salmi passaggiati* (Rome, 1615) of Francesco Severi, also a member of the papal chapel. The large polychoral works from this period are mostly lost; however, two settings of the *Magnificat* for four choirs by Stefano Fabri and a *Dixit Dominus* for six choirs by Benevolo have survived.

Apart from the four Marian antiphons, the antiphons were much less frequently set to music than the psalms. However, there are three collections extant, by G.F. Anerio (1613), Giuseppe Giamberti (1650) and Graziani (published posthumously in 1666). Only one volume of antiphons contains music that may have been performed at Vespers services on special occasions: the antiphons for 12 basses and 12 tenors arranged in eight *chori* for the

10. Interior of the Oratorio di S Filippo Neri, Rome, designed by Francesco Borromini, 1637–50

festival of St Domenico by Abbatini and published in 1667. By far the majority of antiphons in the manuscript collections are written for small numbers of soloists, sometimes with instruments. As a rule, only three of the five antiphons contained in the breviary were set to music, the others being sung in *contrapunto a mente*.

The hymns, too, were seldom set to music, no doubt because Palestrina's settings were still in use. Palestrina wrote his hymns to a set pattern: the first strophe begins in plainchant and continues with a four-part setting for the second verse; the hymn then alternates between a strophe in plainchant and one set for several parts, the forces involved sometimes varying from strophe to strophe. The last is usually in five parts. This model was followed by composers of the papal chapel such as G.M. Nanino, Vincenzo De Grandis and Arcangelo Crivelli, whose hymns were sung at the papal Vespers. Graziani's hymns are much freer and include parts for soloists, while still respecting the strophic form of the poem. At the end of the century G.O. Pitoni introduced a new model: strophes sung by a soloist in concertato style alternating with polyphonic strophes in the *stile antico*.

Volumes of music for the offices of Holy Week are even rarer. Felice Anerio published one in 1606 and Francesco Soriano another in 1619. The volume of four-part responses by Graziani published in 1663 was reissued in 1691.

(g) The litanies of the Virgin. Devotion to the Virgin of Loreto was very strong in Rome; there was even a church dedicated to her. Saturday evening Compline was often replaced by a paraliturgical Office organized around the singing of litanies and the appropriate Marian antiphon: the service was known as 'la Salve', due to the fact that the *Salve regina* was the antiphon sung during the greater part of the church year, from the end of the Easter period to the beginning of Advent. The litanies of the Virgin were also sung at the oratory of S Filippo Neri. All this explains why Roman *maestri di cappelle* composed so many versions of these litanies throughout the 17th century. The texts lent themselves well to settings for double choir: Antonio Cifra and Lorenzo Ratti even published versions for three choirs. Other composers, including Francesco Foggia, wrote settings for between two and four voices in the concertato style. Graziani composed two volumes of antiphons, published posthumously in 1665 and 1675, for between three and eight voices.

(h) Motets. Of all genres, the motet was by far the most popular with music publishers. At the beginning of the 17th century motets for five or more voices were quickly supplanted by settings for one to four voices, the first of which appeared in 1609. The same year Robletti agreed to publish three books of *petits motets* by Antonio Cifra and a book of two-part motets by Girolamo Bartei, *maestro di cappella* at S Agostino. The form of these motets was very flexible: the texts could be either liturgical or biblical, and were often assembled from different sources. Some motets even set newly written texts. Motets were sung in Rome on various occasions. During Mass one motet could be sung at the offertory and another at

the elevation; during solemn Vespers, when each antiphon was sung before and after the psalm it accompanied, some of these repeated antiphons could be replaced by a motet; and motets could also be sung during processions, during the Forty Hours' Devotion, at meetings of confraternities and at the beginning of the service of 'la Salve'. All composers active in Rome during the 17th century produced motets. Two Roman musicians were particularly active in preparing collections by composers working in the city: Fabio Costantini, who published a series of motets between 1614 and 1639, and Florido de Silvestris, whose collections appeared between 1643 and 1672.

(i) Sacred music drama and oratorios. Sacred music drama, inaugurated in 1600 with Cavalieri's *Rappresentatione di Anima, e di Corpo*, achieved some popularity during the pontificate of Urban VIII because of the librettos of Giulio Rospiglioso; Landi's setting of his *Il Sant'Alessio* was first performed at the Palazzo Barberini in 1632. The last examples of the genre were *Sant'Agnese*, set to music by Mario Savioni in 1651 for the Pamphili family, Marco Marazzoli's *La vita humana*, published by Mascardi in 1658, and possibly *Santa Cecilia* by G.A. Carpani, which we know was performed at the seminary of S Pietro in 1660.

The musical repertory of the confraternities developed progressively throughout the 17th century. *Dialogo Pastorale al presepio di N[ost]ro Signore* (1600) was the first example of a genre which gradually evolved into the so-called 'cantata per oratorio'. The French viol player André Maugars describes a Lent meeting of the confraternity of the SS Crocefisso in 1638 when two such 'cantatas' were sung, the first on a text from the Old Testament and the second on a passage from the Gospels. The texts of these cantatas contained a prominent part for a narrator known as *historicus*, or *testo*, and sung by either a soloist or a small ensemble. Many works of this type are contained in the volumes published by Domenico Mazzocchi between 1638 and 1664. In the closing decades of the 17th century the oratorio texts evolved towards a more dramatic form, and the narrator disappeared. The two genres, the 'cantata per oratorio' and the more dramatic two-part oratorio, co-existed for a time, and Carissimi wrote works in both genres. Another important composer of cantatas was Mario Savioni, who published a volume of *concerti morali e spirituali* for two and three voices in 1660. In about 1700 composers began to write oratorios containing parts for allegorical figures such as Divine Love, Profane Love, Charity, and so on. It is difficult to estimate precisely the number of oratorios written in Rome between 1650 and 1720; but the surviving librettos indicate that at least ten new works were performed in the city every year, sometimes many more.

11. Final scene (showing the banks of the Tiber, S Pietro and the Castel Sant'Angelo) of Marco Marazzoli' opera 'La Vita humana', Palazzo Barberini, 1656, performed in honour of Queen Christina of Sweden: etching by Giovan Battista Galestruzzi after Giovanni Francesco Grimaldi

On the other hand, very few scores have been preserved. Oratorios were performed not only in the confraternities but also in the palaces of cardinals, in the colleges, and sometimes in monasteries, and virtually all the Roman *maestri di cappelle* of the time contributed to the genre. One reason for the marked increase in the production of oratorios after 1697 may be the closure of the Tordinona and Capranica theatres, where operas had been given at Carnival time; this increased demand also provided opportunities for visiting composers, including Handel, whose *La Resurrezione* was composed for Marquis Ruspoli in 1708.

(j) Music publishing. In the first half of the 16th century music publishing in Rome seemed to be flourishing; however, distribution outside the city was limited, while the technical quality of publications was distinctly below that of Venetian publishers, suggesting that the financial situation was never very stable. Moreover, printing costs seem to have been higher in Rome than anywhere else. There may simply have been too many music publishers in Rome; there were five, for instance, in 1620: L.A. Soldi, Bartolomeo Zanetti, Paolo Masotti, G.B. Robletti and Andrea Fei, to whom must be added Nicolò Borboni, who published music engraved by himself, and Lodovico Grignani, who pursued his trade at Ronciglione, near Viterbo, before settling in Rome about 1622. Except for Fei, who began publishing in 1619, none of these firms was still active in 1640. Music publishing seems to have been only a supplementary activity for Roman publishers, which may explain why composers did not always publish with the same house. The 18 collections of motets made by Silvestris from 1643 to 1672 were published by ten different firms. Only Vitale Mascardi published as many as four of them, two in 1652 and one in each of the next two years. Robletti published three (1648–50), as did Ignazio de Lazzari (1662–4). Other publishers issued only one each. After the plague of 1656–7 there were never more than two or three music publishers in business at the same time. At the end of the century G.G. Komarek published many oratorio librettos as well as volumes of music by Corelli. By this time, however, music publishing in Rome had greatly declined, and during the following century it became virtually non-existent.

(k) Instruments. Almost all Roman churches possessed at least one small organ. For the holy year of 1600 the chapter of S Giovanni in Laterano ordered a large organ from the organ builder Luca Biagi. Organ builders at the beginning of the century had a great deal of work to do in lowering the pitch of church organs, which from about 1620 were almost all tuned at the Roman *corista* pitch (*a'* = approximately 392). Giovanni Guglielmi was Biagi's only serious rival at the beginning of the century. Subsequently Pompeo Dedi, Ennio Bonifazio and the Testa family worked in Rome; most of them also repaired and tuned harpsichords. Many *maestri di cappelle* owned small organs which they would hire out for special musical occasions.

The churches engaged a few other instruments for the major festivals and the Forty Hours' Devotion. At the beginning of the century these were usually confined to a violin and a cornett, accompanied by one or two theorbos or archlutes. One or two trombones were also sometimes required. A violone was used to provide the basso continuo after about 1630. The harp was also employed as a continuo instrument. In the second half of the 17th century the instrumental ensemble employed for the great church festivals gradually grew into a small orchestra comprising two solo violins, a solo cello and a *ripieno* of violins, *violette*, cellos and double basses. Trumpets were used on special occasions between 1670 and 1680 and reappeared at the beginning of the 18th century, when oboes were first introduced. The instrumental ensemble required for the Forty Hours' Devotion was always much smaller, usually consisting merely of two violins and continuo.

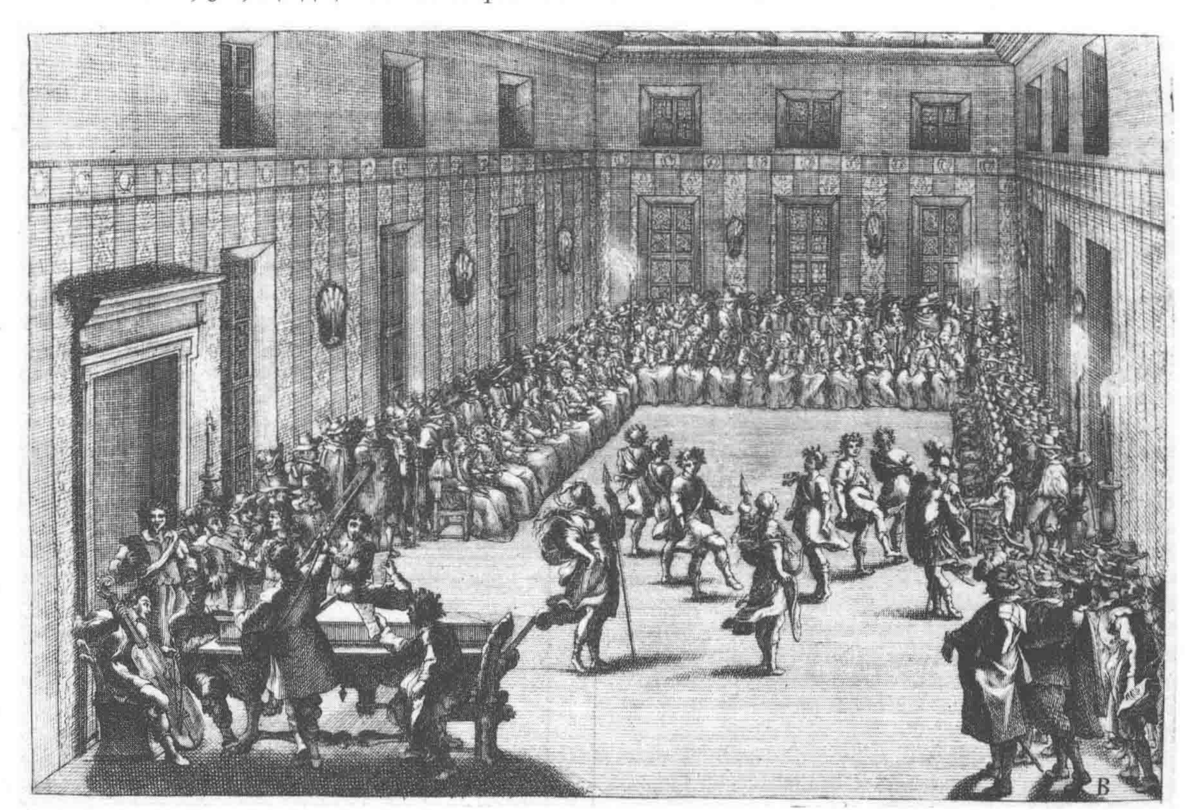
Many instrument makers worked in Rome, leaving their mark in the name of the Via dei Leutari. Lamb's-gut violin strings made in Rome were famous throughout Europe.

(l) Music collections. Roman libraries preserve large collections of liturgical and sacred music from several institutions. The Biblioteca Apostolica Vaticana holds the collections of the Cappella Sistina and of S Pietro (the Cappella Giulia), which also contains the collection of G.O. Pitoni. The collections of the Barberini, Chigi and Ottoboni families are also in the Biblioteca Apostolica Vaticana. A more recent stock, known as the Vaticani Musicali, has been built up from the collection of Raffaele Casimiri; it also contains some 17th-century manuscripts. The music collection of S Maria in Trastevere is housed in the Archivio del Vicariato di Roma, as is the collection of S Giovanni in Laterano. The archives of S Maria Maggiore also hold part of its music collection. The Biblioteca Casanatense houses the collection made by Giuseppe Baini at the beginning of the 19th century, and more recently has also acquired several manuscript and printed scores of sacred music. There are further large collections of Baroque sacred music in the library of the Accademia di S Cecilia, in the Corsiniana library (of the Accademia dei Lincei), the Vallicelliana library and the Biblioteca Nazionale Centrale Vittorio Emanuele II. The S Girolamo della Carità archive in the Archivio di Stato di Roma contains a collection of oratorios in manuscript. The music collection of the Collegio del Nazareno is in the Archivio Generale delle Scuole Pie di S Pantaleo, and the Spanish College of Rome also possesses a large collection of sacred music. Many facsimiles and modern editions of Baroque works are housed in the libraries of the Pontificio Istituto di Musica Sacra and the Istituto Storico Germanico. The collection made in Rome in the early 19th century by Fortunato and Prospero Santini is now in Münster, Germany, while L.K.J. Feininger's large manuscript collection of 17th-century Roman sacred music is in the Museo Provinciale d'Arte in Trent.

(ii) Secular vocal music.

(a) To 1670. All visitors to Rome were able to hear both old and new music in churches and oratories. Few were privileged, however, to enjoy the music performed in palaces and gardens for invited guests, concerts given by gentlemen's academies, intimate chamber concerts (almost the only venue for women performers after about 1626), presentations with music in the numerous Roman colleges, such as the Latin melodramas of Leone Santi, or the music performed at events such as annual prizegiving ceremonies. Public forms of secular music were occasional, and included music performed in open *carrozze* at carnival time, public tourneys and other types of open-air festivities.

Formal evenings of social dancing often included costumed, representational sketches with vocal music. Private presentations of spoken plays were frequent during the carnival season. The two genres coincided early in the century in the musical drama. Members of the Peretti-Montalto family, for example, and other noble youths offered a costumed play on the tale of Psyche in February 1611 which included music-making in stage clouds and ballettas; the titled guests danced and took refreshment after the play. In 1614, however, Cardinal Montalto's presentation of *Amor pudico*, a libretto by Jacopo Cicognini in five acts with music by various composers, was sung throughout and performed by professionals. Full-scale opera became the most elaborate form of such private spectacle from 1620, when Filippo Vitali's *Aretusa* was performed, followed by the various *melodrammi* to librettos by Ottavio Tronsarelli given in the 1620s by Cardinal Maurizio of Savoy, and the nine Barberini operas given annually between 1631 and 1639 and 1641 and 1643. It was adopted by the French ambassadors in Rome from 1638 to 1642, who staged Italian librettos by Ottaviano Castelli (with scores by Angelo Cecchini, Filiberto Laurenzi and himself). Notable also is Taddeo Barberini's 1638 carnival presentation of *L'acquisto di Durindana,* a narrative ballet based on Ariosto with the music partially or wholly by Marco Marazzoli.



Principal presenters of operas in the period 1650–70 were the Barberini family, Pompeo and Lorenzo Colonna (who presented an *Orontea*, presumed to be by Cesti in 1661), Filippo Acciaiuoli, who staged Jacopo Melani's *Il Girello* in 1668 and Alessandro Melani's *L'empio punito* the following year and who would continue as an impresario into the next decade, Queen Christina of Sweden and the Rospigliosi family; the queen and Clement IX (a Rospigliosi) were instrumental in establishing the first public theatre for opera in Rome, the Tordinona, which opened in 1671.

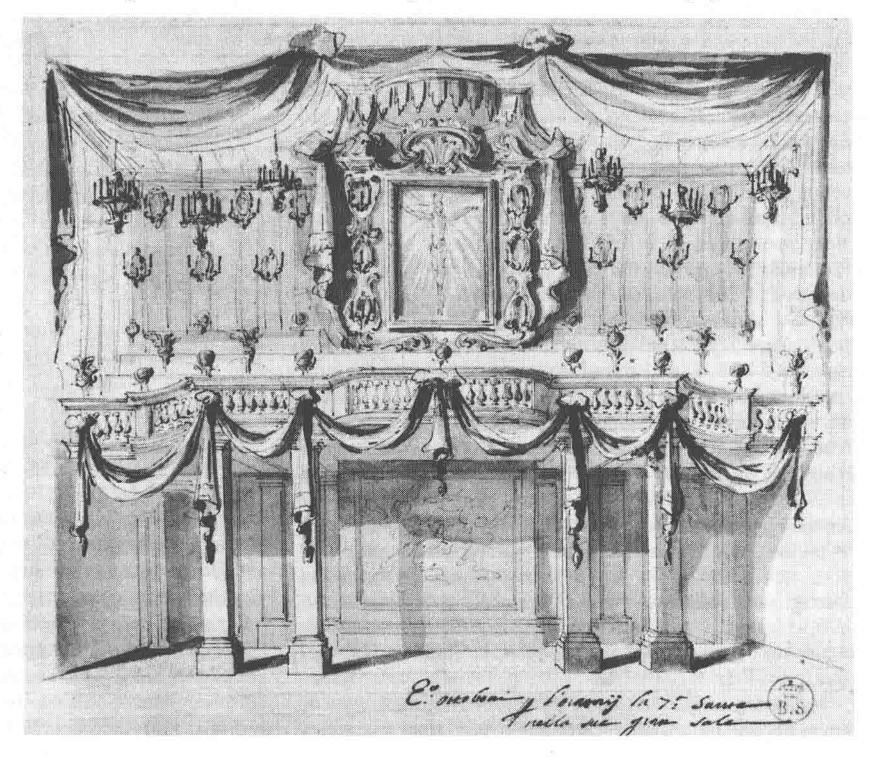
The Roman operas were set to music by composers whose chamber works for voice were more frequently heard. Giovanni Kapsberger, who composed the score for the 1622 anniversary spectacle at the Collegio Romano, the choral cantata on *The Victory of Prince Ladislaus in Wallachia* for the academy of Maurizio of Savoy in 1625, and the opera *Fetonte* (1630), issued seven books of villanellas for one, two and three voices between 1610 and 1640. His first book of solo *arie passeggiate* (1612) exemplifies the ornamented recitational style of early Roman chamber monody. Madrigals, arias, *musiche*, *scherzi* and sonnet settings for between one and five voices appear in a diversity of publications in the first quarter century by Antonio Cifra, Lorenzo Ratti, G.F. Anerio, Giuseppe Olivieri, G.D. Puliaschi, Nicolò Borboni, Stefano Landi, Filippo Vitali, Raffaello Rontani, Paolo Quagliati, Alessandro Capece and others. Compositions for solo voice appear along with graceful, lively strophic settings for two and three voices, which never disappeared from the Roman chamber repertory. Settings in strophic variations as well as extended forms in sections of contrasting metres or melodic styles responded to nuances in poetic diction.

While similar collections continued to be issued in print, the music of the virtuoso singers – from the households of the Peretti-Montalto, Maurizio of Savoy, the Barberini and later the Chigi establishments – exists in scattered manuscript volumes which remain for the most part unedited. The lyric and plangent new style of composers like Orazio Michi and Luigi Rossi was promulgated by a new generation of castratos and stupendous basses who sang for Roman patrons and their visiting guests. Poems for music were designed to be set

12. Carousel in the courtyard of the Palazzo Barberini, 28 February 1656: 'Nocturnal Festivity for Queen Christina of Sweden' by Filippo Lauri and Filippo Gagliardi, 1656 (Museo di Roma)

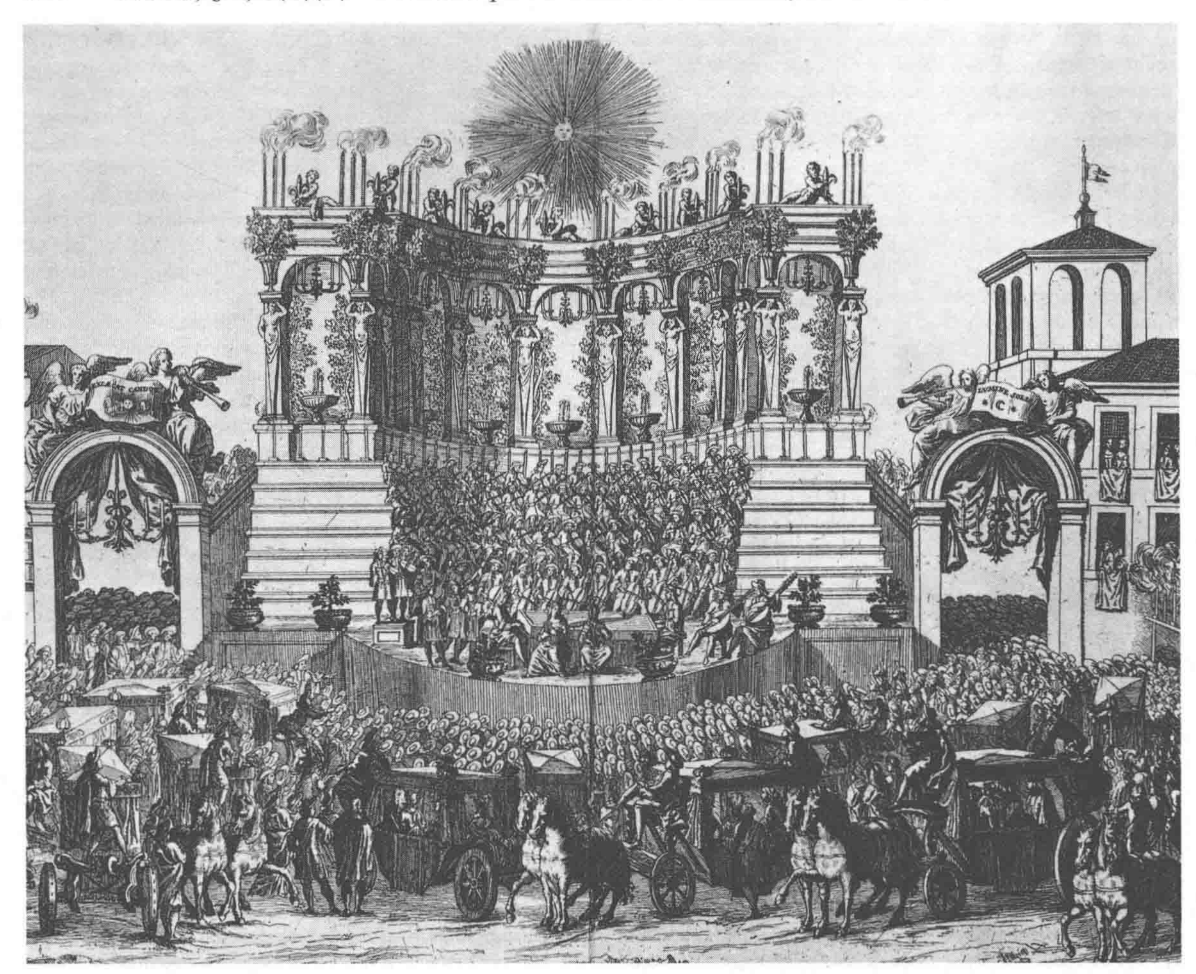
13. Ballet of nymphs and shepherds at the Palazzo Falconieri during Carnival 1634: engraving after Andrea Sacchi from Vitale Mascardi's 'Festa fatta in Roma' (1635)

in several ways, all of which may be classified as cantatas, but which received various designations in contemporary sources – *canzone*, *canzonette*, *concerti*, *ariette*, *recitativi*, *estrivigli* (a rondo refrain form) – or none at all. In them, aria-like sections may contrast by the use of different metres; recitative sections range from more narrative to highly expressive styles. Their variety and unpredictability allowed each setting to be a spontaneous expression of its individual poem, no matter how conventional the sentiments. The flexible, melodious mid-century styles of Luigi Rossi, Giacomo Carissimi, Marc'Antonio Pasqualini, Marco Marazzoli, Mario Savioni, G.F. Tenaglia and Carlo Caproli were expanded and continued by the next generation of composers, represented by Alessandro Stradella, Antonio Cesti (who set local poets while in Rome from 1658 to 1662), P.S. Agostini, Ercole Bernabei, G.C. Rossi, the Melani brothers, Carlo Rainaldi, Antimo Liberati, Fabrizio Fontana, Lelio Colista and others. What remains unknown is the chamber music sung by the many celebrated women singers whose gifts but not repertories were extolled: Leonora and Catarina Baroni and their mother Adreana Basile, Lucrezia Motti, Anna Valeria, Maddalena Lolli, Anna Renzi, Angela Voglia and others.



Several academies had strong musical interests of a historical or experimental nature. Cardinal Francesco Barberini maintained a viol consort that performed madrigals by Gesualdo, Nenna and Marenzio, and in 1640 sponsored a reconstruction of Seneca's *Troades* for which Virgilio Mazzocchi wrote the choruses. Pietro Della Valle and G.B. Doni collaborated to construct musical instruments that performed new compositions requiring chromatic and enharmonic pitches based on ancient scales and tuning systems. Domenico Mazzocchi's Virgilian dialogues and chromatic and enharmonic madrigals of 1638 belong in this context. Castelli, however, experimented with equal-tempered tuning in compositions for the Academici Trascurati. Unaccompanied madrigals old and new were performed at the music academies of Antonio Maria Abbatini in the 1660s. The music performed for the academies of Queen Christina is also unknown; but these academies provided a select public for the many fine singers who passed through her household (Cametti, 1911).

(b) 1670–1730. During the years 1670–1730 Rome's music differed from that of many other Italian cities in that cantatas, serenatas and oratorios outnumbered operas. Rome's first public opera house, the Teatro Tordinona (also known as the Tor di Nona), was open for only four seasons, 1671–4, before the pope ordered its closure. If Roman nobles wished to sponsor operas, they did so in their own palaces (as did Prince Lorenzo Onofrio Colonna, *d* 1689) or outside the city (as in Arricia, where the Accademici Sfaccendati produced works in 1672–3). They could instead subsidize spoken tragedies or comedies, which were often performed with musical prologues and *intermezzi* at Roman colleges (the Clementino, Nazareno and Romano). They celebrated birthdays, visits of foreign dignitaries and notable political events with lavish serenatas, which were produced outside their palaces in warm weather, and thus were free events open to the public. They employed and often housed composers who wrote cantatas or sonatas for chamber performances given within their palaces. A few patrons



opened their doors to the public one day each week for such performances, which were called 'conversations' or 'academies'. During this period the most noted patrons were queens Christina of Sweden (*d* 1689) and Maria Casimira of Poland (*d* 1715), cardinals Benedetto Pamphili (*d* 1730) and Pietro Ottoboni (*d* 1740), and Prince Francesco Maria Ruspoli (*d* 1731). Pamphili and Ottoboni, who wrote texts for many of the works heard at their own academies, began to sponsor performances in 1677 and 1689, respectively. When Maria Casimira and Ruspoli started their patronage in the early 1700s, public academies were available four days of each week. In addition to these secular genres, religious vocal genres flourished in Rome. During the years around 1700, about ten oratorios were splendidly produced during each Lenten season, and saints' and other feast days were celebrated with vocal works in many Roman churches.

In Rome, the first late Baroque phase extends from 1671 to 1697, when native Roman composers, such as Cesarini and Lanciani (who respectively served Pamphili and Ottoboni), were joined by young 'foreigners', who came to profit from the vibrant musical life of the papal city: Pasquini had arrived by 1650, Alessandro Scarlatti by 1672, Corelli by 1675, Lulier by 1679, Severo De Luca by 1688, Gasparini by 1689, Giovanni Bononcini by 1692, Mancia by 1695 and Mancini by 1696. Bernardo Pasquini (*d* 1710) was the most sought-after composer and continuo harpsichordist from 1670 to 1700, but Scarlatti (*d* 1725), in spite of his frequent employment outside Rome, was favoured by erudite Roman patrons from 1679 until his death. It is notable that these two composers and Corelli were, in 1706, the only musicians to be accepted into the Arcadian Academy, and that they typically wrote scores containing a wealth of intricate detail. Such detail is often replaced by a dance-like tunefulness in works by their contemporaries, who gained favour about 1690, when opera was once again allowed at the Tordinona by Pope Alexander VIII. Two other theatres, the Capranica and Pace, began to produce operas in 1692 and 1694 respectively. Roman vocal works composed and performed in 1694 include an unknown (but presumably large) number of cantatas, 14 serenatas, ten operas, nine oratorios and four spoken plays with musical scenes. During the 1690s the influential Arcadian Academy (founded in 1690) recommended 'reformed' opera plots, concerning pastoral Arcadians or heroic rulers of bygone days, undisturbed by the excruciating incidents and raucous comedy frequently found in the swashbucklers *di spada e cappa* ('of sword and cloak') that were favoured during the two previous decades. Ottoboni, who had been named a cardinal in 1689 by his great-uncle Alexander VIII, soon became the chief patron of opera in Rome, and he tried to emulate Arcadian ideals in his first librettos: *Statira* (set by Scarlatti in 1690) is heroic; *Il martirio di S Eustachio* (set by Lanciani, also in 1690) is a staged, three-act oratorical drama; and *L'amore eroico fra pastori* (composed by Cesarini, Lulier and Bononcini in 1696) is pastoral. Ottoboni also commissioned for production in Rome *La clemenza di Salomone* (G. Frigimelica Roberti and C.F. Pollarolo, 1695), a 'reformed' work written in his native Venice.

Although Arcadian reforms were a significant force, they were not dominant on the Roman stage during the 1690s. For example, even though Stampiglia was among the founding members of Arcadia, he showed little interest in its ideals; both his rewrite of the 40-year-old libretto for *Xerse* (1694) and his *Rinovata Camilla regina de Volsci* (1698) delighted audiences with rowdy comedy and bawdy servants. Audiences were also delighted by novel foot-tapping tunes in da capo form (which largely supplanted strophic and ostinato forms) and by incredible scenic transformations, such as those in an *intermedio* depicting hell, which Acciaiuoli devised for the Capranica in 1695. Opera had indeed become so popular in Rome

14. Design by Filippo Juvarra for an oratorio staged in the Sala Riaria of Cardinal Pietro Ottoboni's Palazzo della Cancelleria, c1700 (I-Tn RIS.59.4, f.81(1))

15. Performance of Pasquini's 'Applauso musicale' on a specially erected 'theatre' in the Piazza di Spagna, Rome, to celebrate the nameday of Marie-Louise, Queen of Spain, August 1687: engraving by Christoph Schor; the instrumentalists are probably under the direction of Corelli

that the Capranica and Tordinona were, respectively, enlarged and refurbished for the carnivals of 1695 and 1696. The austere Pope Innocent XII ordered the destruction of the Tordinona in August 1697, after which all roads led composers away from Rome: the pope tried to prohibit all carnival entertainments in 1698–9, the Holy Year prohibited them in 1700, the War of the Spanish Succession 'opposed' them in 1701–9, Pope Clement XI declared a Holy Year to forestall them in 1702, wretched weather and earthquakes prevented them in 1703, a penitential resolution passed by the cardinals banned them in 1704–8, and papal preparations for battle with the Austrian army prevented them in 1709. With the exception of a few works produced in the palace of Queen Maria Casimira, there was virtually no staged drama in Rome between 1698 and 1710. Composers who remained in Rome wrote a few serenatas, many cantatas for academies and many oratorios. In 1707 only two serenatas, but perhaps as many as 18 oratorios, were produced. One of the latter, *Il trionfo del Tempo e del Disinganno*, was written by Pamphili and Handel. In 1708 Handel was employed by Ruspoli, for whom he wrote his *Oratorio per la Resurrezione* (text by Capece) and more than 50 cantatas.

Beginning in 1710, a more hospitable environment for opera meant that all roads once again led Italian musicians to Rome. Composers who began to write musical drama in the 1680s remained the most highly favoured, and Alessandro Scarlatti, Gasparini, Bononcini, C.F. Pollarolo and Caldara composed at least 34 of the 63 operas produced in Rome between 1710 and 1722. Their style would have seemed outmoded in other centres, as Mattheson noted in *Das neu-eröffnete Orchestre* (1713): the Venetian style was based on a lighthearted melody, the Roman on a fully developed harmonic structure; the former was more *galant*, the latter more *reelles* (substantial). Pier Jacopo Martello, in *Della tragedia antica e moderna* (Rome, 1715), recognized the distinguished character of Roman librettos when he named nine authors of admirable works: Moniglia of Florence, De Lemene of Lodi, Zeno of Venice, Manfredi of Bologna and five Romans: Capece, Ottoboni, Stampiglia, Bernini and De Totis. These five 'Romans' (who include the Venetian-born Ottoboni) all collaborated with Scarlatti. Since even his late operas continued to exude the counterpoint and pathos that were more suited to chamber works, his Roman operas staged at the Capranica in 1718–22 represent the culmination of the *reelles* tradition: *Telemaco* (1718), *Marco Attilio Regolo* (1719), *Tito Sempronio Gracco* (1720), *Turno Aricino* (1720), *La Griselda* (1721) and *Arminio* (1722).

The *galant* style overwhelmed Rome after 1720, when the featured operas were by a new generation of composers: Porpora, then Vinci at the Alibert (1721–9), and Vivaldi, then Leo at the Capranica (1723–7). The Alibert, built in 1716–17 by Antonio Alibert, changed its name to the Teatro delle Dame after its grandiose enlargement for carnival 1726, which featured Vinci's *Didone abbandonata*, the first Roman production of an opera libretto by the great Roman named Metastasio. The other genres continued to be well represented: e.g. 14 serenatas (often called cantatas), eight oratorios and eight operas were produced in 1721. Many of these works feature *galant* style, in which an unobtrusive orchestra supports (and often doubles) a virtuosic vocal line. This had replaced the texture which had predominated at Rome in 1670–1722 and had featured polarized vocal and continuo lines, with motivic interplay frequently added by treble instruments.

(iii) Instrumental music. With its abundant sources of patronage, both sacred and secular, Rome became a Mecca for instrumentalists, but many of these, such as the 'nobile Alemanno' Kapsberger, Frescobaldi and Corelli, were not Romans by birth but by adoption, while others such as the Neapolitan Alessandro Scarlatti passed through the city intermittently. Roman instrumental music was neither consistently more conservative nor less secular than elsewhere but reflected the particular dictates of individual pontiffs. Despite Clement VIII's reiteration in his *Caeremoniale episcoporum* (1600) of the Council of Trent's ban on instruments other than the organ, instrumental music flourished in Roman churches. Before 1600 the Collegio Germanico was already famous for its *sinfonie* and André Maugars rapturously described the instrumental music in S Marcello in 1639. However, these were not permanent salaried ensembles as in Venice and Bologna, but were hired for specific events, considerable control lying in the hands of the Congregazione di S Cecilia in the choice of musicians. Its statutes of 12 May 1684 drew attention to the equality of status between singers and instrumentalists.

Such sporadic employment could not provide a steady source of income for instrumentalists, and the periodic closure of the public theatres also affected their lot. They therefore sought more secure accommodation in the princely households of the Barberini, Pietro Aldobrandini for whom Frescobaldi was *direttore di camera*, and successive patrons of Corelli – Queen Christina of Sweden, Benedetto Pamphili and Pietro Ottoboni. Under this system of patronage the best instrumentalists, like the lutenist Lelio Colista, became fabulously wealthy. The occasional nature of many performances, plus the fact that a noble household would employ its own copyist, meant that instrumental composers in Rome, even of the stature of Stradella and Lonati, normally felt no compulsion to publish their music, which circulated in manuscript. Much of this material has subsequently been lost, while that which remains often involves almost insuperable problems of ascription. It is therefore difficult to trace continuous lines of development in any of the main instrumental genres before Corelli. In keyboard music only Frescobaldi and Pasquini are well represented, despite the plethora of organists in the city, notably Amadori, Fontana, Piccini, Simonelli and Spoglia. Similarly, just one volume of extremely unadventurous solo violin sonatas survives in print before 1700 – G.A. Leoni's *Sonate di violino* (1652), while other virtuosos such as Mannelli, Corelli, Lonati, Lulier and Valentini must have written copiously for their own instruments. In this regard, the lack of a competitive music printing industry comparable to that of northern Europe was a significant factor, for its antiquated technology hindered the publication of much complex music. The violinist Giuseppe Valentini complained in the preface of his *Idee* (1706–7) that he could not publish the *Sonate a due e tre corde* on account of the great expense it would entail. In manuscript sources trios are relatively well represented, most often entitled 'sinfonia' ('simfonia', etc.), and by the late 17th century these are among the most substantial and ambitious ensemble compositions of the period. One notable feature of this repertory is the inclusion of binary dance movements along with 'canzonas' (fugues) in free sinfonias, perhaps indicating a lack of a definitive functional differentiation.

In the early 17th century Agostino Agazzari's *Del sonare sopra 'l basso* (1607) and Vincenzo Giustiniani's *Discorso sopra la musica* (after 1628) attest to the wide variety of instruments in general use in the city, and the civic bands of the Concerto dei Musici di Campidoglio and the Musici de Castello provided the usual contingent of cornetts and trombones. Plucked instruments were particularly favoured (lutes, guitars, harps, etc.) so that as late as Mannelli's *Sonate a tre* (1682, 1692) the specified melodic bass is *liuto* rather than a bowed instrument. In 1639 the ensemble mentioned by Maugars consisted only of two or three violins, archlutes, harpsichord and organ, but at the turn of the 18th century trumpets, transverse flutes, oboes and bassoons were not unusual, while in 1739–40 Brosses cited horns, trumpets, flutes, harp, viola d'amore, archlutes and mandolin. By 1700 orchestras could total 150 players, and at least from the 1670s – well before Muffat's encounter with Corelli in 1682 – they were commonly divided into concertino and concerto grosso. While the constitution of these orchestras varied considerably, the number of violins normally equalled the total of all other strings employed. Roman instrumentalists achieved a zenith of international renown under Corelli, but the exodus of a number of his best-known successors – Castrucci, Vincenti, Cosimi and Haym – seeking lucrative employment elsewhere led to its decline.

4. Since 1730.

(i) 1730–1800. In the 1730s three new theatres joined the Capranica, the Alibert and the Pace, which had been in regular use in the first decades of the 18th century; these were the Teatro Argentina, the Teatro Valle and the rebuilt Tordinona. Musical productions were also staged in the Pallacorda and, more sporadically, in the Granari, Saponari, Ornani and Pioli theatres and also in the Collegio Clementino and the Collegio Germanico.

Between 1730 and the end of the century there were almost always two theatres where *opera seria* was performed, only during the carnival season as a rule; two operas, interspersed with ballets, would be presented at each of them. At the Teatro Alibert there were spring seasons only in 1731, 1732, 1738 and 1780, and between 1734 and 1737 only the Tordinona put on *opera seria*. For the rest the Capranica, Argentina and Alibert alternated in such productions until the middle of the century. An edict of 1740 ordered that the three theatres should take turns, decided by lot, and that the one

remaining closed should receive compensation. In 1755 the pontifical authorities decided that only the Argentina and Alibert could stage serious works while the Capranica was being rebuilt. The Argentina was more regularly used for *opera seria*, whereas in 1760, 1765, 1772–9 and 1781 the Alibert presented *drammi giocosi* with ballets.

The Argentina, built in 1731 to a design by Gerolamo Theodoli, belonged to the Sforza-Cesarini family. In 1741 it was renovated and improved by D.M. Vellani. The theatre was managed at first by the impresario Polvini Faliconti, then on his death in 1741 by Count Francesco Maria Alborghetti and in 1746–7 by the librettist Gaetano Roccaforte. It seems, however, that in the second half of the century there was a corporate management in which several Roman nobles participated, including Marquis Angelo Gabrielli, who in 1761 headed the Società e Compagnia di Cavalieri; composed of about 30 Roman nobles, this functioned until 1771. Thereafter the theatre was managed by professional impresarios who were also active elsewhere, such as Giuseppe Compostoff (1773–82), the choreographer Onorato Viganò (1783–8) and Andrea Campigli and his heirs (1789–95). It is possible that Roman nobles and citizens were also involved during these years.

The Alibert had been acquired in 1725 by a group of people (including the marquises Maccarani and Antonio Vaini, prior of the order of Malta) who managed the theatre for most of the century, along with people from outside the ownership. The Capranica, which passed between various members of the Capranica family during the course of the century, was also often under the management of its owners.

In the second half of the 18th century the Valle, Capranica, Pace, Pallacorda and Tordinona theatres all staged prose dramas interspersed with intermezzos and comic operas. The Valle belonged to the Capranica family; a season of *opera seria* was put on there in 1730, but from the late 1730s its activities were confined to spoken dramas and intermezzos. Built in 1726 to a design by Tommaso Morelli, and smaller than the Argentina and the Alibert, it was restored by Mauro Fontana in 1765 and again in 1791. It was the only theatre in Rome which in 1782, and regularly from 1786, offered operatic performances in the spring and autumn seasons as well as at Carnival. The Capranica (latterly a cinema), with its complicated history of ownership, underwent a number of restorations in the 18th century. The theatre known as the Pallacorda di Firenze, which no longer exists, was designed by Nicolò Michetti and built in 1714 opposite the Palazzo Firenze in the present Via Pallacorda; it was restored in 1786 by Vincenzo Mazzoneschi. The Teatro Pace, also no longer in existence, was built at the end of the 17th century in the present Via del Teatro Pace and altered several times. The Teatro Tordinona, on the bank of the Tiber opposite Castel S Angelo, was rebuilt in 1732 at the instigation of Pope Clement XII to provide Rome with a government-run theatre. After being destroyed by fire in 1781, the theatre was reconstructed to the plan of Felice Giorgi, but not completed until 1795. The new building was named the Teatro Apollo and was at first used for comic opera.

The *opera seria* repertory in 18th-century Rome centred on texts by Metastasio, some of which (*Catone in Utica*, *Semiramide riconosciuta*, *Alessandro nell'Indie*, *Artaserse*) were actually heard for the first time there. Metastasio's librettos were frequently set to new music, with the usual modifications, and librettos by Zeno, Roccaforte, Pizzi, Cigna-Santi, Sertor and others were also used. In the last quarter of the century it became more usual to stage operas that had been composed for performance elsewhere. The musicians engaged were mostly trained in Naples; among them were well known composers such as Vinci, Porpora, Leo, Hasse, Pergolesi, Piccinni, Sacchini, Anfossi, Guglielmi and Sarti. Some of them stayed in Rome for some time (Jommelli was there from 1749 to 1753), and so became involved in the general musical life of the city, both secular and religious. Roman composers, many of them *maestri* in the city churches, wrote mostly comic operas, *farsette*, intermezzos and the like; they included Rinaldo di Capua, G.B. Casali, P.M. Crispi, Giovanni Cavi, Giovanni Masi, Agostino Accorimboni, Girolamo Mango and Marcello Bernardini. There were also performances, especially at the Teatro Valle, of comic operas by Galuppi, Piccinni, Anfossi, Sacchini, Paisiello, Guglielmi and Cimarosa. Throughout the 18th century female singers were prohibited from appearing in public theatres in Rome, and all their roles were taken by men.

There were regular winter seasons of oratorio in Rome throughout the 18th century at the oratories of the Chiesa Nuova and S Girolamo della Carità. Each put on about 30 performances each season, including several newly composed works, although the number of new oratorios declined somewhat during the course of the century. The composers included Roman musicians, sometimes already working in the service of those institutions, such as Casali (*maestro* at the Chiesa Nuova), Crispi (*maestro* at S Girolamo), Antonio Aurisicchio and Mango. Cantatas and oratorios were also performed annually in other institutions: at the Collegio del Nazareno (from 1704 to 1784, for the solemn feast of the Nativity of Our Lady), at the Collegio Clementino (for the Assumption of the Virgin), at the Collegio Germanico-Ungarico, at the Collegio Capranica (for the feast of the Resurrection), and at the Congregazione della SS Natività di Maria Vergine at S Lorenzo in Lucina (on Good Friday).

Music had an important role in the festivities organized by ambassadors (especially Spanish and French) to celebrate important events such as births and marriages. There was usually a cantata on an allegorical theme, and the festivity was celebrated with orchestras playing in the open air. Those who frequently promoted musical entertainments were the Spanish ambassador Cardinal Troiano Acquaviva d'Aragona, who was in Rome between 1735 and 1747 and employed the services of the composers G.B. Costanzi and David Perez, and the French ambassador Cardinal Pierre de Bernis, who was in Rome from 1769 onwards. There were also special musical events to mark state visits to Rome.

Musical entertainments in the form of vocal and/or instrumental *accademie* often took place at the homes of noble or bourgeois families: for example, Prince Giorgio Andrea Doria Pamphili (who had three instrumentalists in his service) held regular *accademie* during the period 1764–78; Charles Burney, who visited Rome in 1770, noted musical entertainments at the homes of the Duke of Dorset, the Russian General Schuvaloff, the Forbes family, the musicians Wiseman and Crispi and the painter Pompeo Batoni; and in 1786 there were musical entertainments at the houses of Lady Flaviani, Charles Edward

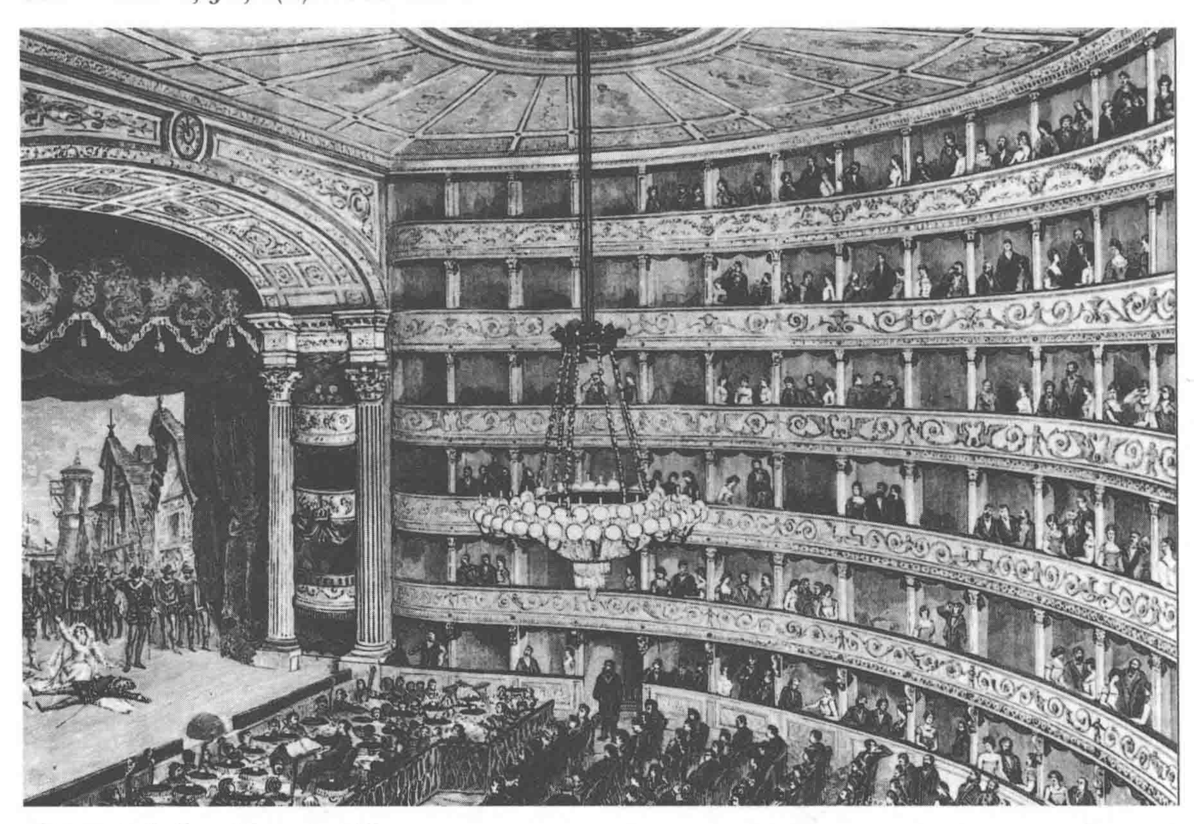
Stuart and the director of the Accademia di Francia Lagrenée (Ferrari, *Aneddoti piacevoli e interessanti*).

Although the number of musically active churches declined in the 18th century, several still maintained musical establishments. In the middle of the century these included S Giovanni in Laterano, S Pietro, S Maria Maggiore, S Lorenzo in Damaso, S Maria in Trastevere, Il Gesù, S Giacomo degli Spagnoli, the Chiesa Nuova, S Agnese in Agone, Madonna dei Monti, S Apollinare, S Giacomo in Augusta and the Castel S Angelo. Religious services with music also took place in other churches in Rome on special occasions. The Cappella Sistina, which kept alive the Palestrina tradition, maintained its special status during the 18th century: the Holy Week services in the chapel attracted visitors from all over Europe.

(ii) 1800–1870. The years of French rule (1809–14) brought a number of changes to musical and theatrical life in Rome. These included an attempt to set up a conservatory and an imperial chapel which would be the focus for performances of music for religious services; the prolongation of the theatre season into Lent, with performances of operas on sacred subjects; the direct involvement of the French administration in running the theatres; and the extension of the repertory to embrace non-Italian music: in 1811, for instance, there was a performance of Mozart's *Don Giovanni* at the Valle, while in 1812 Haydn's *The Creation* was performed at the house of Ruffini.

After the Restoration, however, musical life in Rome continued much as it had done before the French invasion. Opera was regularly presented at the Valle, the Argentina and the Apollo theatres. The Valle, which was entirely rebuilt in 1821, was open for the carnival, spring and autumn seasons. It was chiefly intended for *opera buffa* and *opera semiseria*, which were interspersed with prose comedies; from about 1830 *opera seria* was staged with increasing frequency. A new opera was performed there nearly every season, including Rossini's *Torvaldo e Dorliska* and *La Cenerentola*, Mercadante's *Il geloso ravveduto*, Donizetti's *L'ajo nell'imbarazzo*, *Olivo e Pasquale*, *Il furioso all'isola di San Domingo* and *Torquato Tasso*, Pacini's *La gioventù di Enrico V* and Luigi Ricci's *L'orfana di Ginevra*, *Il sonnambulo* and *Chi dura vince*, as well as many works by relatively unknown or local composers. From the middle of the century the Valle staged only spoken drama.

In the first quarter of the 19th century the Teatro Argentina regularly presented operas and ballet during Carnival (usually *opera seria*, though in 1816 the première of Rossini's *Il barbiere di Siviglia* took place there), but between about 1825 and 1840 performances were more sporadic, the theatre being used mainly for spoken drama and concerts. Opera then reappeared; the premières of *I due Foscari* (1844) and *La battaglia di Legnano* (1849) were given there, as well as the first Roman performances of many other works by Verdi. Until the end of the century *opera buffa* and operetta were performed at the Argentina during Carnival, and in the spring and autumn seasons melodramas by Donizetti, Verdi, Meyerbeer and later Thomas and Bizet. In this period there were few premières except of works by local composers. In 1868 the theatre was taken over by the Comune of Rome.



The Teatro Apollo, which at the beginning of the 19th century had presented opera (often comic opera) from time to time, was the principal theatre in the city from 1828, giving regular performances of *opera seria* with ballet during Carnival until 1858, and then also in spring and autumn. From 1870 the carnival season was prolonged through Lent and the autumn season through Advent, but from 1874 opera occupied only the carnival-Lent season. In the course of the century the Apollo staged works mainly by Rossini, Ricci, Mercadante, Donizetti, Pacini, Verdi, Petrella, Meyerbeer, Gounod, Thomas and Massenet; premières were few but included Rossini's *Matilde di Shabran* (1821), Donizetti's *Adelia* (1841), Pacini's *Il corsaro* (1831), *Furio Camillo* (1839) and *Gianni di Nisida* (1860) and Verdi's *Il trovatore* (1853), as well as the first Italian performances of *Fidelio* and *La forza del destino*. Wagner's music was first heard in Rome at the Apollo with *Lohengrin* in 1878, and in 1883 the entire *Ring* was performed in German. The theatre was demolished in the course of alterations to the Lungotevere in 1889.

The management of Roman theatres in the first decades of the 19th century had some unusual characteristics: the involvement of several aristocratic proprietors (Sforza-Cesarini at the Argentina, Bartolomeo Capranica at the Valle, the Torlonias at the Apollo); the monopoly granted to a single impresario (alternately Cartoni and Paterni); and the lack of government subsidies, which were granted only after the 1830s and only to the Apollo for *opera seria*. For 40 years from 1840 theatrical life in Rome was dominated by Vincenzo Jacovacci, who was first impresario at the Valle and the Apollo and then also at the Argentina (1847–73). Another characteristic feature of opera in Rome in the 19th century concerns the many alterations made to librettos by the censors, especially after the 1840s.

In 1821 the Accademia Filarmonica Romana was founded by a group of amateur musicians. Its members gave a series of public concerts every year, including concert performances of complete operas (often heard in Rome for the first time) by Mayr, Rossini, Donizetti and Mercadante. They also gave many private concerts in which members performed operatic extracts with piano accompaniment and instrumental potpourris. The Accademia was disbanded for political reasons in 1849; after being reconstituted in 1856, it gave more frequent performances of Classical instrumental works. It was again dissolved for political reasons in 1861, and reconstituted in 1868.

In the first half of the century vocal and instrumental *accademie* were occasionally given by local musicians or visiting artists (such as the violinist Antonio Bazzini in 1847) in theatres and in the Palazzo dei Sabini and the Palazzo Braschi. Classical instrumental music was confined mainly to foreign audiences. Performances of chamber music by Mozart, Haydn and Beethoven were organized by Pierre-Auguste-Louis Blondeau at the Accademia di Francia in the Villa Medici during the years of Napoleonic rule, and in February and March 1833 by the cellist Pietro Costaggini in the palace of the Marquis Lepri; in the 1830s a German musician, Ludwig Landsberg, also gave weekly winter soirées devoted to the German Classical repertory.

Concerts of sacred music in Rome were no longer limited to a single performance during Holy Week, and were often heard in the city. In 1821 Giuseppe Baini put on three concerts of sacred music in order to finance the edition of Palestrina's works; and from the 1830s

16. Teatro Apollo, Rome: lithograph, c1860

Giuseppe Sirletti and, later, Abbot Fortunato Santini organized concerts in their own residences devoted to the music of Palestrina and other Italian Renaissance composers. In 1846–7 Pietro Ravalli organized public concerts of sacred music in a hall in the Via dei Pontefici; and between 1843 and 1846 Landsberg put on seasons of mainly German sacred music in the Palazzo Caffarelli.

After a few sporadic attempts in the 1850s, annual seasons of chamber music dedicated to the Classical and Romantic repertory were inaugurated in 1860 by the violinist Tullio Ramacciotti and Ettore Pinelli and the pianist Giovanni Sgambati. These Roman musicians received considerable support from Liszt, who moved to the city in 1863. His Dante Symphony was given in the Sala Dante in 1866, and his oratorio *Christus* was performed there the following year. In 1866 Sgambati conducted Beethoven's 'Eroica' Symphony, also in the Sala Dante.

In 1870 Sgambati and Pinelli founded a Liceo Musicale at the Accademia di S Cecilia, with two classes in piano and violin. This was officially inaugurated in 1877, in the presence of the king and queen, and in 1923 became a state conservatory.

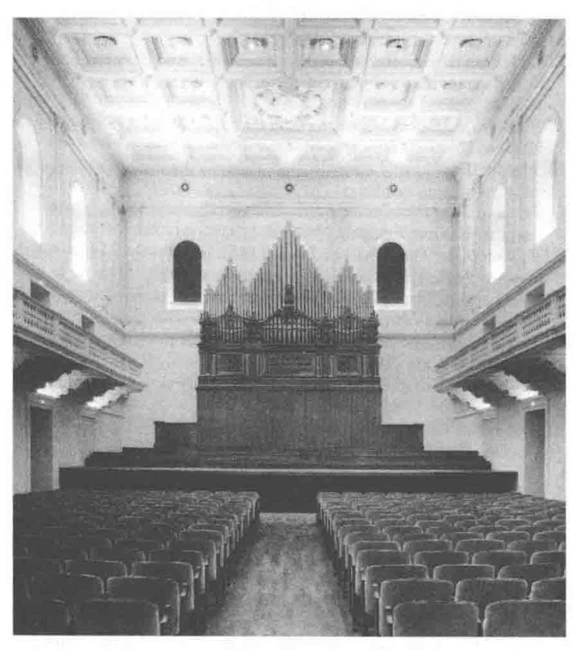
During the 19th century there were various small music publishing houses in Rome which, as well as printing standard editions of operatic extracts for voice and piano, produced several important publications. The firm of Ratti and Cencetti (1821–43) printed eight operas by Rossini in full score, and from 1838 to 1846 Pietro Alfieri oversaw the publication of a monumental *Raccolta di musica sacra*, in seven volumes, containing mainly compositions by Palestrina.

The first specialist periodical on music and theatre was the *Rivista teatrale* (1831–47), followed by *L'Eptacordo* from 1855. Music criticism also appeared in the city's official political newspaper, *Diario di Roma–Notizie del giorno*.

(iii) 1870 to the present. Musical life in Rome after 1870 was dependent on the city's new role as capital of a united Italy. During the last decades of the 19th century the Apollo theatre had been demolished, the Valle was used only for plays, and the Argentina remained in use for opera. To satisfy the new requirements of Rome, now the capital city, the Argentina was joined by new theatres built to hold larger audiences. The Teatro Drammatico Nazionale (built in 1886 and demolished in 1929), the Politeama Romano (built 1862, demolished 1883), the Teatro Manzoni (opened in 1876) and the Politeama Adriano (later the Teatro Adriano, opened in 1898) put on ballet, operetta and opera performances, often of a popular kind, as well as spoken drama. Among the theatres constructed at the end of the 19th century the Teatro Costanzi, built by the entrepreneur Domenico Costanzi to the plans of Achille Sfondrini in the new Esquiline district, acquired particular prestige. It was inaugurated on 27 November 1880 and until the end of the century was usually used in spring and autumn so as not to compete with the municipal theatre in the carnival-Lent season. Various impresarios worked there (including Sonzogno in 1888–90) until 1899, when, under the direction of Enrico Costanzi, the theatre's activities were expanded and regulated, the season being prolonged from the end of December to April or May. On the death of Costanzi the theatre was bought by a company, Stin,

connected with South American theatres and directed by Walter Mocchi. From the 1911–12 season, by which time it began receiving an annual grant from the city, the theatre was directed by Emma Carelli until it was sold to the municipal administration in 1926. During this period the theatre's principal season, from the end of December to the end of April, included 12 to 15 operas; there were also occasional spring, summer and autumn seasons with popular programmes and regular seasons of spoken plays (usually in June–July and October–November) as well as operetta and ballet performances (including some by the Ballets Russes). The première of Puccini's *Tosca* took place at the Costanzi in January 1900 and the Italian première of Wagner's *Parsifal* in 1914.

The theatre was restructured in 1926–7 to plans by Marcello Piacentini and reopened in 1928 as the Teatro Reale dell'Opera, now the Teatro dell'Opera; it was then organized as an autonomous institution and subsidized by the state. In addition to the usual operatic repertory, between the wars it staged premières of operas by Zandonai, Casella, Pizzetti, Wolf-Ferrari, Respighi, Alfano, Mulè, Malipiero and other Italians. The 1942 season was devoted entirely to contemporary works. Beteen 1937 and 1993 the Teatro dell'Opera organized an outdoor summer season at the Caracolla baths.



Rome's role as a capital city from 1870 onwards was also reflected in its concerts, both chamber and symphonic, which became progressively more varied and numerous. In 1874 the Società Orchestrale Romana was founded by Ettore Pinelli, and until 1899 put on regular seasons of symphonic concerts, usually at the Sala Dante. From 1885 to 1921 the Banda Municipale, conducted by Alessandro Vessella, was active in promoting Classical and Romantic music, particularly the works of Beethoven and Wagner. From 1881 the concerts of the Società del Quintetto, founded by Sgambati and with Queen Margherita as patron, replaced the chamber music seasons of Sgambati and Pinelli. In 1893 the group became the Regio Quintetto di Corte and was active at the Palazzo Reale until 1900 and at the Palazzo Margherita until 1908. There were also increasingly frequent concerts of chamber music at the Sala Costanzi (annexed to the theatre and inaugurated in 1881), the Sala Pichetti, the Teatro Adriano and in other halls in Rome. From 1895 to 1906 the Sala Costanzi also hosted concerts given by the Bach Society, founded by Alessandro Costa and Uberto Bandini, which promoted the music of J.S. Bach, Palestrina and other Renaissance and Baroque composers.

Between 1874 and 1899 the choral and symphonic repertory was promoted by the Società Musicale Romana, an amateur association organized on the model of the Accademia Filarmonica. However, the Accademia, reconstituted in 1869, underwent a period of crisis during the last decades of the 19th century, when its activities were limited to annual performances at the Pantheon of a funeral Mass for Vittorio Emanuele II, and a concert of sacred music on Maundy Thursday.

During the 19th century the Accademia di S Cecilia became increasingly international in its outlook, and conferred honorary membership on many well-known foreign musicians. In 1895, the Sala Accademica was inaugurated, making it possible for the Accademia to launch important musical performances. In 1908 a new concert hall, the Augusteo, was opened, and remained in use – with its own orchestra and subsidy from the municipal authority – until its demolition in 1936. In later years, orchestral concerts were given at the Teatro Adriano (1936–46), the Teatro Argentina (1946–58) and the Auditorio Pio (1958–9). After 1908 the Sala Accademica was used almost exclusively for chamber music. From the 1930s an annual season of concerts was broadcast from Rome, organized by Italian radio, later Radio-televisione Italiana (RAI). RAI's own symphony orchestra was discontinued in 1994. In 1920 the Accademia Filarmonica became a concert association, and is still active today. It promotes varied seasons, with particular emphasis on contemporary music, early music, ballet and 18th-century opera. In 1957 the Accademia founded one of the first Italian centres for electronic music. The Istituzione Universitaria dei Concerti, formed in 1944, offers regular seasons of chamber music.

During the 20th century several institutions were created in Rome specializing in contemporary music. Alfredo Casella founded the Società Italiana di Musica Moderna (1917–19) which later became the Corporazione delle Nuove Musiche (1923–8) and later still the Italian section of the ISCM. From 1928 the Sindacato Nazionale Fascista dei Musicisti promoted festivals of contemporary music; and from 1937 to 1943 compositions by contemporary Italians (Casella, Malipiero, Petrassi) received their premières at the Teatro delle Arti (founded by Anton Giulio Bragaglia), which also hosted the Italian premières of works by Debussy, Ravel, Stravinsky and Falla. Casella, and later Petrassi, fought to have contemporary music performed in Rome. The 33rd festival of the ISCM was held in Rome in 1959, and from 1962 the city hosted the festivals and the annual exhibitions of the Nuova Consonanza. Performances of contemporary music were also promoted by the RAI and the Sindacato Musicisti Italiani, founded by Petrassi in the mid-1950s.

Rome holds important musical resources in its many historical libraries, as well as in the archives of ecclesiastical institutions. The largest specialist music library is the library of the Conservatorio S Cecilia, in which is kept a

17. Interior of the concert hall of the Accademia di S Cecilia

copy of all musical material printed in Italy. The most important collections of musical instruments are in the Museo Nazionale degli Strumenti Musicale, in the Museo Missionario–Etnologico and at the Accademia di S Cecilia. Other important musical institutions in Rome include the Discoteca di Stato, the Istituto di Ricerca per il Teatro Musicale (IRTEM), the Istituto di Bibliografia Musicale (Ibimus), the Istituto Italiano per la Storia della Musica, the Fondazione Italiana per la Musica Antica and the Società Italiana di Musicologia. The Accademia di S Cecilia also pursues a broad range of cultural and editorial activities.

Rome, Harold (Jacob) (*b* Hartford, CT, 27 May 1908; *d* New York, 26 Oct 1993). American composer and lyricist. He learnt the piano as a child and played in dance bands. At Yale University he studied law and architecture; he later obtained unpaid employment in an architect's office in New York and began to write songs to support himself, also taking piano lessons and studying composition with Schillinger, Kupferman and Lehman Engel. He first came to prominence in 1937 with his music and lyrics for a revue, *Pins and Needles*, produced by the International Ladies Garment Workers Union; the song 'Sing me a song with social significance' from the show was not only a hit but became a militant anthem of the Depression era. *Pins and Needles* ran for three years and was frequently revived and taken on tour with current topical songs added. Rome's next work was also a political revue: *Sing Out the News* (1938) includes one of his best songs, 'F.D.R. Jones'. During World War II he wrote songs for army shows. After his discharge from the army he produced the last of his social and political revues, *Call me Mister* (1946), and shortly afterwards wrote the first of a series of successful book musicals; several of these achieved very long runs, though only a few of their songs enjoyed widespread popularity. His 1962 Broadway production *I Can Get it for you Wholesale*, provided the début of Barbra Streisand in the song 'Miss Marmelstein'. In her book *The Scarlett Letters* (New York, 1971), his wife Florence describes his experience composing a musical-stage adaptation of Margaret Mitchell's Civil War novel *Gone with the Wind* for Japan in the late 1960s. Rome's last stage work, this was first performed in Tokyo as *Scarlett* (1970), and revised for later productions in London (1972) and Los Angeles (1973). His ability to express in his songs the sentiments of the ordinary person has remained one of Rome's most distinctive characteristics.

WORKS
(*selective list*)

unless otherwise stated, all are musicals and dates are those of first New York performance; all lyrics by Rome; book authors shown in parentheses

Pins and Needles (revue), 27 Nov 1937 [incl. Sing me a song with social significance; Sunday in the Park]; Sing Out the News (revue), 24 Sept 1938 [incl. F.D.R. Jones; collab. C. Friedman]; Call me Mister (revue), 18 April 1946 [incl. South America, take it away; The Face on the Dime]; Wish you Were Here (A. Kober and J. Logan), 25 June 1952 [incl. Where did the night go?; Wish you were here]; Fanny (S. Behrman and J. Logan), 4 Nov 1954 [incl. Fanny; Love is a very light thing]; Destry Rides Again (L. Gershe), 23 April 1959; I Can Get it for you Wholesale (J. Weidman), 22 March 1962; The Zulu and the Zayda (H. daSilva and F. Leon, after D. Jacobson), 10 Nov 1965; Scarlett (K. Kikuta, after M. Mitchell: *Gone with the Wind*), Tokyo, 2 Jan 1970, rev. as Gone with the Wind (H. Foote), London, 1972

DEANE L. ROOT/GERALD BORDMAN

Rome Quartet [Quartetto di Roma]. Italian piano quartet founded in 1956. *See* SANTOLIQUIDO, ORNELLA.

Römer [Remer, Remi, Remmer, Römmer]. The family name of several Austrian organ builders, active from the second half of the 17th century to after the middle of the 18th.

Johann Ulrich Römer (*b* Vienna, ?after 1650) was married in 1683 and became a citizen of Vienna in 1685. In an organ-building contract dated 12 February 1688, made between himself and his brother Ferdinand Josef on the one hand, and Heiligenkreuz Abbey, near Vienna, on the other, he is described as a 'citizen and organ builder of Vienna'. In 1695 he installed an instrument, which now no longer exists, with one manual and seven stops in the parish church at Hainburg, Lower Austria.

His brother Ferdinand Josef (*b* c1657; *d* probably in Vienna, 1723) married in 1682 and from 1684 was organ builder and organ blower to the court. In the 1688 contract referred to above he is described as 'Imperial organ maker'. He is known to have built the choir organ of the Stephansdom, Vienna, in 1701, and the cathedral's great organ (two manuals, 30 stops) in about 1720. The casework of both was destroyed by fire in 1945. He and his brother Johann Ulrich restored the organ at the abbey church of Heiligenkreuz (1721; ?20 stops), for which Ferdinand Josef built a *Hornwerk* in 1722. They had already built a smaller organ (one manual, 12 stops) for

the abbey in 1688, 'to be used as well for figural as for choral music, in accordance with a proposed specification, from which an organ has already been built before this, in a monastery at Ossek in Bohemia'. The imperial Kapellmeister Johann Joseph Fux seconded his petition of 10 December 1723 that 'his position be conferred on his son Johann Römmer, at present his assistant'; the petition was successful, as his son Ferdinand Johann Römer (*d* 1733) was in imperial service. Ferdinand Josef is probably the Josef Remmer who in 1691 built the two choir organs of the abbey of St Florian, Upper Austria. The original casework still exists and is probably the only surviving example of his work. Ferdinand Josef seems to have enjoyed the greater reputation of the two brothers. Their instruments represent the transition from the early to the high Baroque period.

Andreas Josef Römer (*b* Brno, 1704; *d* probably Brno, before 1750) was an organ builder in Brno and the father of Anton Josef Römer (*b* Brno, 1724; *d* Graz, 14 July 1779). The latter left Brno for Graz, and there married the widow of the Graz organ builder Cyriacus Werner, on 19 April 1750. After his death his second wife, whom he had married on 24 September 1758, married another local organ builder, C.M. Schwandtner, who apparently took over his business. Unfortunately, what was probably Anton Josef's largest instrument (the organ of Graz Cathedral: two manuals, 22 stops, dating from 1770–72) has been totally destroyed. However, the organ of Szécsisziget, Hungary (8 stops), with its authentic inscription 'Antonius Röemer organifex Graecensis 1763', still survives in its original state. Also surviving in all its essentials is the organ of the Filialkirche, Peggau (1774). The specification appears to replicate the scheme of the Szécsisziget instrument. The instrument of the pilgrimage church of Frauenberg (Maria Rehkogel), near Kapfenberg, Styria (1774–5; 2 manuals, 19 stops), of which much old pipe-work is preserved, may be regarded as representative of Römer's output. Only the casework has survived of the organs in Rein Abbey, near Graz (1772; 2 manuals, 17 stops), and St Marein, near Kindberg, Styria (*c*1775; 1 manual, probably 12 stops). A clavichord dated 1774 from Römër's workshop has also survived and in 1997 belonged to the Graz violin maker R. Schuster. The Franciscan Nizephorus Römer (*d* 27 Dec 1740) was a talented organ builder working in Jerusalem (see manuscript notes 12, 15 by P.T. Tabernigg in *A-Gf*).

RENATE FEDERHOFER-KÖNIGS

Romer, Emma (*b* 1814; *d* Margate, 11 April 1868). English soprano. A pupil of Sir George Smart, she made a successful début at Covent Garden in 1830 in Linley's *The Duenna*. Engaged at the English Opera House, she appeared in the first performance of Barnett's *The Mountain Sylph* (1834). At Drury Lane she sang in the first performances of many other English operas, including Barnett's *Fair Rosamond*, Balfe's *Catherine Grey* and *Joan of Arc* (1837), Benedict's *The Gypsy's Warning* and Balfe's *Diadaste* (1838), Hatton's *Queen of the Thames* (1843), Benedict's *Brides of Venice* (1844), Balfe's *The Enchantress* and Wallace's *Maritana* (1845) and Balfe's *The Bondsman* (1846). She also sang in the English première of Donizetti's *La favorite* (Drury Lane, 1843). In 1848 she took part in Bunn's autumn season of opera in English at Covent Garden, singing Adina in Donizetti's *L'elisir d'amore* and also Amina in Bellini's *La sonnambula*, a role for which she was particularly admired. For several seasons she was manager of the Surrey Theatre.

Her brother Frank Romer (*b* London, 5 Aug 1810; *d* Malvern, 1 July 1889) was a music publisher and composer. He appears to have written only one opera, *Fridolin*, which was staged in 1840 at the short-lived National English Opera, and in which Emma Romer sang. He became a successful publisher, establishing with Charles L. Hutchings the firm of Hutchings & Romer in London in about 1866. The firm dealt in plates and copyrights as well as in popular music, offering for sale in 1884 such valuable properties as Wallace's *Maritana* and *Lurline*.

ELIZABETH FORBES

Romero (i). American family of guitarists of Spanish origin. Celedonio Romero (*b* Málaga, 2 March 1918; *d* San Diego, 8 May 1996) and his three sons Celín (*b* Málaga, 23 Nov 1940), Pepe (*b* Málaga, 8 March 1944) and Angel (*b* Málaga, 17 Aug 1946), achieved renown as the guitar quartet Los Romeros during the period from the 1960s to the 1980s. Celedonio, a guitar soloist, taught the guitar to each of his sons from the age of two or three, instilling a right-hand position which he believed to be more relaxed than that advocated by Andrés Segovia (and which in part may account for the speed and clarity of the family's playing). Each son had made his début in Spain by the age of seven. Due to difficulties in accepting foreign concert engagements while living in Spain under Franco, the family moved first to Portugal and then in 1957 emigrated to the USA, settling in California. Their first American tour, in 1961, led to recitals in New York at Town Hall and Carnegie Hall, followed by a television appearance and a recording contract.

Los Romeros became known as 'the royal family of the guitar', touring extensively in the USA and also abroad, performing with the major orchestras and making numerous recordings. Initially they played mostly their own

flamenco arrangements and transcriptions of classical works, but they soon commissioned works from Rodrigo, Francisco de Madina, Federico Moreno Torroba and others. Morton Gould has also written for them. The brothers have held teaching positions at various universities in Los Angeles and San Diego, and have sometimes performed as a trio or duo. Pepe and Angel have pursued solo careers since the 1970s; Pepe has made numerous recordings, many with the Academy of St Martin-in-the-Fields, and was the first guitarist to record all three guitar concertos by Mauro Giuliani. Angel's recordings include Claude Bolling's Concerto for guitar and jazz piano (with George Shearing) and the score of the film *Bienvenido*. On Celedonio's retirement in 1990, his grandson Celino joined the group, followed by Angel's son Lito in 1996.

THOMAS F. HECK

Romero (ii). Spanish firm of music publishers, absorbed by the UNIÓN MÚSICAL ESPAÑOLA.

Romero, Jesús C(arlos) (*b* Mexico City, 15 April 1893; *d* Mexico City, 1958). Mexican musicologist. While studying medicine (graduated 1924) and history (graduated 1932), he studied harmony under Juan Fuentes and music history on his own. He became professor of music history at the National Conservatory (1929) and at the music department of the National Autonomous University (1945), participated in the National Music Congresses in Mexico of 1926 and 1928 and collaborated in editing several music periodicals, particularly *Música*, directed by Chávez, and *Cultural musical*, directed by Ponce. He was a member of the Mexican Academy of History and a research associate of the Secretariat of Public Education. In his publications he attempted to reconstruct the music history of the various Mexican provinces, and studied carefully several aspects of Mexican folk music traditions.

GERARD BÉHAGUE

Romero, Juan (*fl* 1675–9). Spanish composer. He was a Mercedarian friar and *maestro de capilla* of the Mercedarian convent at Madrid from at least 1675 to 1679. The Madrid city council commissioned him to supply music for the *autos sacramentales* of Calderón given at Corpus Christi in 1676, 1677, 1679 and possibly 1680. Two villancicos by him survive (in *D-Mbs*). *Agan plaza a las luces*, for nine voices, modulates frequently and exploits the contrast between a solo bass and a double choir, which often sings antiphonally. The six-part *Suene el clarin* (1678) includes parts for trumpets and is full of striking effects, such as echo passages and abrupt changes of pace.

ROBERT STEVENSON

Romero, Mateo [Matheo] [Rosmarin, Matthieu; 'Capitán'; 'Maestro Capitán'] (*b* Liège, *c*1575; *d* Madrid, 10 May 1647). Spanish composer of Flemish birth. He was the leading musical figure at the Spanish royal court during the first three decades of the 17th century, and one of the first Spanish composers to introduce the *stile moderno* into Spain. Born Matthieu Rosmarin to a noble family in Liège, after his father's death he became a chorister in the Flemish chapel of Felipe II's court in Madrid in 1586. He served there as cantor (1594–8), and was later on appointed *maestro de capilla* shortly after Felipe III's ascent in 1598. Changing his name to Mateo Romero (*c*1594), he was eventually naturalized in 1623; this entitled him to high social standing and additional financial benefits. He was better known by his nickname Capitán, or Maestro Capitán, reflecting his outstanding musical talent.

During his long service as *maestro de capilla* (until his retirement in 1633), Romero contributed to the renewed prestige of the native Spanish musicians at the royal chapel, which resulted in the eventual disappearance of Flemish musicians from the court. He served concurrently as *maestro* of the *músicos de cámara*, music and French teacher to Felipe IV and director of the music for numerous religious and ceremonial occasions. In addition, he was an ordained chaplain of high standing, including *greffier* in the Order of the Golden Fleece. He was invited to Vila Vizosa by the Duke of Braganza (1638), who later on, as King João IV of Portugal, nominated him chaplain of the Portuguese Crown (1644). João IV apparently acquired

many of Romero's works for the famous royal library in Lisbon, destroyed by an earthquake in 1755. Furthermore, since Romero's works perished in the fire at the royal palace, Madrid, in 1734, his output was presumably substantially larger than the records of both extant and lost works: two dozen masses, over 30 other Latin works, about 60 villancicos and 40 secular songs.

Nearly 40 Latin works and villancicos by Romero have so far been located (a critical edition in CMM is forthcoming). The Latin polychoral works, in particular, exhibit salient stylistic features of the early Spanish Baroque: multiple antiphonal techniques, contrasting harmonic colours, frequent sectional changes, occasional solo parts and basso seguente or continuo. The texts of Romero's secular songs (*romance nuevo*, *seguidilla*, folía, canción and various letrilla-type versifications), for two to four voices, are attributed to leading Spanish contemporaries, such as Lope de Vega, Luis Góngora, Francisco de Quevedo and Antonio Hurtado de Mendoza. They range from popular chordal settings to exquisite works in a madrigalian style, whose word-painting, fast-changing subsections, chromatic progressions and accented dissonances are symptomatic of the Spanish *stile moderno*. Romero's works were frequently cited in later music treatises and literary sources as a paradigm of compositional excellence. Some of his Latin works continued to be performed until the late 19th century. Consequently, they were often subjected to considerable reworking: the 19th-century version of *Missa 'Qui habitat'* from Santiago de Compostela, for example, includes two violins, flute, two clarinets and trombas.

JUDITH ETZION

Romero de Ávila, Manuel Jerónimo (*b* Herencia, nr Toledo, 26 March 1717; *d* ?Toledo, 15 Dec 1779). Spanish theorist and composer. He spent most of his life at Toledo Cathedral: after being a choirboy there, he competed unsuccessfully for the post of *maestro de capilla*, but from 1747 until his death he served as *claustrero* and *maestro de melodía* (director of *cantus eugenianus*). Between 1774 and 1776 Romero contributed to Cardinal Francisco Antonio de Lorenzana's editions of the Mozarabic rite for use in Toledo Cathedral. For the *Breviarium gothicum* (1775) he provided a rhythmical transcription of Mozarabic chant with an explanation he claimed to have derived from an anonymous treatise, *De omnibus figuris musicis antiquis*. However, neither the explanation nor the contents of the *Breviarium* has much relationship to the still indecipherable ancient notation. For the [*Graduale*], *Liber segundo*, Romero composed a cycle of complete masses for the season from Easter Sunday to Whit Sunday: the Proper is in plainchant, in square notation, and the Ordinary is set polyphonically; and all sections are in triple metre and mixed species of counterpoint. Individual masses and mass sections also appeared in other manuscripts. A *Missa góthica* by Romero was performed at Toledo Cathedral in the presence of Carlos III of Spain in 1776.

Romero's *Arte de canto-llano y organo* enjoyed great popularity and numerous reprintings, including three after his death. It is didactically structured and intended to lead choirboys progressively from plainchant to polyphony. Its discussions of typically Spanish 16th-century topics bespeaks its anachronistic character and results in many problematic interpretations of its (unidentified)

sources. Correspondingly, Romero's explication of the modal system has little to do with earlier practices: transpositions up to four sharps or flats and the frequent use of perfect cadences created a curious mixture of modal idioms.

WORKS

In Arte de canto-llano y organo (Madrid, 1761): Gl–Cr, 1v; Salve regina, 2vv, bc; Lecciones prácticas, 1–2vv, bc
In [Graduale], Liber segundo: 10 missas de tonos todos, 2vv, bc, 1774, *E-Mn*

EDITIONS

[Graduale], Liber segundo, primera parte: el qual contiene todas las misas que ocurren desde la Dominica de Resurrección hasta la última de Pentecostes (MS, 1774, *Mn*)
Missa de canto góthico, o mozárabe, para el día de la Exaltación de la Cruz, y los hymnos propios de Sn Lucas y Sn Torquato (MS, 1775, *Tp*)
Missa góthica, o mozárabe, al sacratísimo Cuerpo de Nuestro Señor Jesuchristo ... reducida de lo góthico, à figuras del presente tiempo (MS, 1776, *Tp*)

ALMONTE HOWELL/WOLFGANG FREIS

Romero y Andía, Antonio (*b* Madrid, 11 May 1815; *d* Madrid, 7 Oct 1886). Spanish clarinettist, music publisher and instrument inventor. Romero began to study the clarinet in 1826 and by 1829 he was playing in a regimental band and a theatre orchestra in Valladolid. He subsequently joined the band of the royal guards, rising to bandmaster in 1841, and was appointed supernumerary clarinet in the royal chapel in 1844. During the 1840s and 50s he also played in Madrid theatre orchestras as a clarinettist and oboist. From 1849 to 1876 he was professor of the clarinet at the Madrid Conservatory and briefly taught the oboe. He opened a shop in 1854 selling both music and instruments and in 1856 founded a music publishing firm. By 1870 he had incorporated an instrument factory into his business and in 1884 he added a concert room.

Romero was an influential figure in Madrid musical life. As a publisher he laid particular emphasis on making available works by Spanish composers and on enlarging the military band repertory. He published a series of specially commissioned Spanish-language tutors covering all conservatory and band instruments, himself writing those for the clarinet, the bassoon and the french horn. A modern revised edition of his clarinet tutor was still in use in Spain at the end of the 20th century. In 1856 Romero took over publication of the *Gaceta musical* of Madrid. His output as a composer appears to have been small. He is known to have written a *Fantasía para clarinete sobre motivos de Lucrecia Borgia* for clarinet and piano (1839, published Madrid, 1875), the *Primer solo original* for clarinet or oboe and piano (Madrid, 1856), some short clarinet duets and a piano piece.

An early and enthusiastic supporter of the application of Boehm's ideas to the clarinet, Romero added two keys to the clarinet in 1851, and in 1853 conceived a highly praised clarinet system, incorporating ring keys, that provided greater agility and improved intonation. This system, first patented in 1862, was developed in collaboration with the Parisian maker Paul Bié, foreman and subsequently co-owner of the Lefèvre firm. Throughout their lives Romero and Bié continued to improve the system. Romero clarinets were sold in Spain, France and Belgium but, in spite of their musical efficiency, they proved to be complicated to maintain and were not widely adopted by musicians.

Romero called for the modernization of Spanish military bands in his *Memoria sobre los instrumentos de música presentados en la exposición internacional de Londres del año de 1862* (Madrid, 1864). His progressive influence is also visible in the scoring of the periodical collection of band music *Eco de Marte* after he took over its publication in 1868. Official recognition of Romero's contribution to Spanish musical life took the form of four decorations and membership of the Real Academia de Bellas Artes de S Fernando. His clarinet system, collection of Spanish-language instrument tutors and new model of snare drum were awared medals in several national and international exhibitions.

BERYL KENYON DE PASCUAL

Römer von Zwickau. *See* REINMAR VON ZWETER.

Römhild [Römhildt; 'Mielorth'], **Johann Theodor** (*b* Salzungen, nr Eisenach, 23 Sept 1684; *d* Merseburg, 26 Oct 1756). German organist and composer. His earliest musical education was probably received from his father, Johann Elias, a substitute minister who moved his family to nearby Steinbach three years after his son's birth. According to Gerber, he also studied with Johann Jacob Bach in the neighbouring town of Ruhla when the latter arrived there in 1694. In 1697 he became a student at the Leipzig Thomasschule, where his distinguished teachers were Schelle and Kuhnau, and his fellow students included Graupner, Fasch and Heinichen. Römhild became a university student in Leipzig in 1705, remaining six terms before accepting in 1708 his first musical position as Kantor of the school in Spremberg (Lusatia); in 1714 he was also named rector and Kapelldirector. In 1715 he went to Freystadt (Lusatia) as music director and Kantor

of the newly constructed parish church, but he returned to Spremberg in 1726 as court Kapellmeister to Duke Heinrich. When the latter became Duke of Saxe-Merseburg he took Römhild to Merseburg as his court Kapellmeister. In 1735 Römhild became organist of Merseburg Cathedral and began a period of great compositional activity, writing more than 200 sacred cantatas and a *St Matthew Passion*.

Römhild was a major composer of sacred music in the north German Baroque, but the survival of many of his manuscripts, found before World War II in libraries and church archives in north-east Europe, is uncertain. As Paulke showed in his description of a portion of Römhild's manuscripts discovered in the early 20th century, the church cantatas, numbering over 250 and including some 50 solo cantatas, were written in a variety of forms and instrumental combinations characteristic of the late Baroque and illustrating almost every formal and stylistic type. Römhild's *St Matthew Passion* (described in some detail by H. Römhild) remains an important example of a late Baroque setting of the Passion text, without free poetic insertions for arias or ariosos, but with chorales common to a tradition found in and around Danzig.

Johann Casper Römhild, possibly related to Johann Theodor, was a student at Brunswick and Helmstedt University. He was choir prefect at the Michaelisschule in Lüneburg, Kantor in Lauenburg, and held posts at the cathedral Gymnasium in Güstrow, 1776–95, and afterwards until 1804 in Parchim. Five cantatas by him are extant (three in *B-Bc*, two in *D-GÜ*).

WORKS

St Matthew Passion, ? formerly *PL-GD*, ed. K. Paulke (Leipzig, 1921); 2 masses, Germany, Evangelische Kirchengemeinde, Mügeln; Kyrie, *D-BIT*; Kyrie, Żary, Poland; Mag, *MÜG*

Cantatas: 3 in *Bsb*, 1 in Bückeburg, 2 in *CR*, 7 in *Dl*, 1 in Guben, 22 in *LUC*, 4 in *MEIk*, 41 in Evangelische Kirchengemeinde, Mügeln, 38 in *MÜG*, ? 1 in *F-Sc*, 112 in *PL-GD*, 1 in Żary

Motet, *D-BIT*; partita, hpd, vn, vc, *SWl*: both according to *MGG1*

22 org preludes, ?lost

123 works at *BOCHmi*, copied in the 1930s by O. Dörfer and H. Langrock. Many of the MSS are of previously unknown works and incl. mostly cantatas, 1 Ky, 1 motet, 1 mass and 22 short organ pieces

GEORGE J. BUELOW

Romieu, Jean-Baptiste (*b* Montpellier, 14 Sept 1723; *d* Montpellier, 8 Nov 1766). French dilettante and scientist. In December 1751 he announced his discovery of difference tones, which he had made by experiments with wind instruments. (Nearly three years later Tartini, evidently unaware of Romieu's work, published his discovery of the same phenomenon observed in double stops on the violin.) Romieu's 'Mémoire théorique & practique sur les systèmes temperés de musique', published in the 1758 *Mémoires* of the Académie Royale des Sciences, surveyed various regular tuning systems and expressed preference for $\frac{1}{6}$-comma mean-tone temperament and its theoretical equivalent, the division of the octave into 55 equal parts.

Ron, Johan (Jean) Martin de (*b* Stockholm, 13 Nov 1789; *d* Lisbon, 20 Feb 1817). Swedish merchant, composer and chamber musician. He worked for his father's banking and shipping firm in Stockholm, and spent much of his short life on business trips to Amsterdam, Viborg, Dublin and Lisbon. He was a capable bassoonist and violinist, and studied composition with J.N. Eggert. According to his obituary he introduced some of the string quartets of Haydn, Mozart and Beethoven to Lisbon. He was also a contributor to the *Allgemeine musikalische Zeitung*, and among his articles is one on music in Portugal (xviii/26, 1816). De Ron's compositions were influenced by Eggert and Beethoven; his harmonic style is similar to that of his contemporaries Spohr and Weber. Many of his works display an independence and artistic maturity that is remarkable in view of his amateur status and early death. In his chamber music and certain songs he experimented with new means of harmonic, melodic and rhythmic expression, although his technique is formally less advanced than his fellow Eggert student Erik Drake.

BIRGIT KJELLSTRÖM/BERTIL H. VAN BOER

Ronald [Russell], Sir **Landon** (*b* London, 7 June 1873; *d* London, 14 Aug 1938). English conductor, pianist and composer, illegitimate son of Henry Russell and Hannah de Lara. He entered the RCM in 1884, where his teachers were Stanford and Parry, and in 1891 became accompanist and coach under Mancinelli at Covent Garden, where he first appeared as conductor in 1896 with *Faust*. He had already toured as conductor of Augustus Harris's Italian Opera Company in 1892, conducted opera at Drury Lane, and toured the USA in 1894 as accompanist to Melba. From 1898 to 1902 he conducted musical comedy in London and summer concerts at Blackpool, a

reflection of how little opportunity England then offered to a conductor. From 1904 to 1907 he was a guest conductor of the newly formed LSO; this led in 1908 to engagements in Berlin, Vienna, Leipzig and Amsterdam. He was conductor of the New SO, 1909–14, and of the Scottish Orchestra, 1916–20. He also conducted the newly formed Birmingham SO at the Saturday night concerts, 1907–18 and Beecham's New Birminham SO, 1917–18. Thereafter he was a regular guest conductor of the leading British orchestras and an expressive exponent of the music of his friend Elgar, who dedicated *Falstaff* to him; Ronald had conducted the first Rome performance of Elgar's Symphony no.1 in 1909. He also played an important educative role in English musical life as principal of the GSM, 1910–38, and wrote a large amount of criticism. He was a close friend of Kreisler, who preferred to have Ronald as conductor for his concerto recordings. Ronald was knighted in 1922. His compositions include a symphonic poem, an overture, a ballet, *Britannia's Realm*, composed for the coronation of Edward VII in 1902, and incidental music to Robert Hichens's *The Garden of Allah* (1921, Drury Lane), but it is his song *Down in the Forest* that has survived. He also published two books of reminiscences, *Variations on a Personal Theme* (London, 1922) and *Myself and Others* (London, 1931).

MICHAEL KENNEDY

Roncaglia, Gino (*b* Modena, 7 May 1883; *d* Modena, 27 Nov 1968). Italian musicologist and composer. He studied the piano with his father, the musician and writer Alessandro Roncaglia, the violin with Giuseppe Ferrari and Zelmira Barbi, and composition with Leone Sinigaglia. He graduated in natural sciences at Modena (1907). In 1926 he became a member of the Deputazione di Storia Patria, and in 1932 of the Regia Accademia di Scienze, Lettere ed Arti at Modena, of which he was also president (1950–52). In 1919 he helped to found the Società Amici della Musica at Modena. His writings deal almost exclusively with Italian music, particularly operatic music and music from Modena; in addition to studies of Verdi, Puccini, Rossini and Stradella he wrote several popular guides. His compositions include orchestral, chamber and vocal works.

FERRUCCIO TAMMARO

Roncal, Simeón (*b* Sucre, 20 April 1870; *d* La Paz, 12 Jan 1953). Bolivian composer and pianist. He was a choirboy at Sucre Cathedral. In about 1910 he went to Potosí to teach at the Colegio Pichincha. There he founded (1917) the Círculo de Bellas Artes, at whose meetings he performed his piano compositions. These are sophisticated stylizations of Bolivian popular dances: *cuecas*, *bailecitos*, *tonadas* and *kaluyos*, genres in which he excelled. A collection of 20 *cuecas* with titles like *La huérfana Virginia* and *Pequeño Simeón* was published in Germany, as were three *kaluyos* in Buenos Aires. A large amount of unpublished music, including fine *cuecas* like *Implorando*, is still circulating in manuscript form and being performed both privately and in concerts. His early works include two funeral marches for military band: *Tres de febrero* and *Las campanas de la catedral*.

CARLOS SEOANE

Roncalli, Conte **Ludovico** (*fl* late 17th century). Italian guitarist and composer. The often-encountered spellings 'Roncelli' and 'Rancalli' are erroneous. Roncalli is known only through his *Capricci armonici sopra la chitarra spagnola* (Bergamo, 1692/*R*; facs. in BMB, iv, 1969). This collection contains nine 'sonatas' or suites for five-course Baroque guitar notated in Italian guitar tablature; each one comprises from five to seven movements. Each suite begins with a preludio and alemanda, which are followed by other typical late 17th-century Italian dance forms such as the corrente, giga, sarabanda and gavotta. Despite their Italian titles the movements show some French influence. Roncalli gave no indication of the tuning for his pieces, but their style and textures seem to indicate the 'French' tuning *a*/*a*–*d'*/*d*–*g*/*g*–*b*/*b*–*e'* used by his contemporaries Corbetta, Derosier and Visée.

ROBERT STRIZICH

Ronconi, Giorgio (*b* Milan, 6 Aug 1810; *d* Madrid, 8 Jan 1890). Italian baritone. He studied with his father, Domenico Ronconi, a well-known singing teacher, and made his début in 1831 at Pavia as Valdeburgo (*La straniera*). The following year he sang in Donizetti's *L'esule di Roma* at the Teatro Valle, Rome, where in 1833 he sang Cardenio in *Il furioso all'isola di San Domingo* and the title role of *Torquato Tasso*, both first performances. He also sang in five other Donizetti premières, *Il campanello di notte* (Naples, 1836), *Pia de'*

Tolomei (Venice, 1837), *Maria de Rudenz* (Venice, 1838), *Maria Padilla* (Milan, 1841) and *Maria di Rohan* (Vienna, 1843), which he repeated at the Théâtre Italien, Paris. Having first sung at La Scala in 1839 as Enrico Ashton (*Lucia di Lammermoor*), he created the title role of Verdi's *Nabucco* there in 1842. The same year he made his London début at Her Majesty's Theatre, and from 1847 to 1866 he sang nearly every season at Covent Garden. His large repertory included Papageno, Rossini's Figaro, Iago and William Tell, and Verdi's Don Carlo (*Ernani*); in 1853 he became the first London Rigoletto.

In many ways, Ronconi was the prototype of the 'modern', Verdian baritone. As the *Musical World* (11 September 1847) said: 'His voice is not particularly melodious, nor is his intonation strictly true ... nevertheless ... its power is immense, and its extent extraordinary for a barytone. In *forte* passages its volume fills the house like a thunder-peal; and in passionate phrases, when the artist comes out with an upper G, or sometimes an A, with all his power, the effect is quite electrical'. It was clearly this (as then) unprecedented power in the highest register that Verdi exploited so thoroughly, and that became a model for many baritones of the next generation. Ronconi was married to the soprano Elguerra Giannoni; his brother Sebastiano (*b* Venice, May 1814; *d* Milan, 6 Feb 1900) was a baritone who made his début at Lucca in 1836 and had a successful career in Europe and the USA.

ELIZABETH FORBES (with ROGER PARKER)

Rondador. PANPIPES of Ecuador, existing in a variety of forms; small ones are called *rondillo*.

Rondalla. Ensemble of the Philippines consisting of plucked string instruments with percussion. The size of a *rondalla* can vary: while a small ensemble might feature eight or so instruments a large ensemble can comprise more than 30. The common *rondalla* consists of four *bandurria* (14-string lute with a flat back), *laúd* (lute), *octavina* (small guitar) one five- or six-string *gitara* and a four-string bass guitar. Smaller ensembles might include one of each instrument and omit the *octavina* and *laúd*, while larger ensembles increase the numbers of instruments included rather than the types. The addition of percussion instruments (such as various types of drum, castanets, triangles and marimba) is a recent phenomenon. Prevalent at the beginning of the 20th century, *rondalla* ensembles have returned to popularity several times, most recently in the 1970s. They are now featured in concert-style performances, playing repertory ranging from folksong to arrangements of Western art music.

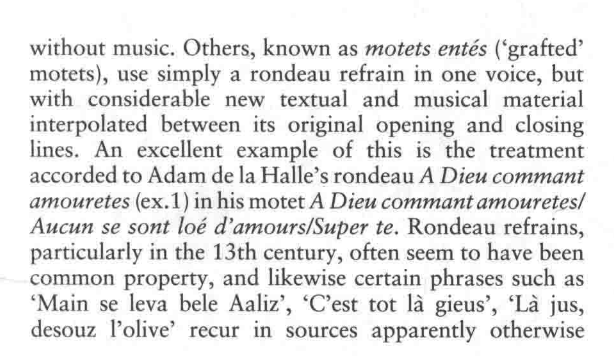
MARIA MENDONÇA

Ronde (Fr.). *See* SEMIBREVE (whole note). *See also* NOTE VALUES.

Rondeau (i). One of the three *formes fixes* (the others are the ballade and the virelai) that dominated French song and poetry in the 14th and 15th centuries. Unlike the ballade and the virelai, the rondeau had taken on its definitive structure by the early 13th century, when it was already a dance-song form of importance. At that stage it was known as *ronde*, *rondet*, *rondel* and *rondelet* (English 'roundelay'), derived from the Latin forms *rotundettum* or *rotundellum*, diminutives meaning 'circular'; this is generally taken to imply circular motion in the dances for which such pieces were originally sung.

The earliest known Old French rondeaux are found among the courtly and popular songs interpolated into the *Roman de Guillaume de Dole* by its author, Jean Renart (*c*1210/*c*1228). There are 16 in all, with varied metres and rhyme schemes and frequent 'irregularities' not to be found later in the rondeau's history. Fundamentally, however, they all conform to a six-line type with music on the pattern I–I–I–II–I–II. A typical example, no.6, reads:



Aaliz main se leva,
Bon jor ait qui mon cuer a!
Biau se vesti et para,
Desoz l'aunoi.
Bon jor ait qui mon cuer a!
N'est pas o moi.

Structurally this amounts to: I(a_7) I(A_7) I(a_7) II(b_4) I(A_7) II(B_4). The essential features are the presence of a final refrain which occupies the entire two-section melody, and the anticipation of the first part of this refrain in the second line. At the earliest stage variations often existed between the exact phraseology of the refrain and its anticipation, but later the anticipation became exact. Rondeaux of the six-line type are also to be found within the *Lai d'Aristote* by Henri d'Andeli. The next stage was to introduce the refrain at the opening of the composition as well, resulting in the overall musical form that was to remain the basis of the rondeau thereafter: I–II–I–I–I–II–I–II. The resultant eight-line type is the most common in the late 13th century and the 14th. Numerous examples of it, together with subsequent extensions, are again interpolated into narrative works such as *Cleomadès* by Adenet le Roi, the *Roman du Castelain de Couci* by Jakemes, *Meliacin* by Girart d'Amiens, the *Roman de Fauvel* by Gervais de Bus, and other scattered sources, quite apart from rondeaux forming part of the lyric output of known poet-musicians such as Adam de la Halle (whose 14 three-part settings in conductus style are the first polyphonic examples), Guillaume d'Amiens and Jehannot de l'Escurel, at the turn of the century.

The emergence of the refrain at the opening of the composition invites a comparison with virelai form and, indeed, has led some distinguished musicologists, especially Gennrich, to contrive complicated interconnections between the histories of the two forms. Others doubt the necessity for this and see them as entirely distinct. A vital differentiating factor is the particular importance acquired by the rondeau refrain, since its performance, though it may be only two lines long, entails the use of the whole melody, not simply part of it. This may well be the reason why rondeau refrains took on a life of their own and were often inserted into other songs, motets, romances and many miscellaneous literary works. Some 13th-century motets use an entire rondeau as one of the voice parts or as the fundamental tenor, which occasionally makes possible the reconstruction of a piece found elsewhere

Ex.2 (a)

(b)

without music. Others, known as *motets entés* ('grafted' motets), use simply a rondeau refrain in one voice, but with considerable new textual and musical material interpolated between its original opening and closing lines. An excellent example of this is the treatment accorded to Adam de la Halle's rondeau *A Dieu commant amouretes* (ex.1) in his motet *A Dieu commant amouretes/Aucun se sont loé d'amours/Super te*. Rondeau refrains, particularly in the 13th century, often seem to have been common property, and likewise certain phrases such as 'Main se leva bele Aaliz', 'C'est tot là gieus', 'Là jus, desouz l'olive' recur in sources apparently otherwise unconnected with each other. The example by Adam de la Halle is a 13-line type, and this is merely one of a number of possible extensions made simply by setting varying numbers of lines of text to the two underlying music sections, the pattern of which never changes. Table 1 shows typical possibilities.

The rhyme and metre may vary. In the 13th and early 14th centuries the eight-, 11- and 13-line types are frequent and often use mixed metres. From Machaut onwards the eight- and 16-line types dominate, with the 21-line type becoming popular in the 15th century; mixed metres are rare in musical rondeau settings, though they may be encountered more often in unset verse (as, for example, in Christine de Pizan, who also promoted the use of shortened refrains).

Machaut's 22 rondeaux are all polyphonic, for solo voice and one, two or three accompanying untexted lines. Some, such as *Doulz viaire gracieus*, are very brief musically (12 bars) and comparable in this respect with the earlier type; others, such as *Tant doucement*, are more extended (52 bars) and make much use of long melismatic decoration on single syllables, a common feature of contemporary ballades. The idea of circular motion implied in the word 'rondeau', long after it had become dissociated from the dance, appealed to the medieval mind in more ways than one, and Machaut provided a particularly fine example of ingenuity in this respect in his three-part rondeau *Ma fin est mon commencement/Et mon commencement ma fin* (*F-Pn* fr.22546; fig.1). Here the music illustrates the text, for at its close it has indeed returned to its beginning: section II of the instrumental tenor is the exact retrograde of its section I; the cantus

TABLE 1

Type	I	II	I	I	I	II	I	II
8-line	A	B	a	A	a	b	A	B
11-line	A	AB	a	A	a	ab	A	AB
13-line	AB	B	ab	AB	ab	b	AB	B
16-line	AB	BA	ab	AB	ab	ba	AB	BA
21-line	ABB	BA	abb	ABB	abb	ba	ABB	BA

1. *Machaut's three-part rondeau 'Ma fin est mon commencement/Et mon commencement ma fin' from MS 'G', 1390s (F-Pn fr.22546, f.153r)*

section II is the retrograde of the instrumental triplum section I; and the triplum section II is the retrograde of the cantus section I. Ex.2 demonstrates this by giving the first four and the last four bars. A further, graphic example of the 'circular' rondeau idea is given in the early 15th century by Baude Cordier, whose canonic rondeau *Tout par compas suy composés* (*F-CH* 564; fig.2) is notated in circular form; his rondeau *Belle, bonne, sage*, with an equally imaginative notation in heart shape, appears in the same source.

The rondeau text, like that of most ballades and virelais, was usually concerned with courtly love, though the treatment of this theme was generally rather lighter than in the ballade, given the rondeau's relative brevity. In one special area, however, the rondeau became widely used for a different purpose, namely in religious drama. Few religious rondeaux have survived with musical settings, but two or more texts are contained in each of the 40 14th-century *Miracles de Nostre Dame*, written and performed by the Goldsmiths' Guild in Paris, and are normally sung by two or three voices as angels escort Our Lady to and from paradise. It seems likely that these texts, which structurally seem to belong more to the early 14th century, were contrafacta of pre-existing secular rondeaux and thus used existing music, with a simple substitution of religious for amorous sentiments. In this way the religious rondeau continued the 13th-century tradition of the *chanson pieuse*. In the great 15th-century French Passion cycles, by, for example, Arnoul Greban and Jean Michel, the rondeau, with much other incidental music, continued to be most important, even extending to cacophonous devils' songs, and it also became a characteristic feature, in secular guise once more, of the 15th-century farce.

Ex.3

The 15th century was the true heyday of the rondeau, when it completely dominated all rival lyric forms. (For a detailed discussion of the relative popularity of rondeau, ballade and virelai in the 14th and 15th centuries *see* VIRELAI.) Hundreds were composed with music, and hundreds more without. Of the most famous early 15th-century musicians, Du Fay left 59 and Binchois 47; many more remain by lesser figures such as Baude Cordier, Césaris, Haucourt, Lebertoul, Johannes Le Grant and Malbecque. Of the rondeaux written by non-musician poets the most important are by Christine de Pizan, Alain Chartier and Charles d'Orléans. Following the divorce between poets and musicians largely brought about by the great intricacy of late 14th-century musical style, it became more common than previously for musicians to set texts written by some poet other than themselves. A good and characteristic example is Binchois' setting of Chartier's rondeau *Triste plaisir et douleureuse joie*. Ex.3 gives the opening of this and demonstrates the characteristic instrumental prelude before the entry of the voice in bar 5. The style is mellifluous, simple but extremely touching and perfectly suited to the sentiments of the text.

2. *Canonic rondeau 'Tout par compas suy composés' by Baude Cordier, from the Chantilly Manuscript (F-CH 564, f.12r)*

The increasing appearance in this repertory of vocal writing with texts provided for all parts, reminiscent of Adam de la Halle but probably under Italian influence, together with ever-increasing use of imitation, point forward to important stylistic features of the chanson in the late 15th century and the 16th.

NIGEL WILKINS

Rondeau (ii) (Fr.). A term used in France for a composition, instrumental or vocal, based on the alternation of a main section (refrain, reprise, *grand couplet* or 'rondeau') with subsidiary sections (*couplets*, episodes). The term was also used by German and English composers for pieces in the form, particularly if they were written in the French

style. In England the corruption 'Round O' was equally common. *See* RONDO, §§2 and 3, and ROUND O.

MALCOLM S. COLE

Rondellus. A technique of composition for three voices cultivated in 13th-century England; also, a piece completely composed in this manner.

The technique is rooted in the compositional device known as VOICE-EXCHANGE (more accurately, phrase-exchange). There were two ways in which 13th-century English composers applied voice-exchange technique to the three-part texture preferred by them. They either restricted it to the two upper voices, supporting it with a repetitive tenor or *pes*, or they wrote triple voice-exchange, i.e. a melody consisting not of two, but of three fairly concise elements (ex.1), all of which are combined simultaneously.

Ex.1 PMFC, xiv (1979), no.29

beginning of final cauda (tenor)

This procedure, which as horizontal projection of a simple harmonic scheme depends on 3rds, 5ths and octaves as constitutive intervals, was known by the medieval Latin term 'rondellus'. The only medieval writer to describe it was an Englishman, Walter Odington (*c*1300):

And when what is sung by one may be sung by everybody in turn, such a tune is called rondellus, i.e. a rotational or rounded melody . . . Rondelli are to be composed as follows: contrive a melody, as beautiful as possible . . . To this melody, with or without text, and sung by each, should be fitted one or two others consonant with it. Each thus sings the other's part [that is, in alternation].

Odington's music example consists of twice three melodic elements; the first half is melismatic (in effect demonstrating the rondellus technique that occurs in many caudas of English conductus), while only one of the remaining three elements has text, which is therefore sung successively by each of the three voices. This latter procedure is the one that occurs most commonly, though some pieces composed near the end of the century exhibit more complex arrangements, such as that shown in ex.2.

In conductus, voice-exchange and rondellus technique could enliven the melismatic caudas; in one case the evidence seems to indicate that poetry came to be applied to some of these 'rondellus caudas'. In any event, several English conductus prove that rondellus technique could be employed in texted sections as well as in caudas. The close relationship between rondellus and conductus was recognized by Odington, who pointed out that any polyphonic composition exhibiting all the features of a rondellus except its imitative technique would be a conductus. Voice-exchange over a *pes* and rondellus technique were also applied in the introductory tropes to the polyphonic settings of the verses and, especially, of the responds (solo portions) of alleluias.

About 100 years before Odington wrote his treatise, Giraldus Cambrensis gave the following report on Welsh music in his *Descriptio Kambriae* (1194):

When they make music together, they sing their songs not in unison, as is done elsewhere, but in parts, with many [simultaneous] modes [*modis*] and phrases [*modulis*], so that in a crowd of singers . . . you would hear as many songs and different intervals [*discrimina vocum varia*] as you could see heads; yet, they all accord in one consonant [*consonantiam*; *recte? consonantem*] polyphonic song [*organicam melodiam*], marked by the enchanting delight of B♭ [?F major].

Ex.2 PMFC, xiv (1979), no.38

The assumption that Giraldus was describing the rondellus is strengthened by the probable provenance of those English sources that for the first time transmit pieces exhibiting rondellus technique. While they postdate the *Descriptio* by five or more decades, some of them seem to have originated in localities 30 to 60 km east of Wales. That rondellus and related techniques were particularly prominent in these areas, from which they spread, and seem to go back at least to the turn of the century is indicated not only by SUMER IS ICUMEN IN and its presumptive antecedents, but also by a French double motet (*Hare, hare, hye/Balaam goudalier/Balaam*) which pokes fun at English and Scottish *goudaliers* (guzzlers of good ale). This composition, dating from the second quarter of the 13th century, is the only continental cantus firmus motet of the time in which the upper voices engage

in voice-exchange, a procedure made possible by the unusual selection of a sequence as tenor. This motet is therefore a strong argument for the assumption that the parodied musical practice, abandoned by French composers as a result of their waning interest in conductus and organum, was known as typically and perhaps rather quaintly English at least as early as about 1225.

Apart from the Summer Canon, which can be regarded as a potential multi-part rondellus, there are no rondelli in existence for more than three voices. After 1300 the expansion of the two-voice framework beyond one octave (i.e. the regular acceptance of the 10th or 12th as the largest contrapuntal interval between the outer voices) caused voice-exchange and especially rondellus to become moribund practices. With their individual voice-exchange passages growing ever more lengthy, a number of compositions exhibit a hypertrophy characteristic of many species of art in their late stage. The most expansive complexity is reached by two long compositions in *GB-Cgc* 543/512, ff.248*v*–249 and ff.252*v*–253 (*Virgo Maria patrem parit/Virgo Maria flos divina* and *Tu civium primas/Tu celestium primas*). In both pieces *signa congruentiae* indicate that the second halves of the two voices are to sound together with the first.

Continental rondellus compositions are relatively rare and, apart from involving three voices, their counterpoint as a rule hardly exceeds the level of complexity represented by ex.1 of VOICE-EXCHANGE. (The identification by Falck of two monophonic compositions in fasc.11 of *I-Fl* Plut.29.1 as rondelli is untenable.)

In continental medieval treatises 'rondellus' was generally used as the Latin term for rondeau.

ERNEST H. SANDERS

Rondelly, Jo. (*fl* early 15th century). Composer, possibly Italian. He is known solely for a three-voice motet *Verbum tuum, verbum sane bonum/In cruce te providens* which survives only in *I-Bc* Q15. The work is for two high, equal voices and a textless tenor that is stated four times in different mensurations.

TOM R. WARD

Rondeña. Song and group dance of Andalusian origin and flamenco type. *See* FLAMENCO, Table 1, and SPAIN, §II, 4.

Rondo (It., also Eng. and Ger. by usage; Fr. *rondeau*). One of the most fundamental designs in music, the rondo is a structure consisting of a series of sections, the first of which (the main section or refrain) recurs, normally in the home key, between subsidiary sections (*couplets*, episodes) before returning finally to conclude, or round off, the composition (*ABAC … A*).

1. ORIGINS AND DEVELOPMENT OF THE FORMAL CONCEPT. The very simplicity of the rondo concept, and its consequent wide usage, makes it difficult to give a precise account of its origins. Any connection between the medieval or Renaissance rondeau and that of the 17th and 18th centuries is at best tenuous; and parallels between the later rondo and (for example) the ritornello principle and the rondo cantata need to be more thoroughly investigated. Those few 18th-century theorists who mentioned influences on the rondo confined themselves to such popular examples as the *Frantzösischer Ringel-Tantz* (Walther), the *Kreiz* or *Circul-Tantz* (Niedt), the *Zirckelstück* (Marpurg, Türk), and the *Rundgesang* (Türk). Mattheson, however, indignantly noted that although 'rondeau' does indeed derive from 'rond' or 'rund' (circle), the music to which this term is properly applied originates neither in the circle-dance nor in the *Runda* (a relative of the French *ronde de table*), a type of drinking-song in which a rousing refrain sung by all the merrymakers followed each participant's verse.

Later writers have suggested two principal influences from art music. Lully is alleged to have devised the rondeau of two *couplets*, sometimes called 'French rondeau'. The multi-*couplet* rondo (or chain rondo, *ABACAD … A*), sometimes called 'Italian rondo', presumably developed from early Italian opera. Peri's *Euridice* (1600), for example, contains two choral refrain–recitative complexes arranged in rondo fashion ('Al canto al ballo' and 'Sospirate aure celesti'). In the former, the sequence is: choral refrain–solo for nymph–refrain–solo for shepherd–refrain–solo for another nymph–refrain (*ABACADA*). The prologue of Monteverdi's *Orfeo* (1607) is a parallel example, with instrumental ritornellos instead of choral refrains. Similar structures were used throughout the century.

2. THE RONDEAU IN FRANCE IN THE 17TH AND EARLY 18TH CENTURIES. The rondeau in France enjoyed considerable popularity throughout the later 17th and early 18th centuries. It appeared in a wide range of media: ballet, opera and related genres (as instrumental piece, chorus and ultimately air or duo *en rondeau*), orchestral music, pieces for harpsichord and sonatas for violin. Composers appended the qualification 'en rondeau' to any dance title: gigue, minuet, gavotte, loure.

Of the early generation of rondeau composers, Lully was most important in the fields of opera and ballet,

Chambonnières and Louis Couperin in keyboard music. The 'Rondeau pour les basques' from the *Intermède de Xerxes* furnishes an elementary example of the two-*couplet* design favoured by Lully. Each section, refrain and *couplets* alike, is in the tonic key and is eight bars long; in the first *couplet* the refrain idea is transposed, in the second it is inverted. A more complicated example is the 'Rondeau pour la gloire' from the prologue to *Alceste*. Refrain and *couplets* are of different lengths, *couplets* being further distinguished by contrasts in scoring and changes of key. A portion of Act 1 scene vii of *Alceste* may be viewed as a large rondo, the introductory rondeau itself serving as refrain for *couplets* allotted to various characters and the chorus. 'Suivons Armide' from *Armide* exemplifies the choral rondeau (Act 1 scene iii). Chambonnières, who favoured the two-*couplet* design, composed one work specifically entitled 'Rondeau' and several chaconnes-rondeaux, one of which has five *couplets*. Louis Couperin preferred the multi-*couplet* disposition, his chaconnes-rondeaux containing three and four *couplets*, his *Passacaille* nine.

In the following generation, François Couperin was the unrivalled master of the harpsichord rondeau, of which there are many examples in his *ordres*; like most of his movements, they often bear fanciful titles (such as *Les baricades mistérieuses*, *ordre* no.6). He offered the richest structural variety of his day, the rondeaux containing one (*Les abeilles*, *ordre* no.1) to eight *couplets* (*Passacaille*, 8), but more often two (*Les silvains*, 1), three (*Soeur Monique*, 18) or four (*L'enchanteresse*, 1). Couperin's refrain is a discrete cell, often of eight or 16 bars and frequently framed with repeat signs (*La badine*, 5). In *Les bergeries* (6), an internal repeat is specified as well. Subsequent returns of the refrain are usually complete and literal, but in *Les bergeries* Couperin abbreviated the first return – his first use of this effective device for alleviating the monotony that can result from too many complete restatements of a refrain. In his earlier music Couperin's *couplets* are usually about the same length as the refrain; in later works they are often expanded (for example the final *couplets* of *La triomphante*, 10, and *L'ingénuë*, 19). Although it is not unknown for all *couplets* to remain in the main key (*La badine*), Couperin usually set them in related keys. To heighten the contrast between refrain and *couplet*, he sometimes changed the register of the *couplet* or altered its texture; more animated figuration is common in a final *couplet* (*Soeur Monique*). While *couplet* material may contrast sharply with the refrain (*Les gondoles de Délos*, 23, third part), it is often derived in some way: common techniques include such unifying devices as transposition of the refrain (*Le gazoüillement*, 6, second *couplet*), free continuation and expansion of a refrain motif (*Soeur Monique*, second *couplet*) and inversion (*L'ingénuë*, third *couplet*) or tonal answer of refrain motifs (*Le petit-rien*, 14, first *couplet*). Couperin's output also shows the evolution of the 'second rondeau' from an entity bound to the preceding rondeau only by a common tonic (*L'Angélique*, 5) to one that functions as an organic component of the primary work (*Les gondoles de Délos*, third part in separate rondeau; *L'epineuse*, 26, fourth *couplet* in separate rondeau).

Following Couperin, Rameau further refined some of his predecessor's techniques but on the whole he standardized the rondeau, settling almost exclusively upon the two-*couplet* design in his harpsichord works. Jean Dubreuil, a theorist of the time, codified Rameau's practice. The refrain is always in the main key. With a rondeau in the major, the first *couplet* is in the dominant, the second in the submediant minor; with a rondeau in the minor, the first *couplet* is in the relative major, the second in the dominant minor. The singular and extensive *Les cyclopes* provides a striking exception to this remarkably consistent approach. In his dramatic works, Rameau not only produced several rondeaux with a single *couplet*; he also combined two such designs, with a modal shift of the second and a da capo of the first, to produce an expanded ternary configuration (*ABA CDC ABA*), as in the first and second 'Gavottes en rondeau' (C major, C minor) from *Les fêtes d'Hébé* (third entrée).

Leclair contributed to later 18th-century rondeau techniques, especially in his Aria movements for violin. His designs were fairly consistent, but he was among the first to compose a linking passage to connect a *couplet* with an ensuing return of the refrain (op.2 no.4, Aria), to change metre and tempo within a *couplet* (op.1 no.9, Allegro ma non presto), and to incorporate a rondeau within a rondeau in the final *couplet* (op.1 no.1, Aria).

3. The spread of the rondo. The rondeau cultivated by French composers quickly spread to other countries. Composers such as Purcell in England and Georg Muffat and J.C.F. Fischer in Germany adopted French forms and techniques. J.S. Bach demonstrated his mastery in such compositions as the Passepied I from English Suite no.5 (BWV810) and the Rondeaux of the Partita no.2 for keyboard (BWV826), Partita no.3 for solo violin (BWV1006) and the B minor Ouverture (BWV1067). In Italy, E.F. Dall'Abaco and others used the form.

By the middle of the 18th century, the rondeau of French stamp was solidly established throughout Europe. Its assimilation into the music of other nations and its transformation into the rondo of the Classical period have not been adequately investigated. Theorists active in the middle of the 18th century described only the French rondeau, and it seems that German composers used the rondo rarely. However, from essays by music critics of the following generation, from correspondence by C.P.E. Bach and Mozart, and from the marked increase in the number of rondos composed, it appears that in the early 1770s there began a vogue for simple, tuneful rondos of a quite different stamp from the French products. German critics scolded Eichner and Dittersdorf for writing too many rondos. One theorist suggested that most fashionable pieces of this type have little true inner value (Forkel), another that the species was appearing ad nauseam in keyboard music (Cramer); one critic pointed to a flood of Italian imports, another to a popular rondo from an oboe concerto by J.C. Fischer. C.P.E. Bach admitted frankly that he included rondos to further the sale of his collections. In several letters, Mozart reported that audiences forced him to repeat the very rondos that he had composed specifically to replace movements in other forms (for example, the substitute finale K382 for the Piano Concerto K175, which however is not a true rondo by any accepted criteria for the form; as we shall see, the term was sometimes applied to movements of a popular character in which the main features of rondo structure are absent). In England a type of finale, characterized by simple tunefulness and light texture, became known as the 'Vauxhall rondo' by association with the pleasure

gardens of that name; its exponents included Samuel Arnold and James Hook.

It is difficult to formulate a historical explanation of the vogue, because no single nation, musical type, composer or work appears to have been solely or primarily responsible. *Opera buffa*, however, provided much of the impetus. *Buffo* composers like Sarti, Paisiello and Piccinni sometimes ended their overtures with rondos, and interspersed vocal rondos throughout their scores. Imbued with lightness and grace, these unpretentious compositions established the stereotype of a 'pleasing', 'charming', 'cheerful', 'clear', 'comprehensible' rondo theme, an idea that must be new and worth hearing six to eight times. German theorists, some of whom recognized the interaction of the vocal and instrumental spheres, frequently cited and even printed examples either from *opera buffa* or from German Singspiele in their essays on rondo (Reichardt, Koch). A particular favourite was the first example of the rondo in north German opera, Sophie's multi-*couplet* 'Selbst die glücklichste der Ehen' from Benda's *Walder* (1776). In the hands of a composer such as Naumann, whose 'Darf ich nicht zu klagen wagen?' from *Cora och Alonzo* (1782) achieved considerable popularity, the vocal rondo soon spread throughout Europe. The content and form of texts appropriate for rondo setting particularly occupied French theorists, the consensus being that although texts should as a rule be light, Gluck's famous 'J'ai perdu mon Eurydice' (originally 'Che farò senza Euridice'; *Orfeo*, 1762) proves that a serious text may be effectively set in rondo form.

German composers, notably J.C. Bach, who absorbed the spirit and technique of the *opera buffa*, appear to have been the prime agents in the transformation and diffusion of this newer kind of rondo. J.C. Bach was also fond of the *menuet en rondeau* finale (for example, in his Symphony op.9 no.2), and Mozart's frequent use of it, as in his Bassoon Concerto K191/186*e*, is clearly indebted to him. Within the older structural designs, primarily the two-*couplet* and the multi-*couplet* arrangements, such composers favoured in rapid tempos the gesture-like thematic style of the *buffo* overture, in slower tempos the lyrical manner of the *buffo* air. Rondos in all tempos show a more marked periodic arrangement, sharper contrast between refrain and episodes, and they often have a coda.

4. The rondos of C.P.E. Bach. One by-product of the rondo vogue was a series of critical essays whose authors, reluctantly acknowledging popular taste, advocated as models the singular examples by C.P.E. Bach. From the finale of the G major Trio (H523, 1776), which includes varied and transposed statements of the refrain, Forkel derived rules for the construction of a good rondo. Cramer, inventing fanciful characters and programmes, chose the fourth collection 'for Connoisseurs and Amateurs' (WQ58). That Bach himself was aware of the general trend in favour of light, cheerful rondos is shown in the dedication of his *Abschied von meinem Silbermannischen Claviere* (H272), in which he notes that one can – as this example proves – compose lamenting rondos.

C.P.E. Bach's rondos stand outside the mainstream of the genre's evolution. Indeed, a gulf separates Bach's own early, French-inspired rondos (*La complaisante*, H109, *Les langueurs tendres*, H110, *La Xénophon*, H123, 1761) from the 13 refined, independent rondos of the series for 'Connoisseurs and Amateurs' (WQ56–9, 61, 1778–86). These are extended, leisurely compositions built sometimes on a lyrical theme, sometimes on a characteristic motif. On occasion Bach explored an idea rather than a theme, for example the harmonic progression from the tonic to the diminished 7th in the A minor Rondo of the second collection (H262). Avoiding extremes of tension, he elaborated, embroidered and spun out his themes in conjunction with imaginative harmonic shifts and modulations. Episode material is often non-thematic, consisting of arpeggiated figuration, sequential passages and chains of chords that serve to prepare refrain statements in related keys. Bach often developed aspects of a refrain theme. Episodes tend to be lengthy and of open design rather than in the closed binary and ternary substructures used by his contemporaries (such as J.C. Bach). Fused with the rondo principle of return are the technique of variation, the ritornello practice of transposition and improvisatory elements of the fantasy, such as virtuoso figuration, dynamic juxtapositions, abrupt alternation of the lyric and the rhapsodic, and changes of metre and tempo within a composition (E major Rondo, third collection, H265). At times, in fact, Bach dispensed with bar-lines altogether, as in the cadenza concluding the B♭ Rondo of the fourth collection (H267), which Cramer likened to a flight of the gods. Structural freedom, refrain transposition, fantasia figurations, harmonic sophistication and dynamic contrasts combine to make Bach's rondos personal and ingenious treatments of the form.

5. The rondo as a movement in a larger work. In the mainstream of music in the Classical period, the rondo functioned most commonly as one movement within a large composition, appearing rarely as the first movement (Haydn, Piano Sonata HXVI:48), more frequently as the second (Beethoven, Piano Sonata op.13) or other interior movement (Mozart, Serenade K250/248*b*) and relatively often as the finale. It had limited use in chamber music and the symphony; it was more freely employed in sonatas and serenades, but only in the concerto was it the almost invariable choice for finales.

The substantial outputs of Haydn, Mozart and Beethoven elegantly summarize the rondo techniques of the late 18th and early 19th centuries. Haydn began composing rondos in the early 1770s; his best examples are found in his symphonies, string quartets and piano trios. Mozart wrote rondos throughout his career, incorporting them in a variety of genres. Beethoven, who included rondos in his early chamber works, sonatas and concertos, abandoned the form, but not the broader principle, almost completely in his last years. Of particular interest is the apparent interaction between Haydn and Mozart, the former responding to Mozart's thematic complexes and preference for sonata-rondo design, the latter incorporating Haydn's thematic economy, thematic motivation and contrapuntal textures in all sections of a rondo. Each composer moved from a simple, sectional structure to a complex, integrated form into which he built surprise and variety, and within which he attempted to offset and even exploit the regularity inherent in the traditional layout.

Mozart wrote only four rondos that are completely in the minor mode; Beethoven wrote five (including the finale of op.13, which is commonly cited as a model sonata-rondo). Because the typical rondo was supposed to be bright and cheerful, composers customarily chose other forms for finales in minor-key works (sonata-allegro, variation, fugue), but when they did conclude

with a rondo, they sometimes placed the entire movement (Mozart, String Quintet K516) or at least the coda (Mozart, Piano Concerto K466) in the major. Duple (2/4, C, 6/8, rarely ₵) replaced the *buffo* and minuet-based variants of triple as the normal metre in rondo movements. Although each composer approached the problem of design differently, the formal arrangements of the earlier 18th century remained in force. The two-episode structure (on occasion *ABABA*; more commonly *ABACA*, as in Beethoven's Piano Sonata op.53) was often used, Mozart and Beethoven employing it more than any other option except the sonata-rondo and Haydn particularly favouring it. In his hands the design evolved from a sectional, variation type, in which the dominant is rarely the goal of the first episode (for example Symphony no.42), to one that in tonal scheme, disposition of the first episode and developmental second episode rivalled the opening movement and the mature sonata-rondo in integration and complexity (as in Symphony no.96). All three composers cultivated the multi-*couplet* rondo, Haydn and Beethoven at times incorporating fantasy or improvisatory elements (Haydn, Piano Concerto HXVIII:11; Beethoven, Piano Concerto WoO4). Haydn, notably in his piano trios, included rondos of ternary design (*ABACABA*).

The Classical composers often infused their rondo refrains with the rhythms, thematic character and phrase regularity of the dance (for example the minuet and especially the contredanse). Folk- and popular song provided another stimulus, composers borrowing authentic folktunes on occasion (Haydn, Symphony no.103) and, more important, distilling their essence to produce a *folklore imaginé* that finds its most obvious expression in certain Hungarian, Gypsy, Turkish or otherwise exotic works (Mozart, Piano Sonata K331/300*i*, 'alla turca'; Haydn, Piano Trio HXV:25, 'Rondo all'ongarese'). Often other formal principles (fantasy, variation, sonata) interacted, with results defying categorization.

The refrain, because of its fundamental importance, invites particular scrutiny. Composers occasionally connected the rondo with a preceding slow movement; Beethoven used this link in the Piano Concerto no.5 to anticipate the refrain theme. Mozart and Beethoven prefaced some refrains with a slow introduction (Mozart, String Quintet K516), while Haydn and Beethoven sometimes preceded the main theme with an introduction in tempo (Beethoven, Sixth Symphony). In the early 1770s Haydn and Mozart abandoned the rushing, *buffo*-inspired tutti refrain, preferring a moderate dance-like theme scored for reduced orchestra. Phrase structure is usually regular, harmonic rhythm slow. Beethoven, who extended the limits of admissible refrain material (for example in his Second Symphony), sometimes used non-tonic beginnings and allowed tonal ambivalence within the refrain (Piano Concerto no.4). While Haydn consistently favoured ternary design, Mozart cultivated a wide range of structures (often, mainly in the concertos, appending long closing groups); Beethoven added the threefold announcement of a single idea (Violin Concerto) and the open refrain (Second Symphony). A refrain is commonly a discrete cell, articulated from the following episode by changes of scoring, dynamics, register and texture. By specifying first and second endings, Haydn showed some concern for connecting the refrain functionally to the remainder of the work, and Beethoven sometimes blurred the structural joint between refrain and episode (Quartet op.132).

With the growing sense of tonic-dominant polarity in the Classical period, it is natural that we find most first episodes (except in Haydn's earlier works) in the dominant. As in sonata-allegros, the transitions developed from perfunctory bridges to passages of melodic, harmonic, rhythmic and textural interest; sometimes transition material (which is often merely figural) is derived from the main theme, or it may even anticipate the episode theme. The episode itself may contain a thematic complex, a single new theme, no distinct theme at all, a transposed statement of a refrain idea or one derived from it (again parallel to the contemporary development of the sonata-allegro). There may be a separate closing unit confirming the new tonality.

In rondos of the early Classical period, returns of the refrain were usually literal. Later, altered versions prevail, characterized by variation, rescoring, extension and even transposition (partial or complete). Mozart, whose initial refrains are often cast in an extended *ABA* pattern, sometimes restricted intermediate statements to the *A* section only. Beethoven, for example in his Violin Concerto, sometimes placed final statements of the refrain in remote keys.

Second and later episodes usually enter without preparation (like the trios of minuets) in the earlier rondos of Haydn, Mozart and Beethoven. Later, the refrain statement is often reshaped to connect with the ensuing episode. All three composers began by placing the episode in the closest related keys (apart from the dominant) – the submediant, tonic minor and subdominant; later they expanded the range of options, and the number of keys touched upon increased parallel with the growth of thematic development. Changes of metre and tempo, rare in the rondos of Haydn or Beethoven, appear in several Mozart works (Violin Concertos K216, 218, 219; *Serenata notturna* K239; Piano Concertos K271, 415/387*b*, 482), emphasizing the form's essentially sectional nature. Central episodes of closed design (binary or ternary) are common, and within them there may appear contrasting material, a derived theme, or virtuoso passage-work. Particularly important is the tendency to incorporate developmental techniques, including eventually fugato, canon, inversion and double counterpoint (sometimes alongside new material); Haydn preceded Mozart in the use of such techniques.

The coda, at first merely a cadential tag, later became an additional development section of considerable length and intricacy. Haydn, Mozart and Beethoven all on occasion digressed to the minor mode and to other keys (the subdominant being particularly favoured), and they often injected development of a humorous character, marked by unexpected rests, tempo fluctuations, scoring and dynamic contrasts, tremolos and similar devices (for example Haydn, Symphony no.102). Recalling the *stretta* sections of Viennese *opera buffa* finales, Beethoven in particular sometimes changed the metre and accelerated the tempo at this point and, primarily in codas of concerto rondos, even introduced new themes.

Analogous to its inclusion as a component in a multi-movement instrumental composition, the rondo appears on occasion as a number in an opera. Act 2 of Haydn's *Lo speziale* (1768), for example, concludes with 'Colla presente scrittura privata', a quartet cast as a dramatically

conceived variation rondo (beginning *un poco Adagio*) with appended Presto. Concluding Act 1 of Mozart's *Idomeneo* (1781) is the magnificent, French-inspired choral *ciaccona* 'Nettuno s'onori!'. In*alla turca* style, Osmin's gloating solo rondo 'O, wie will ich triumphieren' adds spice to Act 2 of *Die Entführung aus dem Serail* (1782), and Figaro's brilliant 'Non più andrai' crowns Act 1 of *Le nozze di Figaro* (1786).

6. The sonata-rondo. One of the most significant structural innovations of the Classical period is the sonata-rondo, a design confined almost exclusively to finales. The specific components of a sonata-rondo have been, and remain, the subject of disagreement. In this fusion of rondo design with a sonata-allegro tonal plan – which entails the recapitulation in the tonic of the first episode and, possibly, the replacement of the contrasting central episode with a development of earlier material – Mozart, Haydn and Beethoven created some of the most complex finales of the period. Mozart, in the String Quartet K157 (1772–3), composed the first known sonata-rondo; during the remainder of his career he refined the form, experimenting with a wide range of structural possibilities. Haydn adopted it somewhat later (Symphonies nos.64, 66 and 69 of the 1770s in one view; Symphony no.77, 1782, in another) and used it relatively sparingly. For some authorities, however, the number increases significantly when one entertains a broader, more flexible notion of sonata-rondo based on 18th-century compositional practice rather than 19th-century *Formenlehre* writings. Fisher (1992), for example, argues compellingly that Haydn 'is exploring a spectrum of possibilities that does not take into account the conventional distinction between the rondo and the sonata-rondo'. In a compositional tour de force, for ten of the 12 London symphonies Haydn crafted some of the most unusual, complex, yet immediately appealing rondos and sonata-rondos of the period. Like Mozart, Beethoven wrote many sonata-rondos, using techniques of surprise to enliven a relatively standardized design. The general plan of a sonata-rondo is as follows:

A: the main theme (refrain); in spite of increasing length and complexity, it was normally treated as a self-contained unit with a cadence in the tonic.

B: the first episode, usually in the dominant (or relative major in a minor-key movement); analogous in function to the second group in a sonata exposition.

A: the first return; it may be literal, varied, abbreviated, rescored, extended or even transposed.

C: the second episode, usually starting in the tonic minor, submediant or subdominant; it may range from a closed, contrasting substructure to a complex contrapuntal development.

(*A*): this and subsequent returns may be omitted (Mozart ultimately favoured this abbreviation: *ABACB¹A*, coda).

B¹: recapitulation in the tonic of material from the first episode; it may be an exact recapitulation, or the material may be rearranged, compressed or extended, and in the mature music of Haydn, Mozart and Beethoven it is normally rescored.

(*A*): the final return; usually omitted or telescoped with the coda by Haydn and Beethoven.

Coda: it may range from a cadential flourish to an additional development.

In early sonata-rondos, Mozart often included a fourth episode, so that the structure stretched to a nine-section *ABACADAB¹A*. A fascinating aspect of his personal evolution is his move from these multi-*couplet*, sectional sonata-rondos to a concise, complex and integrated form of the pattern *ABACB¹A*.

The sonata-rondo in the concerto created further complications and offered the composer special challenges and opportunities. Mozart's piano concertos provide a particularly fertile field for study, their composer facing such problems as the feasibility of a double exposition, the presentation and subsequent role of a solo entry theme, the rearrangement and consolidation of the recapitulation, the placing of one or more cadenzas, and the transformation of the coda from a closing ritornello to an additional development.

In addition to their rondos and sonata-rondos, each composer produced several examples of finales that cannot firmly be assigned to any one formal category. Some are clearly experimental (Beethoven, First Symphony); others are consummate fusions of the composer's most mature techniques (Beethoven, String Quartets opp.130, 135). Some fall in the rondo sphere, but whether or not they are strictly sonata-rondos is open to debate (Haydn, Symphonies nos.88, 101); Haydn in particular often incorporated sonata procedures in rondos that lack the sonata-rondo recapitulation. Of special interest are Mozart's Rondo K485 and the finales of Haydn's Piano Trio HXV:14 and Mozart's Serenade K525, which by generally accepted criteria are in sonata form. The composers themselves, however, specifically marked the movements 'Rondo'. In conjunction with essays by Kollmann and Momigny, the impression emerges that to the later 18th century the term 'rondo', for more recent theorists purely a formal pattern, implied something less definite – a theme type, a character designation specially appropriate for the finale of a work in several movements.

7. The independent rondo. C.P.E. Bach was not the only composer of the Classical period to write independent rondos. Mozart, in addition to his substitute works (K382, Rondo K269/261*a*), created memorable examples in the F major Rondo K494 and the great A minor Rondo K511, a rich, chromatic outpouring that foreshadows the piano genre pieces of the 19th century. The Adagio and Rondeau for glass harmonica and four other instruments (K617), Mozart's only independent instrumental rondo with slow introduction, seems to be related in form to his vocal scenas, which consist of a recitative and aria *en rondeau* (such as K255, 374, 416). His arias marked 'Rondò', however, belong to a different category (*see* Rondò). In his early years, Beethoven composed several independent rondos for piano including the lyrical op.51 no.1 and the wild, brilliant, Hungarian *Rondo a capriccio* (op.129), a rondo in the improvisatory style of the fantasia.

Noted by Czerny as one of the few forms that can stand independently, the rondo flourished as a separate composition in the 19th century, particularly as a virtuoso, bravura piece. Dussek, Hummel, Weber, Kalkbrenner, Moscheles, Herz, Thalberg and others left many examples, of which the titles alone indicate their primary purpose: 'Rondeau brillant' is typical. Further qualifying terms alert the listener to the composers' intentions to simulate national flavour (Spanish, Polish, Russian), exploit a popular tune, or capture a mood (pastoral, sentimental, military). Primarily but by no means exclusively for piano,

these freely, often loosely constructed display vehicles were commonly framed by an arresting introduction and a breathlessly rushing coda.

The great composers too were receptive to this aspect of the continuing vogue for rondos. Schubert wrote an Adagio and Rondo concertante for piano, violin, viola and cello (D487), as well as examples for solo piano (D506), piano duet (D608) and piano and violin (D895). Chopin's first published composition was a rondo (op.1) which he followed with a *Rondo à la Mazur* (op.5) and two other rondos (opp.16, 73). Liszt based a virtuoso *Rondeau fantastique* on an allegedly Spanish tune, 'El contrabandista', and Mendelssohn wrote the famous *Rondo capriccioso* for piano (op.14, with introduction) and the *Rondo brillant* for piano and orchestra (op.29).

8. THE RONDO IN THE 19TH AND 20TH CENTURIES. Although rondos were composed in smaller numbers in the 19th century than at the end of the 18th, the form remained current throughout the 19th century, especially in the concerto. Most composers retained the scheme perfected by Haydn, Mozart and Beethoven. Schubert was a notable exception. In his early years he favoured an *ABABA* design, rarely using the more common *ABACA* pattern or the sonata-rondo. Like his Viennese predecessors, he occasionally placed returns of the refrain in keys other than the tonic: in the second movement of the Piano Sonata D537, for example, the first return is in the flat supertonic. He also favoured lengthy, tonally complex episodes. In his later sonatas he perpetuated the *ABABA* form for slow movements, but for finales he preferred the *ABACA* design (D850, 894) and the sonata-rondo (D845, 958, 959, 960). Some of these are extremely long: the sonata-rondo of D958 takes 717 bars. Initial refrain statements became extended complexes, which Schubert altered on their return. Unlike Haydn and Beethoven, who usually wrote lengthy second (central) episodes, Schubert laid more weight on the first episode. In the finale of the celebrated Sonata in B♭ (D960), the central episode fills 58 bars, the refrain 73 and the first episode 152; the episode material is organized into two distinct and harmonically dazzling groups, the first basically in the major mode, the second in the minor. Having devised such magical relationships, Schubert was content to restate them almost literally in the recapitulation.

Of composers closer to Beethoven's legacy, Schumann extended the range of tonal possibilities for episodes; the sonata-rondo of 'Aufschwung' from the *Fantasiestücke* (op.12), for example, has a singular tonal plan. The *moto perpetuo* finale of the G minor Sonata (op.22) contains notable instances of the false reprise, while the first episode, in B♭, is recapitulated in E♭. Brahms made much use of the rondo and the sonata-rondo, especially in finales. Elegantly proportioned examples grace several of his works from the Piano Sonatas opp.1 and 5 to the Sonata for piano and clarinet (viola) op.120 no.1. Not surprisingly, Brahms's compositional practices recall those of Mozart and Beethoven in many ways. Most of his rondo finales are in duple metre; most are in major keys. Of those in minor keys, the 'Rondo alla zingarese' from the Piano Quartet op.25 remains in the minor throughout. More often, as in the Piano Concerto no.1, they conclude triumphantly with a substantial portion in the major. For the perpetuation of other familiar practices, see the non-tonic beginning in the Piano Concerto no.2, and the change of metre in the central episode of the Violin Concerto, as well as its accelerated coda. At the same time, as in the Piano Quintet op.34 and the String Quartet op.51 no.2, Brahms's own singular approach to form-building yields structural results that elicit almost universal praise from a host of present-day analysts who, however, appear unable to reach consensus upon the formal category of the movements in question. Mendelssohn employed the sonata-rondo as finale in his two piano concertos (opp.25, 40) and the Violin Concerto, all of which open with movements in the minor mode. Each finale, however, is in the major. Introductions precede the refrains in the Piano Concerto no.1 and the Violin Concerto, while the abbreviated first return of the latter is in the mediant. Tchaikovsky's Violin Concerto and Grieg's Piano Concerto in A minor are other celebrated concertos with rondo finales, the latter a sonata-rondo with a contrasting central episode and an accelerated, strikingly transformed coda in A major.

Standing somewhat apart are those late 19th- and early 20th-century compositions in which the rondo principle is operative in a broad sense. Perhaps the most famous example is Richard Strauss's *Till Eulenspiegels lustige Streiche nach alter Schelmenweise, in Rondeau form.* In fact rondo, symphonic development and variation unite in as free an adaptation of the Classical rondo as Strauss's adaptation of sonata-allegro had been in earlier tone poems. Mahler's Fifth Symphony concludes with a Rondo-Finale, a gigantic structure with an introduction in tempo and accelerated close. The third movement of the Ninth Symphony, Rondo-Burleske, is another free and expansive treatment of the Classical rondo.

The rondo and sonata-rondo have survived in the 20th century in the works of composers influenced by the traditions of the Classical period. Prokofiev provides some excellent examples. In the sonata-rondo finale of his Piano Sonata no.4 (C minor, finale in C major), the refrain is a discrete cell with an anacrusis recalling Beethoven's Piano Sonata op.2 no.2; the rushing tempo slackens in the central episode, and there is a brief codetta. The sonata-rondo finale of his Piano Sonata no.6 (A major, finale largely in A minor) unfolds as a wonderfully asymmetrical arch. In his Piano Sonata no.9, the refrain is open, tempo fluctuations reinforce the articulation of each episode, and the coda is a further development. Bartók superbly realized the independent rondo in 20th-century terms in his Three Rondos on Folktunes (1916–27). In the Piano Sonata (1926), he achieved an effective fusion of monothematic sonata-rondo and variation in a folklike finale that recalls Haydn, while in the Piano Concerto no.3 he created a rondo with brilliant fugal episodes. Perpetuating the Viennese fondness for the design, Berg included splendid rondos in *Wozzeck* (Act 1 scene v and Act 2 scene v), the Lyric Suite (2nd movement) and the *Lulu* suite (1st movement). Although entitled *Rondo ritmico*, the Chamber Concerto finale does not conform structurally to normally accepted criteria for rondo form. Further examples of the wide range of techniques employed in 20th-century rondos are furnished by Stravinsky in the Concerto in D for strings (1946), Piston in the String Quartet no.3 (1947), a model sonata-rondo, and Hindemith in the Sinfonietta in E (1949). Moving further afield from the western European art music traditions, several compositions – among them Alberto Ginastera's *Rondo sobre temas infantiles argentinos* op.19 (1947) and Duke Ellington's *Concerto for*

Cootie (recorded in 1940) – confirm the widespread distribution and continuing vitality of the rondo.

MALCOLM S. COLE

Rondò (It.). A term that has come to signify a type of two-tempo aria that became popular in the late 18th century, and which refers both to a musical form and to its content (*see* ARIA, §4). As a form, the rondò begins with an opening slow section, often laid out in an *ABA* pattern, which gives way to a faster section, and its text, in which a new theme is established (sometimes a variation of the opening section's *A* theme). The main themes of either the fast or slow sections (or both) are usually assigned 'gavotte' rhythms, and sometimes the main theme of a rondò's slow section, and its text, will recur in the aria's second half. In the opera, these arias are generally assigned only to the prima donna or primo uomo and strategically placed close to the concluding scene or to the final number of a three-act opera's second act.

Early instances of the rondò emerged during the 1760s and 70s in the operas of such composers as J.C. Bach, Baldassare Galuppi, Niccolò Piccinni and Traetta, with later examples from composers such as Cimarosa, Mozart, Paisiello and Sarti.

The term 'rondò' was often used loosely, along with 'rond' and 'rondeau', terms frequently applied to what is now identified as the vocal rondò with a recurring theme in the tonic key that creates the basic pattern *ABACA*. Arias identified by any of these terms tend to express moments of high emotional intensity, unless singled out for a specific comic effect, as with Mozart's rondo 'Ha! wie will ich triumphieren' (*Die Entführung aus dem Serail*). This special usage, coupled with the tendency of the theme of the slow section of the rondò to recur in a new guise in the fast section, suggests a link between the rondo and the rondò, a closeness that is strengthened by the practice of casting the episodes of the rondo in a new tempo or by bringing back the main theme of the first section of a two-tempo rondò as a partial quotation in the second half, both in the tonic key and at the original slow tempo. 18th-century usage also suggests that a two-tempo aria could attain 'rondò' (or 'rondeau') status through content alone. Mozart's 'Non mi dir' (*Don Giovanni*), for example, an unquestioned rondò of profound emotional content assigned to the tragic heroine immediately before the opera's last finale, does not comply in all respects to the formal specifications of the rondò given above.

Since 'rondò' identified an aria of special distinction, composers were not above appealing to the vanity of their singers by assigning the term to arias that were clearly not rondòs in form, content or placement. In 19th-century opera, the form of the rondò became modified and its musical content expanded, the term often being applied loosely to any second-act aria for a principal singer in a two-act opera.

DON NEVILLE

Ronell, Ann [Rosenblatt, Ann] (*b* Omaha, NE, 25 Dec 1908; *d* New York, 25 Dec 1993). American composer, lyricist and librettist. She graduated in music and literature from Radcliffe College in Cambridge, Massachusetts; her teachers included Ballantine, A.T. Davison, Piston and Gershwin. She began her career teaching music, coaching singers and working on Broadway as a rehearsal pianist. Her many popular songs, *Baby's Birthday Party* (1930), *Candy Parade* (1931) and *Willow weep for me* (1932), brought her to Hollywood, where she was under contract at RKO Studios. At the request of Walt Disney she created the published version of *Who's afraid of the big bad wolf* from the hit Disney cartoon *Three Little Pigs*. She became the first woman to work as a music director and composer for motion pictures. Ronell was also a pioneer in what became known as 'opera in the American manner', most notably in her co-adaptation of Flotow's opera *Martha*, published in 1940. The aim was to render opera more accessible to the general public in America by not merely translating but rewriting the text in English and adapting the staging to that of the time, while preserving the music, settings and essentials of the original libretto. Her librettos include *Gypsy Baron* (1943). Her musical style was eclectic, drawing upon both popular and modern symphonic influences. Her husband was the film producer Lester Cowan.

WORKS
(*selective list*)

Songs: Baby's Birthday Party, 1930; Candy Parade, 1931; Let's Go Out in the Open Air, 1931; Rain on the Roof, 1932; Willow weep for me, 1932; Palooka, 1933, collab. J. Burke; Who's afraid of the big bad wolf, 1933, collab. F.E. Churchill; Andy Panda, 1939; The Commandos' March, 1943, collab. L. Gruenberg; The Infantry March, 1945; Linda, 1945; Hondo, Hondo, 1953, collab. H. Friedhofer

Stage: The Magic of Spring, 1935; Martha, 1938, collab. R. Lert and V. Baum [adaptation of op by Flotow]; The Chocolate Soldier, 1941, collab. O. Strauss; Count Me In, 1942; Oh! Susanna, 1947 [adaptation of song by Foster]

Film scores: Algiers, 1938; The Story of G.I. Joe, 1945, collab. L. Applebaum; One Touch of Venus, 1948; Main Street to Broadway, 1953

LESLIE N. ANDERSEN

Ronettes, the. American pop vocal group. Its members were Veronica 'Ronnie' Bennett (later Ronnie Spector; *b* New York City, 1 Aug 1943; lead vocals), Estelle Bennett (*b* New York City, 22 July 1944) and Nedra Talley (*b* New York City, 27 Jan 1946). Formerly known as the Dolly Sisters and Ronnie and the Ronettes, they linked up with the producer and songwriter Phil Spector (1963), and made some of the most enduring recordings of the 'girl group' genre. Surrounding the heavy vibrato and 'abrasive whine' of Ronnie Bennett (whom Spector later married) and with an orchestra dominated by massed acoustic guitars and horns, Spector created several remarkable 'little symphonies for the kids' as he described them. The Ronettes' first hits using this sound were *Be my baby* and *Baby I love you*, both by Ellie Greenwich and Jeff Barry. These were followed by *(The Best Part Of) Breaking Up* by Vinnie Poncia and Peter Anders and *Walking in the Rain* by Greenwich and Barry. The group split up in 1966 and Ronnie Spector pursued an intermittent solo career whose highlight was *Take me home tonight* (1986), a duet with Eddie Money which was a hit single in the USA. (R. Spector and V. Waldron: *Be My Baby*, New York, 1990)

DAVE LAING

Ronga, Luigi (*b* Turin, 19 June 1901; *d* Rome, 11 Sept 1983). Italian musicologist. After taking an arts degree at the University of Turin, he studied musicology at Dresden. On his return to Italy he taught music history at Palermo Conservatory (1926) and in Rome at the Accademia di S Cecilia and the Pontificio Istituto di Musica Sacra (from 1930), before being appointed lecturer (1938) and professor (1958–71) at the university. He received his *libera docenza* in 1930. He was editor of *Rassegna musicale* (1928–9) and *Rivista musicale italiana* (1954–5), and also served as president of the Istituto Italiano per la Storia della Musica, and as a member of the Accademia di S Cecilia and the Lincei. Ronga's early period abroad afforded him contact with German musicology and he acquired a grounding unusual for Italian musicologists of his generation. He was highly thought of by Italian scholars of other disciplines, an asset which furthered his efforts to reconcile their attitudes towards music (based, as were his own, on the aesthetic teaching of Benedetto Croce) with the more intellectual German approach, but which he attempted to accomplish by employing a language that is non-technical.

CAROLYN GIANTURCO

Ronger, Florimond. *See* HERVÉ.

Ronghe, Albericus de. Flemish musician. A volume of five-part pieces for voices and instruments, now thought to be by MICHAËL DE RONGHE, has been attributed to him.

Ronghe, Michaël de (*b* Antwerp, 30 Oct 1620; *d* ?Hemiksem, nr Antwerp, 8 Jan 1696). Flemish composer. He entered the Cistercian abbey of St Bernard at Hemiksem on 5 August 1640 and was ordained on 17 March 1646. For much of his life he was choir director ('cantor perpetuus') of the abbey and in this capacity compiled several choirbooks after a fire in 1672. He was probably the composer of a lost volume of five-part pieces for voices and instruments, *Nardus odorifera, harmonica, dorica, fugata, opus integrum musicum* (Antwerp, 1663), which (following Bouvaert) has traditionally been attributed to Albericus de Ronghe (1615–66), a sometime colleague at St Bernard who published two devotional works; in one of them he is referred to as an able organist.

GODELIEVE SPIESSENS

Ronnefeld, Peter (*b* Dresden, 26 Jan 1935; *d* Kiel, 6 Aug 1965). German composer and conductor. He studied composition with Blacher at the Berlin Musikhochschule (1950–54) and with Messiaen at the Paris Conservatoire (1954–5). In 1955 he won first prize in the Hilversum Conducting Competition and began teaching in Salzburg, later becoming assistant to Dorati and Wallberg at the Salzburg festivals. Between 1958 and 1961 Ronnefeld was Karajan's assistant at the Vienna Staatsoper and harpsichordist with the Vienna Concentus Musicus. He was then chief conductor at the Theater der Stadt, Bonn (1961–3), and finally Generalmusikdirektor in Kiel. As a

conductor, of contemporary music especially, he appeared in several German cities and in Copenhagen as well as on radio and record. His most notable compositions are for the theatre: they display forceful character through advanced compositional technique and a brilliant use of stylistic parody.

WORKS

Stage: Peter Schlemihl (ballet), 1955–6; Nachtausgabe (opera piccola, 5 scenes, Ronnefeld), 1956, Salzburg, 1956; Die Ameise (op, 4, R. Bletschacher and Ronnefeld), 1959–61, Düsseldorf, 1961; Die Spirale (ballet), 1961

MONIKA LICHTENFELD

Ronsard, Pierre de (*b* La Poissonnière, nr Vendôme, 11 Sept 1524; *d* Priory of St Cosme, nr Tours, 27 Dec 1585). French poet. He was the leader of the literary group known as the Pléiade. He entered court life at the age of ten when his father secured for him the position of page to the dauphin François; after the dauphin's death in 1536, he entered the service of Charles, Duke of Orléans but soon afterwards was sent to Scotland as a member of the retinue of Madeleine, the duke's sister, when she married James V in January 1537. Madeleine died seven months later, but Ronsard remained in Scotland until James's marriage to Marie of Guise the following year. In 1539 he returned to France, but withdrew from court to study Greek and Latin literature with Jean Dorat at the Collège de Coqueret. His fellow pupils included Belleau, Baïf and Du Bellay whose *Défense et illustration de la langue française* (Paris, 1549) was the first published manifesto of the ideals of the Pléiade. The first important creative fruits of the group were Ronsard's five books of *Odes* (1550–52), modelled on Horace and Pindar, and the Petrarchan sonnets *Les Amours* (1552–3); as a result of these and subsequent successes he was drawn back into court circles and enjoyed the protection of Charles IX and his sister Marguerite. He received an annual stipend and the benefices of two priories.

At court Ronsard collaborated with various musicians in devising entertainments for Mary Stuart, Catherine de' Medici, Charles IX and later Henri III. Nicolas de La Grotte published settings of his *Chant triomphal*, celebrating the victory at Jarnac in 1569, *Stances prontement faites pour jouer sur la lyre* and *Pour le trophée d'amour* which was presented as an *intermède* between the acts of *Belle Genievre*, a comedy translated from Ariosto and performed at Fontainebleau in February 1564. In 1571 two lyre players or lutenists 'recited' to Charles *Le Soleil et nostre Roy*, which survives in a four-voice setting by Fabrice Marin Caietain published in 1576. After Charles's death in 1574 Ronsard became less involved with court life but he continued to write and published a new collection of love poems, *Sonnets pour Hélène*, in 1578. His funeral was commemorated with a requiem mass composed by Jacques Mauduit.

Like those of most of his humanist contemporaries Ronsard's verse frequently refers to music, but although it is permeated by the idea of music as a metaphor for poetic composition it reveals no real evidence of practical skill or knowledge. In fact, although a near-contemporary account of his life states that he 'liked to sing and to hear his verse sung' (C. Binet: *Vie de P. de Ronsard*, Paris, 1587, p.45), and despite his advice to his disciple Delbene to sing his verse aloud (*Abbregé de l'art poétique françois*, 1565), Ronsard himself admitted that he rarely sang as he had 'a poor voice'. He may have been capable of playing a little on the flute, guitar or viol, and it is possible that his frequent allusions to the lyre had a practical significance: in 1569 he described in great detail a lyre given to him by Jean Belot, and claimed to have learnt a little strumming ('petit fredon') and bowing, while in other cases he may have been referring to the reconstructions of the ancient instruments attempted by the manufacturer Potin for Thibault de Courville. Most of the musical references in his work, however, are neo-Platonic, using, for example, the imagery of musical instruments to symbolize the subject and tone of the poem (the lyre, lute, guitar or harp for the lyrical, the flute, flageolet, chalumeau, cornemuse, musette for the pastoral) with figures from ancient mythology to lend authority to the ideas expressed. In 1560 he wrote the dedication to François II of an important anthology of chansons and later revised it for a second edition addressed to Charles IX (RISM 1572[2]); the philosophic arguments used to convince the king of the benefits of music – notably its moral virtues and its modal 'effects' – are substantially those of Plato, Plutarch and Boethius, but Ronsard claimed that the compositions of Lassus had surpassed all those of the ancients, including even Josquin and his disciples. Elsewhere in his poetry Ronsard extolled virtuoso performers such as Alberto da Ripa, Alfonso Ferrabosco (ii) and the castrato Estienne Le Roy.

Between 1552 and 1600 more than 200 of Ronsard's poems were set to music, some of them many times, by more than 30 composers. Collections particularly favoured by musicians include the *Odes* (1550–52) which abound in lyrical metaphors, the *Amours* (1552–3) addressed to the Florentine Cassandre Salviati, the *Amours* (1555–6), less italianate and more sensual in expression, addressed to the Angerin Marie, the humorous *Folastries* (1553), the pastoral *Bocage* (1554), the Anacreontic *odelettes* and chansons of the *Meslanges* (1554–5) and the lyrical pieces for court entertainment *Elégies, mascarades et bergeries* (1565) (all ed. P. Laumonier, *Oeuvres complètes*, Paris, 1914–75). In the preface to his first book of odes he explained that he had taken great care to give the poems a metrical regularity so that they could be set to music. This mystique of the union of poetry and music stemmed from the attempt to re-create classical lyricism in which Ronsard was encouraged by his friend Marc-Antoine de Muret, whose setting of the ode to Cassandre, *Ma petite colombelle*, was published in July 1552. The first book of *Amours*, which appeared two months later, contained an appendix of nine four-voice settings by Muret, Janequin, Certon and Goudimel. Four of these pieces were presented as polyphonic *timbres* suitable for other sonnets of similar structure; thus Janequin's setting of *Qui voudra voir* provides a model for 92 other poems with the same rhyme-scheme and his *Nature ornant* for another 59. The same principle applies to the multiple strophes of the Ode to the Chancellor Michel de l'Hôpital and the 'Hymne triumphal' lamenting the death of Margaret of Navarre (1549), both set for

four voices by the young Goudimel. In the preface Ambroise de La Porte explained that Ronsard had taken care to measure his verse 'à la lyre', while the poet himself, in his *Abbregé de l'art poétique françois*, stressed the musical advantages of strophic regularity with short lines and alternating masculine and feminine rhymes. Significantly, none of his political or epic verse, which does not have these characteristics, was set to music.

The chanson anthologies published at Paris in the 1550s and 1560s included polyphonic settings by Goudimel, Arcadelt, M. Blancher, P. Durand, Estienne Du Tertre, Entraigues, Nicolas Millot, François Roussel and Guillaume Costeley. In 1559 Pierre Clereau set five Ronsard texts for four voices and seven for three; the latter were reprinted in 1566 in a collection entitled *Premier livre d'odes de Ronsard*. Clereau published a second book of three-voice settings of the odes in 1566 and both books were incorporated into a new edition in 1575. Ronsard's name figures again (alongside that of Desportes) on the title-page of Nicolas de La Grotte's four-voice chansons of 1569. During the 1570s Flemish composers (notably Lassus, Monte, Jean de Castro and François Regnard) became increasingly interested in Ronsard's work, as did provincial French composers such as Guillaume Boni, Jean de Maletty, Antoine de Bertrand and Blockland; a number of these published collections consisting entirely of settings of Ronsard's poems. Although monophonic settings by Jehan Chardavoine and homophonic *airs* by Didier Le Blanc, Caietain, Le Jeune and Bonnet appeared during the last quarter of the century, Desportes eventually supplanted Ronsard in popularity.

Clereau's settings of the odes and Boni's settings of the sonnets were reprinted in the early 17th century by Ballard, but Ronsard's poetry, condemned by Malherbe, soon fell into oblivion. Its revival in the 19th century gave rise to settings by many composers including Wagner (1840), Victor Massé (1849), Bizet (1866) and Gounod (1872); 20th-century settings of his verse include works by Casella (1910), Honegger (1924, 1945), Frank Martin (1930), Roussel (1924), Poulenc (1925, 1935), Milhaud (1934, 1941), Dukas (1935), Florent Schmitt (1940) and Lennox Berkeley (1947).

FRANK DOBBINS

Ronstadt, Linda (Maria) (*b* Tucson, AZ, 15 July 1946). American pop and country singer. As a teenager Ronstadt left home and moved to Los Angeles, working and making her first recordings with Bob Kimmel (whom she met while studying at Arizona State University) and Kenny Edwards as the Stone Poneys. Her earliest solo albums are excellent examples of country-rock, and the emotive 'Long, Long Time' (from *Silk Purse*, Cap., 1970) received a Grammy nomination. Subsequent releases included material by Buddy Holly, the Everly Brothers, Roy Orbison, Bob Dylan and Jackson Browne, as well as characteristic versions of rock and soul hits. In 1980 she played Mabel in the 1980 New York Shakespeare Festival production of *The Pirates of Penzance*, which later transferred to Broadway. During the mid-1980s she released three albums of popular standards recorded with Nelson Riddle – *What's New?* (1983), *Lush Life* (1984), *For Sentimental Reasons* (1986) – featuring arrangements written by Riddle in the 1950s for Frank Sinatra and Ella Fitzgerald. *Canciones de me padre* (1987) is a collection of *mariachi* and *ranchera* songs in tribute to her Mexican roots. She won both Grammy and Country Music Association awards for the album *Trio* (WB, 1987), recorded with Emmylou Harris and Dolly Parton.

Though mostly associated with the burgeoning West Coast country-rock scene from which she emerged in the late 1960s, Ronstadt has consistently shown a spirit of musical adventure. While drawing on a wide range of sources she always gives stylized and passionate performances. Determined to resist labels and challenge preconceptions, Ronstadt's commercial success and frivolous persona have at times detracted from some genuine achievements.

LIZ THOMSON

Rontani, Raffaello [Rafaello] (*b* ?Florence; *d* Rome, 1622). Italian composer. He is called 'Florentine' by the editor of an anthology in which his music appears (RISM 1629[9]). From 1610 he was a musician in the service of Antonio de' Medici in Florence. From 1616 until his death he was *maestro di cappella* of S Giovanni dei Fiorentini, Rome, and while in Rome he seems also to have served at least two noblemen as a musician; for example, he mentions in the dedication of his op.6 that he is 'capo del . . . concerto' of Duke Sforza. He appears to have been one of the most popular Italian composers of his time of secular vocal chamber music, particularly solo songs: half of his books of *Varie musiche* were reprinted (the first one twice), and nearly a third of their contents also survive in manuscript. The six books contain a total of 97 pieces, some 60 of which are monodies. Most of them are strophic songs (in the later books, also with tablature for guitar), and it is these in particular that seem to have been found attractive.

Although Rontani is not a very appealing melodist it is easy to see that his long curving lines, lively rhythms and subtle phrasing (ex. in Fortune, 1968/*R*) could excite admiration. He published all but the first of his books after he had moved to Rome, and indeed in style and content they are more Roman than Florentine: several of his other songs are strophic variations, which were popular in Rome, and the vocal ornamentation in them is less subtle and more instrumental in nature than that of Giulio Caccini and other Florentine composers. For all his contemporary success and his more interesting qualities, he appears now as a much less rewarding composer of strophic songs than other Italian songwriters of the time such as Calestani and Berti.

NIGEL FORTUNE (with TIM CARTER)

Röntgen. Dutch family of musicians.

(1) **Engelbert Röntgen** (i) (*b* Deventer, 30 Sept 1829; *d* Leipzig, 12 Dec 1897). Violinist. He studied with Moritz Hauptmann and Ferdinand David at the Leipzig Conservatory (1848–53). From 1853 until his death he was a violinist in the Gewandhaus orchestra; he succeeded David as its leader in 1873. He also taught at the conservatory from 1869, and published 'Einiges zur Theorie und Praxis in musikalischen Dingen' in the *Vierteljahrsschrift für Musikwissenschaft*, x (1893).

(2) **Julius Röntgen** (i) (*b* Leipzig, 9 May 1855; *d* Bilthoven, nr Utrecht, 13 Sept 1932). Composer, conductor and pianist, son of (1) Engelbert Röntgen (i). The most celebrated member of the family, he studied composition with Friedrich Lachner, harmony and counterpoint with Hauptmann and E.F. Richter and the piano with Louis Plaidy and Carl Reinecke. He began composing at the age of nine, and in 1869 he made his début as a composer at the Niederrheinisches Musikfest in Düsseldorf with a duo for two violins, performed by his father and Joseph Joachim. After giving concerts in Düsseldorf, Hamburg and Baden-Baden he settled in Cannstatt (1873–4) as accompanist to the baritone Julius Stockhausen. He visited Liszt in Weimar in 1870.

From 1877 to 1925 Röntgen lived in Amsterdam, where he became a piano teacher at the music school in 1878 (the school acquired conservatory status in 1884). From 1912 to 1924 he was director of the Amsterdam Conservatory, succeeding Frans Coenen and Daniël de Lange, and he remained there as a piano teacher until 1926. He succeeded G.A. Heinze as conductor of the choral society Excelsior (1884–6) and Johannes Verhulst as conductor of the Amsterdam Toonkunstkoor (1886–98); he also directed the Felix Meritis concerts for some time. As a pianist, he gave many recitals, was accompanist to the Dutch baritone Johannes Messchaert and Pablo Casals and, with his sons (3) Julius Röntgen (ii) and (4) Engelbert Röntgen (ii), formed the Röntgen Trio before World War I. During his stay in Amsterdam he became friendly with Brahms, who visited the Netherlands in 1884 and 1885; he was also friendly with Grieg, who dedicated his *Lyrische Stücke* op.54 to him (1891). In 1925 he retired to a villa in Bilthoven to spend the remaining years of his life composing and writing; after World War II the Gaudeamus Foundation was established in his house.

A prolific composer, Röntgen belongs to the late Romantic school. His early works show the influence of Schumann (in the Serenade for Wind op.14) and Brahms (in the *Toskanische Rispetti* op.9); in other works a Scandinavian influence can be detected, even in some written before his acquaintance with Grieg. He was also attracted by the folk music of many countries, especially evident in his *Boerenliedjes en contradansen*. In later years the influence of Reger is apparent in his polyphonic works, and the bitonal Symphony of 1930 looks back to Debussy.

His first wife, Amanda Maier (*b* Landskrona, 19 Feb 1853; *d* Amsterdam, 15 July 1894), a violinist, studied at the Stockholm Conservatory and with (1) Engelbert Röntgen (i) in Leipzig.

WORKS

MSS in NL-DHgm

Orch: numerous works, incl. 21 syms.; 7 pf concs., 2 vn concs., 2 vc concs., other concerted works; Toskanische Rispetti

WRITINGS

ed.: *Brahms im Briefwechsel mit Th. W. Engelmann* (Berlin, 1918)

Grieg (The Hague, 1930)

(3) **Julius Röntgen (ii)** (*b* Amsterdam, 20 May 1881; *d* Bilthoven, 23 Jan 1951). Violinist, eldest son of (2) Julius Röntgen (i). A pupil of his mother and later of Cramer and Joachim, he played in various orchestras before settling in New York as a teacher at the Institute of Musical Art. He was a member of the Kneisel Quartet. On his return to the Netherlands he became a member of various chamber music societies and chief professor at the Amsterdam Conservatory.

(4) **Engelbert Röntgen (ii)** (*b* Amsterdam, 12 Aug 1886; *d* 's-Hertogenbosch, 7 Sept 1958). Cellist, son of (2) Julius Röntgen (i). He studied with Mossel in Amsterdam, Klengel in Leipzig and finally with Casals. He became solo cellist of the opera in Rostock, later in Zürich and from 1912 to 1914 in Vienna (Hofoper). As a cellist with the Damrosch orchestra he visited the USA, where he became chief professor at Mannes College of Music. Finally he was appointed solo cellist of the Metropolitan Opera in New York.

(5) **Johannes Röntgen** (*b* Amsterdam, 30 Sept 1898; *d* Amsterdam, 28 April 1969). Pianist, conductor and composer, son of (2) Julius Röntgen (i). He was taught the piano by his father and then studied composition and orchestration with Johan Wagenaar at the Amsterdam Conservatory and conducting with Tovey at Edinburgh University. From 1922 to 1924 he was Kapellmeister of the opera in Ústí nad Labem. He also appeared many times as a concert pianist and as an accompanist of such famous musicians as Casals, Manén and Marteau. In 1928 he settled in Amsterdam as a pianist, conductor and teacher. He taught the piano at the conservatory (1943–63) and for a long time directed the Amsterdam Vocal Quartet and various choirs. He formed a trio with his younger brothers Edvard Frants (*b* Amsterdam, 12 June 1902; *d* Meran, 14 Sept 1969) and (6) Joachim Röntgen. He composed chamber music (including a string trio, a piano trio and cello sonatas), a piano sonatina (1952) and a quantity of vocal music.

(6) **Joachim Röntgen** (*b* Amsterdam, 27 Oct 1906). Violinist, youngest son of (2) Julius Röntgen (i). He studied with Felix Togni in Amsterdam, Bram Eldering in Cologne and Flesch in Leipzig. From 1928 he was the leader of the city theatre orchestra in Winterthur, a teacher at the conservatory there and the leader of the Winterthur Quartet. He was a violinist in the festival orchestra in Lucerne under Toscanini (1938–9). In 1939 he became a violin teacher at the Royal Conservatory in The Hague, and the following year he founded the Röntgen Quartet. He retired in 1972.

ROGIER STARREVELD

Ronzi de Begnis [née Ronzi], **Giuseppina** (*b* Milan, 11 Jan 1800; *d* Florence, 7 June 1853). Italian soprano. She made her début at Bologna in 1816 and in the same year married the bass Giuseppe De Begnis. The following season she appeared at Genoa, Florence and Bergamo. In 1818 she sang Ninetta (*La gazza ladra*) at Pesaro. From 1819 to 1822 she appeared at the Théâtre Italien, Paris, where she sang Rosina in the first Paris performance of *Il barbiere di Siviglia* (1819). She made her London début at the King's Theatre in 1821 as Fiorilla in *Il turco in Italia*. Having sung in a concert performance of *Mosè in Egitto* at Covent Garden (1822), she took part in a staged version of the work (given as *Pietro l'eremita*) at the King's Theatre later that year. During 1823 she sang in *La donna del lago* and *Matilde di Shabran*.

In 1825 Ronzi De Begnis returned to Italy, and was engaged at Naples. There she sang in the premières of Mercadante's *Zaira* (1831) and of Donizetti's *Fausta* and *Sancia di Castiglia* (1832), *Maria Stuarda* (under the title of *Buondelmonte*, 1834) and *Roberto Devereux* (1837). She also created the title role in *Gemma di Vergy* at La Scala (1834), and sang in *Anna Bolena*, *Parisina*, *Belisario* and *Pia de' Tolomei*. Having sung Giulietta in Zingarelli's *Giulietta e Romeo*, she took the role of Romeo in Bellini's *I Capuleti e i Montecchi*. Her repertory also included *Beatrice di Tenda* and *Norma*, which she sang in English at Covent Garden in 1843. She had great facility of execution and was a spirited actress in both comic and serious opera. A fine Mozart singer, she excelled as Donna Anna.

ELIZABETH FORBES

Roocroft, Amanda (*b* Coppull, Lancs., 9 Feb 1966). English soprano. She studied with Barbara Robotham at the RCM and won the Kathleen Ferrier Prize in 1988. In 1990 she made her operatic début as Sophie in *Der Rosenkavalier* with the WNO at Cardiff. The following year brought débuts at Glyndebourne (Fiordiligi in *Così fan tutte*) and Covent Garden (Pamina in *Die Zauberflöte*). In 1993 she began an association with the Staatsoper in Munich, where she was enthusiastically welcomed and which has seen some of her best work. The operas of Handel and Mozart remained central to her repertory, but she expanded it to include Bellini (*I Capuleti e i Montecchi*), Verdi (*Simon Boccanegra* and *Otello*) and Puccini (*La bohème*). Recitals in leading European cities and concerts with leading orchestras enhanced a reputation which grew rapidly in these years. She was also promoted strongly by her record company, arousing expectations she could not always fulfil. Her career reached a critical point involving the cancellation of her first Arabella, scheduled for Covent Garden in 1996. She reappeared with success as Kát'á Kabanová at Glyndebourne in 1998, but her voice, originally pure, bright and firm, had hardened, gaining penetration at the expense of quality.

On recordings she is represented at her best in the *Così fan tutte* of 1992 with Gardiner, fresh of tone, technically assured and strongly characterized.

J.B. STEANE

Rooke [O'Rourke, Rourke], **William Michael** (*b* Dublin, 29 Sept 1794; *d* London, 14 Oct 1847). Irish violinist and composer. He was the son of John Rourke, or O'Rourke, a Dublin tradesman, and almost completely self-taught in music. In 1813 he took to music as a profession (having altered the form of his name), learnt counterpoint under Philip Cogan, and studied the violin, which he later taught. Among his pupils was Balfe, then a boy. In 1817 he was appointed chorus master and deputy leader at the theatre in Crow Street, Dublin. His vocal piece, *Oh Glory, in thy brightest hour*, was sung by Braham and met with acclaim.

In 1818 Rooke composed his first opera, *Amilie, or The Love Test*, and in 1821 he moved to England. In 1826 he was leading oratorios at Birmingham, and in the same year he went to London and sought the appointment of chorus master at Drury Lane Theatre under Tom Cooke. He was leader at Vauxhall Gardens (1830–33) under Bishop, and established himself as a singing teacher as well. *Amilie* was at last put on at Covent Garden Theatre on 2 December 1837, with some success. On 2 May 1839 Covent Garden produced his second opera, *Henrique, or The Love Pilgrim*, which, although favourably received, was withdrawn after five performances because of an argument with Macready, the theatre manager, who had little patience with or respect for musicians.

WORKS

Amilie, or The Love Test, 1818 (op, 3, J.T. Haines), London, Covent Garden, 2 Dec 1837 (1837)
The Pirate (musical play, W. Dimond, after W. Scott), London, Drury Lane, 15 Jan 1822
Henrique, or The Love Pilgrim (op, 3, Haines), London, Covent Garden, 2 May 1839
Cagliostro (op), unperf.
The Valkyrie (op), ?unperf.
Various songs

W.H. HUSK/W.H. GRATTAN FLOOD/GEORGE BIDDLECOMBE

Rooley, Anthony (*b* Leeds, 10 June 1944). English lutenist. He studied the guitar at the RAM with Hector Quine from 1965 to 1968, and from 1969 to 1971 was on the staff there, teaching the guitar, and later the lute, in which he was self-taught. In 1969, with James Tyler, he founded the CONSORT OF MUSICKE, a group of variable size, based on the instruments played by Rooley and Tyler (plucked instruments and viols), and incorporating other lute and string players, usually with a singer: Martyn Hill was the first to sing regularly with the consort. The group's London début was in 1969, and it has since given many recitals worldwide, generally with a unifying Renaissance theme. In 1972 Rooley became the sole director of the consort. He has also given many solo recitals and is particularly noted as a song accompanist, working with singers who are also members of the consort, notably Emma Kirkby and Evelyn Tubb. Since the 1980s he has been a prominent champion of neglected 17th-century composers of vocal music, both Italian and English; it was in furtherance of this project that he co-founded the recording label Musica Oscura, for whom he has recorded Marenzio, Rore, Stradella, Henry Lawes, John Ward and Maurice Greene. A passionate interest in Renaissance philosophy informs all his work.

DAVID SCOTT/STEPHEN HAYNES

Roosendael, Jan Rokus van [*née* Rokus de Groot] (*b* Zwijndrecht, 6 May 1960). Dutch composer. The brother of the composer and musicologist Rokus de Groot, he adopted his grandmother's maiden name as his surname. He studied at the University of Amsterdam (musicology) and at the Amsterdam Conservatory (composition with Heppener, 1979–86, and instrumentation with Geert van Keulen). Rejecting the cerebral approach of post-war serialism, he sought to regain the ritual aspects of music and to use cyclic principles found in Eastern music. In *Tala*, cyclic drum patterns akin to Indian tabla patterns are confronted with a varied bass pattern derived from the medieval color and talea procedure. In his search for a universal tonal system with the natural logic of folk music, he developed a system of eight *modi*, all of them symmetrical and without chromatic progressions. *Windows* for chamber orchestra gives the listener a broad look at world music, using Chinese, African, Tibetan and Western as well as Indian and Indonesian elements. After it had been selected for the ISCM Festival 1998 in Manchester *Windows* was performed by the BBC PO, conducted by Sir Peter Maxwell Davies. Unlike many other composers Van Roosendael does not imitate world music, but incorporates it in his own musical style.

HUIB RAMAER

Roosenschoon, Hans (*b* The Hague, 17 Dec 1952). South African composer of Dutch origin. He has been resident in South Africa since 1953. He studied at the Conservatory of Music, Pretoria (1969–71, 1974–5), the RAM, London

(1977–8), the University of Stellenbosch (1987–9) and the University of Cape Town (1990–91), receiving the Master of Music and Dmus degrees in composition from the latter two institutions respectively. He was employed by the South African Broadcasting Corporation as a music assistant (1976–7), producer (1979–80) and music manager (1980–95). Since 1988 he has been on the board of directors of the Southern African Music Rights Organization. In 1996 he was appointed a senior lecturer in music theory and composition at the University of the Orange Free State, Bloemfontein; and since 1998 has been the director and head of the conservatory at the University of Stellenbosch.

Roosenschoon's music reflects a personal response to experiences of joy, sorrow, mystery and contradiction, through strong emphases on sound painting, collages of diverse material, structural coherence and the fusion of African elements into his own tonal language. His music is characterized by highly skilled orchestration, rhythmic, thematic and harmonic transformation and development, and textural juxtapositions, frequently involving mixtures of avant-garde and conventional techniques. His predilection for pre-existing popular melodies, themes or compositional fragments, employed both as quotations and in the service of new and original ideas and structures, underscores his music's accessibility and popularity, despite complex designs and intellectual musical thought processes. The majority of Roosenschoon's compositions are for orchestra, although other mediums and genres are fairly represented, notably unaccompanied choir, choir and orchestra, solo piano, different instrumental chamber combinations, and occasionally electronic and pop music. Roosenschoon follows a transformational and multi-level approach to rhythmic and tonal organization by which he obtains coherence, synthesis, variety, contrast and the simultaneous unfolding of different, yet related, ideas.

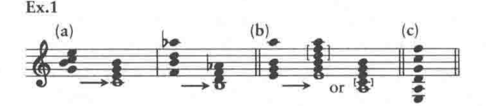
NICOL VILJOEN



Roosevelt, Hilborne Lewis (*b* New York City, 21 Dec 1849; *d* New York City, 30 Dec 1886). American organ builder. He was a member of the prominent New York family which included President Theodore Roosevelt (a second cousin). Roosevelt apprenticed himself to the organ building firm of Hall & Labagh, much against the will of his well-to-do parents, and his first organ was built in their shop in 1869. This was unique in that it was the first in America to be built with electric action. Shortly afterwards he opened his own factory with his brother Frank (*b* Flushing, NY, 2 June 1862; *d* 2 Feb 1895) and quickly established a reputation for high quality and avant-garde ideas. It is doubtful whether the Roosevelts ever had to worry about financial solvency, and were thus able not only to experiment freely but also to use the costliest materials and most skilled craftsmen. Hilborne had an undeniable mechanical gift, making many improvements in mechanical, pneumatic and electrical actions, including the development of a practical combination mechanism. Tonally, Roosevelt organs were influenced by the European Romantic tradition, to the point where some even contained reed stops imported from Cavaillé-Coll, and were among the best American examples of this genre. After Hilborne's death, the business was continued until 1892 by Frank Roosevelt, who then sold his patents to Farrand & Votey. Among his notable instruments were those built for Grace Episcopal Church (1878) and Carnegie Hall (1891) in New York, Incarnation Cathedral, Garden City, New York (1885), and the Auditorium, Chicago (1890).

BARBARA OWEN

Root. In tertiary harmony, such as the major–minor tonal system, the lowest note of a vertical sonority or chord, when the notes of the chord are rearranged as a sequence of 3rds (ex.1*a*). If no rearrangement is necessary the chord

is said to be in root position; if the root is not the lowest note it is said to be in INVERSION. Some chords are built in 3rds but lack one or more notes; these can often be interpolated, and the roots can be determined from the completed structure; occasionally this method produces ambiguities (ex.1*b*). If a chord is based on the superposition of some other interval, for example a 4th, then its root cannot be determined (ex.1*c*).

JULIAN RUSHTON

Root, George Frederick (*b* Sheffield, MA, 30 Aug 1820; *d* Bailey Island, ME, 6 Aug 1895). American composer and music educator. He was taught to play the flute by his father, and also learned other instruments. He spent his boyhood on the family farm, and had his first formal music lessons only at the age of 18 when he went to Boston; he also had singing lessons. After two years he was engaged as an assistant in Lowell Mason's singing classes. In 1841 he began coaching in Mason's teachers' classes and soon started directing regular sessions in vocal technique. In 1844 Root introduced Mason's methods to New York, where he taught at several institutions. He directed the choir of the Mercer Street Church, formed a vocal quartet and in 1846 published *The Young Ladies' Choir*, the first of many choral collections and teaching methods.

Root went to Paris in 1850 to study singing. He returned to the USA in 1851 and resumed teaching. When Mason moved to New York in 1853 Root helped him to organize the first Normal Musical Institute for training teachers. For these classes Root composed *The Flower Queen* (1852), possibly the first secular cantata by an American; it enjoyed considerable popularity, and was followed by similar dramatic cantatas, of which *The Haymakers* (1857) was the most successful. Such cantatas, musically unpretentious but with attractive choruses, contributed to Root's growing reputation as a composer as well as teacher. While in New York he also wrote songs and articles for the *New York Musical Review and Choral Advocate*.

In the 1850s Root began publishing parlour songs, at first under the pseudonym G. Friedrich Wurzel. The first of these was *The Hazel Dell* (1852); other early popular successes were *There's music in the air* (1854) and *Rosalie, the Prairie Flower* (1855). When the Civil War broke out Root was the first composer to respond; *The first gun is fired! May God protect the right!* was issued on 15 April 1861, three days after Fort Sumter was fired upon. He wrote some 30 other war songs, including the immensely successful *Tramp! Tramp! Tramp!* Root also composed hymns and gospel songs, the best-known of which is *The Shifting Shore* (1856). In all Root composed more than 200 songs, exceeding even those of Stephen Foster in number and rivalling them in popular success.

With his publications and his teachers' classes well established, Root abandoned classroom teaching. When his brother Ebenezer Root and C.M. Cady founded the firm of Root & Cady in Chicago in 1858, Root invested funds; in 1860 he became a partner in the firm. In selecting works for publication he urged composers to conform to the severe limitations of range and difficulty he imposed on his own music to make it accessible to the widest public. From 1863 to 1872 he contributed songs and articles to Root & Cady's own periodical, *The Song Messenger of the Northwest*. The firm was almost ruined by the great Chicago fire of 1871 and Root withdrew, but he continued to write and edit educational works and religious song collections. He also collaborated with his daughter Clara Louise Burnham in a series of dramatic cantatas for children. His son, Frederick Woodman Root (1846–1916), was an organist, composer and successful singing teacher, whose publications included *F.W. Root's School of Singing* (1873). He was briefly music critic for the *Chicago Herald* and was for a number of years editor of the *Song Messenger*.

Throughout his career Root remained a layman's musician, thinking of music primarily in terms of singing in the classroom, the church and the home; in his autobiography he wrote, 'I never dreamed of eminence as a writer of music … I am simply one who … makes music for the people, having always a particular need in view'.

WORKS
(*selective list*)

Cants.: The Flower Queen, or The Coronation of the Rose (New York, 1852); Daniel, or The Captivity and Restoration (New York, 1853); The Pilgrim Fathers (New York, 1854); The Haymakers (New York, 1857); Belshazzar's Feast (New York, 1860); *c*19 others, and *c*11 children's cants.

Songs: More than 200, incl. The Hazel Dell (New York, 1852); There's music in the air (New York, 1854); Rosalie, the Prairie Flower (Boston, 1855); The first gun is fired! May God protect the right! (Chicago, 1861); The Vacant Chair (Chicago, 1861); The Battle Cry of Freedom (Chicago, 1862); Just before the battle, mother (Chicago, 1862); Tramp! Tramp! Tramp!, or The Prisoner's Hope (Chicago, 1864); Farewell, father, friend and guardian (Chicago, 1865)

Methods: The Musical Curriculum (Chicago, 1864); The Normal Musical Handbook (Chicago, 1872); Root's Harmony and Composition (Cincinnati, 1892); many collections of hymns, anthems, chants and exercises

DENA J. EPSTEIN/POLLY CARDER

Root & Cady. American music publishers and dealers. Founded by Ebenezer Towner Root and Chauncey Marvin Cady in December 1858, the firm soon became Chicago's leading music dealer and publisher; in 1860 George Frederick Root joined it as chief of publications. It initially conducted a general music trade, publishing simple sheet music for a local market. With the outbreak of the Civil War, trade in instruments for regimental bands soared, while the firm found a national market for its succession of patriotic songs by G.F. Root, H.C. Work and others, including *The Vacant Chair* (1861), *Kingdom Coming*, *The Battle Cry of Freedom* (both 1862), *Tramp! Tramp! Tramp!* (1864) and *Marching Through Georgia* (1865).

Beginning with *The Silver Lute* (1862) the firm issued a succession of popular instruction books for schools, musical conventions and choirs, again reaching a national market. After the Civil War, while American public taste grew more diversified, the policies of the firm remained almost unchanged. Crippling losses followed the Chicago fire of October 1871 and the firm did not recover. On 24 October 1871 G.F. Root and his sons withdrew, leaving the original partners, who (with William Lewis) retained the name Root & Cady. The new firm sold the sheet

music catalogue on 17 November 1871 to S. Brainard's Sons of Cleveland and the book catalogue to John Church & Co., Cincinnati, on 23 February 1872. In October 1872 Root & Cady were bankrupt. Cady withdrew and a new firm, Root & Lewis, was formed, continuing until 1 January 1875 when it merged with Geo. F. Root & Sons and Chandler & Curtiss to form the Root & Sons Music Co.

DENA J. EPSTEIN

Rootering, Jan-Hendrik (*b* Wedingfeld, 18 March 1950). German bass. After early lessons with his father, the Dutch tenor Hendrikus Rootering, he studied at the Hamburg Conservatory and while there took small parts at the Staatsoper. He made his stage début as Colline at Gelsenkirchen in 1980. After Gelsenkirchen he worked at the Deutsche Oper am Rhein before being engaged by Sawallisch for the Staatsoper in Munich (1982), where he remained an ensemble member until 1988 and has returned frequently since then, notably as Hans Sachs in 1998. He has made guest appearances in all the major houses in Europe and the USA, with a special emphasis on the Metropolitan Opera, where Levine has cast him in such roles as Sarastro, Don Basilio, Gremin, King Philip and Gurnemanz. His firm, flexible bass, used with innate artistry and a deal of character, has been heard on many recordings, notably as Daland, Heinrich der Vogler (*Lohengrin*) and Fasolt. He is also an accomplished soloist in choral works (including Beethoven's Ninth Symphony and Dvořák's *Stabat mater* on disc) and a thoughtful interpreter of lieder. In 1994 he was appointed a professor of singing at the Musikhochschule in Munich.

ALAN BLYTH

Rootham, Cyril (Bradley) (*b* Bristol, 5 Oct 1875; *d* Cambridge, 18 March 1938). English organist, teacher, conductor and composer. He read classics and music at St John's College, Cambridge (BA 1897, BMus 1900, MA 1901, DMus 1910). While serving as organist of Christ Church, Hampstead (succeeding H. Walford Davies) he studied with Stanford, Parratt, Barton and others at the RCM. In 1901 he took over the organist's post of St Asaph Cathedral (Robin Orr describes his repertory of church music as 'unusually enterprising and original', and his performances as filled with 'great vitality'), but within the same year he returned to St John's as organist and musical director, remaining there until his death. He was an excellent organizer and did much for the musical life of the town and the University of Cambridge, for example promoting the first English performances of works by Kodály and Pizzetti. He became conductor of the Cambridge University Musical Society (1912) and Fellow of St John's (1914). Rootham was a member of the Purcell Society Committee and conducted performances of *The Fairy Queen* and *King Arthur*.

Among Rootham's students were Bliss (who praised Rootham as a fine orchestration teacher), Darnton, Arnold Cooke, Cecil Armstrong Gibbs, Walter Leigh, Bernard Stevens and Robin Orr. Rootham's works stand in the tradition of Stanford, Charles Wood, Hubert Parry and others. Rootham was at his best when composing for voices. His harmonies, with their occasional bitonality and unexpected twists, could be criticized for their lack of spontaneity, but the expressive, lyrically sensitive version of his *For the Fallen* can stand comparison with Elgar's setting of the same year, in *The Spirit of England*. The most ambitious of Rootham's choral works, the *Ode on the Morning of Christ's Nativity*, received a number of important performances, and the revival of Rootham's music mostly benefited from Sir David Willcocks' performance of it in 1961. It was published, as was *Brown Earth*, under the scheme of the Carnegie Trust.

WORKS
(*selective list*)

Stage: The Two Sisters (op, 3, M. Fausset), 1916–20, Cambridge, 14 Feb 1922

Secular vocal: Andromeda (dramatic cant., C. Kingsley), S, C, Bar, SATB, orch, 1903–5; Coronach (W. Scott), Bar/B, TTBB, orch, 1908; Lullaby (T. Dekker), SA, pf, 1908; The Lady of Shalott (A. Tennyson), op.33, S, SATB, orch, 1909; In Highland and Meadow: 3 Songs (R.L. Stevenson, R. Bridges, E. Fitzgerald), op.35, SATB, orch, 1910; The Stolen Child (W.B. Yeats), SATB, orch, 1911; The Quest (M. Mines), S, S, C, SSAA, str/str qt, pf, 1912; Sweet Content (T. Dekker), SATB, 1914; For the Fallen (L. JÜRGEN SCHAARWÄCHTER

Root position. An arrangement of the notes of a chord in which the ROOT of the chord is the lowest-sounding note. *See also* INVERSION.

Rooy, Anton(ius Maria Josephus) van (*b* Rotterdam, 1 Jan 1870; *d* Munich, 28 Nov 1932). Dutch bass-baritone. He studied singing in Frankfurt with Julius Stockhausen, and made his début at Bayreuth in 1897, singing Wotan at

every festival until 1902, and adding the roles of Hans Sachs in 1899 and the Dutchman in 1901. His gifts were instantly recognized: he appeared at Covent Garden in the leading Wagner roles every year but one from 1898 to 1913, and at the Metropolitan every year but one from 1898 to 1908. Having consented to sing Amfortas in the unauthorized New York *Parsifal* of 1903, he was thenceforth banned at Bayreuth. He also took part in several non-Wagner operas, and in 1907 was John the Baptist in the American première of *Salome*. For over a decade he was the unchallenged leading exponent of all the leading Wagner roles, especially Wotan, Sachs and the Dutchman. Latterly he also sang at Frankfurt. He retired in 1913, and thereafter lived in Munich. Despite primitive studio technique, brief recorded excerpts from his leading roles allow us to glimpse the noble tone and grandeur of declamation that made him a supreme Wagner interpreter.

DESMOND SHAWE-TAYLOR

Ropartz, Joseph Guy (Marie) [Guy-Ropartz, Joseph] (*b* Guingamp, Côtes du Nord [now Côtes d'Armor], 15 June 1864; *d* Lanloup, Côtes du Nord, 22 Nov 1955). French composer and conductor. Born into a family keenly interested in the arts, he showed a remarkable early talent for music and poetry. After attending the Jesuit college in Vannes, where he played various instruments in the school orchestra, he studied law, partly to be able to take care of his mother and partly out of respect for his father's memory. After graduating in 1885, he moved to Paris, where he enrolled at the Conservatoire and studied with Dubois and Massenet; in 1887 he began to take lessons with Franck. During his years in Paris up to 1892 he was also actively engaged in literature and poetry. In 1894 he was made director of the conservatory in Nancy, which achieved an unprecedented impact on the musical life of the city, above all through the concerts Ropartz regularly conducted. His success there led to his appointment as head of the Strasbourg Conservatoire in 1919. He retired in 1929 to his native Brittany where he continued to compose until 1950. He was highly regarded by such peers as Dukas, Schmitt and Honegger; Fauré praised his taste and craftsmanship.

If Ropartz was not a champion of modernism, he was equally an enemy of academicism, rejecting the idea that a creative artist could work according to a preconceived aesthetic dogma. Though he came under the influence of Franck and of French musicians such as Duparc early in his life, he was later able to forge a strong personal style. His harmony evolved from post-Wagnerian chromaticism towards a rich tonal and modal language in which the use of added 6ths or the juxtaposition of triads is fundamental to his mature style.

He always sought renewal within traditional structures. He was fond of the use of generative cells, of partial development of different ideas that ultimately reunite, and of modulations up or down a 3rd.

Ropartz's love of Brittany is expressed not so much through the routine exploitation of folk music but rather by means of an atmospheric evocation of place (as in his opera *Le pays*), by working with modal scales and colours (especially sensitive and successful in his chamber music) and by using unequal rhythms, displaced accents and polyrhythm. Ropartz published three volumes of poetry in his youth: *Adagiettos*, *Modes mineurs* and *Les nuances* (Paris, 1888–92).

WORKS
(*selective list*)

STAGE AND ORCHESTRAL

Stage: Pêcheur d'Islande (incid music, P. Loti and L. Tiercelin), 1891; Le pays (op, 3, after C. Le Goffic: L'Irlandaise), 1910; Oedipe à Colonne (incid music, Sophocles) (1914); Prélude dominical et 6 pièces à danser pour chaque jour de la semaine (ballet), 1929; L'indiscret (ballet, 1), 1931

YVES KRIER

Ropek, Jiří (*b* Prague, 1 June 1922). Czech organist. He studied the organ under Bedřich Wiedermann at the Prague Conservatory (1941–6) and at the Academy of Musical Arts (1946–50), simultaneously studying music at Prague University. He then worked as a postgraduate student at the Academy and as professor of organ playing at the Prague Conservatory. In addition to his concert appearances he is organist at St Jakub in Prague, where he frequently performs at his 'organ lessons'. As well as playing the works of early Czech composers (Černohorský, Seger, Brixi) and the standard organ repertory, he

specializes in the performance of works by French composers of the 19th and 20th centuries. His playing is remarkable for its plasticity of expression and inner tension; it is rich in timbre and highly musical. Ropek has performed several times in Great Britain, where he has made recordings, and has visited the former USSR and other European countries. In 1968 he gave two concerts in Mexico City during the Olympic Games. (P. Skála, ed. *Čeští koncertní umělci: instrumentalisté* [Czech concert artists: instrumentalists]) (Prague, 1983)

ALENA NĚMCOVÁ

Rorantists. Name given to members of the Capella Rorantistarum founded in Kraków in 1540. *See* KRAKÓW, §2.

Rorate chants. Czech chants and songs named after the introit for the fourth Sunday in Advent (*Rorate coeli*). In Czech 'Rorate' designates the votive masses sung in honour of the Blessed Virgin Mary during the early hours of the morning. In the second half of the 14th century sacred Latin songs (*cantiones*) were sung in Bohemia in celebration of the coming of Christ and were incorporated into the votive masses. A manuscript of 1410 (*CZ-Pnm* V B42) has the rubrics 'In adventu ad missam Rorate' before the song *Ave hierarchia coelestis*, and 'cancio in nativitate Christi ad primam missam ante introitum cantetur' preceding the Christmas song *Hodie Christus nasci voluit*. Early in the 15th century Jan Hus advocated the interpolation into the Mass of vernacular sacred songs (now in the Jistebnický Kancionál, *CZ-Pnm* II C7) and by the 16th century the Rorate were sung each day in Advent to Czech texts, as in the Utraquist graduals (such as *CZ-Pnm* V B5, I A17; *HK* II A44). A special manuscript, the Rorátník, was compiled by the literary societies, male cathedral choirs of the Utraquist congregations, containing the chants for the entire week (*CZ-Pu* XVII F45; *HK* II A11). The Rorate mass, derived from Gregorian chant with free melodic and textual troping and song interpolations, usually has the order: opening song, introductory antiphon and oratio, introit, Kyrie, gradual, alleluia, *prosa* (sequence), Patrem (Credo), Sanctus (optional) and the hymn to the Blessed Virgin Mary (optional) (*CZ-Bsa* G10/117). The dissemination of the Rorate chants and the influence of the literary societies led to the establishment in 1540 by Sigismund I of the Capella Rorantistarum, a chapel choir at Kraków that existed until 1872 (*see* KRAKÓW, §2). The Rorate are still sung in Bohemia today. The first printed edition of Rorate chants was edited by J.F. Pospissil (*Roráte neboli Weselé a radostné zpěwy adwentní*, Hradec Králové, 1823). Two cycles of chants are in the new Czech Catholic hymnbook *Kancionál* (Prague, 1971).

JAROSLAV MRÁČEK/JIŘÍ SEHNAL

Rore, Cipriano de (*b* Ronse [Renaix], 1515/16; *d* Parma, 11–20 Sept 1565). South Netherlandish composer, active in Italy. De Rore was one of the most important composers of the middle decades of the 16th century. Although he lived to be only 49 years old, his music, particularly his Italian madrigals, underwent profound changes in style from his early to his late works. His innovations both in harmonic language and in texture created a dramatic style intensely expressive of the text and very important for later developments in the madrigal.

1. LIFE.

(i) Flanders and Italy, 1515/16–1546. De Rore's birthplace can now be established as Ronse (Renaix), a small town in Flanders, west of Brussels and at the linguistic border between Flemish and French-speaking areas (Cambier). The name de Rore (and variant forms de Rodere, Roere) can be found in Ronse documents from as early as *c*1400. It is a proper Flemish name, not a Latinized version like De Monte for Van den Berghe. The family used a coat of arms with crossed scythes within an oval frame; the composer used this as his seal and it is found on his memorial plaque in Parma. Cyprianus, a saint who was celebrated at St Hermes, the collegiate church in Ronse, was the namesake of a number of members of the family. A 1564 notarial document in Parma (Owens, 1976) identifies the composer's father as the late Celestinus. According to Cambier (1983, p.243) Cipriano was the son of Celestinus (*d* before 1564) and Barbara van Coppenolle; he had two brothers: Franciscus and Celestinus (1510–58). The 'Ciprianus de Rodere, Rotornacensis Celestini' found in the matriculation records for the University of Louvain in 1550 was not the composer, but the son of a cousin. The composer signed his own name 'Cipriano de Rore' when he was writing in Italian, and a Flemish document of 1558 refers to him as 'Cup[r]iaen De Rore'. During the 16th century he was often referred to simply by his first name, not infrequently modified by the adjective 'divino', or occasionally as Cipriano Rore (or the Latinized Ciprianus Rorus).

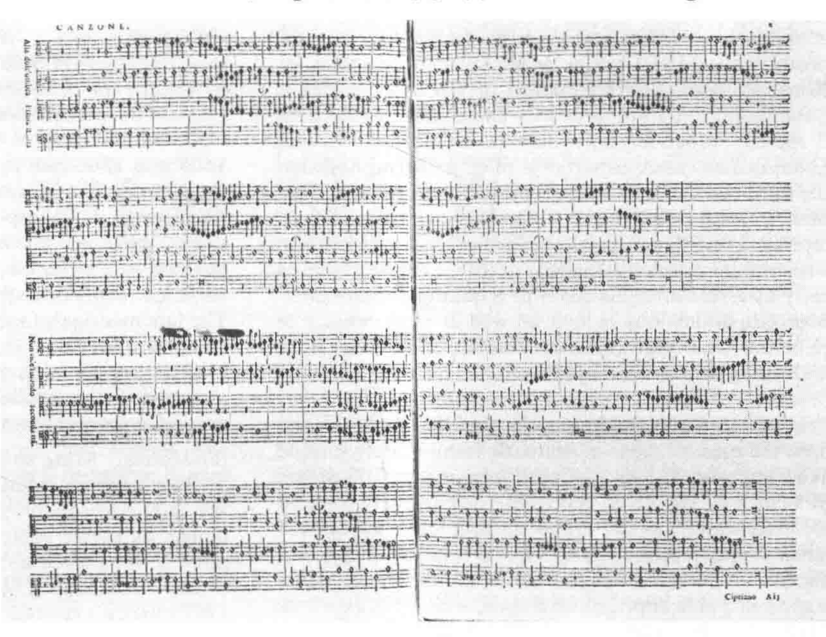
No evidence about de Rore's early musical training has surfaced. Cambier and others have speculated that he could have been in the retinue of the young Margaret of Parma. Meier (1969, pp.103–05) argued that a phrase in *Alma real, se come fida stella*, a madrigal de Rore composed in her honour, probably in 1559, suggested a long-standing connection with her. Margaret, an illegitimate daughter of Charles V, was born in Oudenaarde, just 6 km from Ronse. In 1533 she traveled to Italy and took up residence in Naples, and three years later married Alessandro de' Medici; it is not impossible that the young Cipriano could have been in her entourage. The precise date of his arrival in Italy is unknown. Ever since Caffi's claim that de Rore had been a singer at S Marco, a Venetian sojurn in the 1530s and early 1540s has been assumed, but there is no evidence to support the claim.

De Rore is usually described as a pupil of Willaert's, though the evidence is scanty. Paolo Vergelli's dedication of the Scotto edition of the composer's third book of

madrigals to Gottardo Occagna (1548[9]) includes the phrase 'con alcuni [madrigali] del divinissimo Adriano Villaerth, et de altri suoi discepoli' and he is again referred to as Willaert's disciple on the title page of *Fantasie, et recerchari a tre voci* (1549[34]). 'Discepolo' may, however, simply mean 'a follower of Willaert's practice' (Feldman, 1995, p.xxviii). (It is worth noting that the two composers' three-voice settings of *Regina caeli* in that print use identical tenors.) Whatever the nature of his relations with Willaert, he had clear connections with the group of musicians and composers that Lewis has described as the 'Willaert circle'.

The earliest secure evidence of de Rore's whereabouts in Italy are letters preserved in the Strozzi correspondence. A letter of 3 November 1542 indicates that he was living in Brescia, and that he had been in Venice as a visitor (not as a resident); he was still living in Brescia on 16 April 1545. The nature of de Rore's employment in Brescia remains to be discovered. The Strozzi correspondence reveals an active exchange of the latest compositions in manuscript by Ruberto Strozzi and Neri Capponi, Florentine exiles living in Venice and closely associated with Willaert. Both Capponi and Strozzi commissioned music from de Rore, and the composer's relationship with Strozzi continued until as late as 1546, when he paid de Rore at the rate of 5 scudi per 'canzoni'.

De Rore seems to have sought employment at an Italian court, probably in the early 1540s. His secular motet for Cardinal Ippolito II d'Este, *O qui populos*, contains the plea 'Cypriam gentem suscipe quaeso'. He also had connections with Guidubaldo della Rovere, Duke of Urbino, for whom he composed *Cantiamo lieti* and with Cristoforo Madruzzo, Cardinal of Trent, dedicatee of *Quis tuos presul*. From this period dates the six-voice motet on the text of the prodigal son newly appreciative



1. *Cipriano de Rore: portrait by an unknown artist (Kunsthistorisches Museum, Vienna)*

of his father's generosity, *Nunc cognovi, Domine*; addressed to an unknown patron, this piece has the witty ostinato 'Fac me sicut unum ex mercenariis tuis'. These dedications, combined with evidence of the avid desire by Capponi and Strozzi to acquire his latest madrigals and motets, provide a clear picture of a composer rapidly gaining renown in the court and aristocratic circles of central and northern Italy. These early years in Italy were extremely productive, at least to judge from the number of compositions published in the years 1542–6: 27 or about half of his motets (including secular Latin-texted compositions) and 29 or about one-third of his Italian madrigals.

(ii) Ferrara, 1546–59. The first records of employment in Italy are salary payments as *maestro di cappella* at the court of Duke Ercole II d'Este in Ferrara, one of the leading musical and artistic centres of Italy. De Rore received his first payment on 6 May 1546 (there is no evidence to support the claim that he could have begun in 1545). Particularly given the apparent lack of employment prior to 1546, his appointment as director of one of Italy's most important musical establishments is astonishing. He was then 30 years old, and at the beginning of a decade of even greater productivity. He remained in Ferrara, more or less continuously from 1546 until early 1558.

The years in Ferrara, especially the decade between 1547 and 1557, saw the publication or composition of 107 pieces, more than half of the music he composed during his life. Not surprisingly, a significant number of compositions are specifically Ferrarese in one way or another. These include two masses in honor of Duke Ercole II d'Este; a chanson (*En voz adieux*) celebrating the wedding of Anna d'Este in 1548; a motet (*Hesperiae cum laeta*) on a text by Ferrarese poet and diplomat Girolamo Faletti, describing a painting by Girolamo Carpi of Anna portrayed as Venus (Lowinsky); and three compositions concerning the unauthorized departure of Prince Alfonso for France in 1552 and his return in 1554 (*Calami sonum ferentes*, *Volgi'l tuo corso*, *Quando lasciaste signor*). Two madrigals were used in plays written by Giraldi Cinzio. Also striking are the number and character of his settings drawn from Ariosto's *Orlando furioso*, which artfully invoke the local tradition of improvised recitation of *ottave* (Haar, 1990). His daring chromatic experiments in *Calami sonum ferentes*, written for four bass voices, and published by Lassus together with one of his own experiments, fit in with the Ferrarese passion for chromaticism displayed by Vicentino, Manara, Fiesco and others.

In 1556 Ercole awarded de Rore a benefice, describing him as 'homo molto virtuoso e da bene, mio servitore da molti anni'. But the composer had trouble collecting the income, which in any case was paltry compared to that received by his colleague Francesco dalla Viola. One of a Ferrarese family whose members had been serving as musicians at the Este court for at least three generations, dalla Viola seems to have been a rival and far better connected with the future Duke Alfonso II. During Cipriano's final three years in Ferrara, dalla Viola as well as Prince Alfonso were obsessed with the publication of Willaert's *Musica nova*, the first copies of which finally appeared in Autumn 1558 (Owens and Agee). It is remarkable that a composer of the stature of Cipriano de Rore did not inspire a comparable initiative in Ferrara.

2. First stanza of 'Alla dolce ombra', in score, from 'Tutti i madrigali di Cipriano di Rore a quattro voci' (Venice: Angelo Gardano, 1577)

De Rore was absent from Ferrara, with permission from Duke Ercole, for nine months in 1558 (March to November). During his trip north to Flanders, where he arrived on 1 May, he stopped in Munich, possibly to assist with preparations of a manuscript of his motets (*D-Mbs*). Commissioned by Duke Albrecht V, this luxurious illuminated manuscript contains a folio-sized portrait of the composer. The manuscript was a regal tribute, but unlike Willaert's *Musica nova*, whose many surviving copies attest both to a large print run and an eager buying public, it was an artifact designed for an elite few.

A legal document from 18 September 1558 places de Rore in his native Ronse, assisting his sister-in-law Hermine Bauwens following the death of his brother Celestinus. By 24 September he was in Antwerp, and by December of that year he was back in Ferrara. In July 1559 he received permission to leave his position at the Este court, and once again traveled to Flanders. If his letter of 13 October 1559 is to be taken at face value, he intended to retire from court service.

During his decade in Ferrara de Rore's reputation became European in scope. He composed music for the elite of Europe: Charles V; Lamoral, Count of Egmont; Cardinal Antoine Perrenot de Granvelle; Wolfgang Engelbert I von Auersperg; and Albrecht V, Duke of Bavaria, to whom, in January 1559 he sent a New Year's gift, described as a psalm. This may have been *Beati omnes* (Lowinsky), *Donec gratus eram tibi* (Owens, 1978), or *Exspectans exspectavi* (preserved in *D-Mbs* 20).

(iii) Last years, 1559–65. When de Rore returned to Flanders in 1559 he found his town burnt: a result of the Wars of Independence. The phrase 'rovinati' in his letter, usually thought to mean that his family had lost everything, seems to describe the chaos caused by the war (his sister-in-law was wealthy enough to lend considerable sums for rebuilding the church in Ronse). After the death of Ercole II, de Rore offered his services to Duke Alfonso, in tones that scholars have long noted seemed inappropriate (returning to court service meant taking up the yoke), but the Duke had already hired Francesco dalla Viola. Correspondence with Cardinal Granvelle shows that de Rore was living in Antwerp in 1560, and after weighing offers both in Flanders and abroad, he entered Farnese service. In November he left for Parma, traveling by way of Paris.

The Farnese court in Parma, established only 20 years earlier by Pope Paul III, must have been disappointing; there are various indications that de Rore was looking for employment elsewhere: in June 1563 he sought permission to move to Willaert's position at S Marco in Venice; a document from the Mantuan archives (Sherr) indicates that Duke Guglielmo Gonzaga was considering hiring de Rore; and there is also further correspondence from this time between de Rore and the court in Urbino as well. In the end, the move to Venice did not work out, according to de Rore himself, because of administrative difficulties caused by the division of the chapel into two choirs. He returned to Parma in 1564 and died there a little more than a year later, of unknown causes. His final years saw a drop in productivity: 27 compositions (mostly madrigals), though he continued to compose on commission, including a mass for Archduke Ferdinand II of Tirol, a motet for Guidubaldo della Rovere and music for the wedding of Alessandro Farnese and Maria of Portugal.

2. WORKS. Cipriano de Rore was first and foremost a composer of madrigals. He composed a smaller but not insubstantial number of motets, as well as Latin-texted secular compositions, some of which were published in madrigal books. He also composed a handful of chansons, Masses and other liturgical compositions.

(i) Madrigals. De Rore composed some 107 madrigals. Most of them appeared in the seven madrigal books that bore his name (five for five voices, two for four), while others were published in anthologies. Only two of these seven were devoted exclusively to de Rore's music; the rest were anthologies. In contrast to the previous generation of madrigal composers, when four-voice texture was the norm, most of his madrigals are for five voices.

The works pose some problems of attribution. Four madrigals previously attributed to de Rore can be shown to be by other composers: *Quando lieta sperai* is almost

certainly by Morales and three works published in the posthumous 1565[18] are by Marc'Antonio Ingegneri, de Rore's student. The attribution of ten more pieces is questionable on grounds of style and source distribution. *A che con nuovo laccio*, which was included along with *Quando lieta sperai* as part of a 'filler' gathering added to the third book of madrigals, is probably not by him. Two others, *Deh hor foss'io* and *Volgend'al ciel*, from a Scotto reprint (1562[21]), can be challenged on stylistic grounds. The remaining seven all appear in sources dating from as early as a year after his death to a quarter-century later. Most are anomalous in style as well as in the choice of clefs and tonal type (the combination of clef, signature and final), which are important clues of compositional practice.

It is a commonplace of music history that de Rore burst onto the musical scene in dramatic fashion, fully formed as a composer, with his *Madrigali a cinque voci*, published in Venice by Girolamo Scotto in 1542 (usually referred to, inaccurately, as the *Primo libro*, a name it acquired when it was reprinted in 1544 and retained during the many subsequent editions). One of the first single-composer publications of madrigals, it presents a distinctively Venetian take on the madrigal, marked by a preference for setting sonnets, Petrarch's above all, and by the use of the lofty imitative polyphony that had heretofore been associated with motet composition (Beck; Feldman). The madrigal is thus imbued with a far different spirit than the essentially chanson-like, largely homophonic style of the generation of Verdelot in Rome and Florence.

Although it has been generally accepted that de Rore's early madrigals were strongly influenced by (and indistinguishable from) Willaert, there are significant differences in their styles, in their choice of texts, and especially in their harmonic palettes. Already in his first book de Rore achieved a distinctive voice, which Feldman, in a felicitous analogy, describes as 'Dantean' in contrast to Willaert's more balanced, 'Petrarchan' approach (1994, p.263). De Rore also explored the expanded rhythmic possibilities afforded by the use of C mensuration leading to smaller rhythmic values that 'blackened' the page ('note nere' or 'madrigali cromatici,' as later editions of the book were called). De Rore also set himself apart from Willaert in his decision to organize his 1542 collection in modal order. This was the first instance of a modally-ordered single-composer print; the organization indicates the composer's involvement in the book's publication. The imaginative use of a system of modality whose connections to polyphonic music de Rore was himself instrumental in establishing must have been astonishing to musicians encountering his 1542 print for the first time. Not all of his early madrigals – which might be described as consisting of madrigals published in or before 1550 – are dark, however. His setting of *Anchor che co'l partir*, on a text traditionally ascribed to Alfonso d'Avalos (but this ascription has been challenged by Haar, 1990), participates in the traditional madrigalian topos of death as sexual release. This madrigal achieved extraordinary popularity.

De Rore's style seems to have undergone dramatic change during the 1550s. There was a near total hiatus in publishing between 1550 and 1557 (the exceptions are experimental chromatic *Calami sonum ferentes*, 1555, and the conservative Vespers music of 1554). A change in style at this time is heralded by a change in his poetic sources: he set Petrarch only once after 1550 (as opposed to 38 times in 1550 or earlier), and not at all after 1557. His use of melodic and harmonic language changed as well, indeed many of the madrigals published between 1557 and 1566 (the year after his death) would later be singled out by Giovanni di Bardi and Giulio Cesare Monteverdi as examples of the origins of the *seconda pratica*. No longer did he present his madrigals in modally ordered sets; he seems to have favoured tonal types that could not easily fit traditional modal categories (Owens). The late madrigals (and some of the Latin-texted secular compositions) frequently employ a transparent texture, a kind of supple homophony that can be renotated as monody (Palisca), and text expression is increasingly dependent upon harmonic language.

(ii) Motets. More so than with the madrigals, study of de Rore's motets is hindered by problems of attribution. We can be reasonably certain that de Rore composed 53 motets on sacred subjects, 51 of which are extant. This number is considerably smaller than that reported in earlier scholarship (Owens, 1978; Johnson, 1954, 1963, 1980) for two reasons. First, Blackburn's discovery that all but one of the eight motets in the manuscript Treviso 29 were in fact contrafacta of surviving motets reduces the number by seven. Second, it is now possible to take a stronger stand on issues of authenticity based on considerations of style, the nature of the sources, and above all, de Rore's distinctive patterns in his choice of clefs and tonal type. Thus, 18 motets included in the *Complete Works* can be regarded as either definitely or probably not by de Rore. Six were composed by an unknown 'Ziprianus' (possibly Cipriano de Soto); seven were first published under de Rore's name for the first time only in 1595, in a problematic print issued by Angelo Gardano; three others were attributed to him only after his death; and two motets published in 1549 became associated with de Rore through mistakes in the print transmission (*Clambat autem mulier* is by Morales; *Virtute magna* remains anonymous). Most of these pieces are uncharacteristic of his style, but even more telling is that most employ combinations of clefs or tonal types not represented elsewhere among his securely attributed works.

Establishing a chronology of the motets is difficult. Evidence suggests that he composed approximately half of the motets, and possibly more, during the 1540s or earlier; none of the motets can be securely dated after 1560 (although we know that he sent Guidubaldo della Rovere an unnamed motet 'produto di novo' in 1564). We are hampered in understanding the impetus behind the composition of the early motets by not knowing anything about de Rore's employment before his appointment in Ferrara, and there has not yet been any attempt to match specific texts with particular liturgies.

De Rore's motets have not been preserved in a nicely chronological set of publications. He seems to have supervised the publication of just one volume, the 1545 *Moteti*, which, like his five-voice madrigals of 1542, is ordered by mode. An earlier 'libro primo' published by Gardano (1544) was in fact an anthology containing only seven of de Rore's motets. The only other extant prints published during his lifetime are an anthology called the 'Terzo Libro' (1549[8]) and the two books of four-voice motets for equal voices (1563[3–4]), all but one of which can be found in an earlier manuscript.

In addition to the prints, there are three important manuscripts of his motets. The great illuminated manuscript commissioned by Duke Albrecht V and completed in 1559 (*D-Mbs*) contains 26 motets for four to eight voices. Two sets of partbooks (in *I-MOe*) are copied in upright quarto in a hand and format that probably imitates Willaert's *Musica Nova* (1559). These two manuscripts, which are thought to date from about 1560, are elegantly bound and originated at the Este court in Ferrara. The date of composition of the motets from these manuscripts is uncertain; some probably date to the 1540s.

Various kinds of evidence suggest that one or more motet prints has not survived. A number of motets from the Ferrarese and Munich manuscripts turn up in late prints or manuscripts (Treviso, Bourdeney) that cannot have used the court manuscripts as their source. The absence of a 'Libro secondo' and several suggestive entries in early inventories make the hypothesis of lost prints plausible.

A thorough study of de Rore's style remains to be done and the task is hindered by the uncertain chronology of his works. Most of his demonstrably early motets use the prevailing texture of imitative polyphony throughout. The style found in many works, of textures combining both polyphonic and chordal passages, may represent a stylistic development of the 1550s. And it is possible to distinguish a spare, quasi-chordal late style, analogous to developments in the madrigal and mass. Further study of stylistic features such as the use of repeated musical material and the degree of compactness in the construction of imitative points would doubtless aid in the establishment of chronology.

De Rore set relatively few texts that could be described as liturgical (eight antiphons and five responsories), of which all are early and exclusively polyphonic in texture. Many later texts are drawn from the Bible, most as direct excerpts though some as composites. And in these de Rore shows a preference for dramatic texts. As in his madrigals, de Rore's preferred ensemble was for five voices, the majority of which employ low clefs or low equal voices. The six- and seven-voice pieces are the special, large-scale antiphon settings employing two or three voices in canon that frame the Munich manuscript: *Descendi* at the beginning, *Hodie Christus natus es*, *Ave regina caelorum*, and *Quem vidistis* at the end. The other two six-voice pieces both have ostinatos. The nine four-voice motets look as though they were composed as a group: they are all *voci pari*.

(iii) Masses and other liturgical works. De Rore composed very few masses, compared, for example, to Palestrina or Lassus. This small output surely reflects the conditions of his employment, which called primarily for compositions in other genres. The earliest mass, *Missa Vous ne l'aurez pas*, is of doubtful attribution. Based on an unidentified model, possibly a lost Josquin six-voice chanson or a reworking by Willaert, it occurs in only one source, Scotto's 1555 edition of Jachet masses (1555[1]), as 'a voci pari' and 'vus ne larez'. It is incomplete, lacking part of the Sanctus and Agnus, and seems to have been included to fill out the print. The rest of his masses have strong links (either through documentary or source evidence) to three major patrons who commissioned and collected his music: Ercole II d'Este, Duke of Ferrara; Albrecht V, Duke of Bavaria; and Ferdinand II, Archduke of Tirol.

Two extraordinary masses securely date from the period of his tenure in Ferrara (1546–59), probably from the mid-1550s. These are the two masses composed in honour of Duke Ercole: the five-voice *Missa Vivat felix Hercules* and the seven-voice *Missa Praeter rerum seriem*. In both masses, de Rore acknowledged his status as *maestro di cappella* at the court of Ferrara and thus as inheritor of the position held by his great predecessor, Josquin des Prez. He paid double homage to his patron and to Josquin himself, while at the same time, through artistic means, seeking to surpass Josquin. *Missa Vivat felix Hercules* employs a cantus firmus that is a *soggetto cavato dalle vocali*, like Josquin's mass for Ercole I, *Missa Hercules dux Ferrariae*. *Missa Praeter rerum seriem* takes as its model the motet by Josquin, and adds a chant-based cantus firmus, 'Hercules secundus dux Ferrariae quartus vivit et vivet'. With these masses, revealing his command of traditional compositional techniques that were becoming increasingly irrelevant, he declared himself part of the great tradition of Franco-Flemish polyphony and an astute observer of historical traditions of musical style.

De Rore's other two masses are both written in the transparent chordal style typical of his late music and probably date from the late 1550s or later. Both are five-voice imitation masses based on chansons: *Missa a note negre*, based on de Rore's own chanson *Tout ce qu'on peut en elle voir* (published in 1557); and *Missa Doulce memoire*, based on the popular (and frequently reworked) chanson by Pierre Sandrin.

Although most of de Rore's masses remained unpublished, they achieved considerable renown. Duke Albrecht V of Bavaria seems to have been genuinely interested in collecting his music. Three of de Rore's five masses were copied into manuscripts for Munich in the 1550s, and the duke knew de Rore's music well enough to ask for a copy of *Missa Praeter rerum seriem* by name in 1557. His comments about the music, in the letter he sent thanking Duke Ercole for having sent the mass, are extraordinary in their appreciation for de Rore and for Ercole as his patron. Even after his death, de Rore's masses continued to have a place of honour in the Munich court; according to Troiano, two of de Rore's masses, one for six voices and one for seven, were performed during the wedding festivitites in 1568 for Albrecht's son, the future Duke Wilhelm V; neither of these appears to survive. Archduke Ferdinand II of Tirol commissioned a mass from de Rore in November 1564. From the letters of the Venetian Francesco della Torre, who served as intermediary, we learn of the progress of the composition. By 20 January 1565 the Kyrie and Gloria had been composed and performed for a private audience, and de Rore reported that the mass was almost finished, and on 7 April della Torre reported that the mass was ready to be sent. The most likely candidate among de Rore's surviving masses is *Missa Doulce memoire*. De Rore's masses, which he seems to have composed primarily if not exclusively on commission from or in honour of individual patrons, reflect clear shifts in his style, or compositional agenda, during the brief decades of his compositional activity.

De Rore composed little other liturgical music. A print from 1554 contains a *Magnificat* and a set of psalms for the second Vespers on Christmas, written in conventional alternatim style. An additional *Magnificat* survives only

in manuscript. He may be author of a setting of the Passion according to St. John, published in 1557.

(iv) The printing of de Rore's music. De Rore's early maturity as a composer coincided with the flowering of music printing in Venice, where two printers, Antonio Gardano and Girolamo Scotto, would between them publish nearly one thousand music titles between the late 1530s and the early 1570s. He thus had an opportunity to establish his reputation not available to composers even a few years earlier (compare the publication history for Verdelot, Arcadelt or the young Willaert).

De Rore began publishing not in an anthology, but rather with a book devoted exclusively to his madrigals, one of only three such volumes that he would publish during his lifetime. It is unusual that he did not seek to defray the costs by dedicating this book (or any others) to a patron, the normal means for subvening publication. De Rore worked with the printer Girolamo Scotto for his 1542 book, but then switched to the firm of Antonio Gardano for the publication of his second single-author print, the 1545 motets. This time he obtained a privilege from the Venetian government to protect his rights (though this did not stop Scotto, who published his own edition in the same year, getting around the privilege by omitting the name of city and printer from its title page). His third and final single-volume publication, the 1550 First Book of four-voice madrigals, was with the Ferrarese firm of Buglhat and Hücher. Like the other two, this volume was modally organized, though not numerically ordered. With no Venetian privilege to protect this volume, it went through at least 13 editions, a number that begins to approach Arcadelt's *Primo libro* as a best-seller.

The choice of three different printers to publish his music suggests a dissatisfaction with the music publishing industry. For their part, the printers were trying to satisfy or take advantage of the strong market for de Rore's music. It is striking that the rest of his music appeared in anthologies, publications financed by the publisher/printer as a money-making venture. Gardano's so-called Libro secondo literally capitalizes on his name: 'DI CIPRIANO IL SECONDO LIBRO DE MADREGALI A CINQUE VOICI INSIEME ALCUNI DI M. ADRIANO ET ALTRI AUTORI A MISURA COMUNE NOVAMENTE POSTI IN LUCE' (though only eight of the 27 madrigals in the print are actually by de Rore).

The publication of de Rore's music in publisher-sponsored anthologies meant that the publishers/printers frequently had to make do with whatever copies they could get their hands on, rather than being able to work directly with the composer. For example, the motets that Gardano brought out in a 1544 anthology appeared in more definitive form in de Rore's own 1545 publication (Lewis, 1985–6). The most notorious example concerns the publication of the third book of five-voice madrigals (1548). Lewis (1985–6) has shown that Scotto issued the title first, with only six of the eleven stanze from Petrarch's Vergine canzone. The dedication to Gottardo Occagna by Paolo Vergelli indicates the struggle to obtain Cipriano's music: 'Knowing your diligence and hard work in these past days to obtain those Vergine, composed some months ago by the very excellent musico Cipriano Rore'. Gardano's edition, also with just six stanze, has a dedication in some copies from Gardano to Giovanni della Casa describing the music as 'nuova, rara, e bella'. Both printers issued the remaining stanze, probably in 1549, as a supplemental gathering found in some copies of the 1548 editions. But the definitive version of the music was not published until Gardano's 1552 edition. De Rore's efforts to keep his music from circulating indiscriminately are clear from Bonagionta's dedication to the posthumous *Le vive fiamme* (with its defiant title suggesting musical, if not physical immortality): '... thanks to the great familiarity and the friendly relationship which for a long time united me with the excellent musician M. Cipriano Rore, he kindly shared with me some of his most beautiful four- and five-voice madrigals with the request that I keep them close by me, so that his works might not fall so easily into the hands of everyone who would like to make them public'.

After 1550, de Rore's madrigal prints consisted of just two significant anthologies from 1557 (the fourth book of five-voice madrigals and the second book for four-voices), and two posthumous anthologies (the fifth book in 1565 and *Le vive fiamme* in 1566). Single works are scattered in various anthologies.

3. SIGNIFICANCE AND REPUTATION. The central problem still facing scholars is to explain why this composer was thought so highly of both in his own lifetime and in the half-century following his death. Evidence of this esteem is not hard to find. Over and over again he is called 'il divino Cipriano', surely not a tribute given lightly. His music would continue to be republished for four decades after his death in posthumous complete works editions, like the Phalese (1573) and Gardano (1595) collections of motets or the extraordinary publications of the complete four-voice madrigals in score (1577; fig.2); many of the madrigal books were republished in the 1590s. His music was also strongly represented in several of the large manuscript score anthologies from the second half of the century (Tarasconi, Bourdeney). A whole raft of composers claimed to have studied with him; the details of his influence on composers of the succeeding generations (for example, Giaches de Wert, Luca Marenzio, Luzzasco Luzzaschi, and Orlando di Lasso) is still not well understood.

One answer is that his music was multi-faceted and could appeal to several different compositional agendas at the end of the 16th century. Monteverdi, whose brother referred to de Rore as 'il primo rinovatore' of the 'seconda pratica' (usually translated in English as 'founder of the Second Practice'), found in his music the use of harmonic devices to illustrate the text both locally in terms of counterpoint and at the higher level of tonal organization (for example, *Da le belle contrade*). Giovanni di Bardi, taken as representative of Florentine initiatives in (re)discovering the capabilities of music for dramatic purposes, could find, sometimes in the same pieces that Monteverdi would later cite, examples of a supple, speechlike texture that allowed the words to be heard clearly. And the conservative Artusi could also cite him as an excellent example of the *prima pratica*. He was also credited with a series of 'firsts': to exploite the rhythmic possibilities of the new *note nere* notation; to publish a collection in modal order, and then to write in ways that seem to deny the modal system; to set the eleven-stanza *Vergine* canzone, an unusually long composition for the time; to move from the prevailing imitative style to a newly transparent homophony; to focus on the drama inherent in texts, many of which are speeches, almost like

mini-scenes; to use harmony to portray the power of Petrarch's darker side.

WORKS

Printed works except anthologies published in Venice unless otherwise stated

Edition: *Cipriano de Rore: Opera omnia*, ed. B. Meier, CMM, xiv (1959–77) [M]

MADRIGALS

I madrigali, 5vv (1542, enlarged 2/1544 as Il primo libro de madregali cromatici) [1542; 2/1544]
Il secondo libro de madregali, 5vv (1544^{17}) [1544^{17}]
Il terzo libro di madrigali, 5vv (1548^{9}, supp. 1549) [1548^{9}; 1549a]
Musica ... sopra le stanze del Petrarcha ... libro terzo, 5vv (1548^{10}, supp. 1549) [1548^{10}; 1549]
Il primo libro de madrigali, 4vv (Ferrara, 1550) [1550]
Il quarto libro d'i madregali, 5vv (1557^{23}) [1557^{23}]
Il secondo libro de madregali, 4vv (1557^{24}) [1557^{24}]
Li madrigali libro quarto, 5vv (1562^{21}) [1562^{21}]
Le vive fiamme de' vaghi e dilettevoli madrigali, 4, 5vv (1565^{18}) [1565^{18}]
Il quinto libro de madrigali, 5vv (1566^{17}) [1566^{17}]
Works in 1547^{14}, 1548^{7}, 1549^{34}, 1560^{23}, 1561^{15}, 1564^{16}, 1565^{8}, 1566^{2}, 1568^{13}, 1570^{5}

Alcun non può saper (Ariosto), 5vv, 1557^{23}; M iv, 87
Alla dolce ombra (Petrarch), 4vv, 1550; M iv, 7
Alma real, se come fida stella, 5vv, 1565^{18}; M v, 83

Amor ben mi credevo, 4vv, 1550; M iv, 28
Amor che t'ho fatt'io, 5vv, 1565^{18}; M v, 71
Amor che vedi (2p Ben veggio di lontano) (Petrarch), 5vv, 1542; M ii, 87
Amor se così dolce, 8vv, 1557^{23}; M iv, 120
Anchor che col partire (?A. d'Avalos), 4vv, 1547^{14}; M iv, 31
Beato mi direi, 4vv, 1557^{24}; M iv, 64
Ben qui si mostra il ciel, 4vv, 1561^{15}; M v, 1
Ben si conviene a voi, 5vv, 1542; M ii, 93
Candido e vago fiore, 5vv, 1565^{18}; M v, 74
Cantai mentre ch'i arsi (G. Brevio), 5vv, 1542; M ii, 1
Cantiamo lieti, 5vv, 1544^{17}; M ii, 108
Chi con eterna legge, 4vv, 1548^{7}; M iv, 51
Chi non sa, 4vv, 1557^{24}; M iv, 58
Chi viol veder quantunque (2p Vedrà, s'arriva) (Petrarch), 5vv, 1542; M ii, 69
Come la notte (Ariosto), 5vv, 1557^{23}; M iv, 93
Com'havran fin, 4vv, 1547^{14}; M iv, 34
Convien ch'ovunque (Ariosto), 5vv, 1566^{17}; M v, 108
Da le belle contrade, 5vv, 1566^{17}; M v, 96
Da l'estrem'orizonte, 5vv, 1565^{18}; M v, 53
Da quei bei lumi (G. Brevio), 5vv, 1542; M ii, 100
Datemi pace (Petrarch), 4vv, 1557^{24}; M iv, 73
Deh, se ti strinse, amore, 5vv, 1544^{17}; M ii, 143
Di tempo in tempo (Petrarch), 4vv, 1550; M iv, 36
Di virtu di costumi (2p Così'l mio stil), 5vv, 1557^{23}; M iv, 100
Donna ch'ornata sete, 4vv, 1550; M iv, 39
Era il bel viso (2p E ne la face) (Ariosto), 4vv, 1561^{15}; M v, 3
Far potess'io vendetta (2p Così gli afflitti) (Petrarch), 5vv, 1542; M ii, 81
Felice sei, Trevigi, 4vv, 1565^{18}; M v, 12
Fera gentil (2p Perchè si stretto è'l nodo), 5vv, 1565^{18}; M v, 43
Fontana di dolore (Petrarch), 4vv, 1557^{24}; M iv, 70
Fu forse un tempo (2p Ogni mio ben) (Petrarch), 5vv, 1544^{17}; M ii, 137
Gravi pene in amor (2p Io dico e dissi) (Ariosto), 3vv, 1549^{34}; M iv, 1
Hor che l'aria (2p Sol nel mio petto), 5vv, 1542; M ii, 96
Hor che'l ciel (2p Così sol d'una chiara fonte) (Petrarch), 5vv, 1542; M ii, 4
Il desiderio, 4vv, 1566^{2}; M v, 23
Il mal mi preme (2p Ben ch'i non sia) (Petrarch), 5vv, 1542; M ii, 44
I mi vivea (2p O natura, pietosa) (Petrarch), 5vv, 1544^{17}; M ii, 126
Io canterei d'amor (Petrarch), 4vv, 1550; M iv, 19
Io credea che'l morire, 4vv, 1550; M iv, 33
Ite rime dolenti (2p E se qualche pietà), 5vv, 1548^{10}; M iii, 80
La bella Greca, 5vv, 1557^{23}; M iv, 82
La bella netta ignuda, 4vv, 1548^{7}; M iv, 21
La giustitia immortale (G. Cinzio), 4vv, 1548^{7}; M iv, 26
L'alto signor (2p L'una piagh'arde) (Petrarch), 6vv, 1557^{23}; M iv, 113
Lasso che mal accorto (Petrarch), 5vv, 1548^{9}; M iii, 41
L'augel sacro di Giove (2p Ondi'il bel nome vostro), 5vv, 1548^{10}; M iii, 76
La vita fugge (2p Tornami avanti) (Petrarch), 5vv, 1542; M ii, 34
L'inconstantia che seco han (Giraldi Cinzio), 4vv, 1548^{7}; M iv, 46
L'ineffabil bonta (Ariosto), 5vv, 1557^{23}; M iv, 105
Madonn'hormai (A. Molino), 4vv, 1564^{16}; ed. S. Cisilino, Celebri raccolte musicali venete del Cinquecento, i (Padua, 1974); M v, 7
Mentre la prima mia novella etade, 4vv, 1557^{24}; M iv, 76
Mentre lumi maggior, 5vv, 1566^{17}; M v, 92
Mia benigna fortuna (2p Crudele acerba) (Petrarch), 4vv, 1557^{24}; M iv, 79
Ne l'aria in questi dì, 4vv, 1568^{13}; M v, 26
Non è ch'il duol, 4vv, 1550; M iv, 23
Non è lasso martire (F. Spiro), 5vv, 1566^{17}; M v, 105
Non gemme non fin' oro, 4vv, 1550; M iv, 44
O dolci sguardi (2p E se talhor) (Petrarch), 5vv, 1544^{17}; M ii, 121
O morte, eterno fin (G. Brevio), 5vv, 1557^{23}; M iv, 84
O santo fior felice, 5vv, 1566^{17}; M v, 115
O sonno (G. della Casa), 4vv, 1557^{24}; M iv, 66
O voi che sotto l'amoroso insegne (2p Si dirà poi ciascun) (Guidiccioni), 5vv, 1560^{23}; M v, 34
Padre del ciel (2p Hor volge, Signor) (Petrarch), 5vv, 1544^{17}; M ii, 132
Per mezz'i boschi (2p Parmi d'udirla) (Petrarch), 5vv, 1542; M ii, 51
Perseguendomi amor (2p Io dicea franio cor) (Petrarch), 5vv, 1542; M ii, 62
Poggiand'al ciel (2p Tal si trova), 5vv, 1542; M ii, 9
Poi che m'invita Amore (2p E se pur mi mantiene), 5vv, 1565^{18}; M v, 78
Pommi ov'il sol (Petrarch), 5vv, 1548^{10}; M iii, 68
Qual donn'attende (2p Ivi'l parlar) (Petrarch), 5vv, 1548^{9}; M iii, 52
Qual'è più grand'o amore, 4vv, 1550; M iv, 49
Qualhor rivolgo il basso (2p Ma pur in te sperar), 5vv, 1566^{17}; M v, 99
Quand'io son tutto volto (2p Così davanti ai colpi) (Petrarch), 5vv, 1542; M ii, 14
Quand'io veggio (2p Poscia in pensar), 5vv, 1548^{10}; M iii, 72
Quand fra l'altre donne (2p Io benedico 'l loco) (Petrarch), 5vv, 1548^{9}; M iii, 64
Quando signor lasciaste (2p Ma poi che vostr'altezza) (Giraldi Cintio), 5vv, 1557^{23}; M iv, 96
Quanto più m'avicino (2p Perchè con lui cadrà) (Petrarch), 5vv, 1542; M ii, 56
Quel foco che tanti anni, 4vv, 1547^{14}; M iv, 52
Quel sempre acerbo (2p L'atto d'ogni gentil pietate) (Petrarch), 5vv, 1542; M ii, 72
Quel vago impallidir (2p Conobbi allhor) (Petrarch), 5vv, 1548^{9}; M iii, 48
Quest'affanato mio doglioso core, 5vv, 1565^{18}; M v, 61
S'amor la viva fiamma (2p Novo consiglio), 5vv, 1548^{10}; M iii, 84
Scarco di doglia (2p Ma il ben pensier), 5vv, 1548^{10}; M iii, 88
Schiet'arbuscel, di cui (B. Ferrino), 4vv, 1557^{24}; M iv, 60
Scielgan l'alme sorelle (2p Ardir, senno, virtù), 5vv, 1544^{17}; M ii, 116
Se ben il duol (2p Ben voi), 5vv, 1557^{23}; M iv, 107
Se'l mio sempre per voi, 4vv, 1550; M iv, 41
Se voi poteste (2p Che gentil pianta) (Petrarch), 5vv, 1548^{9}; M iii, 60
Sfrondate, o sacre dive, 5vv, 1544^{17}; M ii, 113
S'honest'amor può meritar (2p Ond'io spero) (Petrarch), 5vv, 1548^{9}; M iii, 43
Signor mio caro (2p Carità di signore) (Petrarch), 4vv, 1550; M iv, 15
S'io'l dissi mai, fortuna (2p Ma s'io no'l dissi), 5vv, 2/1544; M ii, 103
Si traviato è 'l folle (2p E poi che'l fren) (Petrarch), 5vv, 1548^{9}; M iii, 56
Solea lontana (2p Non ti soven) (Petrarch), 5vv, 1542; M ii, 20
Strane ruppi (2p A guisa d'horn) (L. Tansillo), 5vv, 1542; M ii, 29
Tra più beati (2p Io qui non miro), 5vv, 1565^{18}; M v, 56
Tu piangi (2p Lei tutta intenta) (Tebaldeo), 5vv, 1542; M ii, 40
Tutto'l dì piango (2p Lasso, che pur) (Petrarch), 3vv, 1549^{34}; M iv, 4
Un'altra volta la Germania strida, 4vv, 1557^{24}; M iv, 54
Vaghi pensieri, 5vv, 1565^{18}; M v, 66
Vieni dolce Himineo, 5vv, 1570^{5}; M v, 123
Vergine bella (Petrarch), 5vv, 1548^{9} (strophes 1–6 only), 1548^{10} (complete); M iii, 1
Volgi'l tuo corso (G.B. Pigna), 5vv, 1557^{23}; M iv, 90

DOUBTFUL MADRIGALS

A che con nuovo laccio, 5vv 1549b; M iii, 37
A che più stral amor (2p Hor non ricuso) (Ariosto), 4vv, 1575^{4}; M v, 29
Alme gentili, 5vv, 1576^{5}; M v, 131
Che giova dunque (Petrarch), 5vv, 1576^{5}; M v, 127
Chi vol veder tutta (2p Vedrà i biondi capei) (G. Parabosco), 4vv, 1565^{18} (also attrib. Ingegneri); M v, 15
Deh hor foss'io (Petrarch), 5vv, 1562^{21}; M v, 41
Lieta vivo e content, 6vv, 1591^{23} (cf *I-MOe* C.311); M v, 136
Non mi toglia, 4vv, 1565^{18} (also attrib. Ingegneri); M v, 18
Quando lieta sperai (E. Anguisciola), 5vv, 1549 (? by Morales); M iii, 34
Se com'il biondo crin, 5vv, 1566^{17}; M v, 121
S'eguale a la mia voglia, 6vv, 1591^{23}; M v, 138
Se qual è 'l mio dolore, 4vv, 1575^{15}; M v, 32
Spesso in parte (L. Gonzaga), 4vv, 1565^{18} (also attrib. Ingegneri); M v, 10
Volgend'al ciel, 5vv, 1562^{21}; M v, 38

SECULAR LATIN COMPOSITIONS

Motetta, 5vv (1545) [1545]
Le vive fiamme de' vaghi e dilettevoli madrigali, 4, 5vv (1565^{18}) [1565^{18}]
Il quinto libro de madrigali, 5vv (1566^{17}) [1566^{17}]
Works in 1544^{6}, 1544^{22}, 1549^{7}, 1549^{8}, 1555^{19}

Calami sonum ferentes, 4vv, 1555^{19}; M vi, 108
Concordes adhibete animos, 5vv, 1566^{17} (lacking 2p); M v, 118
Dispeream nisi sit dea, 5vv, 1549^{8}; M i, 140
Dissimulare etiam (2p Quin etiam hiberno, 3p Me ne fugis) (Virgil), 5–7vv, M vi, 6
Donec gratus eram tibi (Horace), 8vv, M vi, 16
Hesperiae cum laeta (2p Quis mihi te similem) (G. Faletti), 5vv, 1549^{7}; M i, 127
Itala quae cecidit (2p Una tibi floret), 5vv, 1544^{6}; M i, 7
Labore primus Hercules, 5vv, M vi, 53
Mirabar solito laetas (N. Stopius), 6vv, M vi, 87
Musica dulci sono, 4vv, 1565^{18}; M v, 20
O fortuna potens (2p Haec aufert iuvenes) (C.F. Symphosius, attrib. Virgil), 5vv, M vi, 73
O qui populos suscipis (G.B. Pigna), 5vv, M vi, 70
O socii neque enim (2p Per varios casus) (Virgil), 5vv, 1566^{17}; M v, 110
Pulchrior italicis [= Beatam me dicent], 5vv, 1545; M i, 48
Quis tuos presul (2p Quin tenes legum), 6vv, 1544^{22}; M vi, 176
Rex Asiae et Ponti, 5vv, 1565^{18}; M v, 88

CHANSONS

Il primo libro de madrigali, 4vv (Ferrara, 1550) [1550]
Amour ne faict, 5vv, 1570^{5}; M viii, 54
En voz adieux, 4vv, 1550; M viii, 39
Susann'un iour, 5vv, 1570^{5}; M viii, 49

O altitudo divitiarum (2p Quis enim cognovit), 5vv, 1549^{7}; M i, 122
O crux benedicta, 4vv, 1563^{4}; M vi, 32
Pater noster, 5vv, M vi, 49
Plange quasi (2p Accingite vos), 5vv, 1545; M i, 63
Quanti mercenarii (2p Pater peccavi), 5vv, 1545; M i, 86
Quem vidistis, pastores, 7vv; M vi, 100
Quid gloriaris (2p Videbunt iusti), 5vv, 1545; M i, 90
Regina caeli, 3vv, 1551^{16}; M viii, 34
Repleatur os meum (2p Clementissime pater), 5vv; M vi, 169
Si ignoras te (2p Surge, propera), 5vv, 1545; M i, 74
Si resurrexistis, 5vv, formerly *I-TVd*, destroyed World War II
Stetit Jesus in medio (2p Haec cum dixisset), 4vv, 1563^{4}; M vi, 111
Sub tuum praesidium, 4vv; M vi, 209
Sub tuum praesidium, 4vv, 1563^{4}; M vi, 30
Tribularer, si nescirem (2p Secundum multitudinem), 5vv, 1544^{6}; M i, 29
Usquequo Domine (2p Illumina oculos meos), 5vv, 1545; M i, 68
Vado ad eum, 5vv, 1544^{6}; M i, 22
Vias tuas (2p Notam fac mihi viam), 5vv, 1545; M i, 109

CONTRAFACTUS OF MOTETS

Beatam me dicent [= Pulchrior italicis], 5vv, 1595
Hic vir despiciens [= Angustiae mihi], 5vv, *I-TVd*
Hodie scietis [= Pulchrior Italicus], 5vv, *TVd*
Mulier quae erat [Domine quis habitabit], 5vv, *TVd*,
O Gregori [= Cantantibus organicis], 5vv, *TVd*
Petre amas me [= Domine confido], 5vv, *TVd*
Prudentes virgines [= Exaudiat me Dominus], 5vv, *TVd*
Regnum mundi [= Usquequo Domine], 5vv, *TVd*

DOUBTFUL MOTETS

Clamabat autem, 5vv, 1549^{8} (actually by Morales); M i, 143
Cum sublevassit oculos, 4vv, *E-Mmc*; M viii, 81
Dinumerabo eos, 5vv, *Mmc*; M viii, 90
Fratres: Scitote, 5vv, 1589^{17}; M vi, 164
Fulgebunt iusti, 4vv, 1569^{7}; M vi, 169
Hic est panis, 5vv, 1595; M vi, 149
Iubilate Deo (2p Populus eius), 5vv, 1595; M vi, 118
Levate in caelum (2p Salus autem Domini), 5vv, 1595 (? by Porta); M vi, 141
O salutaris hostia, 5vv, 1595; M vi, 124
Parce mihi (2p Peccavi quid faciam), 5vv, 1595; M vi, 128
Quae est ista, 4vv; M vi, 116
Sacerdos et pontifex, 4vv, *E-Mmc*; M viii, 93
Salve crux pretiosa, 5vv, 1595; M vi, 147
Sicut cervus desiderat, 4vv, *Mmc*; M viii, 87
Sumens illud, 4vv, *Mmc*; M viii, 95
Tu es Pastor ovium, 4vv, *Mmc*; M viii, 84
Virtute magna (2p Repleti quidem), 5vv, 1549^{6}; M vi, 153
Voce me ad Dominum, 5vv, 1595 (? Porta or P. Animuccia); M vi, 126

MASSES

Missa a note negre, 5vv (on Rore's Tout ce qu'on peut); M vii, 91
Missa 'Doulce mêmoire', 5vv, 1566[1] (on Sandrin's chanson); M vii, 122
Missa 'Praeter rerum seriem', 7vv (on Josquin's motet); M vii, 55
Missa Vivat felix Hercules, 5vv (c.f. on soggetto cavato); M vii, 32
Missa 'Vous ne l'aurez pas', 5vv, 1555[1] (incomplete, doubtful); M vii, 1

OTHER LITURGICAL MUSIC

Beatus vir, vesper psalm, 4vv, 1554[17]; M viii, 7
Confitebor tibi, vesper psalm, 4vv, 1554[17]; M viii, 3
De profundis, vesper psalm, 4vv, 1554[17]; M viii, 11
Dixit Dominus, vesper psalm, 4vv, 1554[17]; M viii, 1
Momento Domine David, vesper psalm, 4vv, 1554[17]; M viii, 14
Magnificat (primi toni) (odd verses), 4vv, M viii, 22
Magnificat (sexti toni) (even verses), 4vv, 1554[17]; M viii, 26
Passio ... secundum Joannem, 2–6vv, (Paris, 1557) (doubtful; attrib. Willaert); ed. A. Schmitz, *Oberitalienische Figuralpassion* (Mainz, 1955), 57

TEXTLESS WORKS

1 textless, inc., 5vv; M vi, 211

1 canon, 6vv; M viii, 67 (doubtful)
1, 4vv; M viii, 70 (doubtful)
2, 5vv; M viii, 74 (doubtful)
3, 5vv; M viii, 77 (doubtful)

JESSIE ANN OWENS

Rorem, Ned (*b* Richmond, IN, 23 Oct 1923). American composer and writer. He grew up in Chicago, where he studied the piano with Bonds and music theory with Sowerby. His interests focussed early on 20th-century music, especially the works of Stravinsky and the French Impressionists. Billie Holiday, whose artistry he has written about eloquently, also made a lasting impression.

Rorem began studies at Northwestern University in 1940, but left in 1942 to enter the Curtis Institute in Philadelphia. He found classes at Curtis stultifying, however, and believed his composition teacher, Rosario Scalero, to be too rigid and conservative. In late 1943 he left Curtis and became secretary and music copyist to Virgil Thomson in New York. Though he never studied composition with Thomson, he benefited from his instruction in orchestration and prosody.

Rorem spent the summers of 1946 and 1947 as a fellowship student at Tanglewood, where he was part of Copland's composition class. Copland, he later wrote, 'was less a pedagogue than an adviser – a sort of musical protocol expert'. He eventually completed his formal training at the Juilliard School (BA 1947, MM 1949). In 1948 *The Lordly Hudson*, on a text by Paul Goodman, was deemed the 'best published song of the year' by the Music Library Association and *Overture in C*, recipient of the Gershwin Prize, was performed by the New York PO at Carnegie Hall.

In 1949 Rorem went to Paris, where he studied at the Ecole Normale de Musique with Arthur Honegger. After travels through Morocco, he settled in Paris in 1952, where he lived for six years, winning acceptance into the literary and musical circle of Cocteau, Auric and Poulenc, and gaining the patronage of Marie-Laure de Noailles. Increasing attention to his compositions in the USA compelled his return to New York in 1958. He later taught at the University of Buffalo (1959–60) and the University of Utah (1965–7), and in 1980 was appointed to the Curtis Institute.

Outside musical circles, Rorem became known for his writing, particularly his diaries. *The Paris Diary of Ned Rorem* (New York, 1966/*R*) includes sharp, elegantly written observations on culture, people, music and more. His nonchalant, guiltless accounts of his homosexual life, three years before the Stonewall uprising started the modern gay liberation movement, made Rorem a hero to 1960s youth. Three additional autobiographical volumes followed: *The New York Diary* (New York, 1967/*R*), *The Final Diary* (New York, 1974/*R*), and *The Nantucket Diary* (San Francisco, 1987). He has also published *Knowing When to Stop* (New York, 1994), a memoir of his early years. Rorem's several books of essays, which discuss topics from fellow composers to pop culture, also reveal him to be a trenchant music critic and insightful witness to his times.

Though many of Rorem's musical works exhibit advanced harmonic techniques – altered chords, polytonal passages and patches of modified serialism – he has never strayed far from diatonicism. His use of tonal materials, however, produces striking variety, complexity and, often, intensity. Though he is best known as a composer of songs, it was an orchestral suite, *Air Music* (1974), that won the Pulitzer Prize in 1976. His many orchestral works are distinguished by timbral exploration, rhythmic inventiveness and harmonic richness. The Piano Concerto for Left Hand and Orchestra (1993) is notable for its structural ingenuity. The work's eight movements include an opening and closing passacaglia interspersed with a tarantella, hymn, duet, vignette and medley, fashioned into three larger sections.

It is Rorem's nearly 400 songs, for solo voice and piano and for voice and chamber ensemble, that are his greatest legacy. It was not the human voice that originally drew him to song, but 'poetry as expressed through the voice'. His song writing is graced by his skills at prosody (he sets words with naturalness and clarity, without compromising the range and scope of vocal lines), and by his choice of texts. In his songs he has aspired, in the words of Thomson, to be 'an American Poulenc', communicating restraint, wit, elegance and direct yet unsentimental expressivity.

In January 1998 the New York Festival of Song, with support from the Library of Congress, gave the première of Rorem's *Evidence of Things Not Seen*, a set of 36 poems by 24 authors. The work is arranged in three large segments: 'Beginnings', the first, includes songs about moving forward and the 'wistful optimism of love'; 'Middles', the second, touches on coming of age and the horrors of war; 'Ends' treats issues of death, inspired, in part, by friends of the composer stricken by AIDS. In 1994 a revival of *Miss Julie* (1965), Rorem's only full-length opera, at the Manhattan School of Music Opera Theater showed him also to be an opera composer with a keen dramatic sense and sure vocal instincts.

WORKS

OPERAS

A Childhood Miracle (1, E. Stein, after N. Hawthorne: *The Snow Image*), 1951; New York, 1955

The Robbers (1, Rorem, rev. M. Blitzstein, after G. Chaucer: *The Pardoner's Tale*), 1956; New York, Mannes College, 14 April 1958

The Anniversary (J. Kessler), 1961, unperf.

Miss Julie (2, K. Elmslie, after A. Strindberg), 1964–5; New York, City Opera, 4 Nov 1965, rev. New York, 1979

Bertha (1, K. Koch), 1968; New York, Alice Tully Hall, 26 Nov 1973

Three Sisters who are Not Sisters (3, G. Stein), 1968; Philadelphia, Temple U., 24 July 1971

Fables (5 short ops, J. de la Fontaine, trans. M. Moore), 1970; Martin, TN, 21 May 1971

Hearing (1, J. Holmes after Koch), 1976; New York, Christ and St Stephens Church, 15 March 1977 [based on song cycle]

SONG CYCLES

With pf: 3 Incantations from a Marionette Tale (C. Boultenhouse), 1948; Flight for Heaven (R. Herrick), 1950; Cycle of Holy Songs (Pss cxxxiv, cxlii, cxlviii, cl), 1951; From an Unknown Past (anon. 15th and 16th century), 1951 [arr. for chorus]; 4 Dialogues (F. O'Hara), S, T, 2 pf, 1953–4; Poèmes pour la paix (J. Regnier, P. de Ronsard, O. de Magny, J. Daurat, J.-A. de Baïf), 1953 [arr. medium v, orch, 1956]; King Midas (H. Moss), 1960–61; Poems of Love and the Rain (D. Windham, W.H. Auden, Moss, E. Dickinson, T. Roethke, J. Larson, e.e. cummings, K. Pitchford), 1962–3; Hearing (K. Koch), 1965–6 [arr. as stage work, 1976]; Some Trees (J. Ashbery), S, Mez, B-Bar, pf, 1968; War Scenes (W. Whitman: *Specimen Days*), 1969; Women's Voices (E. Wylie, C. Rossetti, A. Bradstreet, M. Leigh, Lady Chudleigh, M.S. Herbert, Countess of Pembroke, M.E. Coleridge, A. Rich, Dickinson, A. Boleyn, L. Ridge, C. Mew), 1975–6; The Nantucket Songs (Roethke, W.C. Williams, E. Waller, C. Rossetti, W.S. Landor, Ashbery), 1979; 3 Calamus Poems (Whitman), 1982

ANTHONY TOMMASINI (text), JAMES HOLMES/ARLYS MCDONALD (work-list, bibliography)

Ros, Edmundo (*b* Port of Spain, 7 Dec 1910). Venezuelan bandleader, active in Britain. He played in the Venezuelan Military Academy Band and was a timpanist in the Venezuelan SO; he also learnt the saxophone and American 'hot' music and formed his own dance band. At the RAM, London, he studied harmony, composition and orchestration, financed by a Venezuelan government grant (1937–42); concurrently he performed with Latin-American bands in London and was the vocalist and percussionist in Don Marino Baretto's band at the Embassy Club. In 1940 he formed his first London band and by 1942 he was broadcasting, recording and playing for films and private engagements. The staple of Ros's repertory in his heyday around 1950 was the application of samba and rumba rhythms to well-known songs, so popularizing Latin rhythms in Britain. His most successful numbers in this style included his theme tune *The Cuban Love Song* and also *Tico Tico*, *Sun in the Morning* and *The Wedding Samba*. He collaborated with Ted Heath in the early 1960s, and retired from performance in 1975.

□

Rosa, Carl (August Nikolaus) [Rose, Karl] (*b* Hamburg, 22 March 1842; *d* Paris, 30 April 1889). German impresario, violinist and conductor. At the age of 12 he toured England, Denmark and Germany as a violinist. After studies (from 1859) at the conservatories of Leipzig and Paris, he was appointed Konzertmeister in Hamburg (1863–5). In 1866 he went to London and on 10 March appeared as a soloist at the Crystal Palace. After a short stay in England he joined Bateman in a concert tour of the USA, where he met the soprano Euphrosyne Parepa; they were married in New York in February 1867. His wife's success in opera led to the formation of a company under Rosa's management and conductorship, which in its early seasons also included Wachtel, Santley, Ronconi and Formes. Early in 1871 he returned with his wife to England, and then they made an extended visit to Egypt for reasons of health; after this they returned again to London, but Parepa-Rosa died almost immediately, on 21 January 1874. Rosa, however, was resolved to test the fortunes of opera in English in London, and on 11 September 1875 the CARL ROSA OPERA COMPANY opened its first season at the Princess's Theatre with *The Marriage of Figaro* and a cast including Rose Hersee and Santley, and Rosa himself conducting. Between 1876 and 1882 his opera seasons in London and the provinces were noteworthy for the careful manner in which repertory was chosen, rehearsed and mounted. Rosa himself had a gift for spotting talented singers, and introduced popular subscription pieces. The company commissioned many British works, and gave the first performances of such operas as Goring Thomas's *Esmeralda* (1883) and *Nadeshda* (1885), Stanford's *Canterbury Pilgrims* (1884) and Corder's *Nordisa* (1887). The company also staged the first performances in English of *Der fliegende Holländer* (1876), *Mignon* (1880), *Lohengrin* (1880), *Aida* (1880) and, most sucessfully, *Tannhäuser* (1882), among other works. In 1883 Rosa became associated with Augustus Harris, manager of the Theatre Royal, Drury Lane, and a prosperous five years for the company followed.

FRANK WALKER, HAROLD ROSENTHAL/R

Rosa, Carlantonio de, Marquis of Villarosa (*b* Naples, 1 Jan 1762; *d* Naples, 30 Jan 1847). Italian historian and writer on music. He was trained in the arts, law and philosophy and in 1823 was made royal historian. He published a number of biographies and biographical dictionaries of Neapolitan figures. Of musical interest among them are the *Lettera biografica intorno alla patria ed alla vita di Gio: Battista Pergolese* (Naples, 1831, enlarged 2/1843), in which he introduced archival proof of the date and place of Pergolesi's birth, and *Memorie dei compositori di musica del regno di Napoli* (Naples, 1840). As Villarosa explained in the preface, *Memorie* was based on a manuscript entitled *Apoteosi della musica*, left by Giuseppe Sigismondo, a librarian of the Naples Conservatory; it was not fit to be published as it stood but contained valuable notices of some earlier musicians to which Villarosa added material gathered from living persons and archival sources. The result is highly uneven in the amount of space devoted to composers of importance and in the accuracy of its information. This book

was the source for many errors carried on by Fétis, Florimo and others and, though occasionally useful, is mainly of historical interest.

□

Rosa (Franco), (Maria) Clotilde (Belo de Carvalho) (*b* Lisbon, 11 May 1930). Portuguese harpist and composer. Educated at the Lisbon Conservatory (1942–9), she played the harp as a freelancer until 1963, when she went to study in the Netherlands. She joined the Oporto RO (1965), then the Lisbon RO (1969), where she remained until its extinction in 1991. In 1987 she was appointed a teacher at the Lisbon Conservatory.

Rosa's visit to the Netherlands exposed her to contemporary musical trends that had barely reached Portugal. Through repeated visits to Darmstadt and her acquaintance with Peixinho she became involved in the performance of avant-garde music. This led to her inclusion in the Lisbon Contemporary Music Group (GMCL), founded in 1970 by Peixinho. The experiments of the GMCL starting in 1974 (the year of the Portuguese democratic revolution) led Rosa to embrace composition. The following years established her reputation as a composer, but a personal, mature style did not emerge before 1980. In the early 1980s she started to adopt pan-chromatic materials with potential tonal associations and concentrated on contrapuntal techniques and textural fluidity. This enabled her to create forceful, dramatic gestures combined with subtle, evocative atmospheres, producing music of profound emotional resonance and cultural thickness.

WORKS

DRAMATIC AND VOCAL

Stage: Música para Inês I (ballet), 1983; Música para Inês II (ballet), 1986; Portuguex (op, 3, A. Silva Carvalho), 1986–9

Incid music: Projecto-collage (M. Dias Fonseca), 1977; Diapason (mise-en-scène), 1979; Jogo projectado (M.C. Araújo), 1979–81; Jogo projectado II (mis-en-scène, Araújo), 1981; Pedro, o Cru (A. Patrício), 1982; Hellas II (mise-en-scène, ancient Greek texts), 1985

Solo vocal: Discurso tardio (Andrade), T, inst ens, tape, 1975–8; 3 canções breves (Andrade), S, gui, 1980; Passo dezembros na alma (F. Pessoa), S, fl, va, hp, perc, 1981; Cinzas de Sísifo (A. Silva Carvalho), S, gui, 1986; O fabricar da música e do silêncio (Silva Carvalho), Bar, fl, vc, pf, 1987; Hellas III (ancient Greek texts), S, inst ens, 1985–90; Vozes de Florbela (F. Espanca), S, Gui, 1991; Amor que mal existe (Espanca), S, cl, pf, 1992; Antínoo (S. Mello Breyner), S, db, 1993; Em louvor da terra (Rosa), S, vn, va, vc, gui, perc, 1997; A voz da tília (Espanca), S, pn, 1991–7; Glosas próprias (L. Camões), S, pn/hp, 1998

Other vocal: Sonhava de um marinheiro (Pessoa), 2 S, Mez, small orch, tape, 1980; As quatro estações do ano, children's chorus, insts designed by C. Orff, 1982; Litania (Andrade), chorus, 1996

INSTRUMENTAL

Orch: Ricercari, 1983–4; Diapason, str, 2nd version, 1979–87; Orfeu e as sombras, chbr orch, pf, hpd, 1993

5 or more insts: Encontro, fl, qt, 1976; Música para 3 grupos, inst ens, 1981; Recondita armonia, fl, cl, va, 2 vc, gui, hp, 1984; Metalis, 3 tpt, hn, 2 trbn, tuba, 1985; Hommage, fl, cl, vn, va, vc, bn, hpd, org, 1986; Alliage, 2 tpt, hn, 2 trbn, tuba, 1991; Interferências, fl, cl, vn, va, vc, gui, pf, hp, perc, 1991; Elos. In memoriam, fl, cl, tpt, vn, va, vc, gui, pf, hp, perc, 1992; Laik, fl, cl, tpt, vn, va, vc, gui, pf, hpd, hp, perc, 1993; Frequência 94.4, fl, ob, cl, vn, va, tpt, hn, bn, 1994; Breve será dia, fl, cl, vn, va, vc, hp, perc, 1994

2–4 insts: Contrastes, fl, celtic hp, 1976; Alternâncias, fl, pf, 1977; Péon, vn, va da gamba, 1990; Ditirambo, fl, hp 1990, rev. vn, hp, 1990–91; Castelos d'oiro em mundos irreais, vn, pf, 1990; Modus, 2 cl, basset hn, b cl, 1993; Hommage-mémoires, fl, vn, va, vc, 1995; Canto de Zéfiro, 2 fl/(fl, vn), pf, 1997; Impromptu, hn, pf, 1997; Saxofilia, sax qt, 1997; Contornos, va, db, pf, 1998; Str Trio, 1998–9; 3 apontamentos, vn, vc, 1998–9

Solo inst: Variantes I, fl, 1980; Hellas I, hp, 1982; Ode, gui 1982; Variantes II, pf, 1982; Eclat du soleil, ob, 1986; 8 estudos, hp, 1986–98; Divertimento, cl, 1987; Waving, pf, 1992; Le récit d'Orphée, rec, 1994; Clair-et-net, cl, 1996

MANUEL PEDRO FERREIRA

Rosa, Guillermus (de) (*fl* 1462–89; *d* Bruges, 28 July 1489). Franco-Flemish singer. *See* LE ROUGE, G.

Rosa, Noel (de Medeiros) (*b* Rio de Janeiro, 11 Dec 1910; *d* Rio de Janeiro, 4 May 1937). Brazilian composer and singer. Mostly self-taught, he began playing the mandolin at the age of 13, then the guitar, which he learned from his father and friends. By 1925 he was playing at local events. He joined the Bando de Tangarás, which included the important popular musicians João de Barro, Almirante, and Alvino and Henrique Brito, and which made its first recording in 1929. In the same year Rosa composed his first pieces, but it was in 1930 that his unique style was revealed in the samba *Com que roupa?* From 1931 to the end of his life he dedicated himself almost exclusively to the composition of urban sambas, expressing in the colloquial 'carioca' language of the period the psychological traits and behavioural customs and feelings of the lower middle class in Rio, including the figure of the *malandro* (hustler). In this he was the first popular composer in Brazil to express empathy with the plight of the urban poor through mild but effective social criticism.

Despite his short life he was very prolific; among his 259 known compositions the great majority are samba songs, the most popular of which have been *Eu vou pra Vila* (1930), *São coisas nossas* (1932), *Fita amarela* (1932), *Feitio de oração* (1933), *O orvalho vem caindo* (1933), *Três apitos* (1933), *Pastorinhas* (1934), *Conversa de botequim* (1935), *Palpite infeliz* (1935), *De babado* (1936), *Pierrot apaixonado* (1936), *Quem ri melhor* (1936), and *Ultimo desejo* (1937). Many of his sambas and marches were hits of Rio's Carnival seasons from 1931 to 1938, and he developed a special type of urban samba known as *samba de breque* (break samba), a highly syncopated sub-genre in which sudden stops ('breaks') allow the solo vocalist to insert humorous spoken commentaries. The neighbourhood where he was born and died, Vila Isabel, was immortalized in his samba *Feitiço da Vila* (*Vila's Magic Spell*; 1934) and has remained a symbol of popular culture of the period.

GERARD BÉHAGUE

Rosa, Salvator [Salvatore] (*b* Arenella, Naples, 21 July 1615; *d* Rome, 15 March 1673). Italian painter and poet. He moved to Rome in 1635 and between 1640 and 1649 he lived in Florence and Volterra. There he founded the Accademia dei Percossi, whose members included the poet and librettist Giovanni Apolloni, the playwright G.B.

Ricciardi and probably the composer Antonio Cesti (for whom Rosa's letters are an important source of biographical information). Rosa was a gifted comic actor and was famous for dramatic readings of his satires. His principal significance for music derives from the first satire, *La musica* (1641), in which his keen vision of the follies of musical life in Rome (particularly the attention lavished on singers) receives trenchant expression. Rosa provided texts for at least four cantatas by Cesti but denied the composer's request for an opera libretto. In 1649 he returned to Rome, where he remained until his death.

Rosa was one of the first painters to reject the patronage system and champion artistic freedom. In the 18th century his satires and wild landscapes were much admired (save by Mattheson, who attacked *La musica* in his *Mithridat*). Rosa came to be regarded as a romantic hero and many myths about him arose, including the notion that the composed music (see Walker); his life, suitably transformed, furnished material for several opera librettos in the 19th century and Liszt named a movement of *Années de pèlerinage* after him.

THOMAS WALKER/JENNIFER WILLIAMS BROWN

Rosace (Fr.). *See* ROSE.

Rosales, Antonio (*b* Madrid, *c*1740; *d* Madrid, 1801). Spanish composer. He was chiefly a composer of *tonadillas*, of which he wrote at least 150, the first dating from 1762, the last from 1791. His first success as a zarzuela composer came on 28 November 1767, when the one-act *burlesca El tío y la tía* (Ramón de la Cruz, excerpt in *E-Mn*, score in *E-Mm*) was staged in Madrid at the Teatro de la Cruz. In 1769 he was made *músico secundario* by the Madrid theatre company manager Manuel Martínez, and on 1 July 1776 his one-act zarzuela *El licenciado Farfulla*, also to a libretto by Cruz, had its première at the Teatro del Príncipe. This popular work, which was sung everywhere in Spain until 1813, mixed Spanish folk airs with dances such as the *jácara*, *folía*, seguidilla and *coplas de caballo*. About 1787 he succeeded Rodríguez de Hita as *maestro de capilla* of the Convento Real de la Encarnación at Madrid. 149 *tonadillas* by him are at the Biblioteca Municipal in Madrid; one, *El recitado* (*c*1775), lampooning Italian recitative, was edited by Subirá (Madrid, 1930). Parts for his solo *tonadilla El Escarmentado* (first performance at Lima Coliseo dated 1764) were loaned to the Peruvian national library in 1959.

According to Ramón de la Cruz, Rosales composed with extreme speed and captured the public by incorporating street songs of the day in his stage works. The topical subject matter of his *tonadillas* was kept fresh by the dialogue being constantly changed to stay abreast of the latest news. Rosales also composed *entremeses* and *sainetes*; 13 of the latter survive (in *E-Mm*), the earliest dated 1763.

ROBERT STEVENSON

Rosales, Manuel J. (*b* New York, 1947). American organ builder. He studied at Immaculate Heart College and UCLA prior to becoming an apprentice at the Schlicker Organ Co. where he worked from 1969 to 1972. During his employment with Schlicker he contributed to the installation and finishing of approximately 50 organs. In 1972 he established his own firm in Los Angeles, initially engaging in maintenance work and representing the Schlicker firm. In 1980 the firm was incorporated as Rosales Organ Builders. Since that time Rosales has been active as a builder, rebuilder as well as restorer of both mechanical and electro-pneumatic action organs. Through knowledge gained on several study tours to Germany, Mexico and France in conjunction with Harald Vogel, Charles Fisk and Susan Tattershall, Rosales has developed an historically informed eclectic style for his larger organs, although smaller instruments, such as the Mexican-style organ built in 1988 for Mission San José, Fremont, California, are sometimes of a specific type. As a restorer, he has been instrumental in preserving several organs by the pioneer Los Angeles builder Murray M. Harris. Rosales's smaller or medium-sized instruments, such as that in the King of Glory Lutheran Church, Dallas (1994), are usually entirely mechanical action, but the larger ones employ electro-pneumatic or solid-state stop and combination action. Among the latter are those built for the First Presbyterian Church, Granada Hills, California (1982), Trinity Cathedral, Portland, Oregon (1987), and the First Presbyterian Church, Oakland, California (1993). For further information see B. Jones: 'Boyd Jones Looks at the Organs of Manuel J. Rosales', *Choir & Organ*, iii/3 (1995), 39–41.

BARBARA OWEN

Rosalia (It.; Ger. *Schusterfleck*: 'cobbler's patch'). A pejorative name, taken from an old Italian popular song *Rosalia, mia cara*, for the identical repetition of a melody a step higher, often involving transposition. Whenever it is used polyphonically, the part-writing is threatened with consecutive 5ths or octaves, and for this reason it has been regarded disparagingly as a compositional device.

By giving the effects both of rapid modulation and of melodic sequence it can provide great dramatic power and climax, as in the Hallelujah Chorus from Handel's *Messiah* ('King of kings' etc.). In the hands of a skilled contrapuntist, moreover, it can create the impression of a delicately elusive tonality without hinting at questionable part-writing: Mozart used it in this way in the first movement of the 'Jupiter' Symphony and in the finale of his String Quartet K575.

See also SEQUENCE (ii).

WILLIAM DRABKIN

Rosand, Aaron (*b* Hammond, IN, 15 March 1927). American violinist. His early studies were under P. Marinus Paulsen (1935–9) and Leon Sametini (1940–44), the latter a student of Ševčík and Ysaÿe. At the age of ten he made his début with the Chicago SO under Stock, playing the Mendelssohn Violin Concerto. He continued his studies at the Curtis Institute with Zimbalist (1944–8), and made his New York début with a Town Hall recital in 1948. His European début occurred in 1955 in Copenhagen; he subsequently based his career in Europe but also made tours of East Asia, the former USSR and the USA, and appeared with the leading American orchestras. From the beginning of his career Rosand showed a marked interest in the Romantic violin literature, and he has long specialized in reviving neglected works of the 19th century. He has an enormous repertory of over 70 concertos, including rarely played ones by Joachim, Godard, Hubay, Ries, Lalo, Vieuxtemps and Wieniawski, many of which he has recorded. In 1971 he began teaching at the annual Académie Internationale d'Eté in Nice, and in 1981 he joined the faculty of the Curtis Institute. Rosand possesses an effortless technique and a sumptuous tone. He plays the 1741 Guarneri del Gesù formerly owned by Paul Kochanski.

Rosand, Ellen (*b* New York, 28 Feb 1940). American musicologist. She studied at Vassar College (BA 1961), Harvard (MA 1964) and New York University where she took the doctorate in 1971 with a dissertation on aria in Cavalli's early operas. She taught at Brooklyn and Hunter colleges, New York (1972–7) and at Rutgers University (1977–92); she became professor of music at Yale in 1992. She was editor-in-chief of the *Journal of the American Musicological Society* (1981–3) and president of the society (1992–4). Her research covers the history of opera and Baroque vocal music; she has published substantial and rigorously researched articles on aspects of Monteverdi operas and on such broad issues as the libretto, the scenario, the lament and madness in early Venetian opera.

PAULA MORGAN

Rosart, Jacques-François (*b* Namur, 5 Aug 1714; *d* Brussels, 29 May 1777). Flemish music type founder. From 1750 he began to develop new music types, and in 1753 perfected the *caractère coulée ou de finance*, destined for texts accompanying music. A new method of music printing, now called 'mosaic types', was developed by Rosart from 1749 to 1750, but it was J.G.I. Breitkopf who perfected the technique and profited from its use. After working at Haarlem for Johannes Enschedé, he established himself in Brussels in 1759, and in 1761 published proofs of *The Type Specimen of Jacques-François Rosart*, dedicated to Charles de Lorraine, which primarily set out music-type: *le plain-chant sur cinq corps de cicero*, *la double philosophie plain-chant* and *le caractère de musique*. His type rapidly became famous so that in 1764 he owned the only type foundry in the Austrian Netherlands. In 1768 Rosart published a second edition (*R*1973 with an introduction by F. Baudin and N. Hoeflake), augmented by his proofs. On his death, his son Mathias took over the foundry and, on 19 July 1777, formed a partnership with Jean-Louis de Boubers. The foundry was put up for sale on 20 June 1779, and was bought first by the widow of De Cellier and then by Benoît Le Francq, both printers and booksellers in Brussels.

MARIE CORNAZ

Rosas, Juventino (*b* Santa Cruz de Galeana, 23 or 25 Jan 1868; *d* Batabanó, Cuba, 13 July 1894). Mexican violinist and composer. He was a pure-blooded Otomí Indian. His father, a harpist, took him to Mexico City at the age of six to play in a family quartet with his brothers Manuel (guitarist) and Patrocinio (singer). Shortly afterwards he

joined the S Sebastian church orchestra and at 15 was a member of the first violin section of Angela Peralta's touring opera orchestra. He then settled in Mexico City and began to compose salon music, publishing an enormous number of waltzes, polkas, mazurkas and schottisches. Many of them are in the library of the national conservatory. They have no recognizable Amerindian flavour. The set of five waltzes titled *Sobre las olas* (1891) gained such wide international popularity that it was even attributed to Johann Strauss. Rosas died of a fever after joining a travelling zarzuela company.

JUAN A. ORREGO-SALAS

Rosas Fernandes, Maria Helena (*b* Brazópolis, Minas Gerais, 8 July 1933). Brazilian composer, conductor and pianist. In 1964 she graduated from the Conservatório Brasileiro de Música, Rio de Janeiro, where she studied the piano with Liddy Mignone. She pursued further studies, in composition and conducting and in 1977 graduated from the Escola Superior de Musica S Marcelina, São Paulo. Her composition teachers were Osvaldo Lacerda and José de Almeida Prado. She has also studied music education and in 1992 held a teaching appointment at the Escola de Artes Pró-Música, São Paulo. Her output consists mainly of chamber works; piano music, of which the prize-winning *Ciclo no.2* (second prize in a Brazilian composers' competition in 1979) has entered the repertory of many Brazilian pianists; and, most importantly, vocal and choral music, which often incorporates Native American material.

CRISTINA MAGALDI

Rosbaud, Hans (Johann) (*b* Graz, 22 July 1895; *d* Lugano, 29 Dec 1962). Austrian conductor. He attended the Hoch Conservatory in Frankfurt, where he studied the piano with Alfred Hoehn and composition with Bernhard Sekles. In 1921 he was appointed director of the Städtische Musikschule in Mainz, where he also conducted some of the municipal orchestra's concerts. His performance in 1923 of Hindemith's *Kammermusik no.1* signalled the commitment to modern music that marked his career. In 1929 he assumed the leadership of the Frankfurt RO. Here his carefully prepared performances, especially of new music, attracted wide attention. Until the Nazi takeover in January 1933 Rosbaud regularly performed works by Schoenberg, Webern, Berg, Hindemith, Stravinsky, Bartók and others. Premières included Schoenberg's *Begleitmusik zu einer Lichtspielszene* op.34 (1930) and *Vier Orchesterlieder* op.22 (1932), and Bartók's Second Piano Concerto, with the composer as soloist (1933). In 1937, after unsuccessful efforts to find employment in the USA, Rosbaud left Frankfurt, accepting the post of Generalmusikdirektor in Münster; four years later he was appointed Generalmusikdirektor in German-occupied Strasbourg.

In 1945 the American military appointed Rosbaud Generalmusikdirektor of Munich and conductor of the Munich PO, and in 1948 he took over the orchestra of the newly established South-west German Radio (SWF) in Baden-Baden, a position he held until his death. The orchestra quickly gained recognition for its performances of modern music, especially after the Donaueschingen Festival was resumed in 1950. Rosbaud also appeared frequently at other festivals of modern music, including those of the ISCM, which awarded him its Schoenberg Medal in 1952. In 1954, replacing Schmidt-Isserstedt, he conducted the concert première of Schoenberg's *Moses und Aron*; the performance was recorded and released in 1957 as the first recording of the opera. In 1957 he also conducted the stage première of *Moses* in Zürich, and the following year directed memorable performances of

Hans Rosbaud, 1961

Erwartung and *Von heute auf morgen* at the Holland Festival.

Rosbaud's authoritative performances of the music of the Second Viennese School and of new works by Boulez, Stockhausen and their contemporaries gained him a reputation as a contemporary music specialist, a label which fails to do justice to the breadth of his achievements. In 1948 he helped organize the Aix-en-Provence Festival, where he appeared each summer until 1959, and where his performances of Mozart's operas garnered special praise. From 1950 he conducted Zürich's Tonhalle Orchestra, whose principal conductor he became in 1957. As guest conductor he toured widely in Europe, Argentina, South Africa and the USA. His performances were distinguished by clarity, precision, faithfulness to the score and an unerring grasp of structure. Rosbaud's commercial recordings range from Gluck (a notable reading of *Orphée*), Haydn and Mozart through Bruckner, Mahler and Sibelius to Stravinsky and the Second Viennese School. European archives preserve hundreds of Rosbaud's performances, including premières, many of which have appeared on CD.

JOAN EVANS

Roscoe, Martin (*b* Halton, Cheshire, 3 Aug 1952). English pianist. He studied at the RMCM with Gordon Green and Marjorie Clementi. He has played with all the major British orchestras and conductors and has forged a close link with the Royal Liverpool PO. He has also toured Australia, the Middle East and South America. As a chamber musician he has worked with many distinguished ensembles, and his partnership with Peter Donohoe is justly celebrated. Roscoe has appeared on several occasions at the Proms and in 1987–8 recorded the complete Schubert sonatas for BBC Radio. In 1998 he gave three recitals at the Wigmore Hall entitled 'Szymanowski – The Polish Impressionist', a celebration of the composer within the context of Chopin. Roscoe's recordings include concertos by Dohnányi and Ignaz Brüll, three volumes of Szymanowski's piano music, chamber music by Rebecca Clarke and Amy Beach, a solo recital of music by Dohnányi and a much-praised Gershwin two-piano recital with Donohoe. An eclectic pianist, whose repertory extends from Beethoven, Schubert and Brahms to Henze, Britten and Lutosławski, Roscoe displays exceptional keyboard assurance and warm sympathy for a wide variety of styles.

BRYCE MORRISON

Rose [knot] (Fr. *rosace*; Ger. *Rose*, *Stern*). A decorative device placed in the SOUNDHOLE of many string instruments, including lutes and guitars, keyboard instruments and occasionally bowed instruments such as viols. It is either carved from the wood of the soundboard (or table) itself, as in some early Italian harpsichords and virginals, or, most often, made separately from materials such as wood, veneer, parchment, ivory or combinations of these, and set into the soundboard. Some keyboard roses were cast from lead or lead alloy. In some roses, layers of wood veneer or parchment were used to build up elaborate three-dimensional designs. Makers sometimes incorporated their identifying mark or initials into their rose designs.

□

Rosé [Rosenblum], **Arnold (Josef)** (*b* Iaşi, Romania, 24 Oct 1863; *d* London, 25 Aug 1946). Austrian violinist. He studied with Heissler from 1873 at the Musikverein Konservatorium der Gesellschaft der Musikfreunde in Vienna, making his début at the Leipzig Gewandhaus in 1879. He also received support from Verdi, Gounod and Liszt. In 1881 he became leader of the orchestra of the Vienna Hofoper (later Staatsoper) and the Vienna PO, positions he held until 1938 (with some breaks due to disagreements, including an extended absence from 1907 to 1929). From 1888 to 1896 Rosé also led the orchestra of the Bayreuth Festival.

In 1883 he founded the Rosé Quartet, with Egghard, Loh and Eduard Rosé (Arnold's brother). The quartet underwent several changes of personnel, but from 1905 to 1920 consisted of Rosé, Fischer, Ruzitska and Buxbaum. The quartet performed with many prominent musicians, and gave the first performances of works by Brahms, Reger, Pfitzner, Korngold, Schmidt, Schoenberg (first two string quartets) and Webern (Five Movements). Among their most outstanding contributions were four Beethoven cycles, and their performances of the late quartets were especially acclaimed. Also noteworthy were frequent performances of Brahms and Schubert.

In 1902 Rosé married Mahler's sister Justine, and thus came into close contact with Mahler, who was then director of the Vienna Hofoper. Rosé appeared 48 times as a soloist with the Vienna PO, and from 1909 to 1924 taught at the Vienna Music Academy. He became a celebrated figure in Viennese musical life, and received many honours including the Order of Franz Josef and the Goldenes Verdienstzeichen um die Republik Österreich. In 1938 he emigrated to England, where he continued to perform, with Buxbaum and others, until 1945. Rosé played with great musicality, rhythmic sensitivity and purity of intonation; he was also noted for his absolute security in changing position, 'noble vibrato' and secure left hand. His correspondence with Mahler is contained in the Mahler-Rosé Collection at the University of Western Ontario.

Rosé's daughter Alma (*b* Vienna, 3 Nov 1906; *d* Auschwitz, ?4 April 1944) was also a violinist, and sometimes performed with her father in Bach's Double Concerto. She toured Europe as a violinist and as conductor of a women's orchestra until 1938, and was later arrested by the Germans in the Netherlands. In July

1943 she was transported to Auschwitz, where she led and directed the 'Mädchenorchester'. Her death is thought to have been caused by poisoning at the hands of a jealous colleague.

CARMEN OTTNER

Rose, Bernard (William George) (*b* Little Hallingbury, Herts., 9 May 1916; *d* Bampton, Oxford, 21 Nov 1996). English organist, musicologist and composer. He was a chorister under Alcock at Salisbury (1925–31) and studied at the RCM with Alcock (1933–5) before going up to Cambridge as organ scholar of St Catherine's College, where he was a pupil of Hubert Middleton and Edward Dent (BA 1938, MusB 1939). In 1939 Hugh Allen's influence drew him to Oxford, where he became organist at The Queen's College and conductor of the Eglesfield Musical Society. Distinguished war service intervened, including a period as a prisoner of war. With the Oxford Orchestral Society, Rose conducted the première of Vaughan Williams's *An Oxford Elegy*, in the composer's presence (1949). From 1946 he lectured in the faculty of music; he was appointed supernumerary Fellow of The Queen's College in 1949 and a university lecturer in 1955. He was made official Fellow of Queen's in 1954, took the DMus in 1955 and became Fellow, organist and *Informator choristarum* at Magdalen College in 1957, remaining there until his retirement in 1981. He was appointed conductor of the Oxford Harmonic Society in 1971 and in 1973–5 was vice-president of Magdalen. He was president of the Royal College of Organists in 1974–6.

Rose made a special study of the choral music of Tomkins (see *PRMA*, lxxxii, 1965–6, p.89), and prepared many editions of English music from the 16th to 18th centuries. His work with the Magdalen choir made it one of the finest English college choirs, particularly in the late 1960s and early 70s; it was widely renowned for its polish and precision, attention to words and stimulating repertory. He proved an enduringly popular lecturer and teacher, around whom legends gathered, and who influenced the development of generations of undergraduates. He composed 30 anthems, five settings of the canticles, two masses and several settings of the Preces and Responses, among them a set which remains the most popular of the 20th century. He was made an OBE in 1980.

EDITIONS

T. Tomkins: *Musica Deo sacra* [all except the canticles], EECM, v, ix, xiv, xxvii, xxxvii, xxxix (1965–80)

ERIC BLOM, DAVID SCOTT/PAUL HALE

Rose, David (*b* London, 15 June 1910; *d* Burbank, CA, 23 Aug 1990). American composer, arranger and conductor. His family emigrated from England when he was four, and he grew up in Chicago, absorbing the vibrant sounds of the emerging jazz scene. During the 1930s he worked with Benny Goodman and other dance bands, eventually moving to Hollywood to work in the film and recording industries. A long association with MGM resulted in many film scores (including *Jupiter's Darling*, 1955) and, after the introduction of LPs, regular record albums. In 1941 he became Judy Garland's first husband, and his radio show 'California Melodies' grew into something of an American institution, providing the showcase for his new compositions. In 1943 Rose startled the Light Music establishment with his *Holiday for Strings*, in turn inspiring a whole generation of composers including Anderson, Duncan and Farnon.

At the dawn of television he worked with all the leading singers and film stars, and is especially remembered for his Red Skelton, Jack Benny, Bob Hope and Fred Astaire shows. Rose received six gold discs, 22 Grammys, four Emmys and two Oscar nominations. In 1962, just when his composing career was waning, he produced his most enduring composition, *The Stripper*, and was always associated with it thereafter.

(*selective list*)

all works for orchestra

Dance of the Spanish Onion, 1942; Holiday for Strings, 1943; One Love, 1943; Our Waltz, 1943; My Dog has Fleas, 1944; Gay Spirits, 1946; Manhattan Square Dance, 1947; American Hoe Down, 1950; Rose of Bel-Air, 1951; Stringopation, 1951; Christmas Tree, 1953; Fiesta in Seville, 1953; Parade of Clowns, 1953; Satan and the Polar Bear, 1953; Holiday for Trombones, 1962; The Stripper, 1962; Holiday for Flutes, 1964; The Tiny Ballerina, 1967

DAVID ADES

Rose [Donington], **Gloria** (*b* New York, 20 May 1933; *d* Buffalo, NY, 25 April 1974). American musicologist. She was educated at Hunter College, New York (BA 1953), and at Yale (PhD 1960). She was greatly influenced by Leo Schrade, with whom she studied at Yale, and for whom she worked as a research assistant (1957–8). After two years (1958–60) as music librarian at Wellesley College, she taught at the University of Pittsburgh (1960–62). She also held visiting lectureships at Rutgers University (1968) and SUNY, Buffalo (1972). She was married to the English musicologist Robert Donington. Her published works deal with 17th-century Italian music, particularly Carissimi's chamber cantatas, of which she published an edition in 1969, and with problems relating to thoroughbass. In 1976 her research materials were acquired by the Music Library of the University of Birmingham.

HOWARD MAYER BROWN

Rose [Ross], **John.** English viol makers. John Rose (i) (*fl* 1552–61) was among the earliest known of English viol

makers, and his son John Rose (ii) (bur. London, 29 July 1611) was certainly the most celebrated. Both worked in Bridewell, London.

John Rose (i) was first mentioned in the account books of Sir Thomas Chaloner, who ordered from him a viol 'of the finest sort' in 1552. In 1561 he was mentioned in the books of the Bridewell court, where he leased premises in the former state apartments of Henry VIII. The books refer to him as 'virtuous and honest', and as having 'a most notable gift given of God in the making of instruments' which has made his name known throughout 'a great part of Christendom ... [He is] as muche commended in Italy than in this his natural contery'. John Stow's *Annales, or a General Chronicle of England*, 1631, p.869, credited him with the invention of the BANDORA in 1562, and noted that his son excelled in making them. The elder Rose probably died about 1562; if so no extant instruments can be securely attributed to him. Those that are credited to 'John Rose' date mainly from the 17th century and are probably the work of the son.

The younger Rose was apparently less virtuous than his father, but no less talented. He appeared in court records in 1568, when he was ordered to desist from performing puppet shows, and by 1602 he was perpetually in and out of debt. He created a fine body of work, some of which survives as evidence of the greatest period of English viol making. This includes a large consort bass in the Victoria and Albert Museum, London. A particularly fine bass viol (*c*1600) attributed to Rose is in the Hill collection at the Ashmolean Museum, Oxford. Rose's most famous instrument is the so-called Queen Elizabeth lute, a bandora (formerly thought to be an ORPHARION) reputedly given to an ancestor of Lord Tollemache by Queen Elizabeth I. Its label reads: 'IOANNES ROSA/ LONDINI/FECIT/In Bridwell the 27 of July/1580'. A viol by 'John. Rose in Brattwell 1599' is mentioned in an

Front and back views of the instrument, variously thought to be an early bandora or orpharion, inscribed on its sides 'Cymbalum decachordon', by John Rose (ii), London, 1580 (private collection): note the closeness of the outer strings to the edges of the fingerboard and the awkward placing of the two central pegs, spoiling the carved pattern on the front of the keyboard, suggesting that the sixth course was a later addition

auction catalogue published at The Hague in 1759. Thomas Mace (*Musick's Monument*, 1676, p.245) regarded the younger Rose, along with Bolles, as the finest of all viol makers.

JOHN DILWORTH

Rose, Jürgen (*b* Bernburg, 25 Aug 1937). German stage designer who has worked on several productions with OTTO SCHENK.

Rose, Karl. *See* ROSA, CARL.

Rose, Leonard (Joseph) (*b* Washington DC, 27 July 1918; *d* White Plains, NY, 16 Nov 1984). American cellist and teacher. He took his first cello lessons at the age of ten and the next year he went to Walter Grossman at the conservatory in Miami; later, in New York, he studied with his cousin Frank Miller, principal cellist of the NBC SO. He won a scholarship to the Curtis Institute, where his teacher was Felix Salmond (1934–8); he then left to become assistant principal cellist of the NBC SO under Toscanini. After one season he became principal cellist of the Cleveland Orchestra under Rodzinski, 1939–43, and directed the cello departments of the Cleveland Institute and Oberlin College. He next joined the New York PO, 1943–51, with which he made his concerto début at Carnegie Hall in 1944. His last solo appearance as a member of the New York PO was also his first in Britain, at the 1951 Edinburgh Festival; he then began touring widely as a soloist. He taught at the Juilliard School from 1947 and at the Curtis Institute from 1951 until 1962; his pupils included Lynn Harrell, Ronald Leonard, Yo-Yo Ma, Stephen Kates and the principal cellists of many leading American orchestras. Salmond presented him with his own music library, and Rose edited performing editions of a number of cello works. His large-toned but firmly controlled playing was heard to advantage in the Romantic repertory, most of which he also recorded, and he was much admired as a chamber player, especially in trios with Stern and Istomin (with whom he began performing regularly in 1961), and in sonatas with various pianists, notably Graffman. He commissioned, and later recorded, Schuman's *A Song of Orpheus*. He played a cello by Nicolò Amati dated 1662.

RICHARD BERNAS/DENNIS K. McINTIRE

Roseingrave. English family of organists and composers, possibly of Irish origin.

(1) Daniel Roseingrave (*d* Dublin, May 1727). According to Hawkins and Burney (who knew his son Thomas in the 1740s) he was a choirboy in the Chapel Royal with Henry Purcell. The Ralph Rossengrave who died in Dublin in 1667 could have been his father. He became Master of the Choristers at Gloucester Cathedral soon after Charles Wren's death in 1678, and organist in 1679. He married Ann Washbourne, the prebendary's daughter, in spring 1681, and later that year became organist and lay vicar of Winchester Cathedral. He was appointed organist, instructor of the choristers and lay vicar of Salisbury Cathedral on 19 April 1692, and moved to Dublin in 1698, becoming organist and stipendiary of Christ Church Cathedral and organist and vicar-choral of St Patrick's Cathedral. He worked at St Patrick's until 12 February 1719, when he resigned for health reasons, although he continued at Christ Church until his death; he was buried in St Bride's, Dublin. He evidently had a fiery temperament, for he was admonished for 'beating and wounding' a Gloucester colleague on 10 April 1679, and was fined twice for fighting in 1699 and 1700; on the second occasion the Christ Church authorities ordered that 'from henceforth no vicar or stipendary of this church do wear a sword, under penalty of expulsion'. He had at least seven children, including Daniel (*b* 1684–5), who became organist of Trinity College, Dublin, in 1705 and BA in 1707, (2) Thomas and (3) Ralph Roseingrave.

He was less noteworthy as a composer. The organ parts of five anthems and a service in F are in the part-autograph manuscript *US-BEm* 751, apparently copied during his time at Winchester. The service and three of the anthems are not known elsewhere, and are therefore incomplete. However, *Haste three, O God, to deliver me* is also at *GB-Lbl* (suggesting that it is an early work) and elsewhere, while *Lord, thou art become gracious* is in a score of Winchester provenance in John Reading's hand at *GB-Lbl* (R.M.20.h.9) and on a single leaf now in *GB-Och* (Mus.1215), apparently copied jointly by Purcell and the composer in the early 1680s. They are fluent and attractive works, though rather short-winded and limited in scope.

WORKS

all in US-BEm (autograph organ part only)

Service, F
Haste thee, O God, to deliver me, verse anthem, SSATB, org, *GB-GL*
Lord, thou art become gracious, verse anthem, SSATB, org, *Lbl*, *Och*
3 anthems: Bow down thine ear, O Lord, O clap your hands together, The voice of my beloved, inc.

(2) Thomas Roseingrave (*b* Winchester, 1690/91; *d* Dunleary, 23 June 1766). Son of (1) Daniel Roseingrave. As a boy he went to Dublin with his father, under whom he first studied music, and on 1 February 1707, at the age of 16, he entered Trinity College, but he did not complete his degree. He was sent to Italy in 1709 with the financial assistance of the dean and chapter of St Patrick's Cathedral 'to improve himself in the art of music ... that hereafter he may be useful and serviceable to the said Cathedral' (Chapter Acts, 14 December 1709). In Venice he attended a concert at a nobleman's house; he was invited to play, and later told Burney: 'finding myself rather better in courage and finger than usual, I exerted myself ... and fancied, by the applause I received, that my performance

had made some impression on the company'. Burney continued:

a grave young man dressed in black and in a black wig, who had stood in one corner of the room, very quiet and attentive while Roseingrave played, being asked to sit down to the harpsichord, when he began to play, Rosy said, he thought ten hundred d----ls had been at the instrument; he never had heard such passages of execution and effect before ... Upon enquiring the name of this extraordinary performer, he was told it was Domenico Scarlatti, son of the celebrated Cavalier Alessandro Scarlatti. Roseingrave declared he did not touch an instrument himself for a month; after this rencontre, however, he became very intimate with the young Scarlatti, followed him to Rome and Naples, and hardly ever quitted him while he remained in Italy...

Roseingrave composed the anthem *Arise, shine, for thy light is come* in Venice, for the Peace of Utrecht. Tudway referred to it in a letter to Humfrey Wanley:

The Artful part is very fine, and he [Roseingrave] has show'd himself a great Master, but for want I believe to being us'd to set Church Music, he keeps too theatrical a style, and introduces in most places his words, with very great Levetees; ... This is also Mr Hendale's fault.

Burney commented that there was 'much fire in the introductory symphony, which is of a very modern cast'.

According to Dr Patrick Delany, Roseingrave returned to Dublin in 1713. By June 1717 he was in London and, according to the *Daily Courant*, took part in a concert at York Buildings at which a 'Serenade' of his was sung. On 25 March 1718 Mlle Coraill sang one of his Italian cantatas 'with Instruments' at Hickford's Room. During the next few years he was active in London's musical life, particularly as a champion of Domenico Scarlatti. In 1720 he produced Scarlatti's opera *Amor d'un'ombra e Gelosia d'un'aura* under the title *Narciso* at the Haymarket Theatre, adding two arias and two duets of his own. His famous edition of 42 sonatas by Scarlatti appeared in 1739, including sonatas from the *Essercizi* of the previous year and others of which he evidently had manuscript copies.

In 1725 Roseingrave became organist of Handel's parish church, St George's, Hanover Square, where a new three-manual organ had just been completed by Gerard Smith. The vestry, refusing to be 'teased by the solicitations of candidates of mean abilities', appointed a panel of advisers. There are differing accounts regarding the numbers of candidates and judges (quoted by Butcher), and it is said that Handel sent a theme upon which the candidates were to improvise. Burney wrote that Roseingrave's style,

though too crude and learned for the generality of hearers when left to himself, treated the subjects given with such science and dexterity, inverting the order of notes, augmenting and diminishing their value, introducing counter-subjects, and turning the themes to so many ingenious purposes that the judges were unanimous in declaring him the victorious candidate.

Roseingrave's accomplished fugal extemporizations were no doubt the result of his enthusiasm for contrapuntal textures; he had a deep admiration for Palestrina's style, examples of which were seen by John Hawkins on scraps of paper on the walls of Roseingrave's bedroom. He received a modest salary at St George's, and was allowed sufficient time for composition, 'a science too greatly my delight not to be continually my study', as he later wrote. He was now at the height of his powers, having acquired an outstanding reputation as organist and teacher: J.C. Smith, Henry Carey and John Worgan were among his pupils. Although his manner of composing was commonly censured as being both 'harsh and disgusting, manifesting great learning, but void of eloquence and variety' (Hawkins), his virtuosity as executant and improviser was beyond question. Burney wrote that he 'had a power of seizing the parts and spirits of a score and executing the most difficult music at sight beyond any musician in Europe'. A promising career was brought to a premature end by a broken heart, or 'crepation' (as Roseingrave himself called it). Coxe described its cause:

His reputation was ... so high that on commencing teaching he might have gained one thousand pounds a year, but an unfortunate event reduced him to extreme distress. Among Roseingrave's scholars was a young lady to whom he was greatly attracted, and whose affections he had gained, but her father, who intended to give her a large fortune, did not approve of her marrying a musician, and forbade Roseingrave his house. This disappointment affected his brain, and he never entirely recovered the shock. He neglected his scholars and lost his business. He lived upon fifty pounds per annum, which his place produced, and was often in indigence. He was perfectly rational upon every subject but the one nearest his heart: whenever that was mentioned he was quite insane.

At a vestry meeting at St George's on 20 February 1738 a suggestion that the organist's salary be reduced was rejected; it was resolved 'That the Salary to Mr Thos. Roseingrave ... be continued at Forty Five Pounds a year'. There is no mention of any inadequacy on Roseingrave's part until the vestry meeting of 22 March 1744, when a complaint was made that Roseingrave's deputies had not 'behaved in so decent a manner as they ought, with respect to the Airs and Voluntary's played in the church, which has given offence to several of the Parishioners'. In his reply Roseingrave 'signified that by Infirmity he was render'd incapable of playing the organ'; the vestry then resolved to 'appoint an assistant to the said Mr Roseingrave to officiate at the church, the allowance for his trouble out of Mr Roseingrave's salary'. On 23 April 1744 John Keeble was appointed assistant organist; Roseingrave, 'on account of his infirmitys', was allowed half of the salary for the remainder of his life. He stayed for some time at Hampstead where, although he would occasionally alarm his hosts by leaving his bed in the middle of the night to go to the harpsichord, he seems to have recovered to some extent, for Burney was often tempted to visit him 'on account of his sweetness of temper, his willingness to instruct young pupils, and his entertaining conversation'.

Roseingrave eventually retired to Dublin, where his brother Ralph was organist. He stayed with his nephew William Roseingrave (*b* 1726), a son of Ralph, then (1753) chief chamberlain of the exchequer court. Mrs Delany wrote in her autobiography on 12 January 1753 that 'Mr Rosingrave (. . . who was sent away from St George's Church on account of mad fits) is now in Ireland, and at times can play very well on the harpsichord'. It was announced in the *Dublin Journal* (February 1753) that the opera *Phaedra and Hippolitus*, 'by Mr Roseingrave lately arrived from London', was to be given a concert performance, and that between the acts Roseingrave would play 'Scarlatti's Lesson on the Harpsicord, with his own Additions, and to conclude with his celebrated ALMAND'. Although the opera 'met the highest applause', a subscription plan to stage the work unfortunately came to nothing.

Roseingrave was buried in the family grave in the churchyard of St Patrick's Cathedral. The inscription adds that he died in his 78th year, 'a most celebrated musician and accomplished man'. A small watercolour portrait by

Thomas Roseingrave: watercolour by W.N. Gardiner after an unknown artist

W.N. Gardiner can be found in the copy of Coxe's *Anecdotes* in the Gerald Coke collection, currently in the Hampshire Records Office (see illustration).

Roseingrave's relationship with Scarlatti was of considerable importance and was directly responsible for the beginning of the 'Scarlatti cult' in England. Arne, Avison, Boyce, Greene, Loeillet, Pepusch and Stanley were among the 95 subscribers to Roseingrave's edition of Scarlatti. Roseingrave's own harpsichord music shows surprisingly little of Scarlatti's influence. His organ music is closer to the earlier English tradition of Blow and Purcell than to his continental contemporaries. There is nothing of the clear part-writing and simple textures of most keyboard composers of the period: the printed page is often confusing, with isolated notes on the staff belonging to none of the contrapuntal lines. Roseingrave's fondness for chromatic intricacies, irregular phrases and flexibility of form suggests a compositional approach not only motivated by his brilliant powers of improvisation, but probably related to his apparently unstable mental state. The Solo in D is unlike his other keyboard works, with a simpler texture and fluent passage-work; it is probably the solo part for a work such as that listed in the *Dublin Journal* in February and November 1750 as an 'Organ Concerto with Trumpet(s) and Kettle-drums by Tho. Roseingrave'.

Each of his Italian cantatas consists of two da capo arias divided, and sometimes introduced, by a recitative. Two of the manuscript cantatas (nos.9 and 10) are introduced by string sinfonias. Though the cantatas and flute sonatas are more conventional than his keyboard works, several movements have chromatic passages and unexpected modulations, typical of Roseingrave's style.

WORKS

all printed works published in London

VOCAL

Anthems: Arise, shine, for thy light is come, thanksgiving for the peace, Venice, 1712, *GB-Lbl*, ed. P.M. Young (London, 1968); Blessed is he, Bow down thine ear, Praise the Lord ye servants, full anthems, S, org, bc, *Ob*; Great is the Lord, One generation shall praise thy works, verse anthems, S, 2 vn, 2 b, *Lbl*, *Lcm*; I will cry unto God, I will magnify Thee, O come hither, Sing unto God, verse anthems, S, org, bc, *Ob*; O Lord our governor, SATB, *Lcm*

2 songs, 2 duets in D. Scarlatti's Narciso (op), London, King's, 30 May 1720, pubd (1720)

Phaedra and Hippolitus (op), concert perf., Dublin, Fishamble Street Music Hall, 6 March 1753, recits and arias, *Lbl*

12 cants, in 2 sets of 6 (2nd set described as It. cants.), S, acc. 1/2 vn, bc, tpt (only in no.6 of 2nd set) (*c*1735)

12 cants., nos.1–3 to Eng. texts, nos.4–12 to It. texts (nos.7, 8 as arias): all for S, 1/2 vn, bc, some with va, nos.2, 3, 7 with ob, no.3 with fl, no.10 with tpt, *Lbl*

3 songs, pubd singly (*c*1720): Celia conscious of her beauty, S, b; Fairest charmer, lovely dear, S, tr inst, b; This mercenary age despise, S, bc: all with fl pt

(3) Ralph Roseingrave (*b* Salisbury, *c*1695; *d* Dublin, 6 Dec 1747). Son of (1) Daniel Roseingrave. He received his musical education from his father, whom he succeeded as organist of St Patrick's Cathedral, Dublin, in effect from 1719 but formally only in 1726. On his father's death, in 1727, he also became organist of Christ Church Cathedral. In 1721 he, his father, Robert Woffington (i) and Cuvillie examined and reported unfavourably on the new organ (by Hollister) in St Werburgh's, Dublin. Roseingrave is sometimes referred to as having been a bass soloist in the first performance of Handel's *Messiah* (1742). He was buried in the churchyard of St Patrick's Cathedral; the headstone mentions that his wife Sarah, who died in 1746, and four of their children, were buried with him, as were his mother Ann Roseingrave and his brother Thomas.

PETER HOLMAN (1), GERALD GIFFORD/RICHARD PLATT (2), GERALD GIFFORD (3)

Rosell, Lars-Erik (*b* Nybro, 9 Aug 1944). Swedish composer and organist. He studied the organ at the Royal College of Music in Stockholm (1962–8) and continued composition studies with Lidholm from 1968 to 1972. He became a teacher of counterpoint at the college in 1973. Ligeti, a guest teacher at the college, was of great significance in Rosell's development, as were other guest teachers such as the young Americans Morton Feldman and Terry Riley. Rosell's earliest music was tinged with minimalism, one piece bearing Riley's name.

Before the première in 1982 of Rosell's most important work, the Organ Symphony (each movement of which is introduced by a quotation by Rilke), he also spoke about his desire to give the music a spiritual and socially influencing function. He has said, 'My personal conviction is that art now fulfills a vital function, as an expression of the response of sensitive people to what happens, but also as a sign of resistance and desire for change.' This humanistic element, like his sensitive feeling for poetry and literature, has influenced his later focus on church music and chamber opera, as well as on expressive and solidly composed choral music. As an organist Rosell has undertaken many concert tours.

WORKS

Stage: Nattesang (op, 1, M. Faber, after Indian myth), 1974; Tillfälligt avbrott [Temporary Interruption] (op, 2, S. Györbiro), 1981; Amedée (op, 2, M. Kundler, after Ionesco), 1983–5; Mellan tvenne världar [Between Two Worlds] (stage music, B. Malmberg), 1994; Illusionisten [The Illusionist] (op, 2, Kundler, after T. Mann), 1995–6

Choral: Visiones prophetae, solo v, 3 choirs, orch, 1974; Den just skapade världen [The Just-Created World] (Indian poem), children's choir, 1975; I fönstrets fyrkant [In the Square of the Window] (S. Weöres), SATB, 1979; Om icke vetekornet faller i jorden [If the grain of wheat not falls in the earth] (motet, Bible: *John*), SATB, 1980; Ordens källa [The Word's Spring] (scenic cant., various authors), eurhythmic, recit, SATB, fl, ob, hn, 2 va, vc, org, hp, perc, 1980; Ännu en liten tid [Yet a short time] (Bible: *John*), SATB, 1981; 5 färöiska dikter (various authors), SATB, 1983; Jubla ni himlar [Heavens, Rejoice] (Bible: *Jeremiah*, *Revelations*), 2 motets, SATB, org, 1984; O natt av ljus (B. ROLF HAGLUND

Rosen, Charles (Welles) (*b* New York, 5 May 1927). American pianist and writer on music. He started piano lessons at the age of four and studied at the Juilliard School of Music between the ages of seven and 11. Then, until he was 17, he was a pupil of Moriz Rosenthal and Hedwig Kanner-Rosenthal, continuing under Kanner-Rosenthal for a further eight years. He also took theory

and composition lessons with Karl Weigl. He studied at Princeton University, taking the BA (1947), MA (1949) and PhD (1951), in Romance languages. Some of his time there was spent in the study of mathematics; his wide interests also embrace philosophy, art and literature generally. After Princeton he had a spell in Paris, and a brief period of teaching modern languages at the Massachusetts Institute of Technology. But in the year of his doctorate he was launched on a pianist's career, when he made his New York début and the first complete recording of Debussy's Etudes. Since then he has played widely in the USA and Europe. He joined the music faculty of the State University of New York at Stony Brook in 1971.

As a pianist, Rosen is intense, severe and intellectual. His playing of Brahms and Schumann has been criticized for lack of expressive warmth; in music earlier and later he has won consistent praise. His performance of Bach's Goldberg Variations is remarkable for its clarity, its vitality and its structural grasp; he has also recorded *The Art of Fugue* in performances of exceptional lucidity of texture. His Beethoven playing (he specializes in the late sonatas, particularly the Hammerklavier) is notable for its powerful rhythms and its unremitting intellectual force. In Debussy his attention is focussed rather on structural detail than on sensuous beauty. He is a distinguished interpreter of Schoenberg and Webern; he gave the première of Elliott Carter's Concerto for piano and harpsichord (1961) and has recorded with Ralph Kirkpatrick; and he was one of the four pianists to commission Carter's *Night Fantasies* (1980). He has played and recorded sonatas by Boulez, with whom he has worked closely. His piano playing came to take second place to his intellectual work during the 1990s.

Rosen's chief contribution to the literature of music is *The Classical Style*. His discussion, while taking account of recent analytical approaches, is devoted not merely to the analysis of individual works but to the understanding of the style of an entire era. Rosen is relatively unconcerned with the music of lesser composers as he holds 'to the old-fashioned position that it is in terms of their [Haydn, Mozart and Beethoven's] achievements that the musical vernacular can best be defined'. Rosen then establishes a context for the music of the Classical masters; he examines the music of each in the genres in which he excelled, in terms of compositional approach and particularly the relationship of form, language and style: this is informed by a good knowledge of contemporary theoretical literature, the styles surrounding that of the Classical era, many penetrating insights into the music itself and a deep understanding of the process of composition, also manifest in his study *Sonata Forms* (1980). *The Classical Style* won the National Book Award for Arts and Letters in 1972. His smaller monograph on Schoenberg concentrates on establishing the composer's place in musical and intellectual history and on his music of the period around World War I. Rosen's interest in the thought and composition processes of the Romantics, also strong, is shown in his Harvard lectures published as *The Romantic Generation*. He has written many shorter articles, and contributes on a wide range of topics to the *New York Review of Books*.

STANLEY SADIE

Rosen, David (Baruch) (*b* San Francisco, 21 Sept 1938). American musicologist. He studied at Reed College, Portland (BA 1960), at Columbia University (1960–61), and under Kerman at the University of California, Berkeley, where he took the doctorate in 1976 with a dissertation on the genesis of Verdi's Requiem. His main teaching positions have been at Brandeis University (1972–5), the University of Wisconsin, Madison (1976–89), and thereafter at Cornell, where he is professor of music. Rosen's area of research is European music of the 18th and 19th centuries; he has written perceptively on Mozart and music in 19th-century Italy, but his operatic interests centre on Verdi. He has edited the Requiem for the collected edition (1990) and has worked on the early operas and *Don Carlos*.

PAULA MORGAN

Rosen, Jerome (William) (*b* Boston, 23 July 1921). American composer and clarinettist. He was educated at New Mexico State College, UCLA and the University of California, Berkeley, where he studied composition with Denny and Sessions (MA 1949); he also studied with Milhaud in Paris (1949–50). In 1952 he was appointed to the faculty of the University of California, Davis, where he became professor of music (1963–87) and director of the electronic studio. He has received two awards and a grant from the Fromm Foundation (1953, 1954, 1960), a Guggenheim Fellowship (1958) and awards from the Institute for Creative Arts (1966, 1972). The chromatic but tonal neo-classical tendencies of his early music later developed into a free chromaticism in which successive pitch centres and instrumental timbres define the overall structure. Also active as a clarinettist, Rosen has made several recordings, including one of his own Sonata for Clarinet and Cello. He specializes in 20th-century music but also plays the standard repertory.

WORKS

RICHARD SWIFT

Rosenbaum, (Maria) Therese. Austrian singer, daughter of FLORIAN LEOPOLD GASSMANN.

Rosenberg, Herbert (*b* Frankfurt, 13 Oct 1904; *d* Copenhagen, 29 June 1984). Danish musicologist of German birth. He studied musicology with Abert, Blume, Hornbostel, Sachs and Wolf at the University of Berlin, where he took the doctorate in 1931 with a dissertation on 15th-century German song. He was a lecturer at the Berlin Klindworth-Scharwenka Conservatory (1932–5), before working in Copenhagen (1935–43) and Stockholm (1943–6); on his return to Copenhagen (1946) he became recording manager for the Danish branch of EMI (1946–64) and subsequently head of the recorded sound department (Nationaldiskoteket) of the Danish National Museum (1964–73). In 1966 he was appointed lecturer at the Malmö Conservatory, and in 1967 he also became a lecturer in musicology at Lund University. His publications include articles on the frottola, the Locheimer Liederbuch and Scandinavian musicology, a book on understanding music and several discographies.

JOHN BERGSAGEL

Rosenberg, Hilding (Constantin) (*b* Bosjökloster, Ringsjön, Skåne, 21 June 1892; *d* Stockholm, 19 May 1985). Swedish composer and conductor. In boyhood he studied organ and piano, and, after taking the organ examination, he held a post as organist for several years. He travelled in 1914 to Stockholm, where he studied the piano with Andersson and where in 1915 he entered the Royal Academy of Music. There he studied composition with Ellberg for a year and took a longer course in conducting. In 1916 he was introduced to Stenhammar, who gave him much encouragement. He made his first journey abroad in 1920, travelling to Berlin and Dresden and coming into contact with the music of Hauer and Schoenberg; he went on to Vienna and Paris, where he heard works by Stravinsky and Les Six. In the mid-1920s Rosenberg studied counterpoint with Stenhammar, took a leading part in the Swedish section of the ISCM and became known as an excellent chamber musician. In 1926 he began a long and fruitful association with the theatre director Per Lindberg. At the beginning of the 1930s he studied conducting with Scherchen, and from 1932 to 1934 he was coach and assistant conductor at the Royal Opera of Stockholm. Subsequently, as a result of an increasing volume of commissions from Swedish radio, he concentrated more and more on composition, though he continued to make guest appearances conducting his own works in Scandinavia and the USA (1948). He also exerted a great influence on Swedish musical life as a teacher, his pupils including Blomdahl, Lidholm and Bäck.

Rosenberg is held by many to be the leading figure in 20th-century Swedish music. During the 1920s he was a pioneer, together with Broman and Jeanson, in the effort to free Swedish composition from the national Romantic tradition. His very first works reveal the influence of Sibelius, but he was soon experimenting with various

styles displaying diverse models; in Sweden he was regarded as an extreme radical. From early childhood he had been familiar with Lutheran chorales and Gregorian chant, and this, combined with his studies of Bach and his eager acceptance of the principles of Hindemith (whose music he had come across during the European tour of 1920), formed a foundation for his fine contrapuntal technique. He shared Schoenberg's feeling for melody, and lyricism is an integral part of his art; the First String Quartet (1920), a work that has much in common with early Schoenberg, is a good example. The creative culmination of his Bach studies came in the Piano Sonata no.4 (1927), while the *8 plastiska scener* (1921) are close to Bartók, a composer then unknown to Rosenberg. Again like Bartók he took an interest in his country's folk music, composing the Suite on Swedish Folktunes for strings (1927), which combines contrapuntal, lyrical and newer elements.

In 1926 Rosenberg began working in the theatre, where he was active for more than 25 years, producing incidental music to over 40 plays. His work for the stage gave him the opportunity to experiment, and to develop his innate dramatic sense. Several incidental scores gave rise to large-scale works, including the three major operas, *Marionetter*, *Lycksalighetens ö* ('The Isle of Felicity') and *Hus med dubbel ingång* ('The House with Two Doors'). His first opera, *Resa till Amerika* ('Journey to America', 1932), was the source of an orchestral suite which incorporates the celebrated 'Railway Fugue'. This was also the period of an important work in Rosenberg's development, the Second Symphony (1928–35), where there began to emerge a more individual style marked by melodic cantilenas, long pedal points and well-worked, often two-part contrapuntal sections. Bach's influence is again evident in the trio sonata texture at the beginning of the second movement and the presence of a chorale and passacaglia in the finale. The influences of Nielsen and Sibelius are still apparent, though in many respects the style is similar to that of Vaughan Williams.

During the 1930s Rosenberg made a rapprochement with the public, simplifying his style and using clearer, essentially diatonic harmonies, chromaticism becoming more a melodic embellishment. Among the many successful works of the later 1930s are the Christmas oratorio *Den heliga natten* ('The Holy Night') and its Passion counterpart *Huvudskalleplats* ('Calvary'), the opera *Marionetter* and the ballet *Orfeus i sta'n* ('Orpheus in Town'). A more lyrical, meditative mood is notable in the Third Symphony and the Fourth Quartet. In 1940 Rosenberg produced one of his greatest works, the Symphony no.4 'Johannes uppenbarelse' ('The Revelation of St John'), a vast composition in eight movements for baritone, chorus and orchestra. The piece is dramatically conceived, with sharp contrasts both in mood and style between the choral-orchestral movements (at times recalling Mahler) and the baritone recitatives, whose tonality is more advanced. The linking *a cappella* chorales draw on Palestrina and Schütz, but they also continue, from Stenhammar, the development of the Swedish choral tradition.

The 1940s was a decade of further large-scale choral works, reaching a climax in the massive opera-oratorio in four parts after Mann, *Josef och hans bröder* ('Joseph and his Brothers'), commissioned by Swedish radio. From the same period is the opera *The Isle of Felicity* and the Fifth Symphony, a work in a pure classical spirit, forming a pastoral equivalent and complement to the *Revelation* symphony. After 1949 there was a return to purely instrumental works. Rosenberg's style became more homogeneous and his part-writing further refined, as in the excellent Fifth Quartet. Other outstanding works written at this time include the Sixth Symphony (1951) and several concertos, among them the Piano Concerto (1950) and the Violin Concerto no.2 (1951). The Sixth Quartet followed in 1954, and two years later Swedish radio commissioned a further six. These new quartets, written in less than two years, were in a radically new style; Rosenberg used a very personal 12-note technique that was not highly methodical but more a confirmation of his early linear structuring. In the Twelfth Rosenberg returned to material from the First Quartet (1920), a retrospective glance that brought about this renewed interest in atonality and 12-note technique. Two important works that display the lyrical expressionism of Rosenberg's late style are *Åt jordgudinnan* ('To the Earth Goddess', 1960) for voice and six instruments and *Dagdrivaren* ('The Sluggard', 1962) for baritone and orchestra.

WORKS

Catalogue: P.H. Lyne: *Hilding Rosenberg: Catalogue of Works* (Stockholm, 1970)

OPERAS

Resa till Amerika [Journey to America] (A. Henrikson), 1932; Stockholm, 24 Nov 1932

Spelet om St Örjan (children's op), 1937, rev. 1941

Marionetter (J. Benavente), 1938; Stockholm, 14 Feb 1939

De två konungadöttrarna [The Two Princesses] (children's op, H. Rosenberg), 1940; Stockholm, 19 Sept 1940

Lycksalighetens ö [The Isle of Felicity] (P.D.A. Atterbom), 1943; Stockholm, 1 Feb 1945

Josef och hans bröder [Joseph and his Brothers] (op-orat, after T. Mann), 1946–8; Swedish radio, pt 1 30 May 1946, pt 2 19 Dec 1946, pt 3 9 Sept 1947, pt 4 23 Jan 1948

Kaspers fettisdag [Punch's Shrove Tuesday] (A. Strindberg), 1953; Swedish radio, 28 Feb 1954

Porträttet (after N.V. Gogol), 1955; Swedish radio, 22 March 1956; rev. 1963

Hus med dubbel ingång [The House with Two Doors] (after P. Calderón), 1969; Stockholm, 24 May 1970

BALLETS AND PANTOMIME

Yttersta domen [The Last Judgment] (pantomime, E.A. Karlfeldt), 1929; unperf.

Orfeus i sta'n [Orpheus in Town] (ballet), 1938; Stockholm, 19 Nov 1938

Eden (Adam and Eve) (ballet) [after Concerto no.1], 1946; New York, 1961

Salome (ballet) [after Metamorfosi sinfoniche nos.1–2], 1963; Stockholm, 28 Feb 1964

Sönerna (Cain and Abel) (ballet) [after Metamorfosi sinfoniche no.3], 1964; Swedish television, 6 Dec 1964

Babels torn [The Tower of Babel] (ballet) [after Symphony for Wind and Perc], 1966; Swedish television, 8 Jan 1968

ORATORIOS, CANTATAS, ETC.

Den heliga natten [The Holy Night] (H. Gullberg), orat, 1936; Swedish radio, 27 Dec 1936

Perserna [The Persians] (after Aeschylus), orat, 1937; unperf.

Huvudskalleplats [Calvary] (Gullberg), orat, 1938; Swedish radio, 15 April 1938; rev. 1964–5

Prometheus och Ahasverus (V. Rydberg), melodrama, 1941; Swedish radio, 27 April 1941

Julhymn av Romanus (Gullberg), cant., 1941; Swedish radio, 25 Dec 1941

Svensk lagsaga (old Swed. verse), orat, 1942; Swedish radio, 24 Feb 1942

Djufars visa [Djufar's song] (V. von Heidenstam), melodrama, 1942; Swedish radio, 18 Dec 1942

Cantata to the National Museum (Gullberg), 1942; Swedish radio, 1 June 1943

Lyrisk svit (H. Martinson), cant., 1954; Göteborg, 2 Oct 1954

Hymnus (Gullberg), orat, 1965; Swedish radio, 24 July 1966
Hymn to a University (Gullberg, E. Tegnér), cant., 1967; Lund, 13 June 1968

ORCHESTRAL

Adagio, 1915
Symphony no.1, 1917, rev. 1919; Göteborg, 1921; rev. 1971
3 fantasistycken, 1918; Göteborg, 1919
Sinfonia da chiesa no.1, 1923; Stockholm, 16 Jan 1925; rev. 1950
Sinfonia da chiesa no.2, 1924; Stockholm, 20 Jan 1926
Violin Concerto no.1, 1924; Stockholm, 8 May 1927
2 suites [from opera Marionetter], small orch, 1926
Suite on Swedish Folktunes, str, 1927; Swedish radio, 13 Sept 1927
Suite [from incidental music Livet en dröm], small orch, 1927
Threnody for Stenhammar (Sorgemusik), 1927
Trumpet Concerto, 1928; Stockholm, 16 Jan 1929
2 preludes and 2 suites [from pantomime Yttersta domen], 1929
Suite [from incidental music Moralitet], 1930
Suite [from opera Resa till Amerika], 1932; Stockholm, 29 Sept 1935
Overtura piccola, 1934
Symphony no.2 (Sinfonia grave), 1928–35; Göteborg, 27 March 1935
Symphonie concertante, vn, va, ob, bn, orch, 1935; Göteborg, 9 Jan 1936
Suite [from film score Bergslagsbilder], 1937; Swedish radio, 16 Nov 1937
Overture and Dance Suite [from opera Marionetter], 1938
Dance Suite [from ballet Orfeus i sta'n], 1938
Cello Concerto no.1, 1939
Symphony no.3 'De fyra tidsåldrarna' [The Four Ages of Man], 1939; Swedish radio, 11 Dec 1939; rev. 1952
Adagio funèbre, 1940
Suite (I bergakungens sal [In the Hall of the Mountain King]), 1940
Symphony no.4 'Johannes uppenbarelse' [The Revelation of St John], Bar, chorus, orch, 1940; Swedish radio, 6 Dec 1940
Suite [from melodrama Djufars visa], 1942
Viola Concerto, 1942; Swedish radio, 11 Feb 1943
Vindarnas musik [from opera Lycksalighetens ö], 1943
Symphony no.5 'Hortulanus' (Örtagårdsmästaren [The Keeper of the Garden]), A, chorus, orch, 1944; Swedish radio, 17 Oct 1944
Concerto no.1, str, 1946; Swedish radio, 6 July 1947
Overtura bianca-nera, 1946
Partita [from opera-oratorio Josef och hans bröder], 1948
Concerto no.2, 1949; Malmö, 12 Jan 1950
Piano Concerto, 1950; Göteborg, 14 March 1951
Symphony no.6 (Sinfonia semplice), 1951; Gävle, 24 Jan 1952
Violin Concerto no.2, 1951; Stockholm, 25 March 1952
Ingresso solenne del premio Nobel, 1952
Cello Concerto no.2, 1953; Swedish radio, 25 April 1954
Variations on a Sarabande, 1953
Concerto no.3 'Louisville', 1954; Louisville, KY, 1954; rev. 1968
Riflessioni no.1, str, 1959; Swedish radio, 24 April 1965
Riflessioni no.2, str, 1960; Swedish radio, 2 March 1962
Riflessioni no.3, str, 1960; Lucerne, 1961
Dagdrivaren [The Sluggard] (S. Alfons), Bar, orch, 1962; Stockholm, 28 Oct 1964
Metamorfosi sinfoniche nos.1–3, 1963–4
Symphony for Wind and Perc, 1966
Concerto no.4, str, 1966; Stockholm, 14 Sept 1968
Symphony no.7, 1968; Swedish radio, 29 Sept 1968
Symphony no.8 'In candidum', chorus, orch, 1974, rev. 1980 [after poem by W. Ekelund]

PETER H. LYNE/HANS ÅSTRAND

Rosenblum, Mathew (*b* New York, 19 March 1954). American composer. He studied at the New England Conservatory (BM 1977, MM 1979) and Princeton University (MFA 1981, PhD 1992), where his teachers included Babbitt and Lansky. In 1991 he joined the music department at the University of Pittsburgh. Among his awards are grants from the Rockefeller Foundation (1980), the ACA (1987) and the Pennsylvania Council on the Arts (1994), and commissions from the Fromm Foundation, Newband and the Stony Brook Contemporary Players. He has served as artist-in-residence at the MacDowell Colony, the Djerassi Foundation and Yaddo. In 1992 his microtonal work *Continental Drift* was performed at the ISCM World Music Days in Oslo.

A leading voice in American microtonal music, Rosenblum attempts a synthesis of elements from classical, jazz, rock and world music in his works. His stated goal is 'to explore ways in which seemingly separate musical voices and traditions may be woven together into a newly expressive whole'. Many compositions employ both a 12-note equal tempered system and a 19- or 21-note microtonal system. Used in combination, these two systems provide a wide variety of intervallic and harmonic possibilities and permit strong harmonic and stylistic contrasts within each work.

DON C. GILLESPIE

Rosenboom, David (*b* Fairfield, IA, 9 Sept 1947). American composer, performer and designer and maker of electronic instruments. He studied music at the University of Illinois (1965–7, composition with Binkerd and Martirano, electronic and computer techniques with Hiller) and also privately, learning various instruments, conducting and Indian music. In 1967–8 he went to the Center for Creative and Performing Arts at SUNY, Buffalo, and from there to New York University as a guest lecturer (1968–70). He was director of computer and electronic media research at York University, Toronto (1970–77), developing a computer language for the composition and performance of synthesized music, and computerized electronic instruments for live performance. He also carried out research on biofeedback and the relationship between the information-processing mechanisms of the brain and aesthetic experience. He served as artistic director of the Electric Circus in New York (1967–8) and helped found the Neurona Company, which carries out research and development in arts and technology. He joined the faculty at Mills College in 1979 and at the San Francisco Art Institute in 1981. He was a member of the team that designed the software for the Buchla Touché and 400 Series synthesizers. In 1990 he became dean of the School of Music and co-director of the Center for Experiments in Art, Information and Technology at CAL Arts.

Rosenboom's early compositions (1963–9) include film and theatre music, sometimes involving tape and live electronics interacting with synthesized sound. His best-known works isolate electrical signals produced by the human body, principally brain-waves, and pass them through electroacoustic instruments. *Ecology of the Skin* (1970) is an environmental 'event' for brain signals, keyboard players, and group dynamic. Similar techniques were employed in the sound sculptures *Vancouver Piece* and *Portable Gold and Philosophers' Stones* no.2 (both 1973). Rosenboom views electronics as a means of expanding orchestral resources of colour and texture. *And Out Come the Night Ears* (1977–8) balances the virtuoso keyboard style of the composer–performer with preprogrammed electronic processes that monitor frequency spectra derived from the different areas of the keyboard. The best example of this approach is *Future Travel* (1981), a series of works employing compute-assisted electronic systems, percussion, violin, piano, and synthesized speech. His book, *Extended Musical Interface with the Human Nervous System* (Berkeley, 1990), discusses the process of cognition in relation to those of performance.

Rosenboom has appeared as a solo performer and has participated in improvisation and collective composition

with Robert Ashley, 'Blue' Gene Tyranny, Subotnick, Riley, Hassell, and Teitelbaum, among others. He has also produced a number of television and video works.

WORKS

Ens: Contrasts, vn, orch, 1963; Caliban upon Sebetos, after Browning, orch, 1964; 12 Stories High, jazz band, 1964; Prelude, Danse fantastique, sym. band, 1965; Chart Pieces I, II, orch, 1966; Patterns for London, kbds, ens, jazz insts, 1972; Is Art Is, variable ens, 1974; Champ Vital (Life Field), vn, pf, perc, 1987

Elec and cptr: Internals, tape, 1966; Then we Wound through an Aura of Golden Yellow Gauze, fl, trbn, elec gui, perc, pf, elec hpd, 2 actresses, 1967; And Come up Dripping, ob, cptr, 1968; How much Better if Plymouth Rock had Landed on the Pilgrims, cptr, elec insts, wind, perc, str, 1969–72; Ecology of the Skin, kbds, elec, audience, 1970; Pf Etude no.1, 1971; Portable Gold and Philosophers' Stones no.1, cptr, elec, 1972; The Seduction of Sapientia, va da gamba, elec resonators, 1974–5; And Out Come the Night Ears, pf, elec, 1977–8; In the Beginning I (Electronic), pfmr, elec, 1978; Future Travel, elec, 1981; Zones of Influence, perc, cptr, 1985; Systems of Judgment, insts, cptr, 1987; 2 Lines, any two melodic insts, 1989; Layagnanam, cptr, mrdangam, 1990; Predictions, Confirmations, and Disconfirmations, MIDI pf, cptr, elecs, 1991; Extended Trio, insts, HSML, 1992, Extended Trio, cptr, pf, db, mrdangam, 1992; Lineage, Enactment, Transfiguration, and Transference, MIDI pf, cptr, cl, fl, 3 sax, elec pf, 1992; On Being Invisible II (Hypatia Speaks to Jefferson in a Dream), 1995; Brave New World, cptr and/or tape, 1995

Mixed-media: The Thud, Thud, Thud of Suffocating Blackness, insts, tape, lights, 1966–7; The Brandy of the Damned, 1967; 4 Soundings from Urboui, tape, film, 1968; She Loves me, she Loves me Not, tape, slide projections, lights, perc, pfmrs, 1968; Body Music, tape, slide projections, 1969; Portable Gold and Philosophers' Stones no.2, sound sculpture, 1973; Vancouver Piece, sound sculpture, 1973; In the Beginning V (The Story), 16 insts, film, elec synthesized speech, 1980; sound sculptures, many collaborations, incl. On Being Invisible, vv, elec, pfmrs, vn, perc, pf, speech, 1976–7, collab. J. Humbert; It is About to ... Sound, 1993; It is About ... Vexations, 1993

Chbr and solo inst: Sextet, str qt, fl, bn, 1965; To that Predestined Dancing Place, perc qt, 1968; Pocket Pieces, fl, a sax, va, perc, 1968; Septet, 1974; In the Beginning II (Qt), va, vc, trbn, perc, 1979; In the Beginning III (Qnt), ww qnt, 1979; In the Beginning: Etude I, trbns, 1979; early works

Kbd: Continental Divide, pf, 1964; 6 Pieces, pf, 1964; Movt, 2 pf, 1965; [untitled], pf, 1965; Epilogue, pf, 1978; In the Beginning: Etude II, kbds, mallets, hps, 1980; In the Beginning: Etude III, pf, 2 oranges, 1980; Keyboard Study for ZONES, cptr-kbd, 1984

Many film, TV, video productions; many collaborations with other composers and pfmrs

STEPHEN RUPPENTHAL/DAVID PATTERSON

Rosenfeld, Gerhard (*b* Königsberg in Bayern, 10 Feb 1931). German composer. He studied musicology at Humboldt University, Berlin (1952–4), and composition with Wagner-Régeny at the Deutsche Hochschule für Musik, Berlin (1954–7). He completed his studies in masterclasses with Hanns Eisler and Leo Spies at the German Academy of Arts, Berlin (1958–61). After working at the International Music Library, Berlin, he taught film music at the Deutsche Hochschule für Filmkunst, Potsdam-Babelsberg, and music theory at the Berlin Hochschule für Musik 'Hanns Eisler' (1961–4). The success of his First Violin Concerto (1963) gained him numerous commissions for concertos and orchestral works. Beginning in 1964 he devoted himself to composition full time.

Rosenfeld has composed in a wide variety of genres. Inspired by his operatic writing, he came to devote an ever-increasing role to the human voice, evident in such works as *Rifugio d'uccelli notturni* (1976), *Mnemosyne* (1984), *Friedensgloria* (1985), *Ognuno sta solo* (1986) and *Amore e sapienza* (1996). His music is marked neither by concession to fashion nor by sudden changes of style. A concern for musical expression is fundamental, determining both the musical materials used and the compositional techniques employed, which range from traditional to 20th-century methods. Unusual interval sequences distributed according to contrapuntal or harmonic principles often play a structural role in his works.

VERA GRÜTZNER

Rosenfeld, Paul (*b* New York, 4 May 1890; *d* New York, 21 July 1946). American writer on music. He studied at Yale (BA 1912) and with Talcott Williams at the Columbia School of Journalism (LittB 1913). In 1916 he began to contribute essays and reviews to the *Seven Arts*, *New Republic*, *The Dial* (of which he was music critic from 1920 to 1927), *Vanity Fair* and others. Almost all his music criticism appeared in the 'little magazines' with his essays on the plastic arts and literature: the only music journal to publish a substantial number of his articles was *Modern Music*.

Rosenfeld was an unflinching and intelligent champion of new music. He was primarily an essayist: of his five books concerned mainly with music the two which are least successful represent contributions to publishers' series rather than collections of essays. His approach is impressionistic rather than analytical (with particular success in *Modern Tendencies in Music*); his interest in the way music reflects reality as perceived by both composer and listener has produced valuable critical assessments notable for their taste and intelligence.

At his succession of modest New York homes Rosenfeld brought together those interested in new literature, art and music; his help to individual artists included finding a patron for Copland on his return from Europe.

WAYNE D. SHIRLEY

Rosenhain, Jacob [Jakob, Jacques] (*b* Mannheim, 2 Dec 1813; *d* Baden-Baden, 21 March 1894). German pianist and composer. He studied with Jakob Schmitt, Kalliwoda and Schnyder von Wartensee, and made a successful début in 1832 in Frankfurt, after which he took up residence there. His one-act opera *Der Besuch im Irrenhause* was performed there in 1834. In 1837 he went to London, where he played in numerous concerts, and then to Paris, where he settled and became a prominent figure, particularly through his chamber-music evenings given with Alard, Ernst and other eminent players and frequented by Cherubini, Rossini and Berlioz. In 1841 his second one-act opera, *Liswenna* (1836), was performed. In 1843 he founded a piano school in collaboration with J.B. Cramer, and in 1851 *Liswenna*, provided with a new libretto and renamed *Le démon de la nuit*, was produced at the Opéra, although with limited success. His final opera, *Volage et jaloux*, was produced in 1863 at Baden-Baden, where he settled in 1870 and again became the centre of a distinguished artistic circle.

In his long life Rosenhain wrote in many genres. In addition to his four operas, he composed an oratorio and three symphonies, the first of which, in G minor, was played under Mendelssohn at the Leipzig Gewandhaus in 1846. He wrote many orchestral and chamber pieces, and a plethora of works for solo piano, including variations based on themes of famous operas of the time. Moscheles indicated in his diary that he maintained a good friendship with Rosenhain, as did Mendelssohn. Early essays in the *Neue Zeitschrift für Musik* reveal Schumann's enthusiasm for Rosenhain's Piano Trio no.1, op.2 (1836), and *Douze études caractéristiques*, op.17 (1839), although in later discussions Rosenhain's sonatas were dismissed as light and unoriginal.

STEPHAN D. LINDEMAN

Rosenman, Leonard (*b* Brooklyn, NY, 7 Sept 1924). American composer. Originally trained as a painter, he began musical studies at the age of 15. After war service, he studied composition with Schoenberg, Sessions and Dallapiccola and the piano with Bernard Abramowitsch. In 1953 he served as composer-in-residence at the Berkshire Music Center and received a Koussevitzky Foundation commission for an opera; however this was never completed. From 1962 to 1966 he lived in Rome where he scored television programmes and gained experience as a conductor. He has taught at the universities of Southern California and New York, was a member of the board of directors of the California branch of ISCM and served as musical director of the New Muse, a chamber orchestra specializing in performances of avant-garde music.

An important figure in the history of American film music, his score for *The Cobweb* is said to be the first in Hollywood to employ 12-note procedures. In *Fantastic Voyage* he experimented with *Klangfarben*, while portions of his *Chamber Music I* found their way into his score for *The Savage Eye*. In his scores for the James Dean films *East of Eden* and *Rebel Without a Cause* he effected a successful synthesis of the traditional and modern. At other times he showed himself both willing and able to compose music in a more traditional romantic style; his score for *Cross Creek*, for example, is influenced by American folk music.

WORKS

CHRISTOPHER PALMER/FRED STEINER

Rosenmüller, Johann [Rosenmiller, Giovanni] (*b* Oelsnitz nr Zwickau, *c*1619; *d* Wolfenbüttel, bur. 12 Sept 1684). German composer, trombonist, organist and teacher. Although he spent the major part of his creative life in Italy, his music was held in high esteem in Germany, making him an important figure in the transmission of Italian styles to the north.

1. LIFE. Rosenmüller received his early musical training at the Lateinschule at Oelsnitz and matriculated in the theological faculty of the University of Leipzig in 1640. There he most likely continued his musical studies with Tobias Michael, cantor of the Thomasschule, and he is listed as an assistant there in 1642, teaching music in the lower classes. By 1650 he had become the first assistant; in 1651 he was also appointed organist of the Nicolaikirche, and in 1653 the Leipzig city council promised him the succession to the Thomasschule cantorate. In the following year he also became director of music *in absentia* to the Altenburg court. This promising career came to an abrupt halt in spring 1655, when he and several of the schoolboys were arrested and imprisoned on suspicion of homosexuality. He escaped from gaol and is thought to have gone to Hamburg, though there is no documentary evidence for his presence there.

Rosenmüller was employed as a trombonist at S Marco, Venice, in early 1658 and by 1660 had established himself as a composer there; an emissary from the court at Weimar obtained some compositions from him there that year. Johann Philipp Krieger studied composition with him in Venice about 1673–4; Rosenmüller also held the post of composer at the Ospedale della Pietà from 1678 until July 1682. Towards the end of his life he returned to Germany as Kapellmeister of the court at Wolfenbüttel. His connections with the house of Brunswick-Lüneburg had probably been established in 1667, when Duke Johann Friedrich visited Venice and Rosenmüller dedicated his first sonata collection to him. The duke's cousin, Anton Ulrich, to whom the 1682 sonatas are dedicated, returned to Wolfenbüttel in 1682 from a visit to Italy, perhaps taking Rosenmüller with him. Rosenmüller's epitaph in Wolfenbüttel declared him to be 'the Amphion of his age'.

2. WORKS. Rosenmüller's publications of instrumental music span his creative career, from 1645 to 1682, and a clear line of stylistic development can be traced through them. The first three have in common the organization into suites of quite short, functional dance pieces, usually in duple-triple pairs in the order allemande, courante (correnta), ballet (ballo) and sarabande, introduced by a longer, more stylized movement. In the case of the *Paduanen* (1645) and *Studenten-Music* (1654) this opening movement is also a dance, a pavan. Lehmann claimed that the 1645 collection is the first to use a pavan in this

'Prima vox' part of 'Treiffet ihr Himmel von oben' from Rosenmüller's 'Kern-Sprüche' (Leipzig: Author, 1648)

way, without a galliard; however, it contains only four such suites, the other 30 pieces being single dances, mostly allemandes. In the *Studenten-Music* there are ten suites, systematically arranged in ascending order of key. The greatest growth is seen in the introductory pavans, where all five parts engage in motivic interplay. The other dances, like the 1667 sonatas, may also be played *a* 3: the middle parts are only harmonic filling.

Italian influence, particularly that of Legrenzi and Cavalli, is clear in Rosenmüller's last two collections. In the 1667 *Sonate da camera* the opening pavan has given way to a much longer sinfonia made up of sections contrasting strongly in tempo, metre and texture. The main sections always fall into the form *ABCB*, *B* being in a cantabile 3/2; this produces a rich, nicely balanced movement. There is no corresponding growth in the dances, however, and they disappear completely from the 1682 sonata collection.

These sonatas, probably intended for church use, clearly represent an expansion of the 1667 sinfonias, but they show a much greater variety in both scoring and overall structure. There are three to five main movements, one of which is often repeated at the end; many are fugal, and there is a marked increase in the number of chromatic themes. The slow, chordal transition sections are longer, more dramatic and often startling in their harmonic boldness. While these sonatas are neither as 'classical' in structure nor as secure in tonality as those of Corelli's op.1 (1681), this collection is rightly regarded as Rosenmüller's instrumental masterpiece.

With few exceptions, all of Rosenmüller's extant vocal music is sacred. Prints are confined to the Leipzig period; after 1654 he followed the practice of all the better German composers of the time and preferred to have his sacred music disseminated in manuscript. Much of it must have been composed in Italy, but it seems to have survived only in German sources, of which the Bokemeyer Collection, copied mainly in the 1690s by Georg Österreich, is the most important. Approximately 150 surviving manuscript works and inventories of lost collections in Lüneburg, Rudolstadt, Weissenfels, Ansbach and elsewhere (see Krummacher) attest the fact that he was one of the most popular composers of his day.

The funeral songs, each published separately on the occasion, are strophic, homophonic *a cappella* hymns. The most famous of them, *Welt ade, ich bin dein müde*, was taken over intact by J.S. Bach into his Cantata no.27. The *Kern-Sprüche* and *Andere Kern-Sprüche* are collections of small sacred concertos, careful settings of short German and Latin texts in the style of Schütz's *Symphoniae sacrae*. Rosenmüller was in fact Schütz's Leipzig agent for the distribution of the second set of *Symphoniae sacrae* (1647), and Schütz had contributed a congratulatory poem to Rosenmüller's first publication (the *Paduanen* of 1645). Although the contents of the *Kern-Sprüche* are the best represented in modern editions of Rosenmüller's vocal music, they give little hint of the expressiveness, clarity of form and idiomatic vocal writing of his later works.

Of the extant manuscript works, most of the 32 with German texts were probably composed before he settled in Italy. These include a few small concertos similar to those in the *Kern-Sprüche*, large concertos contrasting vocal soloists with a choral tutti, dialogues of both the dramatic and allegorical type, sometimes with a concluding chorale, and his first two settings of complete psalms. Most of the manuscript works, however, have Latin texts and were probably composed in Italy. There is little music for the Mass, but Italian liturgical practice is reflected in the large number of pieces proper to Vespers or Compline; there are 53 settings of complete Latin psalms, including multiple settings of the Sunday and Marian vesper psalms. These range from works for solo voice with two violins and continuo to large concertos with double chorus, soloists and instruments (e.g. NM, lix and lxxxi). Most of them share a clear overall structure articulated by instrumental ritornellos. The vocal writing consists mainly of arioso, with some concertato sections and often a virtuoso setting of the 'Gloria Patri'. The very expressive setting of words from the Lamentations (NM, xxvii–xxviii), Rosenmüller's only purely monodic work, is also liturgical. His cantatas for solo voice, on the other hand, are modelled on the secular cantatas of Carissimi and Cesti. Based on Latin devotional texts of mixed prose and poetry, they are set as recitative, arioso and arias and include closed forms (examples are *Homo Dei creatura* and *Ad pugnas ad bella*, both in Snyder, 1970). Rosenmüller's incorporation of elements of the solo cantata and Italian operatic and instrumental styles into sacred music that was widely performed in Germany clearly helped prepare the way for the emerging German sacred cantata.

WORKS

SACRED VOCAL

complete catalogue in Snyder (1970)

Kern-Sprüche mehrentheils aus heiliger Schrifft Altes und Neues Testaments (Leipzig, 1648); some ed. D Krüger (Hohenheim, nr Stuttgart, 1960–68) and B. Clark (Wyton, 1996):

KERALA J. SNYDER

Rosenthal, Albi [Albrecht] (*b* Munich, 5 Oct 1914). English antiquarian music dealer of German birth. He was educated at the Wilhelmsgymnasium in Munich and settled in England in September 1933. He continued his studies in London, with Robin Flower at the British Museum in palaeography, and then at the Warburg Institute, where he worked on palaeography, medieval book illustration and iconography as assistant to Wittkower and Saxl. He studied musicology privately with Wellesz. In 1955 Rosenthal and his wife Maud bought the London business of Otto Haas, which they continued under Haas's name, extending its tradition of scholarly expertise. Rosenthal's fine judgment, based on his specialized academic training, has contributed to the firm's leading position among antiquarian dealers. It has handled the sale of many famous collections, including those of Cortot, Scholes and Prunières, as well as many notable single items. He also became a trustee of the Beethoven-Haus, Bonn, and of the Paul Sacher Stiftung, Basle, for which he negotiated acquisitions of the Stravinsky, Webern, Maderna, Wolpe, Carter, Birtwistle, Kagel and other archives. He was awarded the Hon. MA (Oxon) in 1979 and the silver medal of the Mozarteum, Salzburg, in 1991.

ALEC HYATT KING/O.W. NEIGHBOUR

Rosenthal, Harold D(avid) (*b* London, 30 Sept 1917; *d* London, 19 March 1987). English writer on music. He studied at University College, London (BA 1940), and embarked on a teaching career, but became increasingly involved in music, principally as a critic and lecturer. In 1948–9 he worked with the Earl of Harewood on the journal *Ballet and Opera*, and he was Harewood's assistant editor when *Opera* was founded in 1950. In 1953 he became editor of *Opera*; under his guidance the journal came to provide an extensive coverage of operatic events throughout the world and exercised considerable influence on operatic life in Britain. He was archivist of the Royal Opera House, Covent Garden (1950–56). He wrote extensively for periodicals and was a correspondent of *Opera News* (1947–52) and *Musical America* (1955–60); he was also much engaged in broadcasting and in lecturing. Rosenthal's work is highly regarded for its judiciousness, based on a thorough knowledge of the human voice and the operatic repertory.

STANLEY SADIE

Rosenthal, Manuel (Emmanuel) (*b* Paris, 18 June 1904). French composer and conductor. He studied solfège with Mme Marcou and the violin with Jules Boucherit at the Paris Conservatoire (1918–23) while gaining practical musical experience in cinemas and music halls. In 1924, his Sonatine for two violins and piano was played at the 100th concert of the Société Musicale Indépendante, sponsored by Ravel and Nadia Boulanger. Jean Huré, struck by his 'dazzling melodic gifts', undertook to give him a grounding in fugue and counterpoint, which was completed by Ravel (1926) and culminated in a Blumenthal bursary (1931). Until Ravel's death in 1937, Rosenthal was among his master's closest disciples, a privileged interpreter and confidant.

His output as a composer is extensive and highly contrasted. Rejecting the compartmentalized aesthetics of French music in the interwar period, Rosenthal put his individual language to work in almost every musical genre, including opera, operetta, ballet, chamber music and the *mélodie*, to which he has contributed many works of high quality. A convert to Catholicism, Rosenthal was particularly eloquent in choral and sacred music (*La Piéta d'Avignon*, 1943; *Trois pièces liturgiques*, 1944; *Missa Deo gratias*, 1953). Certain passages in his *Saint François d'Assise* appeared to have inspired Messiaen. His skill as an orchestrator is evident from brilliant arrangements of Offenbach (*Gaîté Parisienne* and *Offenbachiana*), Mompou and Ravel.

Ravel encouraged Rosenthal in his conducting career (he made his début in 1928 with the Orchestre Pasdeloup). At the end of World War II he was at the French Radio in Paris and conducted the concert given to mark the liberation (28 September 1944) which included the first performance of Messiaen's *Chant des déportés*. He directed the Orchestre National until August 1947. His subsequent career took him to Seattle (1948–51) (he returned in 1986 to conduct Wagner's *Ring* cycle), Buenos Aires (1952), Havana (1954), Paris (at the Opéra-Comique and the Opéra) and Liège (1964–7). He also appeared on many occasions at the Metropolitan Opera in New York, and in 1987 he conducted the Russian première of *Pelléas et Mélisande*. He was professor of conducting at the Paris Conservatoire (1962–74). His indefatigable activity on the podium (continuing into the 1990s) make him one of those who shaped the concept of the '20th-century repertory'; he was responsible for a Stravinsky series on French radio and made definitive recordings of the symphonic music of Debussy and Ravel.

Rosenthal is a Commander of the Legion d'Honneur and of the Ordre du Mérite.

WORKS
(*selective list*)

STAGE

Rayon des soieries (opéra-bouffe, 1, Nino), 1926–8, Paris, OC (Favart), 2 June 1930
Un baiser pour rien [La folle du logis] (ballet, 1, Nino), 1928–9, Paris, Opéra, 15 June 1936
Les Bootleggers (comédie musicale, 3, Nino), 1932, Paris, Pigalle, April 1933
La poule noire (comédie musicale, 1, Nino), 1934–7, Paris, Champs-Elysées, 31 May 1937
Gaîté Parisienne (ballet, 1, E. de Beaumont) [after Offenbach], Monte Carlo, 5 April 1938
Que le diable l'emporte (ballet, 1, A. Derain), 1948, Paris, Marigny, 1948
Les femmes au tombeau (op, 1, M. de Ghelderode), 1956, Paris, Nations, 29 May 1957
Hop, signor! (op, 3, de Ghelderode), 1957–61, Toulouse, Capitole, 24 March 1962

ORCHESTRAL

Les petits métiers, 1936; Jeanne d'Arc, spkr, orch, 1936; Musique de table, 1941; Noce villageoise [from Lully], 1941; Symphonie de Noël, 1945; Aesopi convivium, vn, pf, orch, 1948; Magic Manhattan, 1948; Sym. C, 1949; Offenbachiana, 1953; Pastorale en rondeau, 1956; 2 études en camaïeu, str, 1969; Aeolus, wind qnt, orch, 1970

CHORAL

Saint François d'Assise (orat, Roland-Manuel), spkr, chorus, orch, 1936–9; 3 burlesques, chorus, orch, 1941; La Piéta d'Avignon, SATB, tpt, str orch, 1943; Cantate pour le temps de la Nativité, S, chorus, orch, 1943–4; 3 pièces liturgiques, high v/chorus, pf/org/harm/orch, 1944; A choeur vaillant, chorus, 1952–3; Missa Deo gratias, S, Mez, T, B, chorus, orch, 1953

CHAMBER AND INSTRUMENTAL

MARCEL MARNAT

Rosenthal, Mark. *See* RÓZSAVÖLGYI, MÁRK.

Rosenthal, Moriz (*b* Lemberg [now L'viv], 18 Dec 1862; *d* New York, 3 Sept 1946). Polish pianist. The son of a professor of mathematics at the Lemberg Academy, he began piano studies at the age of eight. In 1872 Rosenthal became a pupil of Karol Mikuli, Chopin's assistant, with whom he performed Chopin's Rondo in C major for two pianos in concert. In 1875 he moved to Vienna to study with Rafael Joseffy, a Liszt pupil, whom Rosenthal considered a far better instructor than Mikuli. A recital début in 1876 was followed by a tour, and in 1877 he met Liszt, who played a major role in his development. For a nine-year period Rosenthal received private lessons in Rome and Weimar from Liszt, who allowed Rosenthal to examine his manuscripts and library. During this period he stopped giving concerts in order to complete a degree in philosophy at the University of Vienna. An acquaintance and friendship with Brahms began when the composer heard Rosenthal perform his Paganini Variations. Brahms, Anton Rubinstein, Saint-Saëns, Massenet, Johann Strauss (ii) and Albéniz were among the musical colleagues of his early career. In 1888–9 he and Kreisler made their first tour of the USA, and in 1895 he appeared in London. Rosenthal settled in New York in 1938. In later years he taught privately, numbering Robert Goldsand, Poldi Mildner and Charles Rosen among his pupils.

Rosenthal's playing combined Chopin's legato technique (through Mikuli) with the half-staccato touch developed by Joseffy. Liszt provided a stylistic analysis of the works Rosenthal prepared for their lessons. As an interpreter he ranked among the finest of his time, with a prodigious technique linked to a profound sensitivity for phrasing, rubato and tone-colour. Rosenthal's four hours of recordings remain an invaluable source for study. Several of his compositions were published, including paraphrases on Johann Strauss's works. He edited Liszt's piano works for Ullstein Verlag and contributed many articles to *The Etude*. Copies of his unfinished autobiographical manuscript and other writings are in the library at the International Piano Archives at Maryland.

ALLAN EVANS

Moriz Rosenthal

Rosé Quartet. Austrian string quartet founded by ARNOLD ROSÉ.

Roser [von Reiter], **Franz de Paula** (*b* Naarn, Upper Austria, 17 Aug 1779; *d* Budapest, 12 Aug 1830). Austrian composer, Kapellmeister and tenor, son of JOHANN GEORG ROSER. He studied singing, the playing of instruments and music theory under his father, and is said to have been a pupil of Mozart in Vienna for a short time in 1789. He studied further with Georg Pasterwiz in Kremsmünster and J.G. Albrechtsberger in 1795. In 1796 he became a novice in the Cistercian monastery of Wilhering, Upper Austria, but did not take his vows; instead he became a soldier, then decided to make a career in music, probably from 1799 when he became musical director in Freiburg. Later he was a Kapellmeister of travelling opera troupes in Paris (1800) and Verona (1802), a tenor in theatres at Klagenfurt (1803) and Pest (1804), and from 1806 a composer in the service of Ignaz von Vegh at Vereb (now Székesfehérvár). After a year as a theatre Kapellmeister in Linz (1811–12) Roser settled in Vienna, where from 1812 to 1819 he was Kapellmeister at the Theater in der Josefstadt. In 1817 he founded a music lending and copying concern, and in 1819 he became assistant Kapellmeister at the Kärntnertortheater. From 1820 he was Kapellmeister at the Theater an der Wien and from 1824 at the German theatre at Pest. From 1826 he worked in Vienna as a successful freelance composer for a number of farce theatres.

Roser was one of the most prolific composers for the Vienna stage in the early 19th century. His operas, operettas, farces, ballets and other comic works written between 1800 and 1830 number at least 63; almost a third were to texts by J.A. Gleich, and most are lost. Roser also wrote 19 masses and numerous shorter sacred

works, some possibly attributable to his father, as well as several orchestral works and dances for military band, chamber ensembles or piano.

OTHMAR WESSELY

Roser, Johann Georg (*b* Naarn, nr Linz, bap. 19 March 1740; *d* Linz, 23 Sept 1797). Austrian composer, father of FRANZ DE PAULA ROSER. He became a schoolmaster at Naarn and in 1786, through the intervention of Leopold Mozart, was appointed Kapellmeister of the cathedral and the parish church at Linz, succeeding Georg Haller. Roser is said to have invented the *harmonie parfaite*, a just-intonation instrument with an enharmonic keyboard; the assertion that W.A. Mozart composed a rondo for the instrument cannot be substantiated. Roser's compositions, some possibly attributable to his son, are apparently all lost; they included two requiems, six graduals, a mass and shorter sacred works, and were formerly at Linz Cathedral and other churches in Upper Austria.

OTHMAR WESSELY

Rosetti [Rösler, Rössler], **Antonio** [Anton] (*b* Leitmeritz [now Litoměřice], *c*1750; *d* Ludwigslust, 30 June 1792). Bohemian composer and double bass player. The precise date and location of his birth remain uncertain. When he died in 1792, the death register in Ludwigslust recorded his age as 42, placing his birth in the year 1750. In documenting his marriage in 1777, the Wallerstein parish records identified him as a court musician from Leitmeritz, Bohemia, but the parish registers there record no birth of an Anton Rösler in 1750, leading some scholars to suggest that the composer was a Franciscus Xaverius Antonius Rössler born on 25 October 1746 in Niemes (now Mimoň), Bohemia. This Rössler, however, was throughout his life a shoemaker in Niemes, where he died on 11 June 1779. Some time before 1773 Rosetti adopted the Italian form of his name, and he thereafter consistently referred to himself as Antonio Rosetti. The existence during this period of several musicians who shared one or the other of the composer's surnames has led to considerable confusion in the identification of his music.

Originally intended for the priesthood, Rosetti received his early education and musical training from the Jesuits in Bohemia. Gerber reports that at the age of seven Rosetti entered the seminary in Prague (*GerberNL*). Several writers have confused him with an 'Antonius Rösler', whose education at various Jesuit colleges has been documented in the *Catalogus personarum, & officiorum provinciae Bohemiae Societatis Jesu* (Prague, 1763–7). This person is now known to be a Georg Antoni Rössler, born in Eger (now Cheb), Bohemia, on 3 October 1745.

Rosetti was never ordained a priest. After the abolition of the Jesuit order in Bohemia, he moved away and in September 1773 joined the Hofkapelle of Kraft Ernst, Prince (Fürst) von Oettingen-Wallerstein, near Augsburg, as a livery servant and double bass player; in July 1774 he was promoted to the official position of *Hofmusikus*. According to Gerber, Rosetti had already composed some chamber and church music before leaving Bohemia, and during his early years at Wallerstein he contributed a number of compositions to the court repertory. Following the death of Kraft Ernst's wife, Maria Theresa (born Princess of Thurn und Taxis), on 9 March 1776, as a result of complications following childbirth, Rosetti rapidly composed a Requiem in E flat major which was first performed on 26 March 1776. The court then was plunged into a period of mourning, during which no music was allowed, and Rosetti, among others, was given permission to travel. By 1780, however, the prince was ready to refocus his attention on music; by the autumn of that year he had reassembled an orchestra of exceptional talent, including some of the finest wind players of the day.

A turning-point in Rosetti's career occurred in 1781, when he was granted a leave of absence to visit Paris. During his five-month stay there, he actively promoted his music, and his works were performed by the best ensembles of the city, including the orchestra of the Concert Spirituel, for which he composed several new symphonies. Rosetti also used this opportunity to arrange for the publication of his music by firms such as Le Menu et Boyer and Sieber, who in 1782 published a set of six of his symphonies, op.3, dedicated to Prince Kraft Ernst. When Rosetti returned to Wallerstein about 20 May 1782, his recognition as a composer was assured.

The 1780s were a period of increased compositional activity. The symphonies, concertos and wind partitas that Rosetti composed between 1782 and 1789 provide clear testimony to the quality of the Wallerstein ensembles; worthy of special note are the remarkable solo and double horn concertos created especially for the Bohemian duo Franz Zwierzina and Joseph Nagel. In 1785 Rosetti assumed the duties of Kapellmeister. One of his first priorities was to improve Wallerstein church music, and in a document of that year he proposed some substantial changes – most of which were never to be implemented. His oratorio *Der sterbende Jesus* (published by Artaria in Vienna in September 1786) was probably intended to demonstrate his control of a large-scale vocal medium.

Rosetti's life at Wallerstein was plagued with financial difficulties. His debts continued to mount, and in 1789, after numerous financial setbacks, he requested release from the prince's service in order to accept the position of Kapellmeister to Friedrich Franz I (1756–1837), Duke of Mecklenburg-Schwerin. Reluctantly, on 9 July 1789 Kraft Ernst agreed, and later that month Rosetti moved to Ludwigslust. His years at Ludwigslust were less frustrating than those in Wallerstein. Thanks to a generous salary, he was for the first time financially secure, and his growing reputation as a composer brought him a number of important commissions. Unlike that at Wallerstein, the Ludwigslust Kapelle included several talented singers, and during his years there Rosetti composed a number of large-scale works for soloists, chorus and orchestra, including a chamber opera, an oratorio and a cantata. His Requiem of 1776 was used at a memorial ceremony for Mozart in Prague in 1791. In the spring of 1792, Rosetti, who had suffered from poor health for most of his life, became seriously ill, and he died on 30 June; he was buried at Ludwigslust three days later.

Rosetti's early works are written in a pleasing style that emphasizes diatonic melodies cast in a regular and repetitive phrase structure, supported by a predictable harmonic vocabulary. His music of the early 1780s demonstrates the first signs of a stylistic maturity that is brought to full bloom in the works composed after about 1784. These are characterized by a greater reliance on chromatic inflection in melodic lines, a richer harmonic and tonal language, skilful handling of counterpoint and

imaginative and colourful orchestration. Throughout Rosetti's output, two distinctive features distinguish his style: an economical treatment of materials, which often results in tight musical structures held together by discernible motivic relationships, and a sure and imaginative employment of wind instruments.

STERLING E. MURRAY

Rosier [Rosiers, de Rosier], **Carl** [Charles] (*b* Liège, 26 Dec 1640; *d* Cologne, 1725, before 12 Dec). Flemish composer and violinist, active mainly in Germany. From about 1664 he was a violinist at the court of the Elector Maximilian Heinrich in Bonn and later became vice-Kapellmeister there. From 1675 he lived principally in Cologne, but from about 1683 to 1699 he also worked in the Netherlands, where he was highly regarded as a violinist and numbered Carolus Hacquart among his colleagues. On a title-page of 1691 he is described as vice-Kapellmeister at the court at Cologne. In 1967 he participated in a collegium musicum in Amsterdam together with Nicolas Desrosier, Hendrik Anders, N.F. Le Grand and others. In 1699 he was Kapellmeister of Cologne Cathedral and in 1701 was appointed to a similar post by the city council: he thus held simultaneously the two most important positions in the musical life of Cologne. His daughter Maria Anna married Willem de Fesch. His first two publications were of sacred music, but his only other church music, in manuscript, dates from much later in his life. He is most notable as a composer of instrumental music, which includes 57 attractive dance pieces for three violins without continuo (1679) and, in his other publications, works ranging from Italianate trio sonatas to those showing the influence of the French overture.

URSEL NIEMÖLLER

Rosiers [Roziers], **André de,** Sieur de Beaulieu (*fl* Paris, 1634–72). French composer. There is no evidence to suggest that he was a descendant of the Sieur de Beaulieu who composed part of the *Balet comique de la Royne* (1582), and it is unlikely that he belonged to the Rosier family of Parisian musicians of the 17th century, who were illiterate.

Rosiers was the most prolific and important composer of drinking- and dance-songs in mid-17th-century Paris. In addition to his own numerous publications he was the only contributor acknowledged by the publisher Robert Ballard in his many collections of *chansons pour dancer et pour boire*. After two books of four-part drinking-songs, *Les libertez*, Rosiers concentrated on solo songs, either accompanied by lute or unaccompanied, and on duets. According to the composer these lighter songs were sung by members of the court at the dinner table, not for any aesthetic purpose but to increase the general mood of gaiety. Dedicated to the most influential people in the kingdom (provincial governers, gentlemen of the king's chamber, the *lieutenant général* of the royal armies), they abound in political connotations (the Treaty of the Pyrenees, the wedding of Louis XIV). The military strength of the King of France is suggested in some texts (*L'invincible Bourbon*); we encounter poets and men of letters describing the joyful gatherings of gentlemen (Colletet, Bautru), the king's musicians who became famous for their songs (Lazarin, Gingan), and even the talents of cooks and wine waiters, such as Boquet, Du Val, Guérin and Facio, are celebrated.

Despite a common simple style there are several basic differences between the drinking- and dance-songs. The former are always for two voices (soprano and bass), and include a few dialogues, reminding us that France was searching for its own lyric theatre; the latter are always monophonic. The dance-songs are always built of symmetrical motivic units; for example *Gardez vous bien* and *J'ayme le sexe des filles* each consists of the following pattern of bars (mostly crotchets, always four beats to a bar): (2+2)–4–(4+4). On the other hand, the drinking-songs are often asymmetrical; *Le premier mot quand on s'esveille*, for instance, has the pattern (3+3)–3½–(4+4). All the chansons are strophic, in a variety of popular simple forms. The move towards the use of basso continuo in France (a practice that was widespread there well before it appeared in printed music) is evident in the harmonic bass voice parts.

36 songs, 1637[4], 1638[6], 1639[3]
2 sacred contrafacta, 1640[5]

JOHN H. BARON/GEORGIE DUROSOIR

Rosignolo [rusignolo] (It.). *See under* ORGAN STOP (*Vogelgesang*).

Rosin [resin, colophony, colophonium, colophane] (Fr. *colophane*; Ger. *Kolophonium*, *Geigenharz*; It. *colofonia*). A substance rubbed on the hair of the bow of a string instrument to give the bow hair the necessary 'bite' on the strings. Rosin is obtained by distilling oil of turpentine. The resulting solid residue is refined further when intended for musical use, the rosin then being cast into conveniently rounded or rectangular shapes. Rosin is a hard, brittle solid whose colour varies from a light, clear amber to dark brown. For a newly haired bow, powdered rosin, which looks like a fine white dust, is normally used. Pure rosin is best for violin, viola and cello bows, but the double bass bow requires a stiffer preparation made of pure rosin and white pitch in equal proportions.

Strictly speaking, there is a distinction between rosin and resin although the word 'rosin' is doubtless derived from 'resin' and the two terms are often used interchangeably. Resin is the natural gummy exudation from the trunks of trees, especially coniferous trees, while rosin is the end-product of the distillation described above which starts with a turpentine resin (there are also chemical resins). Another term for rosin, 'colophony', may derive from Colophon, an ancient city in Asia Minor, where the best rosin presumably came from.

References to the musical uses of rosin occur at least as early as the 16th century. In his *Musica teusch* (1532), Hans Gerle tells the string player to rub the bow 'with colfanium or with English rosin which one finds at the apothecary' ('Mit Colfanium oder mit Englischem hartz das findt man in der appotekgen').

DAVID D. BOYDEN

Rosin, Armin O(tto) (*b* Karlsbad [now Karlovy Vary, Czech Republic], 21 Feb 1939). German trombonist. He studied the trombone at the Munich Musikhochschule (1960–63), musicology at the University of Erlangen-Nuremberg (1963–8), and conducting with Keilberth and Celibidache (1972–3). He played first trombone with the Bamberg SO from 1961 to 1966 and, from 1968 to 1980, with the SDR RSO at Stuttgart. He was a founder-member of the Ars Nova Ensemble of the Bavarian radio (1964–70), and a member of the Edward Tarr Brass Ensemble (1970–74). As Globokar's successor in Kagel's Cologne Ensemble for New Music (1969–79), Rosin gained useful experience in the interpretation of contemporary music, for which he is best known. He has given the first performances of some 40 works, many dedicated to him, by Isang Yun, Mauricio Kagel and Werner Heider, among others. In 1975 he was appointed to the Staatliche Musikhochschule in Stuttgart to teach the trombone and wind ensemble music; he became a professor there in 1980. In 1976 he founded the large brass ensemble Brass Philharmonie in Stuttgart, and in 1987 the first professional brass trio, Trio Armin Rosin. His many recordings include Martin's *Ballade* and Heider's *Einander* (1971), each conducted by the composer. His 1973 recording of Romantic German trombone concertos was the first LP to be dedicated entirely to trombone music. Rosin was appointed a member of the South German Academy of Arts and Sciences in 1990.

EDWARD H. TARR

Rosing, Vladimir (*b* St Petersburg, 23 Jan 1890; *d* Los Angeles, 24 Nov 1963). Russian tenor and director. He studied in St Petersburg with Joachim Tartakov and in Paris with Jean de Reszke. In 1912 he made his début in *Yevgeny Onegin* at St Petersburg, and the following year went to London, where in 1915 he directed a Russian and French season at the Stoll Theatre; he introduced *The Queen of Spades* to London, 'working like a veritable Trojan' (*Musical Opinion*, July 1915) in the role of Hermann. He sang with the Carl Rosa Opera Company at Covent Garden in 1921 as Cavaradossi, and in 1923 founded a company which for six years toured the USA giving opera in English. Rosing directed, and Albert Coates conducted, the British Music Drama Opera Company, founded in 1936, and their single season at Covent Garden included the première of Coates's *Pickwick* and the first performance in England of Musorgsky's *The Fair at Sorochintsï*. His production in 1938 of George Lloyd's *The Serf* for the English Opera Company at Covent Garden was admired, but in 1939 he moved to the USA, where he organized the Southern California Opera Association and from 1950 to 1958 was director for the New York City Opera. In concert work his manner was flamboyant and his style exaggerated, but he was a fervent advocate of Russian song, of which he made some pioneering recordings. Rosing was one of the most determined, individualistic and enterprising figures of his day. His voice, though powerful enough, was subject to some rough usage. His insistence on intelligibility in opera was timely and influential.

J.B. STEANE

Rosing-Schow, Niels (*b* Copenhagen, 14 April 1954). Danish composer. After studying musicology at Copenhagen University from 1972, he went to the Royal Danish Conservatory in 1979, where he took the music teacher's examination in theory and music history. From 1984 he studied composition there with Nørholm, completing his study with a début concert of his works in 1987. Later that year he undertook further study in Paris. In 1986 he began teaching theory, music history and composition at the Royal Danish Conservatory, from 1988 as a lecturer. He also taught at Funen Conservatory (1989–91). In the 1980s he acted as music critic for various Danish newspapers. He was chairman of the Society of Young Composers (1984–8) and a member of the National Music Council (1991–5). Awards he has received include the three-year scholarship of the Government Art Fund (1982), Det Ancherske Legat (1990) and the Carl Nielsen and Anne Marie Carl-Nielsen Memorial Prize (1993).

As an 18-year-old, Rosing-Schow began composing within the framework of the Copenhagen Group for Alternative Music, which sought to formulate an alternative to both European modernism and the music of the preceding generation of Danish composers such as Nørgård and Nørholm. The result was what was known as 'Ny Enkelhed' (New Simplicity), a style that characterizes works such as *Songs of the Flower-Fairies* (1974) and *Kinderlieder* (1977). However, during the 1980s he sought to move towards a modernistically inspired expression; in *E rigidis* (1980–81) concretist patterns are gradually abandoned. The composer considers the Trio for flute, viola and harp (1983) to be his breakthrough. As the work's Debussian instrumentation indicates, Rosing-Schow's attention has long been directed towards French music, and his work with the purely sonic aspect of music is reflected in a number of instrumentally and harmonically sophisticated chamber and ensemble works. During

his study in Paris he became familiar with the music of Murail and the principles of spectral music, which further stabilized this course, as can be heard in his . . . *sous les râles du vent d'Est* (1993). Other main works are *Archipel des solitudes* (1994–5) for mezzo-soprano, choir and large orchestra, and the chamber opera *Dommen* ('The Verdict', 1995–6).

THOMAS MICHELSEN

Rositsky, Jacek. *See* RÓŻYCKI, JACEK.

Roslavets, Nikolay Andreyevich (*b* Dushatin, Chernihiv region, Ukraine, 23/24 Dec 1880/4/5 Jan 1881; *d* Moscow, 23 Aug 1944). Russian composer. Born into a family of rural, peasant background, Roslavets's initial exposure to music was through his uncle, a self-taught village fiddler and builder of string instruments. At the age of seven or eight he began to teach himself to play the violin by ear and soon became part of a popular village string ensemble led by his uncle. From the age of 12 he supported himself through various office duties in the city of Konotop and eventually became a railway office employee, moving to Kursk at the age of 16. There he acquired formal instruction in the violin, rudimentary theory and harmony in classes given by Arkady Abaza under the auspices of the Russian Music Society.

In 1902, at the age of 21, Roslavets left his job and entered the Moscow Conservatory where he studied the violin under Jan Hřímalý and composition under Vasilenko. He graduated in 1912 with a silver medal for his opera-cantata *Nebo i Zemlya* ('Heaven and Earth') based on a drama by Byron. Having completed his studies at the conservatory, Roslavets began to establish himself as a modernist composer. Between 1913 and 1919 he formulated a so-called new system of tone organization which he continued to refine in his works written in the 1920s. In an autobiographical article published in 1924, he explained that his compositional method involved manipulation of what he called synthetic chords – collections of six or more notes – which, through possible transpositions to all 12 degrees of the chromatic scale, govern the pitch-structural plan of a work. In particular, a certain basic hexachord (C–B♭–E–A♭–D♭–G) can be identified as the source for his various synthetic chords.

This sonority is varied to create others through chordal rearrangement, chromatic alteration of component pitches and/or addition of pitches to the collection. Roslavets's sketches indicate that he approached totally chromatic composition through combined transpositions of his predetermined synthetic chords. These chords are associated with a strictly regulated orthography that invokes the traditional concept of chordal roots within a post-tonal context. While being at times visually cumbersome, this practice sheds light on the composer's understanding of pitch structure in his music. Even though Roslavets claimed compositional independence from Skryabin, his synthetic chord technique has much in common with Skryabin's late harmonic practice.

Initially, Roslavets's compositions were well received by his modernist Russian contemporaries. In reviews of Roslavets's first three publications (*Tri sochineniya* ('Three Compositions') and *Grustnïye peyzazhi* ('Melancholy Landscapes') for voice and piano, and the Sonata no.1 for violin and piano), Myaskovsky recognized in 1914 that Roslavets possessed a remarkable talent and already was comparing his work favourably with that of Skryabin and Schoenberg. By 1915 Roslavets had gained a reputation for being a daring innovator and had established ties with representatives of Russia's literary and artistic vanguard such as Vladimir and Nikolay Burlyuk, Vasily Kamensky, Velimir Khlebnikov, Aristarkh Lentulov, Vladimir Mayakovsky, Kazimir Malevich and Boris Pasternak. Along with contributions by these various artists, his compositions were included in two publications of futurist poetry, prose, and drawings that appeared in 1915, *Vesenneye kontragentstvo muz* ('The vernal subcontracting agency of the Muses') and 1916, *Moskovskiye mastera* ('Moscow Masters'). In 1919 Arthur Lourié, then head of the Music Division of the Commissariat of Public Education (Narkompros), tentatively enlisted Roslavets's services in founding the Association for Contemporary Music (ASM). Soon after its eventual establishment in 1923 (by Belyayev and Derzhanovsky), the organization sponsored performances of several of his chamber and orchestral compositions. Until 1927 reviews from the modernist camp continued to praise Roslavets's compositional skill and pronounced him the most interesting innovator among his Russian peers.

During this time Roslavets produced the bulk of his output: several orchestral works (most of which have not survived intact), a violin concerto, much chamber music, piano compositions and art songs, in addition to some

propaganda songs extolling the 1917 Revolution and the proletariat. As a result of the New Economic Plan, a few of these works were published in the 1920s by Universal Edition in conjunction with the Moscow State Publishing House.

Roslavets welcomed the Revolution of 1917 and participated willingly in the cultural, educational and even political structuring of the new state. Beginning in 1919, he assumed administrative positions in the All-Russian Union of Workers in the Arts (Vserabis) for the Moscow region and was head of music publishing of the Moscow Proletkul't. From 1921 to 1922 he served as rector and professor of composition and orchestration at the Kharkiv Music Institute and headed the department of Artistic Education at the Central Administration of Professional Education (Glavprofobr) of Ukraine's Commissariat of Public Education (Narkompros). In the following year he returned to Moscow and worked as a censor (political editor) in the literature and publishing division of the Russian Narkompros. In 1924 he headed the political department of the State Music Publishing House and became editor-in-chief of the short-lived modernist journal *Muzykal'naya kul'tura*. In 1928 he joined the Union of Workers in Education (Soyuz Rabotnikov Prosveshcheniya) and in 1930 he was appointed music consultant to the Moscow Department of National Education (MONO). Privately, and at the Stravinsky Musical-Vocal Courses (which later became the first Moscow Music Polytechnic), he taught composition students his new system of tone organization which he believed could prepare them to deal with the musical challenges of the 20th century.

In addition to promoting his own approach to composition, Roslavets defended post-tonal music from criticism it received from the Russian Association of Proletarian Musicians (RAPM). These polemics turned to his disadvantage in 1927, when he was attacked for his modernist stance and his own compositions were denounced for their formalism and decadence. By this time, Roslavets had become disillusioned with the government and resigned from the Communist Party. As a result of his political mistakes, he was relieved of his censoring duties in Narkompros and was forbidden to seek such employment for two years. To escape the tensions of Moscow, Roslavets moved to Tashkent in 1931 where he assumed the duties of music director and conductor of the Uzbek State Music Theatre and music supervisor of the Radio Centre. During this time, his ballet *Pakhta*, based on Uzbek folk melodies, was composed and performed to critical acclaim.

In 1933 Roslavets returned to Moscow to resume teaching at the State Music Polytechnic and to serve for that year as a supervisor in the repertory section of the All-Union Radio Committee. Between 1936 and 1938 he was again involved with censoring of music repertory in Moscow. Roslavets also continued to compose and was even commissioned by the Composers' Union to write a second chamber symphony, another violin concerto, a quartet for four dömbras, and several pieces for violin and piano. However, his name disappeared from Russian reference sources until 1978 and he was admitted to the Composers' Union only in May 1940 after suffering a crippling stroke. During the remaining four years of his life Roslavets suffered from cancer and another stroke, illnesses which paradoxically saved him from arrest by the security forces.

WORKS

† – *unpublished, MS in RGALI (Rossiyskiy gosudarstvennïy arkhiv literaturï i iskusstva) or GMMC (Glinka Museum of Musical Culture)*

Stage: Pakhta† (ballet), 1931–2

ANNA FERENC

Rösler, Anton. *See* ROSETTI, ANTONIO.

Rösler, Endre (*b* Budapest, 27 Nov 1904; *d* Budapest, 13 Dec 1963). Hungarian tenor. He made his Budapest Opera House début in 1927 as Alfredo (*La traviata*), having studied with De Lucia and Garbin. From the outset he undertook a wide range of roles, both lyric and dramatic, favouring the Mozart repertory above all. His performances were notable not so much for beauty of voice (as a young singer he had contracted an inflammation of the vocal cords that affected his higher register) as for expressive power, great musicality, a keen sense of style, excellent acting ability and versatility in character parts such as Shuysky (*Boris Godunov*), Malatestino (Zandonai's *Francesca da Rimini*) and Loge (*Das Rheingold*), perhaps his greatest role. He played Florestan under Toscanini at Salzburg (1935), later recording the role with the Hungarian State Opera under Klemperer (1948), and appeared several times at the Florence Maggio Musicale and elsewhere. At the end of the 1950s he resigned his leading roles, playing only comprimario and character parts. He was also a leading Hungarian recitalist and concert singer. (P.P. Várnai: *Rösler Endre*, Budapest, 1969)

PÉTER P. VÁRNAI/ALAN BLYTH

Rösler, Jan Josef [Jozef] [Rössler, Johann Joseph] (*b* Banská Štiavnica, 22 Aug 1771; *d* Prague, 28 Jan 1813). Bohemian composer. He studied music formally with his father but was mainly self-taught in composition. His earliest successes, the pantomimes *Das Zauberhörnchen* and *Die Geburt des Schneiders Wetz Wetz Wetz*, date from 1796. He wrote both Singspiele and Italian operas, most of which were given at the Nostitz Theatre in Prague; they include *L'assassino per vendetta*, given later in German and also Czech, and *Elisene, Prinzessin von Bulgarien*, his most famous opera, which was first performed in 1807 and later presented successfully at the Vienna court theatre (1809). Rösler went to Vienna in 1805 and worked for a while at the court theatre; he also spent some time in the service of the Countess Lobkowitz.

Although renowned as a theatre musician, Rösler also won a reputation as a keyboard virtuoso and composer. His Piano Concerto in D op.15 is one of his most important works, and his keyboard sonatas and smaller piano pieces were popular in his day. Stylistically, Rösler, like so many of his contemporaries, falls between Mozart and Beethoven; his *Cantate auf Mozart's Tod* (1798) shows his indebtedness to the former but his Piano Concerto leans towards the latter.

ADRIENNE SIMPSON

Rosmarin, Matthieu. *See* ROMERO, MATEO.

Rosmer, Ernst. Pseudonym of Else Bernstein-Porges, daughter of HEINRICH PORGES.

Rosner, Arnold (*b* New York, 8 Nov 1945). American composer. He began writing music at an early age and developed his own style before receiving formal instruction. He studied at SUNY, Buffalo, where he received an MA in 1970 and the degree of PhD in 1972. At that time Rosner resisted the academic trends in composition then in fashion. Instead he has hewn to an often neo-archaic manner that shows affinities with the music of Hovhaness, Shostakovich and the Renaissance polyphonists. He favours modal melodies, clear textures, simple rhythmic patterns and non-tonal but consonant, triadic harmony. Within its deliberately limited syntax his music is capable of a surprising emotional gamut: at times gentle, serene, or even ecstatic, and at others brooding, harsh, or violent. Rosner was assistant music director of WNYC radio from 1970 to 1972 and has taught at Brooklyn and Wagner colleges, CUNY (1972–9 and 1972–89, respectively); in 1983 he joined the staff at Kingsborough Community College. An interview with the composer is published in *Fanfare*, xiv/5 (1991).

WORKS

(*selective list*)

Op: The Chronicle of Nine (F. Stevenson), op.81, 1984; Bontsche Schweig (chbr op. I.L. Peretz), op.102, 1994

6 syms., op.3, 1961, op.8, 1961, op.20, 1963, op.29, 1964, op.57, 1973, op.64, 1976

WALTER G. SIMMONS

Rosowsky, Solomon [Shlomo] (*b* Riga, 27 March 1878; *d* New York, 31 July 1962). Russian-Latvian musician and scholar of Hebrew Bible cantillation. His father was the noted Jewish cantor Baruch Leib Rosowsky (1841–1919). He studied composition under Rimsky-Korsakov, Glazunov and Lyadov at the St Petersburg Imperial Conservatory and conducting under Nikisch at the Leipzig Konservatorium. After studying law in Kiev he returned to music; he was a co-founder of the St Petersburg Jewish Folk Music Society (1908) and started collecting and editing Jewish folksong and liturgical music. He served as music director at the Jewish Art Theatre in Petrograd (1917–19). In 1920 he left the Soviet Union for independent Latvia, where he directed music at a Riga theatre, was active as a music critic, and founded the Riga Jewish Conservatory of Music (1920). From 1925 to 1947 he lived in Palestine. He wrote incidental music for the Hebrew theatre, some chamber music, and popular songs, and emerged as a leading authority on the chanting of the Hebrew Bible. He initiated courses on Bible cantillation at the Palestine Conservatory of Music, Jerusalem (now the Rubin Academy of Music). In 1946 he was awarded the J. Engel Music Prize (Tel-Aviv) and elected chairman of the Musicians' Association of Israel. In 1947 he settled in the USA where he lectured first at the New School for Social Research and later at the Jewish Theological Seminary of America, New York.

His lasting contribution to musicology is *The Cantillation of the Bible: the Five Books of Moses* (New York, 1957). In this comprehensive study, a branch of the research initiated by A.Z. Idelsohn and Robert Lachmann, an attempt is made to find a key for the reading and musical rendering of the Biblical neumes system (*tĕ'ameyhamiqra*), which survives in many local versions. The principal aim was to establish the relation between the written symbols and their actual performance, using the tradition of the eastern (Polish-Lithuanian) Ashkenazic congregations as a model. A major result is the melodization of whole phrases, chapters and even books of the Bible.

EDITH GERSON-KIWI/BRET WERB

Rospigliosi, Giulio [Pope Clement IX] (*b* Pistoia, 27 Jan 1600; *d* Rome, 9 Dec 1669). Italian poet, writer and librettist. He studied at the Jesuit Seminario Romano from the age of 14, and received doctorates in jurisprudence and philosophy from the University of Pisa in 1624. Returning to Rome, he quickly rose in the new government of Urban VIII and in the learned academies of the city. Among these was the circle around Cardinal Francesco Barberini, who had a keen interest in ancient theatre and the new music drama. Many of Rospigliosi's lyric poems at this time were set by composers in the Barberini orbit, such as Domenico Mazzocchi, Luigi Rossi and Stefano Landi. Rospigliosi collaborated with J.H. Kapsberger on a dramatic Christmas dialogue, *I pastori di Bettelemme* (1630) and subsequently provided at least 11 opera librettos and several sets of *intermedi* in verse for Barberini productions from 1631 to 1656. These were set to music by Landi, Michelangelo and Luigi Rossi, Virgilio Mazzocchi, Marco Marazzoli and Antonio Abbatini. His librettos stressed aspects characteristic of non-pastoral verse drama, such as complex plots and the psychology of the characters. Only his two earliest operas, *Sant'Alessio* and *Erminia sul Giordano*, were performed outside Rome, the latter in Pistoia in 1638, the former in Reggio nell'Emilia in 1645 and in Bologna in 1647. His sojourn in Spain as papal nuncio from 1644 to 1653 appears to

have rekindled the interest of the Madrid court in the new genre of opera. *La comica del cielo*, possibly written then, was modelled on a Spanish play but not staged until his own pontificate (1668, music by Abbatini). Following a tradition of Jesuit school plays and Florentine librettos of the 1620s, six of his librettos present events from the lives of saints, though all were given in private palaces during carnival. His secular plays all derive from literature (Tasso, Boccaccio, Ariosto and contemporary Spanish playwrights). *La Vita humana* (1656), a morality play that resembles a Spanish *auto sacramental* was commissioned by the Barberini to honour the conversion of Queen Christina of Sweden to the Catholic faith. She quickly became involved in musical activities in Rome and was instrumental in persuading Clement IX to license the Teatro Tordinona, the first public opera house in Rome, which opened in 1671.

Among his various ecclesiastical offices, as secretary to Urban VIII and to the Congregation of Rites, Rospigliosi must have been involved in some of the liturgical reforms of the period, such as the revision of the breviary hymns, and as canon of S Maria Maggiore (from 1636) he had some responsibility for its musical establishment.

MARGARET MURATA

Rosquellas, Pablo (Mariano) (*b* Madrid, 15 April 1784; *d* Sucre, Bolivia, 12 July 1859). Spanish violinist, singer and composer. He studied with his father and other family members, and at a young age he was a violinist in the employment of the Duke of Medinaceli and at the church of Nuestra Señora de la Soledad in Madrid. In 1805 he was a viola player in the royal chapel, but gave it up when the War of Independence began. He embarked on a new career as tenor, actor, composer and director of operatic and dramatic companies, travelling to London, Paris, Ireland and then Brazil, where he organized concerts at the court of Emperor Pedro I and in the theatres of Rio de Janeiro. In 1819 he staged his opera *O grande califa de Bagdad*. In 1823 he settled in Buenos Aires, where he gave many successful vocal and instrumental concerts and, after a number of difficulties, succeeded in setting up a permanent opera company. He gave many Argentine premières of operas by Rossini, including *Il barbiere di Siviglia* (1825), *La Cenerentola* (1826), *L'inganno felice* (1826), *Otello* (1827) and *Tancredi* (1828); he also staged Zingarelli's *Giulietta e Romeo* (1826) and Mozart's *Don Giovanni* (1827). He also gave performances in Montevideo. In 1833 he moved to Bolivia, developing a silver mine at Potosí while continuing his musical activities; later he travelled to Chile and Peru. He subsequently settled in Chuquisaca (now Sucre), where he went into business. In 1835 he founded the Sociedad Filarmónica Dramática, which existed for over a century. His younger son, Luis Pablo Rosquellas (1823–83), included singing and composing among his multifarious activities. (G. Bourligueux: 'Un musicien madrilène à travers le Nouveau Monde', *Mélanges offerts à Paul Roche*, ed. N. Perera San Martín (Nantes, 1992), 183–97

GUY BOURLIGUEUX

Ross, Diana [Diane Ernestine] (*b* Detroit, 26 March 1944). American pop singer. She initially came to fame as the lead singer of the Supremes, who were signed to the Motown record label in 1961. Beginning in 1963 with *When the Lovelight Starts Shining*, the group had a series of 28 singles in the American pop charts, 12 of which reached the number one position, including *Where did our love go?*, *Baby Love*, *Stop! In the name of love*, *You can't hurry love*, *You keep me hangin' on*, *Love Child* and *Someday we'll be together*. In 1967 the group's name was changed to Diana Ross and the Supremes, paving the way for her subsequent solo career, begun in 1970.

She was highly successful as a soloist, and placed 20 singles on the American rhythm and blues and pop music charts. Five of these reached the number one position in the pop charts: *Ain't no mountain high enough*, *Touch me in the morning*, *Upside Down*, *Endless Love* (a duet with Lionel Richie) and *Do you know where you're going to* (the theme song of the film *Mahogany*). She also won an Academy Award nomination for her portrayal of Billie Holiday in the 1972 film *Lady Sings the Blues*. In 1981 she signed to RCA Records to mixed success, but returned to Motown eight years later. Throughout the 1980s and 90s her records have become increasingly infrequent and of uneven quality. Working with a variety of producers, including Nile Rodgers and Bernard Edwards, Daryll Hall, the Bee Gees and Michael Jackson, her solo records have veered from lushly produced melodramatic pop ballads to disco dance numbers.

ROB BOWMAN

Ross, Jerry [Jerrold]. Songwriter, collaborator with RICHARD ADLER.

Ross, John (i). *See* ROSE, JOHN.

Ross, John (ii) (bap. Newcastle upon Tyne, Feb 1764; *d* Aberdeen, 27 July 1837). Scottish composer and organist. The son of a bottle maker, he showed early musical talent,

playing the violin when only five years old. From the age of 11 he studied with Matthias Hawdon. In December 1783 he was appointed organist to the Episcopal Chapel of St Paul's in the Gallowgate, Aberdeen, in succession to Robert Barber (ii), who had also come from Newcastle. On arrival Ross was also appointed organist to the Aberdeen Musical Society (founded 1748). In December 1787 he married Jean Tait, a relative of Andrew Tait, who had been master of Aberdeen Music School, a former organist of St Paul's and a founder member of the Musical Society.

Ross's first published composition was his set of six keyboard concertos (1788), followed by a set of ten songs (*c*1790), both published by Preston in London. Thereafter he produced nearly 200 songs, at least 29 sonatas as well as many other pieces for piano. In the winter of 1812 he organized a special concert for the relief of the poor in Aberdeen after a disastrous crop failure. His *Ode to Charity* was performed, raising a sum of £314. Although reputed to have been offered lucrative posts in London, Ross remained in Aberdeen for the rest of his life, playing, teaching (harpsichord, piano, singing) and composing.

Ross had a keen ear for a good melody and a well developed sense of how best to set it in context. Lombard rhythms, anacruses, off-beat accents, gapped scales, pedals and drones all contribute to a feeling of Scottishness in his music, even in movements in which no Scottish tune is directly quoted. These elements are handled with confidence, making Ross one of the most accomplished composers of his particular generation. Throughout his work there is an atttractive freshness, and the occasional naivety merely serves to give that sense of oddity to which contemporary musical sophisticates and public alike so readily responded. Despite a life spent in Aberdeen, any hint that Ross was merely a provincial composer is countered by the number of leading publishers who printed his works: they are invaluable reflectors of contemporary taste, and in many of the instrumental works, particularly the concertos, Ross wrote music which is both rare and delightful.

WORKS

VOCAL

published in London unless otherwise stated

An Ode to Charity, op.10 (1800)

Songs: 10 as op.2 (1790); 9 as op.4 (?1792); 6 as op.7 (Edinburgh, ?1800); 15 as op.11 (?1801); 6 Canzonets, op.12 (?1805); 6 Canzonets, op.13 (?1805); 6 Canzonets, op.18 (1805); 12 as op.28 (*c*1808); over 100 others; Sacred Music, 3vv, org (*c*1830)

Select Hymns (1818), words only

INSTRUMENTAL

6 Concertos, op.1 (1788)

Sonatas for pf with vn/fl: 3 as op.5 (1798); 3 as op.6 (*c*1800); 3 as op.15 (Edinburgh, *c*1805); 3 as op.16 (Edinburgh, *c*1805); 3 as op.17 (*c*1805); 3 as op.19 (1808)

Sonatas for solo pf: op.23 (*c*1808); 3 as op.43 (Aberdeen, *c*1830)

Duets for pf: op.26 (London, *c*1808); 3 as op.46 (London, *c*1812)

Waltzes: op.3 (1812); 6 with 4 marches, op.8 (1800); 6 as op.9 (Edinburgh, 1803)

Other marches, variations and short pieces

Complete Book of Instructions (*c*1795, enlarged 2/*c*1816)

ROGER B. WILLIAMS

Ross, Scott (*b* Pittsburgh, 1 March 1951; *d* Assas, nr Montpellier, 14 June 1989). American harpsichordist. After moving to France at the age of 14, he matriculated at the Nice Conservatoire, studying organ with René Saorgin and harpsichord with Huguette Grémy-Chauliac. He graduated with a *premier prix* in 1968. At the Paris Conservatoire (1969–71) he continued his harpsichord studies with Robert Veyron-Lacroix and studied figured bass with Laurence Boulay. After taking first prize in solo harpsichord at the 1971 Bruges competition, Ross entered Kenneth Gilbert's harpsichord class at the Antwerp Conservatory and earned an artist's diploma there in 1972. His own teaching career began with a professorship at Laval University in Quebec in 1973 and continued with numerous summer courses and masterclasses in France. He collaborated with Gilbert in editing the harpsichord music of d'Anglebert and Domenico Scarlatti. His many distinguished recordings include the complete harpsichord music of Rameau (1975), François Couperin (1978) and Scarlatti (1985). As a player he combined scholarship and musicality of a high order with a brilliant technique. Ross's approach to music was strongly influenced by French philosophical thought of the 18th century. His interpretations were solidly founded on musicological research, yet were never academic or dry.

HOWARD SCHOTT

Rosseau, Norbert (Oscar Claude) (*b* Ghent, 11 Dec 1907; *d* Ghent, 1 Nov 1975). Belgian composer and violinist. He spent his youth in Italy, and from the age of seven gave evidence of considerable gifts as a violinist. He studied with Mulé (composition), Silvestri (piano) and Dobici (fugue), obtaining the diploma in composition at the Accademia di S Cecilia in Rome (1929). Concurrently he followed courses at Rome University. In 1940 an injury to his right hand forced him to abandon a career as a performer and devote himself to composition. In 1964 he took part in electronic music research at Ghent University, and he directed a seminar in early music at the conservatory there between 1967 and 1969. His earliest works show evidence of diverse influences; it is scarcely possible to detect any consistent development in his work, since he was always subject to varied tendencies, and produced quite different pieces at the same time. In his serial writing he used his 'harmonic dodecaphonic system'; that is, the series is divided to form four perfect triads, as in *Maria van den Kerselaar*. From 1957 he became increasingly interested in electronic music (*Impromptu: ode aan Gent*, 1969), but he continued to be involved with the past, as is evident in the orchestral *Sinfonia liturgica* (1963), which is – except for octave doublings – entirely monodic.

WORKS

HENRI VANHULST

Rossell (Argelagós), Joan (*b* Barcelona, bap. 1 April 1724; *d* Toledo, 30 March 1780). Spanish composer. His father was a tenor soloist at the church of S Maria del Pi and his grandfather harpsichordist at Barcelona Cathedral. In 1731 he was admitted as *escolanet* (choirboy) at the cathedral, where he was taught by Francesc Valls and Josep Picañol. In 1746 he became *maestro de capilla* of Tarragona Cathedral and in the autumn of 1747 he moved to Palma de Mallorca, where he became *maestro de capilla* of S Anna de la Almudaina.

From 1756 to 1757 he took part in the polemics between Josep Durán and Jaume Casellas, in which Casellas censured Durán for his use of progressive Neapolitan compositional techniques. Although Rossell's musical style was thoroughly italianate, he defended Casellas's conservative attitude, probably because he was on friendly terms with him. In 1763 Rossell became *maestro de capilla* of Toledo Cathedral, a post he held until his death in 1780.

Rossell was a prolific composer of sacred music. His Latin church music is in the late-Hispanic Baroque style, alternating *stile antico* with concertato and polychoral styles. Most of his masses, psalm settings and antiphons are for large choir, often divided into three or four groups and sometimes with concertato instrumental parts. In these works solo sections are clearly contrasted with choral sections. In most of his sacred works in the vernacular, however, modern vocal and instrumental techniques are well assimilated, and the dramatic elements of the texts are emphasized.

Rossell's talent is best revealed in his villancicos and Lamentations for solo voices. The villancicos and other similar genres (such as *tonoi* and *romances*) display influences from other models, especially the Italian cantata. His earlier villancicos, such as *Vuy que del amor divino* (1750), retain the traditional scheme of introducción, *estribillo* (refrain) and *coplas* (stanzas). In his more elaborate villancico-cantatas, however, recitatives and arias replace the *estribillo* and *coplas*. Some villancicos include musical items from Hispanic folklore, such as the *jácara* and *seguidilla*.

ANNA CAZURRA

Rosselli [Rossello]**, Francesco.** *See* ROUSSEL, FRANÇOIS.

Rosselli, John (*b* Florence, 8 June 1927). British writer of partly Italian descent. He studied at Swarthmore College, Pennsylvania, and was a research student in history with Herbert Butterfield at Cambridge (1948–51). He then worked for the (*Manchester*) *Guardian*, as leader writer, features editor and deputy London editor, before moving to Sussex University, 1964–89, to teach history, latterly as reader. Rosselli has worked as a critic but is chiefly noted for his writings on the social and economic

background of opera, particularly in Italy. His authoritative *The Opera Industry in Italy* (1984) explored aspects of operatic history and culture unfamiliar to the music historian, as too did his *Music and Musicians in Nineteenth-Century Italy* (1991) and his studies of the role, in the broadest sense, of the singer. These include important articles on castratos, the singer's relation to his patrons, a study of contractual documents between pupils and teachers, and a book on the profession itself, *Singers of Italian Opera* (1992). Rosselli has also studied Italian opera in Argentina and has written a concise critical biography of Bellini in his cultural context.

ROSEMARY WILLIAMSON

Rossellini, Renzo (*b* Rome, 2 Feb 1908; *d* Monte Carlo, 13 May 1982). Italian composer. He studied composition with Giacomo Setaccioli and conducting with Bernardino Molinari, and was director of the Liceo Musicale, Varese (1934–5). He taught composition at the Pesaro Conservatory from 1940 to 1942, was music critic for the *Rome Messaggero* and artistic director of the Monte Carlo Opera (1972–6). Rossellini came to public notice at the beginning of the 1930s with the performance of various orchestral compositions. In 1931, the Augusteo in Rome programmed his *Suite in tre tempi*, which was followed by other orchestral works such as the rhapsodic suite *Hoggar* (1932), the *Preludio all'Aminta del Tasso* (1933) and the *Canti di marzo* (1935). These early pieces reveal the influence of Respighi and a superficial response to Debussy; their folk, historical and mythological inspiration was rooted in the 'Roman spirit' and cultural rhetoric of fascist Italy. After the war Rossellini turned his attention to music theatre, following the first Italian performance, in May 1955, of Menotti's *The Saint of Bleecker Street.* A conservative musician, tied to the traditions of the late 19th century and Italian realism, while also influenced by Massenet, Rossellini conformed to these musico-dramatic models in his first operas, *La guerra* (1956) and *Il vortice* (1958). From the 1960s onwards, his operatic writing, untouched by the radical stylistic developments of 20th-century music, was refined towards more slender melodies with atmospheric echoes of French Impressionism. He composed incidental and film music, and provided the soundtracks for many films by his brother, the director Roberto Rossellini, including two famous examples of Italian neo-realism, *Roma, città aperta* (1945) and *Paisà* (1947).

RAFFAELE POZZI

Rossem, Andries van (*b* Leerdam, 20 Dec 1957). Dutch composer. He studied the organ with Johan van Dommele at the Arnhem Conservatory (1975–81) and composition with Klaas de Vries, Wagemans and Loevendie at the Rotterdam Conservatory (1982–6). Further composition study followed with Donatoni at the Civica Scuola di Musica Contemporanea in Milan (1989–90). Subsequently he was composer-in-residence at the Arnhem Conservatory (1992–3).

On the surface, van Rossem's development has passed through a number of distinct phases. Initially, in works such as *Escape* (1983) and *Brisk* (1984), his music exhibits a bounding rhythmic energy and kaleidoscopic approach to timbre. Such momentum was countered towards the end of the 1980s by a series of Feldmanesque musical 'images', *Pier and Ocean*, the title taken from a painting by Mondrian. These, in turn, were replaced by a set of works which exhibit a newly rigorous approach to pitch organization drawn from van Rossem's studies with Donatoni. But the ascetic, concentrated character of, for example, the 'untitled' compositions of 1990 and the

Alice Pieces for violin and piano (1993) continues the fragile intensity of the Mondrian-inspired works. Meanwhile the subsequent *Walthamstow* (1994) and the 'compositions in soft rhythms' are connected to *Pier and Ocean* in their focussing upon a single idea or image – now a fluid rhythmic flow. The works of the second half of the 1990s are marked by a mature synthesis of timbral nuance and organizational purpose, for example in *Four is One* (1996), written for the Kronos Quartet. There is also a return to music of a more extrovert nature, for example in *BBO* for big band and organ (1998).

MICHAEL ZEV GORDON

Rosseter, Philip (*b* 1567/8; *d* London, 5 May 1623). English court musician, composer and theatrical manager. In a lawsuit concerning Dowland's *Second Booke of Songs* in 1601 he gave his age as 33. He was appointed lutenist at the court of James I in 1603, a position he retained until his death. In February 1613 he was one of the musicians (with John and Robert Dowland and Thomas Ford) in George Chapman's *Middle Temple and Lincoln's Inn Masque*.

Rosseter is best known for *A Booke of Ayres*, a collection of songs with lute and bass viol accompaniment published in 1601 and dedicated to Sir Thomas Monson, a notable patron of music. The volume contains 21 songs each by Campion and by Rosseter. The view formerly held by literary editors such as Percival Vivian, that the poems in the Rosseter section were by Campion, is no longer generally maintained. Doubt also surrounds the authorship of the address 'To the Reader'. This is unsigned and one might assume that it was written by Rosseter who had overall responsibility for the publication. However, its tone and language are so similar to Campion's other writings that it seems likely that it was written by Campion. This preface is in effect a humanistic manifesto, proclaiming the virtues of the simple air and ridiculing the complexities of counterpoint and madrigalian word-painting. Rosseter's airs, like those of Campion, conform very much to this prescription. They are short, with a minimum of phrase repetition, predominantly homophonic in texture and sparing in detailed text expression. The quality of Rosseter's invention is high. Particularly characteristic are his use of sequence and light touches of imitation between the melody and bass as seen in *Sweet, come again* and *What is a day*. One harmonic mannerism in major-key songs is that of cadencing in the supertonic at the end of the first phrase as in, for example, *If I urge my kind desires*. Allied to these features is his light-footed rhythmic treatment, seen in such songs as *If she forsake me* and *When Laura smiles*. Some of these features are also present in *What then is love but mourning*, which epitomises Rosseter's emotional world of gentle melancholy.

In 1609 Rosseter published his *Lessons for Consort*, a collection for the mixed consort of lute, bandora, cittern, flute, treble viol and bass viol. The lessons are arrangements by Rosseter of music by himself and others. However, only the parts for flute, cittern (incomplete) and fragments of the lute part have survived. Three of his solo lute pieces were included in William Barley's *New Booke of Tabliture* of 1596.

In addition to his musical activities Rosseter pursued a career in theatrical management. In 1609 Rosseter and Robert Keysar established a theatre at Whitefriars and took over the management of a company of boy actors that had formerly been known as the Children of the Queen's Revels. However, in 1608 the title and royal patronage had been withdrawn following some productions which were too satirical for the court taste. With the help of Sir Thomas Monson, Rosseter recovered these privileges in 1610. In the next few years the company was amalgamated with others and had a somewhat chequered history. In 1614 the lease on the Whitefriars Playhouse expired and the following year Rosseter and his business partners obtained permission to build a new Blackfriars Theatre. Local objections resulted in the demolition of the new building just as it was reaching completion in 1616. The company was disbanded in 1617 and Rosseter's connection with the theatre came to an end. Rosseter was buried at St Dunstan-in-the-West from his house in Fetter Lane. His will (PCC, 41 Swann) mentions his wife Elizabeth and sons Dudley and Thomas.

DAVID GREER

Rossetti, Biagio (*b* Verona, 2nd half of the 15th century; *d* Verona, after 1547). Italian theorist and organist. As a boy he studied in the Scuola degli Accoliti of Verona Cathedral, and after becoming a priest entered the cathedral chapter in 1495 as chaplain and cantor. Soon afterwards he became cathedral organist and held the post at least until 1547 and probably until his death. His single published treatise (a treatise on organ playing is no longer extant), *Libellus de rudimentis musices* (Verona, 1529/R1973), is a manual for the training of choirboys and cantors concentrating on plainsong. The conventional divisions of the subject, such as the gamut, solmization, intervals and the church tones, are discussed in a manner traditional with Italian theorists as early as Marchetto da Padova. The treatise zealously condemns such abuses as singing only for money, garbling texts by bad accentuation and syllabification, and poor vocal technique and tone quality, thus giving a clear idea of what average or poor choir singing must have been like in his day. In an attempt to inspire more reverent performance, Rossetti gave considerable space to liturgical and theological explanations of the musical portions of the Mass and Office. The treatise is of special interest for its numerous observations about practical subjects like vocal technique, physical culture of singers, and training and leadership of choirboys. Rossetti was among the earliest theorists to give instructions for text underlay. His ideas influenced later theory: he was quoted, among others, by Pietro Pontio (1588) and Pietro Cerone (1613).

PETER BERGQUIST/DON HARRÁN

Rossetti, Pietro (*b* Trieste, 1659; *d* Trieste, 1709). Italian writer, composer and teacher. As a priest and public teacher he received a salary from the municipality of Trieste from 1680 to 1692, when the struggle between Jesuits and local authorities for the creation of public teachers was won by the latter. He wrote sonnets and songs and also gave instruction in how to write them. He wrote a play with music, *La fidutia in Dio, ovvero Vienna liberata dalle armi turchesche* (now in the Trieste State Archives), which was performed for the first time on 12 February 1684 in the city hall, Trieste. It is in three acts and 35 scenes, with a prologue and epilogue, and required 33 performers. At the end of each act the actors performed a chorus and a dance in which words and movements were closely allied to the events portrayed.

SERGIO CHIEREGHIN

Rossetto, Il. *See* BIANCHINI, DOMENICO.

Rossetto [Rossetti], **Stefano** (*b* Nice; *fl* 1560–80). Italian composer. He took part in the wedding festivities of Emmanuel Philibert of Savoy and Marguerite of Valois at Nice in 1560. Shortly before this he may have been in the service of the Giustiniani on the Genoese-held Aegean island of Chios; his volume of four-voice madrigals (1560) is dedicated to one member of this commercial clan, and individual pieces in this book and in his book for five voices of the same year are inscribed to others. After a brief period at Novara he went in 1564 to Florence. In 1566–7 he was in the service of Cardinal Ferdinando de' Medici and his sister, the unhappy Isabella Medici Orsina, Duchess of Bracciano; for the latter he wrote one of his most ambitious works, the 17-part cyclic *Lamento d'Olimpia* (a setting of parts of canto x of *Orlando furioso*). He also composed some of the music for the 1567 carnival in Florence. A volume of motets (1573) dedicated to Ferdinand of Austria suggests that he had some connection with the Habsburgs, and in 1579–80 he seems to have been at the court in Munich as organist. He may also have been responsible for the music of one of the *intermedi* for the Florentine performance (1583) of Fedini's *Le due Persilie* (see *PirrottaDO*).

Rossetto's motets, apparently designed for instrumental accompaniment, are modest works using plainchant paraphrase in workaday fashion. His madrigals are more varied in character, with flexible rhythmic declamation and some touches of chromaticism, as in the opening of the six-voice *I dolci basci* (1566) and the five-voice *Il canto novo* (1560). He (or perhaps his publishers) noted cadential accidentals with great, almost unnecessary, precision. He was particularly fond of cycles and set cyclic texts with some eye for effect, even tampering a little with the text (in the *Lamento d'Olimpia*) for dramatic purposes.

JAMES HAAR

Rossi, Annibale dei [Roxis, Annibal de; Annibal Mediolanensis] (*fl* Milan, 1542–77). Italian virginal maker. According to Chiesa, he gave his name at first as 'de Arósio' (i.e. from Arósio, a town to the north of Milan), but changed this later to 'dei Rossi'. Morigi records that he was the first to make *clavichordi* (i.e. virginals, not clavichords) in the 'modern shape': the virginal dated 1542, now in the Schubert Club, St Paul, USA, is polygonal, thin-walled, and has a partially inset keyboard, but similar instruments had been made before this (e.g. one of 1523 by Francesco de Portalupi, now in the Musée de la Musique, Paris). The 1542 virginal is, however, the earliest dated string keyboard instrument with a *C/E–c‴* compass. Seven other virginals by Annibale are known, including the elaborate, bejewelled instrument of 1577 in the Victoria and Albert Museum, London. Three instruments by his son Ferrante dei Rossi (*fl* 1580–97) survive. All Annibale's virginals are typical of the period, having a compass *C/E–f‴*, and if strung with iron wire they would stand at *a′* = 440.

DENZIL WRAIGHT

Rossi, Camilla de (*b* ?Rome; *fl* Vienna, 1707–10). Italian composer. Nothing is known of her life except that 'Romana' appears on the title-pages of her manuscripts, indicating Roman origin. She wrote four oratorios for solo voices and orchestra, which were performed in the Vienna court chapel between 1707 and 1710. In style and form they are similar to the oratorios of Alessandro Scarlatti. A cantata also survives. Her first known work, *Santa Beatrice d'Este*, was commissioned by Emperor Joseph I. She often uses particular instruments for dramatic effect or characterization: trumpets represent the villainous warrior in *Santa Beatrice d'Este*, the archlute represents the innocence of S Alessio in *Sant'Alessio*, and chalumeaux, only a year after their first orchestral use in Vienna, represent the peaceful dream of Abramo in *Il sacrifizio di Abramo*. According to the title-page of the manuscript, Rossi wrote the text as well as the music for *Il figliuol prodigo*.

BARBARA GARVEY JACKSON

Rossi, Ferrante dei (*fl* 1580–97). Italian virginal maker, son of ANNIBALE DEI ROSSI.

Rossi [de Rossi], **Francesco.** Several Italian composers of this name were active between about 1650 and about 1725. Since Rossi is such a common surname and since evidence is scarce, it is difficult to disentangle the biographies of these composers.

The clearest identity is that of an opera composer active in Milan between 1658 and 1697, who was organist at S Maria presso S Celso from 1667 until his death in 1697. He is surely the same person, described as *maestro di cappella* there and at S Giovanni in Conca, who produced sacred music in Milan between 1689 and 1696. This Rossi set to music two librettos by Carlo Torre: *La ricchezza schernita* (*dramma scenico-morale*, 12 February 1658; with three other composers) and *L'Arianna* (*dramma scenico*, Pavia, 15 July 1660). He also furnished new music for a strongly opposed performance of Cavalli's *Artemisia* (June 1663) and set the librettos *Il Crispo* (20 December 1663), by the impresario and comic singer Carlo Righenzi, and *La farsa musicale*, also by Righenzi though likely to have been co-authored by Carlo Maria Maggi (Teatro Ducale, 9 February 1664). He collaborated with Lodovico Busca and P.S. Agostini on *La Regina Floridea* (Teatro Ducale, ?1669), whose subject matter is drawn from Spanish comedy, and set at least one libretto by Carlo Maria Maggi, *La Bianca di Castiglia* (Isola Bella, Lake Maggiore, theatre of Count Vitaliano Borromeo VI, October 1669). Printed librettos survive for two sacred works performed in Milan: *Cantate a gloria del Santisimo Sacramento* (19–21 February 1689) and *I trionfi di Carmelo* (oratorio, G.B. Merosi, 1696). His only extant music is a solo motet, *Flammae bellae* (1692; ed. in SMSC, iii, New York, 1987), which is written in a modern, operatic style, demands considerable vocal agility, and includes expressive modulations to B♭ minor.

A Don [Nicolò] Francesco [de] Rossi, who, contrary to Bellucci's claims (1885), was not the Francesco Tomaso de Rossi born on 17 June 1627, was a canon of Bari Cathedral and on 16 January 1677 was appointed *maestro di cappella* there. However, from 31 July 1681 he was forced to share the position with his rival Alonzo Ramirez (see Fabris). Records in Bari indicate that Rossi moved to Venice to compose operas about 1686. Indeed, Bonlini credits a Francesco Rossi with composing three works given in Venice at the Teatro S Moisè: *Il Seiano moderno della Tracia* (A. Girapoli, 1686; withdrawn before completion of the first performance), *La Corilda* (?P.E. Badi) and *La pena degl'occhi* (both 1688). Later theatre chronicles refer to this composer as 'abate pugliese'. When his *Salmi et messa a cinque voci* op.1 was published (Venice, 1688), Rossi was still canon of Bari Cathedral. He is probably the 'abate Francesco Rossi' who was elected *maestro di cappella* of the Venetian Ospedale dei Mendicanti on 22 July 1689, retiring on 8 January 1699. He may have written three psalm introductions (short oratorios) for the Mendicanti: *Divina Gratiae Triumphus* (1691), *Patientia Victrix* (1694) and *Carmina praecinenda psalmo miserere a Filabus Xenodochi* (see Selfridge-Field, 1985).

According to Baldauf-Berdes and Fabris, the 'Medicanti' Rossi was the same 'Don Francesco Rossi' who was *maestro di cappella* of the Neapolitan conservatory S Onofrio from November 1669 to February 1672. This Rossi probably composed several works now in Neapolitan libraries: an oratorio, *La caduta de gl'angeli* (G. Scaglione; *I-Nf*), two psalm settings for four voices with violins (copies, dated 1797, in *Nf*), and three cantatas, *Vanne, foglio volante* (ed. in Fabris), *Ove L'Adria fastosa* and *Son degno di pietà*.

The title 'abate' is also applied to the 'D. Francesco Rossi' who composed an oratorio for five voices and instruments *S Filippo Neri* (*A-Wn*), the 'Bassi' who wrote six cantatas (in *I-Nc*, see Fabris) and to the 'Russi' whose cantata *Lunga stagione dolente* (*c*1700) survives among arias by Scarlatti and Bononcini (*E-Mn*).

Although Fétis claimed to have taken the aria 'Ah, rendimi quel core', which he popularized in the 19th century, from Rossi's *Mitrane* of 1689, no such opera existed. The aria is in late 18th-century style and doubtless came from an opera including a character named Mitrane. A likely candidate is Francesco Bianchi's *La vendetta di Nino* (Naples, 1790); the role of Mitrane was sung by a Francesco Rossi at Verona in 1794 (as *La morte di Semiramide*). According to this singer Sartori performed in at least 44 productions in Italy and Portugal between 1782 and 1799. Two other opera singers named Francesco Rossi are known during the 17th and 18th centuries. One, a soprano from Rome who performed in Genoa between 1678 and 1679, may be the Rossi who was dean of the papal *cappella* and lived from about 1658 to 1733 (see Kast). The other, also known as Francesco Rolfi (see Alm), appeared in Venice, Cremona and Rovigo in the 1750s. Bonlini attributed to a 'D. Francesco Rossi' the music for *La ninfa Apollo* (pastorale, after F. Lemene; Murano, Teatro S Michiel, 1726). A Francesco Rossi 'Dottore Veneziano' wrote several opera librettos for Venice between 1699 and 1719. A 'Don Francesco Rossi' played the violone at S Marco, Venice, from 1665 to at least 1691; and a Francesco Rossi was a member of the Venetian instrumentalists' guild in 1727 (see Selfridge-Field, 1971). During the same period at least two other musicians of this name are traceable in Rome (see Celani, Casimiri, Kast).

LORENZO BIANCONI/JENNIFER WILLIAMS BROWN

Rossi, Gaetano (*b* Verona, 18 May 1774; *d* Verona, 25 Jan 1855). Italian librettist. His literary career began when he was 13, with the publication of religious verse. He wrote the first of his librettos in 1797, and continued writing them for nearly 60 years, until the mid-1820s mostly for Venice. Most of the early ones were farces, but there were also important texts for Mayr (*Ginevra di Scozia*), Rossini (*Tancredi* and *Semiramide*) and Meyerbeer (*Il crociato in Egitto*). Later, Milan began to predominate, with increasing numbers for Trieste and Vienna. This period included work for Pacini (*I cavalieri di Valenza*), Mercadante (*I due illustri rivali*) and Donizetti (*Maria Padilla*, of which the composer was part-author, and *Linda di Chamounix*). Other composers with whom he collaborated included Carafa, Coccia, Farinelli, Generali, Hiller, Morlacchi, Nicolai, Nicolini, Pedrotti, the brothers Ricci, Vaccai and Zingarelli. Rossi was also for some years stage director of the Teatro Filarmonico, Verona, and singers remembered him as intelligent, helpful and practical.

He said himself that he was not a poet but a windbag ('parolaio'); his versification was crude, often forced, marred by a fondness for *tronco* lines and for riding roughshod over the rules of scansion. Nevertheless he had an eye for dramatic situations, and his texts, if longwinded, are effective. His importance lay in his boldness in raiding foreign – primarily French – theatre for source material and for introducing strongly romantic plots to the Italian operatic stage.

His personal life was not easy and he seems to have been beset by financial worries. His importunate, even toadying, letters to Meyerbeer make pathetic reading, but he was always spoken of as genial and good-natured.

JOHN BLACK

Rossi, Giacomo (*fl* 1710–31). Italian librettist. He was one of many Italians who settled in London early in the 18th century, perhaps as a language teacher. Late in 1710 he was employed by Aaron Hill to versify the scenario he had prepared from Tasso's *Gerusalemme liberata* for Handel's first London opera, *Rinaldo*. In an apologetic address to the reader of the libretto (February 1711), Rossi called it 'the delivery of but a few evenings' and complained that Handel composed the music in a fortnight and 'scarcely gave me the time to write'. Handel must have collaborated, for both libretto and score contain material from works composed in Italy. The same is true of Rossi's second libretto for Handel, *Il pastor fido* (November 1712), ruthlessly altered from Guarini's

famous play. Rossi also supplied the librettos of the unsuccessful pasticcio *Ercole* (May 1712) and Handel's *Silla* (June 1713), and no doubt other operas of this period, including perhaps *Amadigi*. He showed little literary or dramatic skill. His rival Rolli satirized him in one of his epigrams after Martial. On Haym's death in August 1729 Rossi became, according to Rolli, 'Handel's accredited bard', and may have provided the librettos of *Lotario* and other operas, all adapted from earlier originals. He made revisions and additions for the revival of *Rinaldo* in April 1731. He was not the Jacopo Rossi who wrote a libretto for Lucca in 1685.

WINTON DEAN

Rossi, Giancarlo [Giovan Carlo] (*b* Torremaggiore, *c*1617; *d* Rome, 13 June 1692). Italian harpist, organist and composer, youngest brother of LUIGI ROSSI. He joined his brother in Rome about 1630 and in March 1635 he played the harp for the five services of the 'Quaranta Hore' in the Borghese chapel, S Maria Maggiore. He deputized for Luigi during his absences from his post as organist of S Luigi dei Francesi in 1635, 1643 and 1647–9. In February 1653 he wrote the epitaph for his brother's tombstone. In 1659 he was among the composers whom Francesco Buti and Cardinal Mazarin considered might set to music a libretto, *Ercole amante*, written by Buti for the French court; their first choice, Cavalli, finally accepted the commission, but Rossi played the harp in its eventual performance in 1662. He served the French court from 1661 to 1666, and was a member of the *cabinet italien du roi* with Anna Bergerotti and other Italian musicians. In July 1664 he performed twice for Cardinal Flavio Chigi, in Versailles and in Vincennes. His wife, Francesca Campana, was probably the musician of that name (*see* CAMPANA, FRANCESCA). The notary papers regarding her death in 1665 indicate that they possessed paintings by Leonardo da Vinci, Raphael and Salvator Rosa, a good library and an excellent collection of musical instruments (which probably included those that had belonged to Luigi Rossi). From 1666 Rossi was back in Italy, living in Rome. A few chamber cantatas by him are extant: *Chi mi soccorre, ohimè* (*F-Psg* 3372), *Core, a te è tardo* (*I-Rdp*51), *Deh, come devo fare* (*Vbn* It.IV 466), *Dove vai, pensiero audace* (*Rc* 2478), *E così dolce la pena* (*Rvat* Chigi Q IV 18), *In amor ciascun* (*Vbn* It.IV 466) and *Vanne, mio core, alle stelle* (*Rdp* 51), all for soprano and continuo; and *Non ho che perder più* (*Rvat* Chigi Q IV 16), for soprano, baritone and continuo.

ELEANOR CALUORI/JEAN LIONNET

Rossi, Giovanni (i) (*d* 1595). Italian music publisher. He opened his first printing house in Venice in 1557 and transferred it to Bologna in 1558 or 1559, at first in partnership with the brothers Benacci. From 1561, however, his publications were signed with his name alone. In 1563 his printing press was on the street of S Mamolo, bearing the title 'Episcopal printer' (i.e. official printer to the church). In 1572 he was elected the official typographer of a Bolognese society of men of letters, historians etc. A senate decree (renewed in 1593) declared that Rossi was obliged to provide good type characters, in particular musical ones, to be replaced whenever necessary. He was the first to print music in Bologna using movable metal type, producing an elegant edition of Camillo Cortellini's *Il secondo libro di madrigali a cinque voci* (11 May 1584); his typographical mark was a winged Mercury with the motto 'Coelo demissus ab alto'. His only other musical work that survives is a small publication by Ascanio Trombetti, *Musica fatta sopra le conclusioni di legge* (1587).

Giovanni died in 1595 and his son Perseo succeeded to the printing business, using the title 'Heredi di G. Rossi'. The firm published some works by Adriano Banchieri – *Conclusioni nel suono dell'organo* (1609), *Terzo libro di nuovi pensieri ecclesiastici* (1613), *Cartellina del canto fermo gregoriano* (1614), *Due ripieni in applauso musicale* (1614) and *Prima parte del primo libro al direttorio monastico di canto fermo* (1615) – as well as Ercole Porta's *Vaga ghirlanda di … fiori musicali* (1613) and Coma's *Sacrae cantiones* (1614). Giovanni Rossi's publications are characterized by a finesse and elegance which the firm did not retain after his death.

ANNE SCHNOEBELEN

Rossi, Giovanni (Gaetano) (ii) (*b* Borgo San Donnino (now Fidenza), Parma, 5 Aug 1828; *d* Genoa, 31 March 1886). Italian composer. He studied music with his father, the town organist, and at the Milan Conservatory (1846–8). He was *maestro concertatore* at the Teatro Regio, Parma, in 1852 and organist at the court chapel. From that year he held posts at the conservatory (director for ten years from 1864). He was conductor at the Teatro Carlo Felice, Genoa (1873), and director of the Liceo Musicale there from 1874. Rossi composed four operas, *Elena di Taranto* (1852, Parma), *Giovanni Giscala* (1855, Parma), *Nicolò de' Lapi* (1864, Ancona) and *Cuore di madre* (1871, Borgo San Donnino); they were written in an up-to-date Verdian style but were not particularly successful. He also composed a few sacred works, including an oratorio *Le sette parole*, three *messe di gloria* and a requiem. His overture to Alfieri's tragedy *Saul* won a prize in a competition organized by the Società del Quartetto di Milano.

MARVIN TARTAK/CLAUDIO TOSCANI

Rossi, Giovanni Battista (*b* ?Genoa; *fl* 1585–1628). Italian composer and theorist. That he was from Genoa and belonged to the Somaschi order is stated on the title-page of his *Organo de cantori per intendere da se stesso ogni passo difficile che si trova nella musica, et anco per imparare contrapunto* (Venice, 1618/*R*). Despite the date of publication, a significant part of the text had been completed by 5 May 1585 (Rossi claims that his original manuscript was stolen), which helps to explain why it appears so conservative. Designed for self-instruction, the treatise covers elementary ground up to the basics of counterpoint. The examples include music by Josquin and Palestrina, as well as some rather dull cantilenas (some with Italian texts) by the author for two to five voices with and without continuo. Rossi also published a volume of four-part masses including a *Magnificat* (Venice, 1618), and *Threni Ieremiae Prophetae, super voces Gregorianas, & miserere* (Venice, 2/1628). The volume of solo motets by a Giovanni Battista Rossi listed in the *Indice di tutte le opere di musica che si trovano nella Stampa della Pigna di Alessandro Vincenti* (Venice, 1658; repr. in *Mischiati*, pp.187–212), but now lost, may or may not be by him.

TIM CARTER

Rossi [Rosso], **Giovanni Maria de** [del] [Il Rosso] (*b* Brescia, *c*1522; *d* Mantua, 30 April 1590). Italian organist, composer and singer. He was active at the Mantuan court during the second half of the 16th century, and between 1553 and 1559 he is mentioned as curator of the duke's instrument collection. During the 1550s and early 1560s he was responsible for making the musical arrangements for Cardinal Ercole Gonzaga's household at Trent during the sittings of the Council. In 1563 he became *maestro di cappella* at Mantua Cathedral, a post he held until 1576. During this period he also became a priest. In 1567 he was one of three singers who visited Venice with the court *maestro di cappella* Giaches de Wert. From 1582 to 1585 he was organist at the cathedral and as late as 1587 was once again listed as a court singer. During his last years he suffered from gout, which eventually caused his death. Like his younger colleague Francesco Rovigo, Rossi was closely connected with Claudio Merulo who published the composer's main works.

PIERRE M. TAGMANN/IAIN FENLON

Rossi, Giuseppe de (*b* Rome, mid-17th century; *d* Rome, *c*1719–20). Italian composer. He may have been a pupil of Orazio Benevoli. He was for a time *maestro di cappella* of the Castel S Angelo, Rome. He held a similar position, at the S Casa, Loreto, from 16 March 1701 until July 1711, whereupon he took over the position, vacated by G.P. Franchi, of *maestro di cappella* of the Madonna dei Monti, Rome, while Franchi succeeded him at Loreto. His extant music is exclusively sacred, and much of it, the masses in particular, is written in the massive polychoral style cultivated by Benevoli and several other Roman composers. A characteristic device in his works is to present the augmented theme in the same voice in each choir, in the manner of a cantus firmus. Some of his 16-part masses have titles (e.g. *Missa 'Maria meliorem partem elegit'* and *Missa 'Maria jam jucundabatur'*) that are taken from St Augustine's sermon for the Feast of the Assumption.

WORKS

13 masses, 5, 8, 12, 16vv, some with insts, 1676–1717; 2 grad, 2–3vv, insts, bc, 1713–17; Mag, 8vv; Miserere, 4vv; Benedictus, 4vv; 13 ant, 1–4, 8vv, 1710–15; 27 resp, 4vv; 12 ps, 4, 6, 8, 12, 16vv; 4 motets, 2–3vv; 3 hymns, 4vv: *D-Bsb** (1 mass wrongly attrib. Benevoli), *MÜp*, *I-Bc* (1 mass wrongly attrib. Benevoli, probably by Rossi; 1 mass, inc., anon. probably by Rossi), *Rc*, *Rli*, *Rsg*, *Rvat* (1 mass inc., anon., probably by Rossi); graduals ed. in Documenta maiora liturgiae polychoralis, x (Rome, 1964)

□

Rossi, Lauro (*b* Macerata, 19 Feb 1812; *d* Cremona, 5 May 1885). Italian composer. He studied at the Naples Conservatory with Zingarelli, Giovanni Furno and Crescentini, obtaining his diploma in 1829. In 1830 *Costanza e Oringaldo*, written in collaboration with Pietro Raimondi, gave him entrée to the Teatro S Carlo. Further comedies, given at the Nuovo in 1831 and all well received, brought him to the attention of Donizetti, who recommended him as assistant director of the Teatro Valle, Rome, a post he held until 1833. In 1834 his *La casa disabitata*, given at La Scala, Milan, so impressed Maria Malibran that she persuaded the impresario Barbaia to commission an opera for her. Unfortunately, she insisted that this work, *Amelia, ovvero Otto anni di costanza* (1834, Naples), include a pas de deux for herself and the dancer Mathis; but as her many accomplishments did not include ballet dancing, the opera was hissed off the stage. Embittered, it is said, and in spite of the fair success of *Leocadia* (1835, Milan), Rossi became director of a company touring Mexico, where his next opera, *Giovanna Shore*, had its première in 1836. When in 1837 the company broke up because of political unrest and the hazards of travel, Rossi set up as an impresario. In June 1840 he was in Milan to engage a company for Havana managed by a colleague with himself as musical director. Among the singers was a young Bohemian soprano, Isabella Obermeyer, who had that year made a highly successful Italian début under the name Ober. The company appeared in New York in September and opened in Havana on 27 October. In 1841 Rossi married Obermeyer, who sang thereafter as Ober-Rossi. In spring 1842 the company performed in New Orleans, returning then to Havana. In 1843 Rossi and his wife were in Europe to convalesce from yellow fever. He then settled in Milan and resumed his operatic career with a triumphant revival of *La casa disabitata*, revised as *I falsi monetari* and known for many years as 'Rossi's *Barbiere*'.

In 1846 Rossi's *La figlia di Figaro* was given at the Kärntnertortheater in Vienna, while in Milan *Il domino*

nero was warmly received in 1849. Now a figure of some consequence, Rossi was appointed director of the Milan Conservatory. During his 20 years there his operatic output diminished considerably as he devoted himself increasingly to academic pursuits. His harmony course, published in 1858, became a standard textbook. Though in no sense a modernist, he pursued a liberal policy and his regime saw the emergence with high honours of Faccio and Boito and the founding of a chair of dramatic poetry. Rossi was among the founders of the Milan Società del Quartetto (1864) and also of the society's journal, which carried some of Boito's fieriest attacks on the state of music and literature in Italy. In 1869 he contributed an Agnus Dei to the *Messa per Rossini*, a composite work intended by Verdi to mark the anniversary of that composer's death. The death of Mercadante the following year led to Rossi's nomination as head of the Naples Conservatory; in 1878 he resigned his supreme position to form part of a triumvirate, appointed to carry out the government's plans for reforming the institution. In 1880 he retired to Cremona.

During his years at Naples Rossi produced a number of instrumental and sacred vocal works, and composed two operas for Turin, *La contessa di Mons* (1874) and *Cleopatra* (1876), the first of which enjoyed a *succès d'estime*. His last opera, *Biorn*, was written to an English libretto and performed at the Queen's Theatre, London (1877). A version of *Macbeth* with the action transferred to Norway and the witches turned into Norns, it failed disastrously; none of the music, described by the critic Joseph Bennett as written at so much per yard, survives in print.

As a creative artist Rossi belonged to the generation of minor composers who achieved some individuality within the post-Rossinian tradition, but whose talent was unable to survive the tradition's collapse. Works like *I falsi monetari* and *Il domino nero* show a real invention, combined with a flair for comedy that caused Felice Romani to consider Rossi Donizetti's successor in *opera buffa*. *Cleopatra* and *La contessa di Mons*, on the other hand, while showing an attempt to keep up with the times, offer little more than the old framework shorn of *fioriture* and cabalettas and garnished with recherché harmonies, calculated irregularities of phrasing and an occasional excursion into local idioms (*La contessa di Mons* quotes from the famous *Jota aragonesa*). Among the later stage works exception should be made of the one-act *Il maestro e la cantante* (1867), in which Rossi shows a Sullivanesque talent for musical foolery, at one point combining a cabaletta by Bellini in the voice part with one by Donizetti in the orchestra. But Rossi was famous chiefly as an academic, and one of the first in Italy to show a genuine interest in the revival of old music.

WORKS

OPERAS

Costanza e Oringaldo (melodramma, 1, R. Fortini), Naples, S Carlo, 30 May 1830, *I-Nc**, collab. P. Raimondi

JULIAN BUDDEN

Rossi, Lemme (*b* Perugia, *c*1602; *d* Perugia, 2 May 1673). Italian philosopher, mathematician, astronomer, authority on the Greek language and music theorist. He was professor of philosophy and mathematics at the University of Perugia but had retired by the time he published a brief

method on astronomy there in 1664. He is known to musicians for his *Sistema musico, overo Musica speculativa* (Perugia, 1666); 23 copies are known to survive, and a second edition (which had appeared by 1669) is lost. Burney described this work as 'one of the clearest and best digested treatises of harmonics [systems of tuning] that had been produced in Italy during the previous century'. In it Rossi discussed the work of many earlier theorists, from Pythagoras to Kircher, and described the equal-tempered system. His book appears to have stimulated Bontempi to write his *Historia musica* (Perugia, 1695/*R*), which contains 'many copious extracts' (Hawkins) from it; tables based on Rossi's work are included in the *Storia della musica* of Padre Martini.

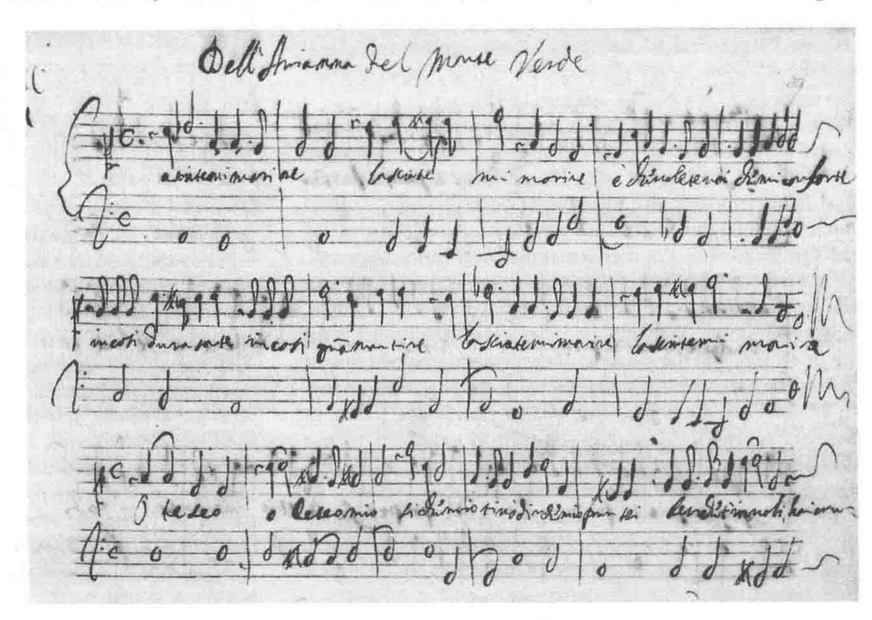
COLIN TIMMS



Rossi, Luigi (*b* ?Torremaggiore, ?1597/8; *d* Rome, 19 Feb 1653). Italian composer and keyboard player. He was active in Naples, Rome and Paris, and wrote some of the finest vocal music of the 17th century; his canzonettas and cantatas enjoyed wide popularity and he composed operas for both the papal family and the French royal court.

1. LIFE. The exact date and place of Rossi's birth may never be known. His death certificate, dated 20 February 1653 (text in Prunières, 1910–11, and Cametti, 1912–13), gives his age as 55 and states that he was the son of Donato of Torremaggiore (in the modern-day province of Foggia, in Puglia) in the diocese of San Severo. Such documents, however, are notoriously imprecise in recording the age of the deceased, and records from Torremaggiore were destroyed in the earthquakes of 1627 and 1638. To confuse matters further, a plaque in S Maria in Via Lata, the Roman church where Rossi is buried, describes him as Neapolitan, though this may refer to his origins in the Kingdom, rather than the city, of Naples.

The earliest document associated with Rossi, a collection of instrumental and vocal music (*GB-Lbl* Add.30491; facs. in SCKM, xi, 1987), is still more difficult to interpret. Inscriptions on the cover and fly-leaves state that the composer owned the manuscript, that he studied with Giovanni de Macque, and that he had spent 14 years at court (presumably that of the Neapolitan viceroy). Silbiger (1980 and preface to SCKM, xi, 1987) argues that, despite the great variety of handwriting, Rossi himself copied the entire manuscript; he reads the almost illegible writing on the last page as '6 July 1617' and considers it the date by which Rossi entered the bulk of the instrumental music. Newcomb (1984–5) is sceptical and suggests that this music was copied for, rather than by, Rossi. The vocal music, which both agree was copied later by Rossi himself, includes Monteverdi's *Lamento d'Arianna* (see illustration), in a version that transmits more of the work than all but one other source. The manuscript is also a unique source of a *Lamento d'Olimpia*, attributed to Monteverdi but probably by another composer, perhaps Rossi himself.

By January 1620 Rossi was in Rome, and in August that year he became a 'sonatore' in the newly formed household of Marc'Antonio Borghese, Prince of Sulmona, grandee of Spain and great-nephew of Pope Paul V. Surviving documents record payments from the prince until September 1636; not surprisingly, the composer was often referred to at the time as 'Luigi Rossi di Borghese', as in the source of *Io ero pargoletta* (*I-Bc* Q.49; see Fortune, 1951). Among Rossi's documented services for the family was his direction of the Quarant'ore devotion, held on the last three days of carnival, in the Capella Borghese of S Maria Maggiore. Lionnet (1983) found a receipt signed by the composer on 17 March 1635 for payment in respect of services rendered the previous 18–20 February.

On 3 July 1627 Rossi married the Roman harpist Costanza de Ponte, who had been in the service of his patron's wife, Camilla Orsini. She, too, was one of the finest musicians of the time; in 1639 André Maugars

Rossi's autograph copy of the opening of Monteverdi's 'Lamento d'Arianna' (GB-Lbl Add.30491, f.39r)

described her as playing 'parfaitement bien' (*Response faite à un curieux sur le sentiment de la musique d'Italie*). Both husband and wife were much in demand: in 1635 Camilla recommended them to the dowager Grand Duchess of Tuscany, and the two visited the Medici court in Florence from May to November that year; Costanza described one of her performances there in a letter of 25 May (see Cametti, 1912–13).

On 1 April 1633 Rossi became organist at S Luigi dei Francesi, the French national church and one of the most important centres of Roman music-making. Despite frequent absences, when he was replaced by his younger brother Giovan Carlo, Rossi held this position for the rest of his life, and his association seems to have been particularly close. Lionnet (1985–6) documented his sale of six barrels of wine to the church in December 1639, as well as a Requiem Mass celebrated there for him the week after his death.

Murata (*GroveO*) suggests that, with his employment at S Luigi, Rossi also began to shift from Spanish to French patronage, a process he completed by leaving the Borghese to enter the service of Cardinal Antonio Barberini. The exact date of his passage to the francophile nephew of Pope Urban VIII remains unclear, but the circulation of his music suggests it occurred by the end of the 1630s. When, on 16 January 1640, Pietro Della Valle wrote in defence of modern music to Lelio Guidiccioni (himself a protégé of the cardinal) he turned to Rossi and Orazio Michi (yet another Barberini client) for examples of the new canzonetta, praising the former's *Or che la notte del silenzio amica* as 'grave'. Speculation aside, the will Rossi made on 14 November 1641 names him as a 'musicus' of Antonio Barberini, and it was to the cardinal that he left 'omnes ejus scripturas musicales'. From January 1642 until his death Rossi's name figures among the payments made to Cardinal Antonio's *famigliari*. It was at this time, too, that Rossi composed the music for the first opera Antonio sponsored, one of his most grandiose projects, *Il palazzo incantato*. Performed on 22 February that year, the opera was less than completely successful because of problems with its scenery. Nevertheless, Antonio must have been satisfied with the music: a few months later another of his retainers, Girolamo Teti, declared Rossi 'nostri aevi preclarissim[us] Phonasc[us]' (*Aedes Barberinae ad Quirinalem* (Rome, 1642), p.18; the dedication is signed 1 August 1642).

Documents from the 1640s (see Prunières, 1913) show Rossi's music circulating in France and areas of French domination. In August 1641, for example, the librettist and Barberini intimate Ottaviano Castelli sent Cardinal Richelieu a copy of *Ferito un cavaliere*, Rossi's lament of the Queen of Sweden, recommending it to Jules Mazarin. Similarly, on 25 September 1645 the singer Leonora Baroni sent some of his music to Cristina of France, Regent of Savoy. With the end of the Barberini papacy on 29 July 1644 and the election of the hispanophile Innocent X two months later, finally, Rossi found himself drawn to France. Cardinal Antonio was forced to flee Rome in September 1645; Mazarin's protection extended to the composer as well, who arrived in Paris in June 1646. He spent the summer with the French royal court in Fontainebleau, and his stay earned his music still wider diffusion. On 17 October 1646, for example, the composer Thomas Gobert sent some of his works to the Dutch polymath Constantijn Huygens.

After his return to Paris that autumn Rossi was again called upon to compose opera. Mazarin's taste, like Antonio Barberini's, ran to Italian spectacle on the most extravagant scale. The result, *Orfeo*, had its première on 2 March 1647. Once again the reception was mixed, and once again for reasons that had nothing to do with Rossi's music: Mazarin's enemies denounced the enormous expense of the production. In the event, Mazarin himself was apparently pleased with Rossi, writing on 15 March to secure a benefice for the composer's brother-in-law in Rome. *Orfeo* likewise made an enormous impression on Rossi's French colleagues. One of its trios, *Al fulgor di due bei rai*, was published in Paris as late as 1695; as Anthony notes, another, *Dormite begli occhi*, inspired the sleep scenes in Lully's *tragédies lyriques*.

By July 1647 Rossi was back in Rome. His wife, who had remained there during his French sojourn, had died on 27 November 1646, and it is not surprising that the composer soon accepted a second invitation from Mazarin. After making a new will on 9 December 1647, he returned to France in January 1648. This trip was less rewarding than the first: Mazarin's enemies soon passed into the armed rebellion of the Fronde, and musical patronage was no longer the order of the day. In autumn 1649 Rossi joined Antonio Barberini in Provence. He returned to Rome for the last time in June 1651.

Rossi was now at the height of his fame. The theorist Severo Bonini, in his *Discorsi e regole sopra la musica et il contrappunto* (MS, 1649/50, ed. and trans. M. Bonino, Provo, UT, 1979), bracketed him with Francesco Cavalli as the 'novelli cigni' of Rome and Venice. Rossi's younger colleagues and successors also celebrated him as one of the leaders of Roman musical life. On 4 June 1644 the 18-year-old Atto Melani, later the first Orpheus, wrote to his patron Mattias de' Medici, saying that the composer and Marc'Antonio Pasqualini were the best 'virtuosi' he had ever met and begging the prince to allow him to study with Rossi that summer. Other cantata composers paid more subtle tributes. Antonio Francesco Tenaglia, for example, quoted 22 bars from the lament of the Queen of Sweden in his *Che volete ch'io canti*. A couplet in Sebastiano Baldini's cantata text *Aspettate, aspettate, adesso canto*, set about 1660 by Antonio Cesti, celebrates Rossi and his French patronage ('di quel uom cotanto raro/che d'un re portava il nome'), bracketing him with Carissimi as the leading cantata composer. By the end of the 17th century Cesti himself joined Rossi and Carissimi as the 'tre maggiori lumi della nostra professione', as G.A. Perti put it in the dedication to his *Cantate morali e spirituali* op.1 (Bologna, 1688).

2. Works. The nearly 300 settings of Italian secular verse that constitute the bulk of Rossi's music display a variety of forms and styles. Roughly three-quarters are canzonettas, whose texts are either strophic or cast in such closed forms as ternary or rondo (see Caluori, 1981). The remainder may be designated cantatas, settings of open-ended structures, texts consisting of *versi sciolti* with or without interspersed canzonettas. Throughout them Rossi displayed a masterful command of contemporary styles, from the dramatic recitative of the lamenting Deianira in *Allor ch'il forte Alcide* to the senario-generated patter in *Fanciulla son'io* and the melting triple-metre lyricism in *Disperate speranze, addio, addio*.

Rossi was equally skilled at juxtaposing different styles within a single work. In *Precorrea del sol l'uscita*, for

example, a canzonetta whose verse consists entirely of *ottonari* and *quaternari*, he alternated recitative–aria–recitative in each of the four strophes. Still more complex, and powerful, are such works as *Gelosia ch'a poco a poco*. Apparently one of Rossi's most popular pieces – it appears in numerous sources and was even published in 1646 – this canzonetta ably portrays a mind unhinged by jealousy. Striking harmonic shifts, virtuoso melismas and purposely distorted scansion are complemented by the syntactic and semantic parallelism between the three stanzas of Domenico Benigni's poem.

A definitive chronology for Rossi's vocal chamber music may never be established. As was common in this repertory, most of his works circulated in manuscript and only a handful found their way into print during the composer's lifetime. Even those works that refer to contemporary events, such as the so-called political laments, can defy easy dating. *Ferito un cavaliere*, the Lament of the Queen of Sweden, for example, refers to the death of Gustavus Adolphus at the Battle of Lützen on 16 November 1632. Although it is reasonable to assume that Rossi composed the work shortly thereafter, the fact that the text is by Fabio Della Corgna, another Barberini client, suggests a later date. So, too, does the aforementioned posting of it to Richelieu in 1641, since recent works were usually the stuff of such offerings. On the other hand, the work's style – *versi sciolti* set as recitative throughout – suggests a date closer to the event commemorated. In any case, Rossi's youthful study of Monteverdian lament served him well, as can be heard in the affective dissonance of the recurring line 'datemi per pietade un che m'uccida'.

Rossi's versatility was put to good use in his operas, both of which are complicated affairs with a wealth, indeed a surfeit, of characters and situations. *Il palazzo incantato*, Rospigliosi's adaptation of an episode from *Orlando furioso*, requires among other things music for 16 soloists. Act 2 calls for a virtual parade of soliloquies; Bradamante's magnificent 'Dove mi spingi, Amor' in scene ix is among the best. At the same time, the work's highly episodic plot has bewildered modern critics. Pirrotta (1984) found the moralizing conclusion unconvincing, Murata (*GroveO*) has remarked on the triumph of love over deception, while Hammond (1994) reads it as an allegory of Barberini rule.

Orfeo also put Rossi to the test. The librettist, Francesco Buti, greatly expanded the familiar myth, adding new characters and subplots. In so doing, he also required Rossi to supply numerous ensembles; as Murata suggests, these may have resulted from the success of Rossi's chamber works the previous summer. Another highpoint of the opera is 'Lagrime dove sete', Orpheus's lament at the opening of Act 3: some scholars have suggested that the scene owes its particular intensity to Rossi's having learnt of his own wife's death at the end of 1646.

Next to nothing remains of Rossi's instrumental music. His sole surviving keyboard work, a *passacaille*, however, is skilfully crafted. Hammond (1993) suggests that Rossi composed it in France – it is preserved in several French sources – and that it displays a ready assimilation of Gallic styles of ground bass composition.

ROBERT R. HOLZER

Rossi, Luigi Felice (Stefano) (*b* Brandizzo, nr Turin, 27 July 1805; *d* Turin, 20 June 1863). Italian teacher, theorist and composer. Between 1824 and 1825 he studied counterpoint and composition first with Stansilao Mattei in Bologna (where he met Gaspari), then with Pietro Raimondi and Niccolò Zingarelli in Naples. His fellow students in Naples were Bellini, the Ricci brothers and Lauro Rossi. After 1833 he returned to Turin, where he presented his comic opera *Gli avventurieri* (6 July 1835). The impresario Bartolomeo Merelli revived it at La Scala in 1836, with disastrous results, ending Rossi's operatic career. The Milan critics wrote of 'characterless music', a very serious charge in the era of Donizettian romantic opera. He subsequently composed sacred and instrumental music. In 1842 he met Adrien de La Fage and Guillaume Louis Wilhem in Paris; their practices and ideas had a decisive effect on the theoretical and teaching work which occupied Rossi in Turin from 1843 until his death.

Rossi's role in musical life in Turin is comparable to that of Alberto Mazzucato in Milan: he oversaw the reform of the orchestra of the royal chapel, pressed for improvements to the orchestra in the Teatro Regio (especially in his contributions to the *Gazzetta musicale di Milano*: 'Sullo stato della musica in Torino', 26 January, 30 March and 27 July 1845); he was one of the first to tackle the question of conducting in the opera house; he occupied himself with musical historiography, contributing to the *Enciclopedia popolare Pomba* (Turin, 1841–8) and Tommaseo's *Dizionario della lingua italiana* (Turin, 1861–79); he promoted the dissemination of non-Italian music with articles on Mendelssohn and Meyerbeer (*Gazzetta musicale di Milano*, 28 July 1844), anticipating the work of Basevi and Boito; he took part in the renewal of the mutual benefit society for musicians in Turin (1835); and he started experimental classes in the teaching of choral singing, exploring new methods (from 1845 to 1858).

The editions of treatises by Fedele Fenaroli (*Partimenti ossia Basso numerato*, 1844), Mattei (*Pratica d'accompagnamento*, 1843) and Luigi Cherubini and Rossi's

original teaching works are evidence of the variety of skills that Italian composers would have possessed at the time of the young Verdi. In his translation (1846) of Antoine Reicha's *Cours de composition musicale*, Rossi – like Mazzucato in his version of Berlioz's *Grand traité d'instrumentation et d'orchestration modernes* (1843) – indicates some notable divergences between French and Italian practice.

WORKS

VOCAL

Gli avventurieri (melodramma giocoso, 2, F. Romani), Turin, D'Angennes, 6 July 1835

Sacred: Le sette ultime parole di N.S. Gesù Cristo sulla croce, chorus, org (Turin, n.d.) *I-Tn*; 10 masses, chorus, orch; 2 masses, chorus, org; 10 settings of Mass Ordinary texts, 11 psalms, 6 Mag settings, 3 motets, 25 hymns, ants, lauds, lits

Secular: 18 choral works, female vv, pf; 8 choral works, female vv unacc.; 22 romanze, 1v, pf

INSTRUMENTAL

2 sinfonias, F, D, *I-Tco*; works for band

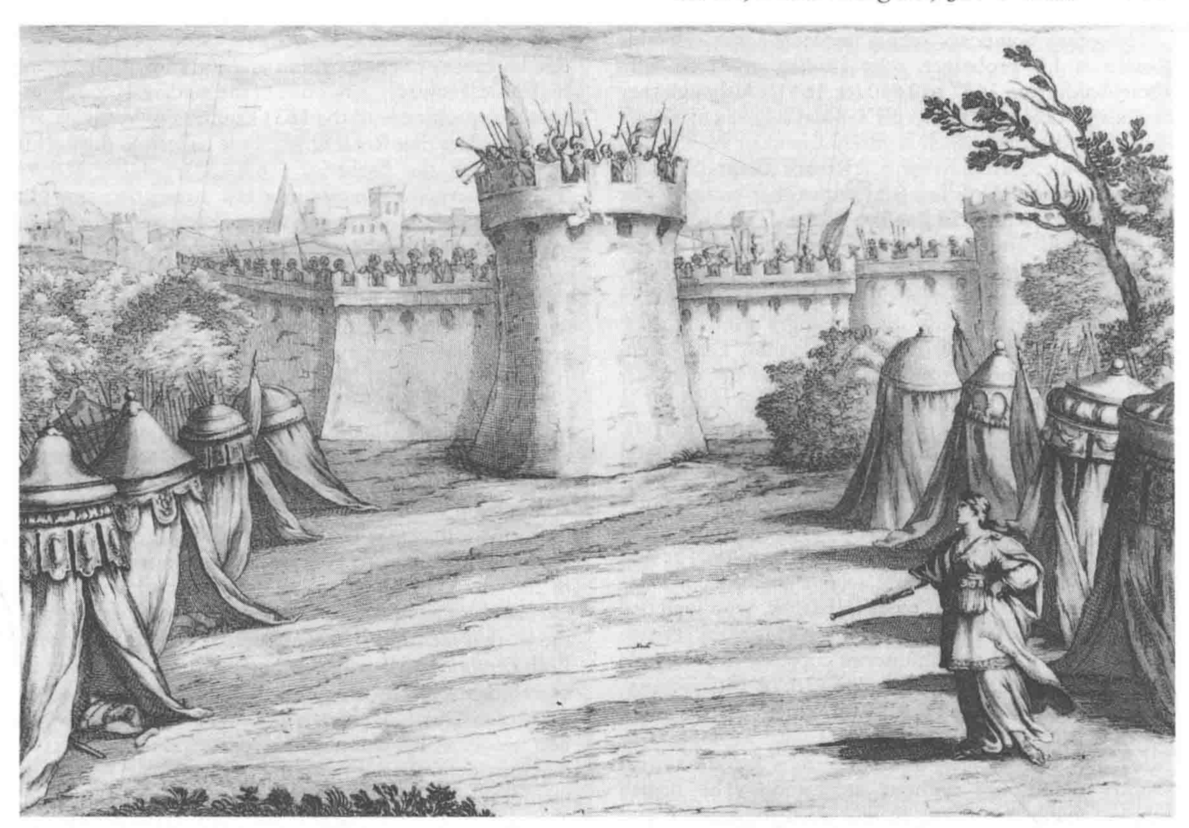
ANTONIO ROSTAGNO

Rossi, Mario (*b* Rome, 29 March 1902; *d* Rome, 29 June 1992). Italian conductor. He studied composition with Respighi and conducting with Setaccioli at the Rome Conservatory, graduating in 1925. He first directed a workers' amateur choir in Rome (1923–6), which led to his appointment as deputy conductor, under Bernardino Molinari, of the Augusteo Orchestra, with which he made his début in 1926. He also began to conduct in other Italian cities. In 1936 he left the Augusteo and went to Florence, where he was appointed resident conductor of the Maggio Musicale Orchestra, and conducted his first opera, Mascagni's *Iris*, at the Teatro Comunale in 1937. He remained in Florence until 1944, meanwhile conducting at other theatres, including La Scala. Toscanini, on his return to Italy from the USA in 1945, proposed Rossi as artistic adviser at La Scala, but he preferred to accept a post as resident conductor of the Turin RAI SO. Under his direction from 1946 to 1969, this became one of the finest Italian symphonic organizations, and was also admired outside Italy. In 1953 he was awarded the Schoenberg Prize for the dissemination of contemporary music, and in 1960 he was given the Viotti Gold Medal. A member of the Accademia di S Cecilia and of the Philharmonic Societies of Rome and Bologna, he also held a course in conducting at the Turin Conservatory. His repertory, mainly symphonic, was extensive, especially in contemporary music, and he conducted many first performances, including those of several works by Petrassi and Malipiero.

LEONARDO PINZAUTI



Rossi, Michelangelo [Michel Angelo del Violino] (*b* Genoa, 1601/2; *d* Rome, bur. 7 July 1656). Italian composer, violinist and organist.

1. LIFE. There are large gaps in our knowledge of Rossi's life, and the fact that two, if not three, contemporary Italian violinists (including Rossi himself) were known as Michelangelo (or Michelagnolo) del Violino calls into question some previously accepted information. It can be assumed that Rossi received his earliest musical training in Genoa, where he was assistant organist to his uncle Lelio, a Servite brother, at the cathedral of S Lorenzo. He may also have studied with Simone Molinaro, who published Gesualdo's madrigals in 1613.

Rossi's three known periods in Rome are the most unequivocally documented and also most relevant to his musical output. In the first, 1624–9, he was in the service of Cardinal Maurizio of Savoy, principally in Rome but also in Turin, where he performed in February 1628 or 1629. The madrigalist Sigismondo d'India and the poet Fulvio Testi were also members of the Savoy court; since Rossi's madrigals bear a resemblance to India's and one madrigal text is by Testi, it is probable that Rossi composed most of his madrigals before 1629. An account of a Michelangiolo who played the violin soothingly ('nostro Michelangiolo, atto col suo violino a raddolcire ogni amaro') and travelled from Genoa to Naples with the nobleman Gian Vincenzo Imperiale in January 1628 (see Barrili) cannot refer to Rossi, who was still in the service of Cardinal Maurizio at that time. Rossi reportedly left Maurizio's service abruptly and in disgrace (see Rua).

In the second Roman period, 1630–33, Rossi was in the service of Taddeo Barberini. During this time he composed the opera *Erminia sul Giordano*, at least one madrigal, and probably the volume of keyboard music *Toccate e correnti d'intavolatura d'organo e cembalo*. He was also organist at S Luigi dei Francesi (and the church's principal violinist on feast days) from March 1630 to December 1632. During Carnival 1633 Rossi appeared in the final act of *Erminia* as Apollo, surrounded by zephyrs scattering flowers; he was borne in a chariot suspended above the stage and, 'sparkling with the brightest of splendours, he played [on the violin] a composition of inestimable melodiousness'. The event is depicted in one of five sumptuous engravings, probably by Andrea Camassei, in the printed score of *Erminia* (1637; see illustration).

In 1634, at Antonio Barberini's bidding, Rossi left Rome for Paris in the entourage of Giulio Mazzarini (later Cardinal Mazarin), but left at Reggio nell'Emilia to join the court of Francesco I d'Este. During his service at the Este court in Modena (1634–8) Rossi was engaged to compose music for an *opera-torneo* for Ferrara, *Andromeda*, performed during the 1638 carnival. After 1638 there is no confirmed information about Rossi's whereabouts or activities until his name appears in the Roman census records for the parish of SS Apostoli in 1649. He was resident at Camillo Pamphili's palace (the present Palazzo Doria Pamphili) from 1649 until 1655, the year

Scene before the walls of Jerusalem: engraving, after Andrea Camassei, from Michelangelo Rossi's 'Erminia sul Giordano' (Rome: Paolo Masotti, 1637)

that the Pamphili pope (Innocent X) died. The composer himself died the following year, having spent his final months in a house owned by Thimoteo Ximenes in the Strada Gregoriana, probably living with his wife and children (see Silbiger, 1983).

Rossi's death notice is unusually long and detailed. Not surprisingly, it acknowledges his reputation as a violinist: 'eccellente nell'arte della musica e particolarmente nel sonar il Violino'; but the exceptional inclusion of details of the administration of the last rites suggests that Rossi may have been regarded as a more than usually pious person. Untypically, the death notice also specifies the chapel in which Rossi was buried within the church of S Andrea delle Fratte – the chapel of the Minimi order (see Moore). Any association between a virtuoso violinist and the Minimi would seem highly improbable, as the Minimi were noted for their asceticism and consequent rejection of things elaborate and artistic, such as music. However, at least one prominent figure in 17th-century Roman musical circles was a Minim: the theologian, philosopher and music theorist Marin Mersenne.

Rossi appears twice in contemporary accounts as a member of an instrumental trio: the engraving of Rossi as Apollo in *Erminia sul Giordano* places a harpist and lute player with him in the airborne chariot, and Athanasius Kircher described the strange and profound effects of a private performance by Rossi with the violinist Salvator Mazzella and the lutenist Lelio Colista. It is interesting to learn from Kircher's description that the instruments used (two violins and a continuo instrument) were exactly those of the trio sonata that was to flourish in the following decades. Since Colista, Rossi's junior by 27 years, shared accommodation with Rossi in the Pamphili palace in 1653, it is tempting to assume that Kircher's secret concert took place that year.

2. Works. Rossi's contribution to three major genres reflects the evolution of each one: in the 1630s the keyboard toccata was at the height of its development, the polyphonic madrigal was past its prime, and Italian opera was in its early years.

Examples exist of three distinct editions of Rossi's single volume of keyboard music, the *Toccate e correnti*, which comprises ten pieces in each genre. One of the editions re-uses a title-page from an edition not extant in its original form. Two may have been prepared in the 1630s, one bearing the Aldobrandini arms and the other those of Cardinal Antonio Barberini; the other two are probably posthumous (see Silbiger, 1983). All are beautifully engraved on copper plates and similar to the printed editions of Frescobaldi's keyboard music. Rossi's toccatas belong to the fully mature genre that owed much of its development to Merulo and Frescobaldi, but his is a distinctive voice. Whether compounded in tortuous lines or abruptly dropped into an alien key centre, Rossi's chromatic, declamatory sections are leavened by extended melodic and harmonically stable imitative sections. He introduced an extreme chromatic dimension, which owes as much to his own madrigals and those of Gesualdo and India as it does to others' toccatas. It is possible that Rossi consciously used the irregularities of mean-tone temperament to enrich his harmonic vocabulary.

The other composer whose toccatas most resemble Rossi's is J.J. Froberger, who studied in Rome with Frescobaldi from 1637 to 1640 (or 1641). Although they are clearly italianate, Froberger's toccatas have a markedly sectional structure which is rarely found in Frescobaldi and was only starting to form in Rossi's toccatas. Rossi's sections do not share material with other sections (the unifying octave leaps in the fifth toccata and 3rds in the sixth toccata are exceptions); he employed a greater number of motifs and developed each one less fully. Clearcut divisions between sections, regular patterns in imitative sections and abrupt, seemingly arbitrary, harmonic changes characterize Rossi's toccatas. The correntes provide a contrast to the toccatas; they are compact and well-crafted pieces that may have been included in the volume to broaden its appeal to less advanced players. Their dance-like character may suggest Rossi's violin music, none of which is known today.

Thanks largely to the quality of the 17th-century engraved editions, it is Rossi's keyboard music that became most widely known in the 20th century. The first and ninth toccatas and the first, second and fifth correntes were arranged for piano by Béla Bartók, who included them in his recitals, and the notoriously chromatic seventh toccata is often heard. Manuscript copies of the first nine toccatas, which may date from the 17th or 18th century, exist in Vienna (*A-Wm*); nos.1 (incomplete), 4, 5, 6 and 7 are in a British Library manuscript with attribution to Rossi; nos.1 (complete) and 6 are in a second British Library manuscript without attribution. The British Library manuscripts are from the 17th century and contain English ornament signs and other embellishments that indicate how players elaborated the printed text, especially in declamatory sections.

Some instrumental pieces attributed to Rossi do not appear in the 17th-century editions: four toccatas, two versetti and a set of four *partite sopra la Romanesca*. Although they contain certain stylistic features associated with Rossi, their authenticity is doubtful. An incomplete piece headed 'Ballo di Michel Angelo del Violino' is unlikely to be by Rossi.

Although never published, Rossi's collection of 32 five-part madrigals is carefully planned in two books; one source (*US-BEm* 176) is a fair copy in score. Rossi's use of traditional madrigal texts (most of them by Guarini, including the often set *Ah, dolente partita* and *Cor mio, deh non languire*) and the inclusion of two tenors (rather than two sopranos) is old-fashioned, and his extreme chromaticism looks back to Gesualdo. The writing is also bold enough to invite comparison with India, and mannerist characteristics suggest the Ferrarese composers Luzzaschi and Fontanelli. Nevertheless, Rossi's madrigal style is varied and not entirely derivative. Among the most original examples is his setting of Fulvio Testi's *O prodighi di fiamme* which, despite opening in G and ending in F♯, is well conceived and executed: clear melodic direction, contrasting chordal and contrapuntal sections and eloquent text-setting are skilfully combined. The penultimate madrigal, *Mentre d'ampia voragine tonante*, is also untypical: it is markedly diatonic with brief chordal points of rest that are rather chromatic. Cascading semiquavers aptly depict the driving wind, raining stones and thundering vortex mentioned in the text, by the Neapolitan Giovanni Battista Basile, brother of the famous singer Adriana Basile.

Except in the case of Rossi's two operas, precise circumstances of composition are not known for any of his music. However, since one of the madrigals commemorates a specific event, the 1631 eruption of Vesuvius, we can speculate that Rossi finished the collection during his tenure with the Barberini (1630–33), adding *Mentre d'ampia voragine tonante* in a last attempt to secure a patron (Cardinal Antonio) for publication. The poem appears in a volume dedicated to Antonio, *Scelta di poesia nell'incendio del Vesuvio fatta dal sig. Urbano Giorgi* (Rome, 1632). The fair-copy manuscript score shows the arms of Queen Christina of Sweden on a binding that seems to date from the papacy of Giulio Rospigliosi (Clement IX).

Rossi's personal style is defined by the madrigals and toccatas rather than the operas. *Erminia sul Giordano*, on a libretto by Giulio Rospigliosi after Tasso's *Gerusalemme liberata*, was composed for Anna Colonna on a commission from her husband, Taddeo Barberini. First performed during the 1633 carnival at the Palazzo Barberini alle Quattro Fontane, the opera was published in 1637 by Masotti. Some cast details are known, as well as records of payment for scenery and other supplies, and the work is mentioned in contemporary letters and *avvisi*. Both *Erminia* and Rossi's other opera, *Andromeda*, served as vehicles for spectacular stage machinery designed by Francesco Guitti. Choruses provide some of *Erminia's* best music, which Doni likened to tuneful madrigals, but the judgment that it was the scenery that was most memorable in Rossi's opera is not without foundation. The music of *Andromeda* does not survive, but the libretto, by Ascanio Pio of Savoy, was published in 1639 along with an extensive description and commentary by a Ferrarese gentleman, Ignazio Trotti (see Rolandi).

WORKS

OPERAS

Erminia sul Giordano (dramma musicale, 3, G. Rospigliosi), Rome, Palazzo Barberini, 30 Jan 1633 (Rome, 1637/*R*); extracts ed. in Goldschmidt, 258ff

Andromeda (opera-torneo, A. Pio), Ferrara, Corte Vecchia, 1638, music lost

MADRIGALS

for soprano, alto, 2 tenors and bass, unless otherwise stated; principal sources C-Mc, GB-Lbl, Ob, US-BEm, NYp

Edition: *The Madrigals of Michelangelo Rossi*, ed. B. Mann, MRM, x (1999)

Ah, dolente partita (G.B. Guarini); Alma afflitta (G.B. Marini [Marino]); Amor io parto (Guarini); Che dura legge (Guarini); Che pensi, cor di tigre (G. de' Conti), S, S, A, A, B; Ciechi desir (G.B. Giraldi), S, S, A, T, B; Come sian dolorose (Guarini); Con che soavità (Guarini); Cor mio, deh non languire (Guarini), S, S, A, T, B; Credetel voi (Guarini), S, S, A, T, B; Cura gelata (Guarini); E così pur languendo (Guarini); Era l'anima mia (Guarini); Hor che la notte (I.P. Mutio); Io d'altrui (Guarini); Langue al vostro languir (Guarini)

Mentre d'ampia voragine tonante (G.B. Basile); Moribondo mio pianto; Morto mi vede (Guarini); Occhi un tempo (Guarini); O donna troppo cruda (Guarini); Ohimè, se tanto amate (Guarini); O miseria d'amante (Guarini); O prodighi di fiamme (F. Testi); Pallida gelosia (B. Tasso); Per non mi dir (C. Rinaldi); Quanto per voi (Guarini); Sì, mi dicesti (Guarini); Stratiami pur (Giraldi), S, S, A, A, B; Tu parti a pena (Guarini); Una farfalla (Guarini); Voi volete (Guarini)

OTHER WORKS

2 It. arias, 1v, bc, *I-Vc*

CATHERINE MOORE

Rossi, Salamone [Salomone, Salamon de', Shlomo] (*b* ?Mantua, probably 19 Aug 1570; *d* ?Mantua, *c*1630). Italian composer and instrumentalist. He is specially important for his contribution to the development of the trio sonata and chamber duet.

1. Life. Since his first published work, the *Canzonette* of 1589, contains 19 pieces, was dedicated on 19 August 1589 and includes a table of contents whose initial letters include the acrostic VIVAT S R, it is probable that Rossi was born on 19 August 1570. Zunz and Werner claimed that he was the son of the distinguished historian Azariah de' Rossi, but the latter himself noted in his *Meor enayim* (Mantua, 1573) that he had no surviving son. The theory, advanced by Einstein (1950–51), that there were two composers of this name is now generally discredited (it was based mainly on the fact that in their dedications Rossi described both the *Canzonette* and *Il primo libro de madrigali a 5 voci* as his first works). It seems likely that Rossi was born in Mantua. He spent his entire professional career there and had strong connections with the Gonzaga court. He was presumably too young to contribute to *L'amorosa caccia* (Venice, 1588), an anthology of pieces by Mantuan-born composers, but his first three publications suggest contact with the court. The book of canzonettas is dedicated to Duke Vincenzo Gonzaga and opens with a piece in honour of the duke and duchess; the first book of five-part madrigals is again dedicated to Vincenzo, with the acknowledgment that 'under the happy shade of your service I have learnt everything'; and the second book is dedicated to the Marquis of Pallazuolo, a prominent member of the Mantuan court. Rossi was evidently well regarded by Vincenzo, since the compulsory wearing of the yellow badge, introduced as part of the restrictions imposed on the Jewish community in response to popular agitation during the early part of Vincenzo's rule, was relaxed in his case by ducal decree in 1606; this privilege was renewed by the new duke, Francesco II, only six days after his accession in 1612. Later, however, Rossi's relations with the court seem to have become less close, and that he dedicated none of his later works either to the Gonzagas or to members of the court is consistent with the general impression of a decline in the musical life of the court in the years following Vincenzo's death.

Despite the implications of his above-quoted remark in the dedication of his first book of five-part madrigals – which is probably no more than a piece of extravagant lip-service – it should not be assumed that Rossi was a permanent or official member of the Gonzaga musical establishment, though he was salaried there for some isolated years. Leo da Modena's comment in the preface to *Hashirim asher lish'lomo* that he 'succeeded by his abilities in rising to the position of the singers in the Duke of Mantua's choir' can only refer to his comparative stature and talent since he is recorded in the Mantuan archives only as an occasional instrumentalist, does not appear in the salary rolls of the Palatine Basilica of S Barbara and in any case would presumably have been debarred from such a position because of his Jewish faith. So although he was not one of the seven court violists recorded in a Mantuan salary list of 1599, his name does appear in the *Registrati de' musici straordinarii* (in *I-MAc*) between 1587 and 1600, and Bertolotti noted a further payment for viol playing in 1622. It seems likely for a variety of reasons that his principal professional connections were with one of the Jewish theatrical troupes that played such a significant role in Mantuan theatrical life, not only in the ghetto but also in the Christian

community and at court. This assumption is reinforced by a memorandum from Carlo Rossi to the duke on 27 February 1608 reporting Salamone's selection as the composer of the first of the five *intermedi*, to texts by Chiabrera, that were to accompany the performance of Guarini's comedy *L'idropica*, planned for presentation at Mantua on 2 June 1608 as part of the festivities celebrating the marriage of Francesco Gonzaga to Marguerite of Savoy. He also contributed a balletto to the incidental music for G.B. Andreini's *La Maddalena*, given in 1617. Moreover, in 1612 Alessandro Pico, Prince of Mirandola, to whom Rossi dedicated his third book of five-part madrigals, requested that he and 'his group of musicians' be sent to Mirandola to entertain the Duke of Modena and other guests.

With the exception of the virtuoso singer known as Madama Europa who was his sister, Rossi was probably not related to any of the other Mantuan musicians with the same surname. Both Carlo and Mattheo Rossi must have been Christians (or converts) since they appear in the salary rolls of S Barbara, and the same is true of Anselmo Rossi, who contributed one piece to a motet collection (RISM 1618[4]). The dedication of Rossi's last published work is dated 3 January 1628. He may well have perished during the destruction of the ghetto and the severe plague that followed the sack of Mantua at the hands of the imperial troops in July 1630.

Like Rossi, Madama Europa served the Mantuan court, though, in all probability, for a more limited period (her name occurs, along with Salamone's, on two payrolls: one from 1589–90, as 'Europa di Rossi', the other from 1592–3, as 'Madama Europa sua sorella'). She deserves attention for being the only known Jewish female professional singer of her time (to be distinguished from various Jewish amateur singers, among them Rachel and Madonna Belinna). Europa appears to have been her given name, and not, as often claimed from Canal on, a sobriquet attached to her after having played the part of Europa in an *intermedio* by Chiabrera (*The Rape of Europa*, produced at the Mantuan court in 1608). If she did play the part, she seems to have been a sensitive musician and to have had a charming voice: the Mantuan court chronicler Federico Follino said the singer who played Europa that 'in her capacity as a woman most understanding of music, she sang to the listeners' great delight and their even greater wonder in a most delicate and sweet voice' (*Compendio delle sontuose feste . . .*, Mantua 1608).

2. Works. Rossi's music has often been misrepresented as a result of the blanket application of preconceived concepts of periodization and the consequent highlighting of what are believed to be 'proto-Baroque' elements in it. Most of the pieces in the five books of five-part madrigals, however, are cast in a light, sonorous style that breathes the freshness and spirit of the pastoral Marenzio and the early Monteverdi. Much has been made of his inclusion of a basso continuo part in the second book (1602), following hard upon his experiment with an accompanying chitarrone tablature in the first (1600). These are indeed the first published examples of continuo madrigals, but they are rather tame. Moreover, current knowledge of the way in which vocal music was accompanied by instruments, supported by the evidence of sources as early and disparate as the explicit reference to a type of continuo part in Diego Ortiz's *Tratado de glosas* (1553) and the surviving organ bass part to a 40-part motet *Ecce beatam lucem* (1568) by Alessandro Striggio (i), suggests that this may be no more than printed confirmation of a well-established performing practice. Significantly, the basso continuo part for the second book was not issued separately but was printed opposite the cantus part after the traditional arrangement of lute tablatures. Again, no figures appear in this book, and few occur in the third (1603); only the last two books (1610, 1622) are provided with genuine, figured continuo parts. The overwhelming conservatism of the music in all five books also characterizes the four-part volume, the very appearance of which as late as 1614 must be regarded as archaic: only a handful of books of four-part pieces were published after 1600, mostly by Neapolitan and Sicilian composers. Ten of the texts are by Guarini, and seven of these are from *Il pastor fido*. On grounds of poetic taste and musical style, Newman has suggested that the pieces in the book date from 1600–03, a hypothesis supported by the enthusiasm for the play at Mantua during this period and by the keen interest generally aroused by the publication of the Ciotti edition at Venice in 1602. Yet the impression of comfortable stylistic uniformity throughout the madrigal books may be misplaced, since of the fifth five-part book, which contains a number of pieces described as *madrigali concertati*, only the continuo part survives, and other exceptions are the six similarly labelled pieces in the first book, which can be performed either by five voices or as solo songs.

Traditional musical approaches certainly characterize *Hashirim asher lish'lomo* ('The Songs of Solomon'), a collection of 33 polyphonic settings of Hebrew psalms, hymns and synagogal songs whose importance has perhaps been overemphasized by Jewish liturgists. Moreover, Adler's studies strongly suggest that even within the traditions of synagogal music Rossi's collection is not the isolated example of concerted music before the 19th century liturgical reforms that it was once thought to be. The existence of *cori spezzati* fragments written out around 1630–50 (see Fuchs) and thought to have emanated from Leo da Modena's Jewish musical academy in Venice may suggest that *The Songs of Solomon* formed part of the repertory of some other such body. The title of the collection is probably a pun on Rossi's name, since none of the texts, though largely taken from the Old Testament, actually comes from *The Song of Solomon*. The style of the music reflects not only the expected influences of Mantuan colleagues, particularly Monteverdi, and, in the three-part pieces, the ballettos and canzonettas of Gastoldi, but also, in the works for larger forces, the music of the Venetian school. *L'mi ehpots*, a setting of a text in the popular Jewish verse form of the wedding ode, is an echo dialogue whose ornamented final cadence borrows the gestures of secular monody. It has been suggested that, in addition to contemporary polyphonic styles, Rossi also drew on Italian Jewish chants for some of his material. The result, novel in its fusion of different cultural traditions rather than in the component stylistic elements themselves, also marks a new departure in the history of music printing. *Hashirim asher lish'lomo* is the first attempt to print music to Hebrew texts, a task which brought its own technical challenges, not all of which are overcome in Bragadino's edition (see illustration).

Title-page of Salamone Rossi's 'Hashirim asher lish'lomo' (Venice: Pietro & Lorenzo Bragadino, 1622–3)

It is in his lighter vocal pieces and in his instrumental music that Rossi appears at his most novel and prophetic. The book of three-part canzonettas comprises a variety of musical and poetic types, though most of them are genuine strophic canzonettas with internal repetition schemes set for two high voices and a tenor or baritone. The publisher Amadino produced the book in the small pocket-sized upright format favoured for this repertory. Among its contents, *Voi che seguit'il ciec'ardor* is unusual in its use of *terza rima* with sdrucciola rhythms, and *Mirate che mi fa* is almost a madrigal in three sections, with an extended last line. Rossi's most important achievement is his contribution to the transformation of the instrumental canzona, with its homogeneous texture, into the trio sonata, with its prominent equal upper parts and supporting bass. This development, which was influenced by the characteristic textures exhibited by the virtuoso singers at the Ferrarese and Mantuan courts in the late 1580s and 1590s, occurs mostly in the sinfonias of his instrumental collections rather than in the dance movements. Some of the dances, which are characterized by a polarization of upper and lower parts, are named after members of the nobility or after other composers, such as 'La Cecchina' (Francesca Caccini), or are based on popular bass melodic patterns. Although the chitarrone part is unfigured, it functions as a true continuo part, and the presence of dynamic markings is a typical feature of the emergence of instrumental music as a separate genre. The sinfonias, which may have been meant as instrumental preludes or ritornellos in the manner of the lutenists' ricercares or *tastar da corde* or the instrumental ritornellos which occur in some of Ludovico Agostini's madrigals, are so clearly related in texture and structure to the *Canzonette* of 1589 that the influence of the one style upon the other seems indisputable. While the sinfonias are essentially textless canzonettas, the *Madrigaletti* of 1628, which include two strophic arias with short instrumental ritornellos between the strophes, are finely wrought early examples of the short duet so successfully cultivated by Monteverdi and later by Carissimi and Luigi Rossi. Yet despite the intriguing transitional features here and in the instrumental music, Rossi's contemporaries, inasmuch as they admired his music at all, preferred the comparatively bland style of the concerted pieces from the first set of five-part madrigals, though Francis Tregian did copy madrigals from the third book into his manuscript score (in *GB-Lbl*). Weelkes was also evidently acquainted with Rossi's music: his settings of *I bei ligustri e rose* and *Donna, il vostro bel viso* in the *Ayeres or Phantasticke Spirites* (1608), which are clearly related to his five-voice settings of English versions of the same texts in the *Madrigals to 3, 4, 5 and 6 Voices* (1597), are so close to Rossi's settings of the same texts in his *Canzonette a tre voci* that it is difficult to believe that Weelkes had not actually seen Rossi's versions.

WORKS

Editions: *S. Rossi: Cantiques*, ed. S. Naumbourg and V. d'Indy (Paris, 1877) [N]
Sinfonie, Gagliarde, Canzone, i, ii, ed. J. Newman and F. Rikko (New York, 1965) [R]

Rossi-Lemeni, Nicola (*b* Istanbul, 6 Nov 1920; *d* Bloomington, IN, 12 March 1991). Italian bass. A pupil of his mother, Xenia Macadon, and of Carnevali-Cusinati, he made his début at La Fenice in 1946 as Varlaam, a role he repeated in 1947 at La Scala, where he continued to appear until 1960. At first he was heard as Boris, Philip II and Mephistopheles (Gounod and Boito); he sang in all the major Italian theatres and also at Buenos Aires, San Francisco (American début, as Boris, 1951), Covent Garden (1952, as Boris), the Metropolitan, Chicago and other houses. An interpreter of marked intelligence and sensitivity, he began with a smooth, mellow and well-focussed voice. Later he compensated for his premature vocal decline with over-emphatic phrasing and vigorous declamation. He specialized in modern operas such as Pizzetti's *L'assassinio nella cattedrale* (as Becket, including première at La Scala in 1958), *Wozzeck*, Bloch's *Macbeth* and Britten's *Billy Budd* (Italian première, 1965, Florence). His second wife was the soprano Virginia Zeani. He recorded, among other parts, the title role in Rossini's *Mosè in Egitto*, Henry VIII (*Anna Bolena*, with Callas) and Oroveso (*Norma*).

Rossing, Thomas D. (*b* Madison, SD, 27 March 1929). American physicist and acoustician. After studying at Luther College, Iowa (BA 1950), and Iowa State University (MS 1952, PhD 1954), he worked for the Sperry Rand Corporation. He was appointed professor of physics at St Olaf College, Minnesota, in 1957, then at Northern Illinois University in 1971. He has contributed greatly to the understanding of percussion instruments. Particularly noteworthy was his experimental demonstration of Chladni figures showing the vibrational modes of a kettledrum head (1982) and his work on bells (1984). His research with Johan Sundberg and colleagues in Stockholm revealed important features of the formant characteristics of the voice in solo and choral singing. He is best known as co-author of the influential *The Physics of Musical Instruments* (1991).

MURRAY CAMPBELL, CLIVE GREATED

Rossini, Gioachino (Antonio) (*b* Pesaro, 29 Feb 1792; *d* Passy, 13 Nov 1868). Italian composer. No composer in the first half of the 19th century enjoyed the measure of prestige, wealth, popular acclaim or artistic influence that belonged to Rossini. His contemporaries recognized him as the greatest Italian composer of his time. His achievements cast into oblivion the operatic world of Cimarosa and Paisiello, creating new standards against which other composers were to be judged. That both Bellini and Donizetti carved out personal styles is undeniable; but they worked under Rossini's shadow, and their artistic personalities emerged in confrontation with his operas. Not until the advent of Verdi was Rossini replaced at the centre of Italian operatic life.

1. EARLY YEARS. Rossini was born in Pesaro, a small city on the Adriatic in the region known as the Marches. His immediate paternal ancestors can be traced in Lugo, while his mother's family came from Urbino. Both his parents were musicians. Giuseppe Antonio Rossini was a horn player of some ability, having preceded his son into membership in the Bologna Accademia Filarmonica in 1801. During his early career he performed in military bands and served the ceremonial function of public *trombetta*, the position he obtained in Pesaro when he took up residence there in 1790. The building into which

he moved also housed the Guidarini family, whose daughter Anna he married on 26 September 1791.

Rossini's earliest years, spent in Pesaro, were not peaceful. The Napoleonic wars, bringing with them French and papal soldiers in confusing alternation, were particularly hard on Giuseppe, whose vociferous enthusiasm for the cause of liberty displeased the papal authorities and resulted in his brief imprisonment in 1800. Memories of his father's misadventures (his lively prescence earned him the name 'Vivazza') may have dampened Gioachino's enthusiasm for Italian nationalism later in his life.

By 1800, however, the family had entered energetically into the theatrical life of the period. During the carnival season of 1798, Anna was seconda donna in a theatre at Ancona; by the next year's carnival season in Ferrara she had become a prima donna, and performed until the summer of 1808 in cities such as Bologna, Iesi, Lugo, Fano, Imola, Reggio nell'Emilia and Rovigo. Giuseppe, too, was active as a performer and even tried his hand as an impresario. The young Rossini soon began joining his parents on these tours. We find his name for the first time in Fano, during the carnival season of 1801, where he is listed as playing the viola in the orchestra.

By the time the family moved to Lugo in 1802, Rossini's father was teaching him to play the horn, while a local canon, Giuseppe Malerbi, whose musical knowledge and fine collection of scores seem to have exercised a generally beneficent influence on the child's musical taste, instructed him in singing. Under Malerbi's direction Rossini began studying composition, and he wrote a considerable number of sacred pieces. Although Malerbi freely corrected these early efforts of his pupil and often replaced Rossini's name with his own on the autograph manuscripts, there is no question about their authorship: these early efforts already show stylistic elements that can be found throughout the decade in the student works of Rossini.

During this period the Rossinis came to know a wealthy businessman in Ravenna, Agostino Triossi, and in 1804 they were summer guests at his nearby villa at Conventello. On this occasion the young composer wrote his six *sonate a quattro*. Rossini remained in contact with his 'friend and patron' for many years, also composing for him two overtures (the *Sinfonia 'al Conventello'* and the *Grand'overtura obbligata a contrabbasso*) and a Mass for Ravenna.

By 1804 the family transferred its principal residence to Bologna, a more central location for their burgeoning professional careers and also a city where Rossini could obtain more qualified instruction. As early as 1804 Gioachino had begun to appear professionally as a singer: he organized and participated in an *accademia di musica* in the Teatro Comunale of Imola on 22 April 1804. His performance as the boy, Adolfo, in Paer's *Camilla* at the Teatro del Corso in Bologna during the autumn season of 1805 is attested by a libretto printed for the occasion. Other documents show him singing in private concerts. His abilities as a singer were well enough recognized that in June 1806 he followed his father into the Accademia Filarmonica of Bologna, honoured for his accomplishments as a singer, a singular recognition for so young a man.

In Bologna, Rossini studied music privately with Padre Angelo Tesei. His progress was rapid and by April 1806 he entered the Liceo Musicale. There he followed courses in singing, the cello, piano and, most important, counterpoint under Padre Stanislao Mattei, the director of the Liceo and successor to Padre Martini. Rossini, always an eminently practical man, did not react well to the more esoteric processes of counterpoint. He later reported to his friend Edmond Michotte that Mattei considered him the 'dishonour of his school'. Nonetheless, Rossini profited enormously from prolonged exposure to more 'serious' musical styles than those prevailing in Italian theatres. He devoured the music of Haydn and Mozart, later referring to Mozart as 'the admiration of my youth, the desperation of my mature years, the consolation of my old age'. His devotion to Haydn was demonstrated by the performance of *The Seasons* he directed on 10 May 1811 at the Accademia dei Concordi, of which he had become musical director in 1809. Though he culled from Mattei's exercises in strict composition only what could be of direct use to him in a practical career, the sureness of his harmony, clarity of his part-writing (hardly marred by occasional 'forbidden' progressions) and precision of his orchestration derive ultimately from this traditional training. During his years at the Liceo Rossini wrote a few instrumental pieces, some sacred music (including a Mass commissioned in 1809 by the cathedral of Rimini) and a cantata, *Il pianto d'Armonia sulla morte d'Orfeo*, which won a prize at the Liceo and was performed there for an academic convocation on 11 August 1808.

More important, though, Rossini had already begun to work as a *maestro al cembalo* in local theatres. His first documented activity of this kind took place during the carnival season of 1804 in Ravenna, and similar theatrical activities continued unabated until 1811. On these occasions he sometimes supplied arias for insertion into the operas being performed. The first documented case was in Forlì during the autumn of 1806, when he wrote the aria 'Cara, voi siete quella' for the tenor Antonio Chies, to be inserted into *L'amor marinaro* of Weigl. For another Weigl opera, *Il podestà di Chioggia*, he composed 'Dolci aurette'. The work was sung during the carnival season of 1809 in Ferrara by a tenor who became closely associated with Rossini's early career in Venice, Raffaele Monelli. During his last documented season as a *maestro al cembalo*, at the Teatro del Corso of Bologna during the autumn of 1811, Rossini prepared a *coro e cavatina* for Maria Marcolini, 'Viva Roma e Quinto viva', to be inserted into Domenico Puccini's *Il trionfo di Quinto Fabio*.

His first opera was commissioned, probably during a visit to Bologna in 1810, by the tenor Domenico Mombelli, who together with his two daughters formed the nucleus of an operatic troupe. As Rossini later told Ferdinand Hiller, Mombelli asked him to set some numbers from a libretto entitled *Demetrio e Polibio*. Not even knowing the entire plot, he proceeded one number at a time until the entire score was finished. Though this was Rossini's first opera, it was not performed until 1812, after four other works had brought the young composer advance publicity. It is not clear how much of the opera is Rossini's and how much may have been supplied or tampered with by Mombelli; but with it Rossini was fully initiated into the realities of Italian operatic life.

2. First period, 1810–13. The first decade of the 19th century was a period of transition in Italian opera. The deposited mantles of Cimarosa and Paisiello were unfilled.

The Neapolitan *buffo* tradition was in decline, and the operas of Farinelli or Fioravanti merely repeated its gestures without its substance. Though the conventional world of Metastasian *opera seria* had dissolved, the future was murky. Composers set heavily revised Metastasian texts, or imitations of them, to music in which typical 18th-century devices were precariously balanced with more progressive features. The simple tonal procedures of older *opera seria* were inadequate for longer ensembles and elaborate scenas, yet no Italian composer could or would adopt the more sophisticated tonal schemes of Mozart. As librettos turned from classical history to semi-serious subjects, medieval epic, and ultimately Romantic drama, the orchestral forces of the 18th century proved increasingly inadequate. As characters emerged from the cardboard figures of earlier days, melodic lines required more careful delineation, while the indiscriminate improvisation of vocal ornaments became less palatable. As Italian composers such as Paisiello, Cherubini and Spontini travelled to other European capitals, particularly Paris, Italian opera felt the influence of other national schools.

These challenges to a dying tradition drew little response from even the best composers of the decade, Simone Mayr or Ferdinando Paer. Though they brought new orchestral richness to Italian opera and began to construct larger scenic complexes than were found in the post-Metastasian period, they seemed incapable of fusing a new style from the disparate elements demanding their attention. Stendhal, in his forthright manner, found these composers essentially wanting. Mayr was learned, able, 'the most correct composer', but only with Rossini did a composer of genius appear. Indeed, for Stendhal, Rossini's very earliest works are his best, with *Tancredi* an apotheosis of the freshness that illuminates them. One need not follow Stendhal in denigrating Rossini's mature operas in order to recognize the charm of his first operas. Amid the resplendent glories of *Guillaume Tell* one can still yearn with Stendhal for 'the freshness of the morning of life', the spontaneity and sheer melodic beauty of a piece such as the duet 'Questo cor ti giura amore' from *Demetrio e Polibio*.

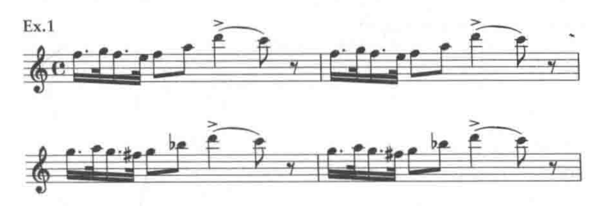
Rossini's operatic career began in earnest in 1810, with a commission from the Teatro S Moisè of Venice to compose the music for Gaetano Rossi's one-act *farsa*, *La cambiale di matrimonio*. According to a student of Giovanni Morandi, cited by Radiciotti, a German composer scheduled to write the opera reneged on his contract. Through the good offices of Morandi and his wife, the singer Rosa Morandi, friends of the Rossinis, the inexperienced Gioachino was approached instead. It was a fortunate opportunity, as he later recalled:

> That theatre also made possible a simple début for young composers, as it was for Mayr, Generali, Pavesi, Farinelli, Coccia, etc., and for me too in 1810. . . . The expenses of the impresario were minimal since, except for a good company of singers (without chorus), they were limited to the expenses for a single set for each *farsa*, a modest staging, and a few days of rehearsals. From this it is evident that everything tended to facilitate the début of a novice composer, who could, better than in a four- or five-act opera, sufficiently expose his innate fantasy (if heaven had granted it to him) and his technical skill (if he had mastered it).

Five of Rossini's first nine operas were written for the S Moisè.

It was a full year before Rossini's next opera, *L'equivoco stravagante*, was performed in Bologna on 26 October 1811. The libretto, in which the heroine's poor lover convinces the rich imbecile preferred by her father that the girl is really a eunuch disguised as a woman, was considered in such bad taste that the Bolognese authorities closed the show after three performances. But Rossini had no time to be upset by this fiasco, since the Teatro S Moisè was already awaiting his next *farsa*. *L'inganno felice*, which had its Venetian première in January 1812, was Rossini's first truly successful work, remaining popular throughout Italy during the next decade.

Commissions from other theatres followed rapidly. Despite statements from writers north of the Alps about the decadence of Italian music in this period, operatic life was in one sense remarkably healthy. Many important centres existed, and theatres and impresarios sought to outdo one another in obtaining new works, exploring new talent, training new musicians. That there was much bad music composed and performed is undeniable, but a flourishing, lively culture could give a composer the opportunity to come to maturity, and Rossini did not lack for opportunity. His sacred opera *Ciro in Babilonia* was presented in Ferrara during Lent, followed by yet another work for S Moisè, *La scala di seta*. The pinnacle of Rossini's first period, though, was the première of his two-act *La pietra del paragone*, at the Teatro alla Scala, Milan, on 26 September 1812. Just as Verdi, 30 years later, was assisted by Giuseppina Strepponi in obtaining his entrée to La Scala, so Rossini benefited from the recommendations of two singers who had taken part in his earlier operas, Maria Marcolini and Filippo Galli, both of whom were to sing in the cast of *La pietra del paragone*. The work was an unquestionable triumph. Rossini told Hiller that it earned him exemption from military service. He hurried back to Venice, where he composed two more *farse* for the Teatro S Moisè, *L'occasione fa il ladro* and *Il signor Bruschino*. It is distressing that, 70 years after Radiciotti destroyed the myth of the latter opera's being a jest at the impresario's expense, the story continues to circulate. *Il signor Bruschino* is one of the best of Rossini's early *farse*, comic, witty and sentimental by turns. The famous sinfonia, in which the violins occasionally beat out rhythms with their bows against the metal shades of their candle holders or, in modern times, against their music stands, is delightful both for its absurdity and for the totally natural and logical way in which the effect is woven into the composition.



In the 16 months from *L'equivoco stravagante* to *Il signor Bruschino*, Rossini composed seven operas. With the sheer press of commitments on him, he often used individual pieces in more than one opera. Though famous examples of self-borrowing are found later in his life, no compositions ever saw such service as two from *Demetrio e Polibio*, the duet 'Questo cor ti giura amore' mentioned above (which reappeared in five later operas) and the quartet 'Donami omai Siveno' (about which Stendhal wrote, 'had Rossini written this quartet alone, Mozart and Cimarosa would have recognized him as their equal'). One can understand, if not wholly respect, the insouciance with which Rossini simplified his task of grinding out so many operas. What is remarkable is how much fine music they contain.

Rossini's *farse* and *La pietra del paragone* are superior to his early *opere serie*. Despite some beautiful moments, *Demetrio e Polibio* remains colourless, while *Ciro in*

Babilonia, if not the fiasco that Rossini later labelled it, is scarcely distinguishable from the host of pseudo-religious operas prepared yearly for Lent. In the *farse* and comic operas, however, Rossini's musical personality began to take shape. Formal and melodic characteristics of his mature operas appear only occasionally, but many elements emerge that remain throughout his career. A love of sheer sound, of sharp and effective rhythms, is one of them. Germano's self-congratulatory 'Quando suona mezzanotte' in *La scala di seta*, Pacuvio's aria 'Ombretta sdegnosa' in *La pietra del paragone*, with its babbling 'Misipìpì, pìpì, pìpì' that rapidly acquired the status of a folksong, or the younger Bruschino's funereal 'Son pentito, tito, tito', proclaim a love for words and their sounds that blossomed in the first finale of *L'italiana in Algeri*.

Orchestral melodies give the singer scope for *buffo* declamation. Built almost exclusively in this way is 'Chi è colei che s'avvicina?', the aria of the parodied journalist, Macrobio, in *La pietra del paragone*. But sometimes, especially in these earlier works, the orchestral bustle seems rather faceless. Thus much of the introduction in *La cambiale di matrimonio* revolves around an orchestral figure (ex.1), over which the pompous Mill attempts

Ex.1

unsuccessfully to calculate from a world map the distance from Canada to Europe and then engages in a spirited dialogue with his servants. The same figure recurs in *L'inganno felice*, during the aria 'Una voce m'ha colpito', in which Batone realizes that the woman he thought to have murdered is alive. Rather than being particularly jarring in these diverse situations, the orchestral motif is simply appropriate to neither: its very limitations make it extremely adaptable.

The comic characters in many of these early works are complex and well differentiated. The servant and would-be lover Germano in *La scala di seta* is both absurd and touching. Don Parmenione in *L'occasione fa il ladro* is a charlatan and opportunist, but his charm is infectious, and we cheer when he pairs off with Ernestina at the end. In a memorable aria (with a prominent piccolo part) his servant Martino informs us that Parmenione is not rich nor poor, not good nor bad, but simply one of those 'beings common in society'. In *Il signor Bruschino* Rossini creates two delightfully contrasting and exaggerated comic characters, Bruschino and Gaudenzio, each driven to distraction by the antics of young lovers and wayward children, but good-hearted and forgiving. Already in these *farse* Rossini is a master of comic style.

Alongside the comic elements is the sentimental vein that pervades much of Rossini's *opera buffa*. Florville's opening solo in the introduction of *Il signor Bruschino*, 'Deh! tu m'assisti, amore!', Isabella's 'Perchè del tuo seno' in *L'inganno felice*, or the cavatina of Berenice in *L'occasione fa il ladro*, 'Vicino è il momento che sposa sarò' (ex.2), are all lovely examples. Rossini's vocal lines

1. Gioachino Rossini: portrait by Thomas Lawrence, chalk, c1824 (private collection)

here are less florid than in his later operas. Although some ornamentation would have been applied by singers, particularly in repeated passages, the style imposes limitations. Isabella in *L'inganno felice* could hardly sing in the vein of the heroines of *Semiramide* or *Elisabetta, regina d'Inghilterra*. The simplicity and balance of these melodic periods, which avoid the deformations that give Rossini's later melodies such variety, help explain their freshness and appeal. When a singer does break into coloratura, as Berenice in her expansive aria 'Voi la sposa pretendete', it normally forms a quasi-independent section before the final cadences, a procedure Rossini abandoned after his earliest operas.

Ex.2

Whereas Rossini grew in stature as a dramatist during his career, he was from the outset a consummate composer of overtures. Though early specimens do not exhibit all the typical characteristics of the more mature works, their appeal is immediate and genuine. Formally they are sonata movements without development sections, usually preceded by a slow introduction with a cantabile melody for oboe, english horn or french horn. The first group is played by the strings, the second group features the wind. The crescendo is part of the second group, though in these early works it is not fully standardized. Within this

schema, clear melodies, exuberant rhythms, simple harmonic structure and a superb feeling for sound and balance, together with such splendid details as the wind writing in *La scala di seta* or the beating bows in *Il signor Bruschino*, give the overtures their unique character. The qualities that make them unique as a group, though, are also the qualities which make them generic among themselves. Almost all these overtures served for more than one opera. Some of the transferences, as from *La pietra del paragone* to *Tancredi*, seem no less incongruous than the infamous vicissitudes of the overture to *Il barbiere di Siviglia*.

In a famous letter to Tito Ricordi, written in 1868, Rossini chided Boito for attempting innovations too rapidly. 'Don't think I am declaring war on innovators', he continued; 'I am opposed only to doing in one day what can only be achieved in several years . . . look, *with compassion*, at *Demetrio e Polibio*, my first work, and then at *Guglielmo Tell*: you will see that I was no crayfish!!!' Still, Rossini's early works have their own considerable charms, and to anyone who has a touch of Stendhal in his blood they remain delightful.

3. From 'Tancredi' to 'La gazza ladra'. With no effective copyright legislation existing in an Italy of separate states, Rossini's earnings from an opera were limited to performances in which he participated, and payments to a composer did not match those to a prima donna. Obliged to support both himself and, increasingly, his parents, Rossini plunged into one opera after another. The period from *Tancredi* to *La gazza ladra*, which intersects with his Neapolitan years, was one of constant travelling and frenetic compositional activity. Entire operas were prepared in a month, and Rossini's masterpiece, *Il barbiere di Siviglia*, occupied him for about three weeks. During this period he produced his great comic operas, works ranging from pure *buffo* to sentimental comedy, his more 'classical' serious operas, and his finest opera in the *semiseria* genre.

Relatively little is known of Rossini's life during these years. Anecdotes pertaining to his amorous pursuits and filial devotion abound, but only a few documents provide details. Thanks to the survival in a private collection of an archive of documents preserved by his father, the so-called 'Vivazza Archive', we possess at least some personal letters and documents, and they do suggest Rossini's deep attachment to his mother. Most reports stem from later in the century, however, and not even those originating with close friends such as Hiller, Alexis Azevedo or Edmond Michotte can be trusted: so many of the statements they attribute to Rossini are palpably false that one must suspect either that they embroidered his remarks or that he saw his early life and attitudes through the tinted glasses of his old age. One can be certain, however, that Rossini now became the leading Italian composer. His music was played and enthusiastically received almost everywhere.

Rossini's first two operas to win international acclaim were written consecutively for Venetian theatres: *Tancredi*, the idyllic *opera seria*, which was given at the Teatro La Fenice on 6 February 1813, and the zaniest of all *buffo* operas, *L'italiana in Algeri*, which was produced at the Teatro S Benedetto on 22 May 1813. For later generations the fame of *Tancredi* appeared to rest on the cavatina 'Tu che accendi', with its cabaletta 'Di tanti palpiti'. One need not invoke the old images of gondoliers singing and juries humming the tune to gauge its appeal. Thanking Tito Ricordi for a New Year's *panettone* in 1865, Rossini assured him it was worthy of 'the greatest Publisher (donor) and the author of the too famous cavatina "Di tanti palpiti" (receiver)'. Wagner's parody, the Tailors' Song in Act 3 of *Die Meistersinger*, is further evidence of its longevity. Rossini's melody seems to capture the melodic beauty and innocence characteristic of Italian opera, while escaping naivety by its enchanting cadential phrase, which instead of resting on the tonic F jumps to the major chord on the flattened third degree A♭ (ex.3). Rossini delighted in such harmonic games, even within the simplest phrase, and their piquancy gives his melodies their special charm.

But *Tancredi* is more than 'Di tanti palpiti'. It is Rossini's first great *opera seria*, and it exhibits the freshness of first maturity, of first formulated principles. There is little in *Semiramide* whose roots cannot be traced here. Formal procedures in particular, uncertain and tentative in earlier operas, assume the characteristics that were now to dominate Italian opera. It is impossible to prove that Rossini was an innovator here, since so little is known of the music of his contemporaries, but the force of his example was felt strongly by the legions of opera composers after him.

Rossini's formal procedures were compelling because they fused in a simple yet satisfactory manner the urge for lyrical expression and the needs of the drama. Although in *Tancredi* secco recitative still separates formal musical numbers, many important dramatic events occur within these numbers. There are occasional isolated lyrical moments, such as Amenaide's exquisite 'No, che il morir non è' of Act 2, but these play a decreasing role in Rossini's operas as he matured. Instead they are incorporated into larger musical units in alternation with dramatic events which motivate lyrical expression. The formal structure of standard arias, duets and first-act finales demonstrates this in various ways.

The problem of the aria is to permit lyrical expression to predominate without freezing the action. Often, especially in his cavatinas (entrance arias), Rossini composed two successive, separate lyrical sections, an opening cantabile and concluding cabaletta, thus giving the impression of dramatic change even when actual change is slight or non-existent. More normal is the approach taken in Amenaide's 'Giusto Dio che umile adoro' of Act 2 of *Tancredi*. Amenaide is alone on the stage. After a short scena her aria begins with a lyrical solo, a prayer for the victory of her champion. In a section of contrasting tempo and tonality, the chorus enters and describes his victory. Emphatically not lyrical, the music

depends instead on orchestral figures, declamatory non-periodic solos and choral interjections. The cabaletta now concludes the aria in its original key. Amenaide contemplates her joy in a lyrical period, first expressively, then in exuberant coloratura. 'The chorus and other characters immediately applaud', in the words of Pietro Lichtenthal, a contemporary detractor, 'and She [Queen Cabaletta], all kindness, returns to content her faithful audience by repeating with the same instrumental plucking the celestial melody.' Rossini's multi-sectional aria with cabaletta may not be the ideal solution to the problem of the aria, but it permits lyrical sections to co-exist with dramatic action and gives the singer, during the repetition of the cabaletta theme, the flattering option of ornamenting the melody. That the cabaletta was both useful and aesthetically satisfying was perceived by Verdi as late as *Aida*, when he wrote to Opprandino Arrivabene in reaction to criticism about his use there of a quasi-cabaletta: 'it has become fashionable to rail against and to refuse to hear cabalettas. This is an error equal to that of the time when only cabalettas were wanted. They scream so against convention, and then abandon one to embrace another! Like flocks of sheep!!'.

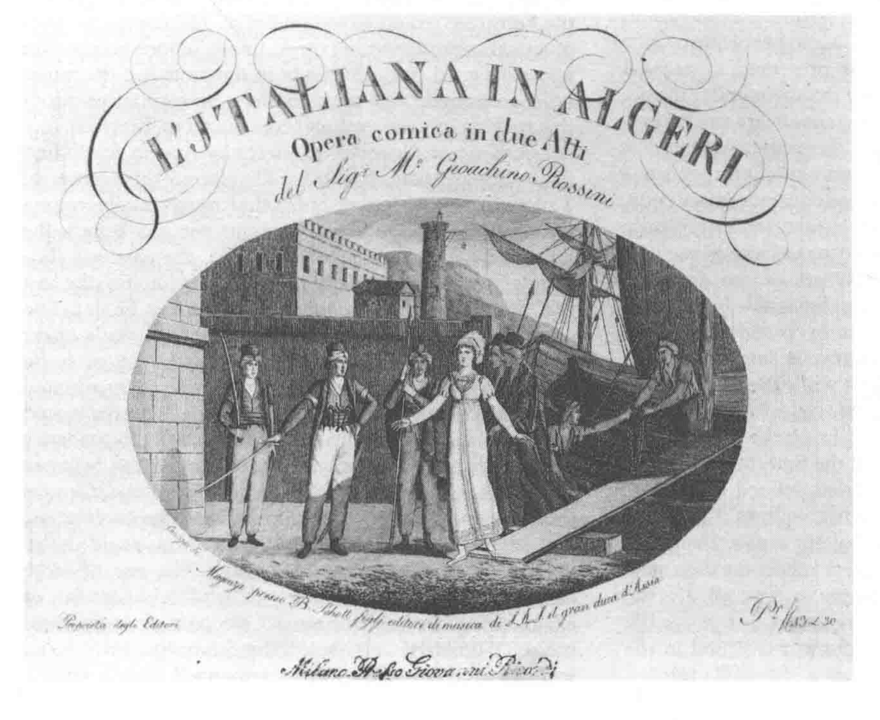
The duet poses a different problem. 18th-century *opera seria* tended to minimize ensembles. Under the influence of *opera buffa*, ensembles gradually infiltrated the grand Metastasian design, until by 1800 ensembles within the act and lengthy finales were the norm. As Rossini matured, the number of his solo arias (with or without assisting chorus) decreased until, in an opera such as *Maometto II*, they play a small role. There are of course purely lyrical duets, like the already cited 'Questo cor ti giura amore' from *Demetrio e Polibio*. But Rossini's problem was to perfect a duet form that offered the characters opportunity for lyrical expression while centring on their dramatic confrontation. The duet 'Lasciami, non t'ascolto!' for Tancredi and Amenaide exemplifies his solution. Essentially in four parts, the duet begins with a confrontation that dramatically motivates the whole composition, Tancredi's belief in Amenaide's guilt and her protestations of innocence. The initial clash is presented in parallel poetic stanzas, normally set to the same or similar music. Here the settings differ only in details of ornamentation and in tonality: Tancredi's is in the tonic, Amenaide's modulates to and remains in the dominant. Once positions have been stated, the characters often continue in dialogue, though in this example an orchestral modulation (typically to the mediant major) leads directly to the second section. The latter is a lyrical contemplation of the dramatic situation. Though the characters basically have quite different views, they express them in 'pseudo-canon' to the same or parallel texts, one character singing a lyrical phrase alone, the other repeating it while the first supplies brief counterpoints. Overlapping lyrical phrases and cadences, often in 3rds and 6ths, bring the section to a close. The third section can recall the first, but is freer in design. Action is taken, new positions defined, a motivating force established, while the music follows the events, preparing the final section, a cabaletta *a due*. Using the form outlined above, the characters reflect on their new positions, shout out new challenges and so on. (In the *Tancredi* duet older printed editions do not show the repetition of the cabaletta theme, but it is found in the autograph.)

The first-act finale is quite similar to the duet, with the standard addition of a short opening ensemble or chorus. Since more action is to be incorporated into the music, the kinetic sections are longer and more flexible. Action is advanced through passages of arioso and simple declamation over orchestral periods, often identical in both kinetic sections. The latter are followed, respectively, by a slow ensemble, called a 'Largo', and a concluding cabaletta, referred to in the finale as a 'stretta' but indistinguishable in shape and function from the normal cabaletta. The *Tancredi* finale is a pure example, but with the addition of extra internal movements the model holds for most contemporary *opera seria*. Indeed, except for a less rigid stretta, the act 'Il contratto nuziale' from Donizetti's *Lucia di Lammermoor* concludes with a textbook example of the Rossini finale, the famous sextet forming the Largo. The same holds for the first-act finale of Verdi's *Nabucco*. Once again, Rossini's underlying plan balances various forces, musical, dramatic and vocal.

The difficulty with these formal conventions is that form too easily degenerates into formula. But the procedures do permit diverse handling and effective modifications. *Tancredi* manifests them in their pristine state. The lines are clear, the melodies crystalline, the rhythms vital without being exaggerated, the harmonies simple but with enough chromatic inflections to keep the attention. Orchestral writing is kept in perfect control, with the wind offering numerous colouristic solos. Heroic and idyllic moods dominate, and Rossini captured well the pseudo-Arcadian spirit. Although the world of *Semiramide* is implicit here, its realization seems far off.

Not all the music of *Tancredi* partakes in these formal conventions. For a revival of the opera in Ferrara shortly after the première, Rossini replaced the opera's original happy ending with a tragic finale. In this he was sustained by Luigi Lechi, a literary figure and long-term companion of the prima donna, Adelaide Malanotte. Lechi provided the text of the new finale after Voltaire's original drama. Rossini's music seems to aspire to the Gluckian ideal, but the Ferrarese would have none of it. The composer, ever practical, abandoned his tragic finale, whose manuscript was consigned to Lechi. Only in our time has the music been recovered, and most modern performances adopt this striking, unconventional conclusion to *Tancredi*.

L'italiana in Algeri, to a libretto by Angelo Anelli first set by Luigi Mosca (1808), fully shared the success of *Tancredi*. It is an *opera buffa* that moves easily among the sentimental (Lindoro's 'Languir per una bella'), the grossly farcical (the 'Pappataci' trio), the patriotic (Isabella's 'Pensa alla patria'), and the sheer lunatic (the 'cra cra, bum bum, din din, tac tac' of the first finale). Too often, critics stress the extent to which Rossini's *opera seria* is enriched through elements of the *opera buffa* without looking at the reverse: how *opera buffa* adopted elements from the *seria*. The aria 'Pensa alla patria' would have no place in a classical *opera buffa*, and this tendency develops further in *La Cenerentola*. Similarities between the genres are as important as their divergences. Of course there are no *buffo* arias *per se* in Rossini's serious operas, and devices such as mechanical repetition, rapid declamation to the limits of the possible, the use of large intervals in a grotesque manner ('Pappataci Mustafà') or exaggerated contrasts of tempo are part of *buffo* technique. Similarly, elaborate, orchestrally introduced scenas, often preceding major arias in Rossini's serious



operas, rarely appear in the *buffo* world. The heroic *coro e cavatina* is reserved for the *opera seria*, though Rossini satirized the procedure in Dandini's mock-heroic entrance in *La Cenerentola*, 'Come un'ape ne' giorni d'aprile', or even in Isabella's 'Cruda sorte! amor tiranno!' from *L'italiana*.

But so many elements are similar. All the formal designs of the *opera seria* recur in the *opera buffa*, though treated with the greater internal freedom characteristic of the *buffo* heritage. The rhythmic verve of *opera buffa*, which depends on rapid orchestral melodies as a background for quasi-declamatory vocal lines, easily passes to the serious style and helps expand enormously the amount of action incorporated into musical numbers. Though the stretta of an *opera seria* finale would never adopt the 'bum bum' fracas of *L'italiana*, there is really scant difference in character between the close of the first-act finale in the serious *Aureliano in Palmira* and the comic *Il turco in Italia*. Nor does the orchestration differ greatly between the genres. The ease with which a single overture could introduce a serious or a comic opera is well known. This confounding of types, particularly the rhythmic vitality injected from the *opera buffa* into the *seria* and the introduction of more noble sentiments into stock *buffo* figures, is central to an understanding of Rossini's music and its effect on his contemporaries. Though the traditional *buffa* prevails gloriously in *L'italiana*, *La Cenerentola* is only four years away.

After *Tancredi* and *L'italiana*, Rossini's fame was assured. From the end of 1813 until the summer of 1814 he was largely in Milan, mounting and revising for the Teatro Re his two Venetian successes, and composing for La Scala two new operas, *Aureliano in Palmira* (26 December 1813) and *Il turco in Italia* (14 August 1814). The role of Arsace in the former was sung by the last great castrato, Giambattista Velluti. Although the castrato hero had been superseded by the contralto (Rossini's Tancredi, Malcolm in *La donna del lago*, Calbo in *Maometto II* and Arsace in *Semiramide* are all breeches roles) and by the tenor (Othello, Rinaldo in *Armida*, Osiride in *Mosè in Egitto* and Ilo in *Zelmira*), Velluti remained a powerful figure. Rossini again wrote a part for him in his 1822 cantata *Il vero omaggio*, prepared for the Congress of Verona, but Velluti's greatest triumph was as Armando in Meyerbeer's last Italian opera, *Il crociato in Egitto* of 1824, one of the last significant castrato roles.

Velluti's importance for Rossini centres on an anecdote too widely accepted, according to which Velluti so ornamented Rossini's music that it was unrecognizable. Enraged, the composer vowed thenceforth to write out all ornamentation in full. It is an amusing story; but Rodolfo Celletti has conclusively demonstrated its fatuousness. While Rossini's melodies do tend more and more toward the decorative and florid, it is a gradual process. Rather than a matter of disciplining singers, Rossini's florid style is a mode of musical thought whose development can be traced from *Demetrio e Polibio* to *Semiramide*. At least one piece from *Aureliano* was published with Velluti's ornaments, the duet 'Mille sospiri e lagrime'. It is not certain that these are the variants he sang in Milan, but they are no more objectionable than ornamented versions of Rossini arias by other singers published in Paris in the 1820s. There is no hard evidence that Velluti had any effect on Rossini's vocal style, and there is no quantum jump between *Aureliano* and *Elisabetta, regina d'Inghilterra*, Rossini's first Neapolitan opera and, according to legend, the first opera in which he left no space for singers' ornamentation.

Aureliano was only moderately successful with the Milanese; *Il turco in Italia*, to a libretto by Felice Romani, fell flat. The fault did not lie with the opera, which is as masterful as *L'italiana* and, particularly in its Pirandellian Poet, even more sophisticated. The Poet, however, was not Romani's invention: like much of the libretto this enigmatic figure derives from an earlier libretto of the same name by Caterino Mazzolà, first performed at the court of Dresden in 1788 with music by Franz Joseph

2. Title-page of the first edition of the vocal score of Rossini's 'L'italiana in Algeri' (Mainz: Schott, c1819): engraving of Act 1 scene ii by Cöntgen; this copy bears the stamp of the selling agent Ricordi

Seydelmann. Ignorant of the pre-history of the libretto, the Milanese believed *Il turco* to be an inversion of *L'italiana* and claimed also to hear extensive self-borrowing in the music. But *Il turco* is actually one of Rossini's most carefully constructed comic operas. Except for a few short motifs (for example, the opening motif of the duet 'Io danari vi darò' from *Il signor Bruschino* is the basis for the first section of the magnificent Geronio-Fiorilla duet 'Per piacere alla signora'), the opera is newly composed.

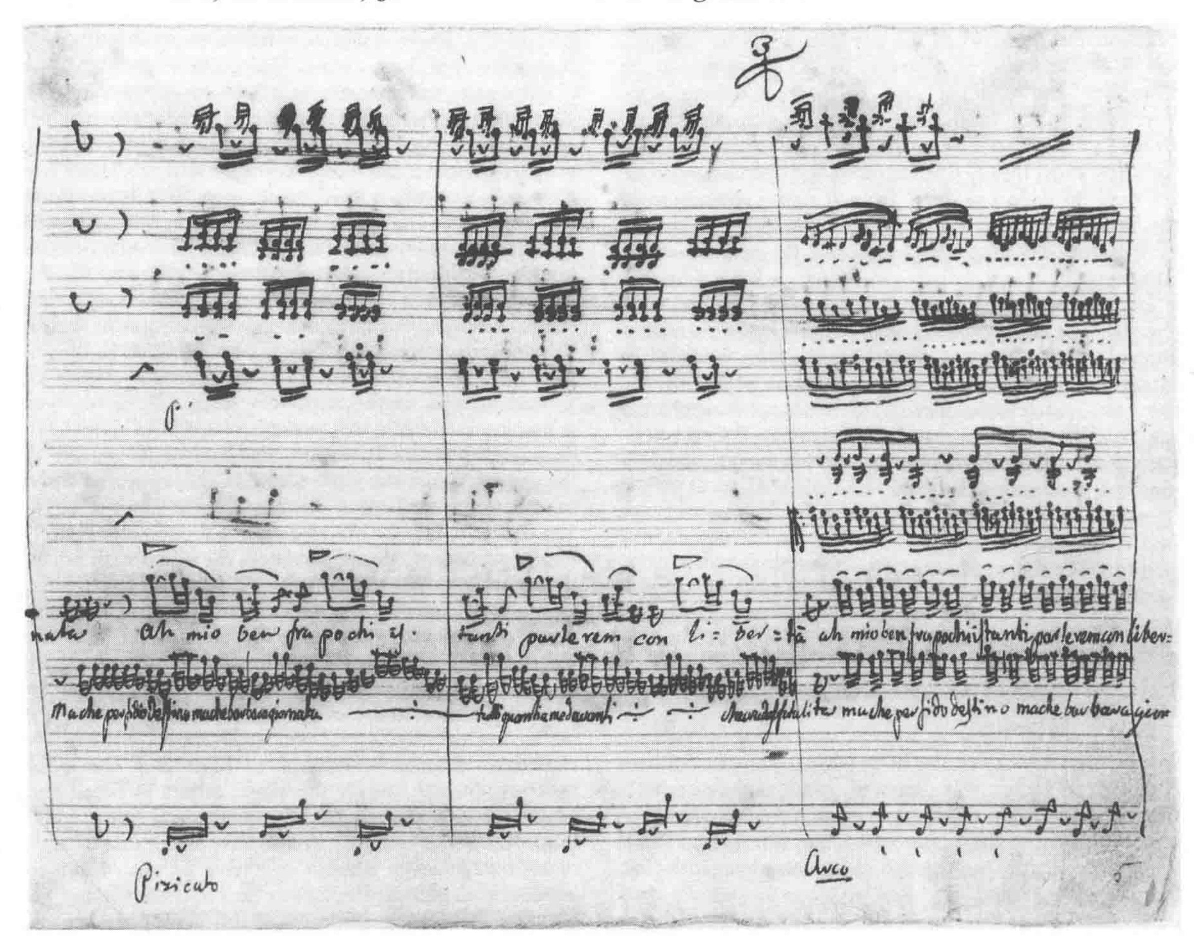
In the ensembles Rossini shines, and the quintet 'Oh guardate che accidente!' is one of the best he ever wrote.It is also one of the most disturbing, as Don Geronio is thrust deeper and deeper into a confusion of identity as the music and masqueraded characters swirl around him. The trio 'Un marito scimunito!' presents the Poet projecting a plot around the misfortunes of his friends, until in fury they turn on him singing:

Atto primo, scena prima,
Il poeta, per l'intrico,
Dal marito e dall'amico
Bastonate prenderà.

Rossini's setting is unique among his ensembles. The entire piece grows from a figure in semibreves, played alone and then accompanying the orchestral motif round which the *buffo* declamation revolves (ex.4).

By the end of the year Rossini was again in Venice, writing *Sigismondo* for the carnival season at La Fenice. Although its failure was deserved, some of the numbers that critics praise in *Elisabetta, regina d'Inghilterra* were originally written for *Sigismondo*. Azevedo quoted Rossini concerning the publication of his complete works by Ricordi in the 1850s:

> I remain furious . . . about the publication, which will bring all my operas together before the eyes of the public. The same pieces will be found several times, for I thought I had the right to remove from my fiascos those pieces which seemed best, to rescue them from shipwreck by placing them in new works. A fiasco seemed to be good and dead, and now look they've resuscitated them all!



The extent and character of Rossini's self-borrowing remains to be investigated, although serious analytic work has finally been done on the three operas that most prominently depend on the recycling of earlier music: *Elisabetta, regina d'Inghilterra*, *La gazzetta* and *Eduardo e Cristina*.

Elisabetta, Rossini's next opera (4 October 1815), opens his Neapolitan period and almost exclusive involvement with *opera seria*. During the first years (1815–17) of his association with Naples, however, Rossini produced several major works for other cities, including two comic operas, *Il barbiere di Siviglia* and *La Cenerentola*, and two in the *semiseria* genre, *Torvaldo e Dorliska* and *La gazza ladra*. These works, so different as a group from his Neapolitan operas, may be examined first.

Soon after the première of *Elisabetta* Rossini went to Rome, where he wrote two operas during the carnival season. The first, *Torvaldo e Dorliska*, opened the season at the Teatro Valle (26 December 1815). There are attractive elements in this rescue opera, but its reception was mediocre. The day after the première, Rossini signed a contract with the rival Teatro Argentina to compose an opera, to a libretto chosen by the management, for the close of carnival. (There is ample evidence, however, that several weeks earlier he had been negotiating with and on behalf of the Argentina.) After a subject offered by Jacopo Ferretti had been rejected, Cesare Sterbini, author of *Torvaldo*, was summoned. The resulting opera was *Almaviva, ossia L'inutile precauzione*, a title adopted to distinguish it from Paisiello's well-known *Il barbiere di Siviglia*, although the more common title appeared when the work was revived in Bologna during summer 1816. The relative failure of *Almaviva* on opening night is hardly surprising, if one considers the speed with which it was mounted. But stories, even by the original Rosina, Geltrude Righetti-Giorgi, which claim that Rossini extensively altered the opera are constructed on air. The standard overture was undoubtedly performed at the première; since Rossini often prepared overtures last, he probably turned to the overture of *Aureliano in Palmira* for lack of time or lack of will to compose another. (He turned to *Aureliano* and not to *Elisabetta*: the latter overture, though largely the same, differs in detail and has a heavier orchestration.) Manuel Garcia, the original Lindoro, cannot be shown ever to have inserted a serenade of his own, though Rossini may have permitted him to improvise an accompaniment to 'Se il mio nome saper voi bramate'. The autograph contains the melody in Rossini's hand and guitar chords in another, except for an important modulation that Rossini obviously feared might be misinterpreted by his singer-guitarist. The libretto printed for the première gives essentially the same text as modern editions; the opera played on 20 February 1816 was the opera known today.

Il barbiere di Siviglia is perhaps the greatest of all comic operas. Beethoven thought well of it; Verdi wrote to Camille Bellaigue in 1898: 'I cannot help thinking that *Il barbiere di Siviglia*, for the abundance of true musical ideas, for its comic verve and the accuracy of its declamation, is the most beautiful *opera buffa* there is'. Rossini was faced with one of the best librettos he ever set, one in which the characters are keenly sketched and the dramatic situations are planned for a maximum of effective interaction among those characters. Add to this that the libretto was based on an excellent play by Beaumarchais, featuring the incomparable Figaro, and it is no surprise that Rossini took fire. The opera soon gained an enormous success that has never diminished. From Lindoro's miniature canzona 'Se il mio nome saper' to Rosina's delicious cavatina 'Una voce poco fa', which so perfectly captures the wily heroine, to the uproarious first-act finale, the compositions achieve in turn melodic elegance, rhythmic exhilaration, superb ensemble writing and original and delightful orchestration, particularly when heard in Alberto Zedda's critical edition (Milan, 1969), stripped of the extraneous accretions of 'tradition'. The formal models of earlier operas are adapted to specific dramatic situations with such cleverness and irony that

3. Page from the autograph MS of Rossini's 'Il barbiere di Siviglia', 1816, showing part of Almaviva's 'Pace e gioia' from Act 2 (I-Bc UU 2/1–2)

they seem eternally fresh. Basilio's 'La calunnia' is an apotheosis of the Rossini crescendo. The orchestral phrase that is to serve for the crescendo first appears in the strings alone, *sul ponticello* and *pianissimo*, as an orchestral background for Basilio's narration. Then a gradual increase in orchestral forces, with a movement upward in register, a change to the regular position in the strings, and the introduction of staccato articulation, all produce the enormous crescendo as rumour spreads from mouth to mouth. Bartolo's 'A un dottor della mia sorte', on the other hand, is one of the most rapid patter songs ever written. There is the delightful incongruity of form and content in the trio 'Ah! qual colpo inaspettato!', where the Count and Rosina go through 'obligatory' formal conventions, including a strict cabaletta repeat of 'Zitti zitti, piano piano', while their escape ladder disappears and Figaro hopelessly mimics and prods them along, only to be forced to wait out the exigencies of form. Every piece is filled with such riches. *Il barbiere di Siviglia* is an opera that can be appreciated on many levels, and what it may lack in the humanity of Mozart's *Le nozze di Figaro* it retrieves in glorious musical spirit and wit.

After two more Neapolitan operas, *La gazzetta* and *Otello*, Rossini returned to Rome, where on 25 January 1817 he produced *La Cenerentola*, with the contralto Righetti-Giorgi again in the title role. *La Cenerentola* markedly turns away from the delirious style of *L'italiana* and *Il turco*. There are, of course, the normal *buffo* roles. Don Magnifico aspires to be the archetypal Italian comic, but an undertone of malevolence darkens him considerably. Dandini, the servant dressed as the prince and trying to sound like him, is more subtle and more amusing. The duet 'Un segreto d'importanza', in which Dandini reveals his true identity to Magnifico, is brilliantly witty, and Rossini's setting is superb. Once the secret is out, the tentative opening phrase (ex.5*a*) is transformed into the spirited tune of the final Allegro (ex.5*b*). In the fashion of *L'italiana* the confused Magnifico babbles:

> Tengo nel cerebro
> un contrabbasso
> Che basso basso frullando va,

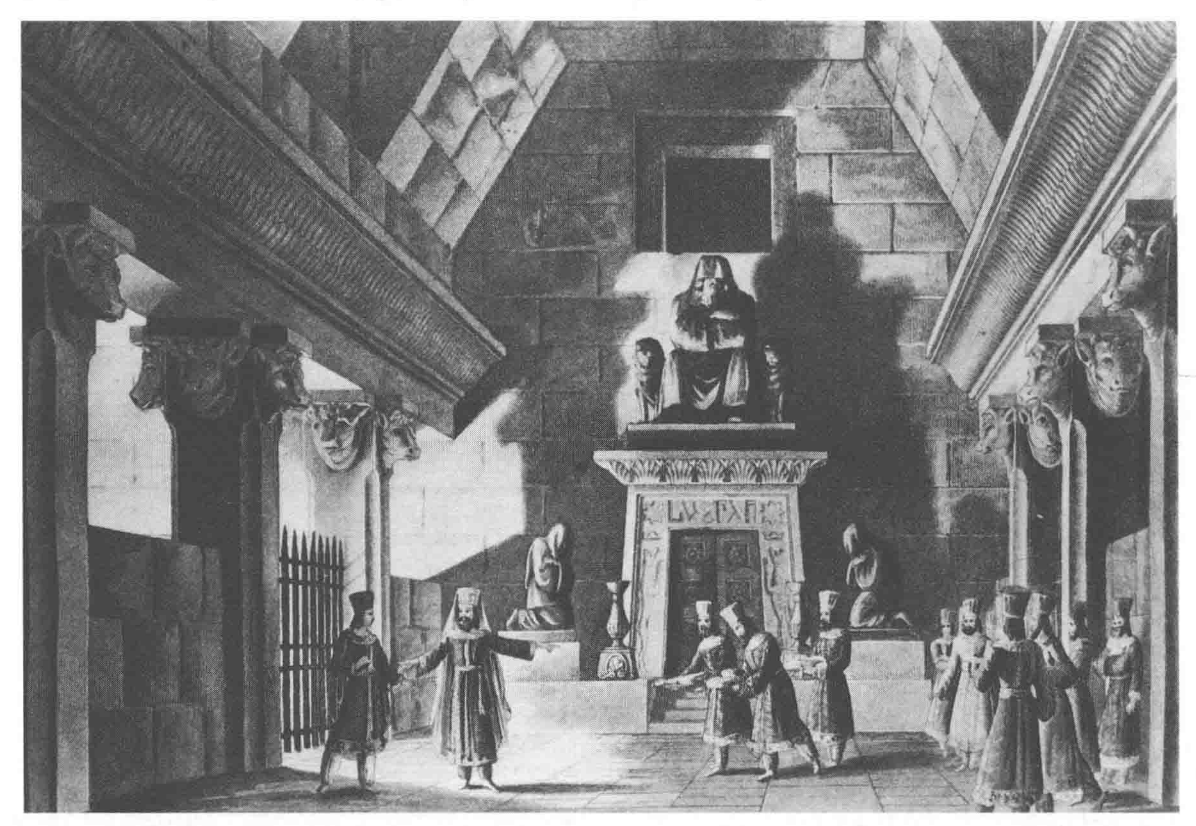
with the requisite leaps and quick patter.

What sets *La Cenerentola* apart, though, is the nature of the Cenerentola-Don Ramiro story, the sentimental tale, the transformation of the scullery maid who sings 'Una volta c'era un re' in the introduction of Act 1 into the royal maiden who, with full coloratura regalia, ends the opera with 'Nacqui all'affanno e al pianto'. The shy mouse of the duet 'Un soave non so che', with her charmingly incoherent 'Quel ch'è padre non è padre', grows into the mature woman who, in the sextet 'Siete voi? voi Prence siete?', can, to the beautiful melody 'Ah signor, s'è ver che in petto', forgive those who have wronged her. Far removed from the tone of an Isabella or Rosina, Cenerentola is a character who anticipates the

Ex.5

heroines of sentimental dramas, such as Bellini's *La sonnambula*.

La gazza ladra, produced in Milan on 31 May 1817, takes the process further. The rustic setting, as later in *La sonnambula*, heralds a tragi-comedy, the *opera semiseria* genre so popular in this period. Not until Verdi's *Luisa Miller* was a rustic scene permitted to serve as background to real tragedy. Some critics have deplored a lack of profundity in Rossini's characterization of the evil forces in the opera, particularly the Podestà, but this objection loses sight of the genre. The Podestà must function as a semi-*buffo* figure to sustain disbelief in the reality of the forces that appear to be bent on Ninetta's inevitable destruction. Indeed Rossini develops the characters quite carefully, avoiding both the exaggerations of *buffo* style and the postures of *opera seria*. Ninetta's simplicity, even when overwhelmed by events, differentiates her entirely from his earlier, more sophisticated heroines. In both the sweetness of the opening of her duet with Pippo, 'Ebben, per mia memoria', and the almost monotone declamation at 'A mio nome deh consegna questo anello', set over a theme used earlier in the sinfonia, Ninetta is the image of persecuted innocence. Her prayer at the start of the second-act finale, framed by a funeral march, is extremely touching, the more so for Rossini's restraint in the use of ornament. Fernando, her father, is one of the composer's finest bass roles, and his agony is vividly expressed musically. The pedlar, Isacco, is sketched with just a few touches but they are witty and telling, especially in his street song, 'Stringhe e ferri'. Though Giannetto makes a bland lover, his parents are well characterized. To begin the opera, Rossini wrote one of his finest overtures, filled with novel and striking ideas from the opening antiphonal snare drum rolls and military march, to the first group in the minor (later employed in Ninetta's prison scene) and the superb crescendo.



Rossini began his maturity close to 18th-century models but gradually established his own approaches to musical form, melodic writing and dramatic characterization. Since this period of his first maturity includes his better-known music, one tends to characterize his total operatic output by it and to see him as essentially Classical rather than Romantic. But if the Romantic tradition in Italian opera is defined through the works of Bellini and Donizetti, this tradition is unthinkable without the developments that Rossini's style underwent both in his first maturity and in the years immediately following, years in which the composer's base of operations was established in Naples.

4. NAPLES AND THE 'OPERA SERIA', 1815–23. By 1815 Rossini's operas were played almost everywhere, but in Naples they were ignored. That the Neapolitans, with their long, flourishing native traditions, were loath to welcome a brash northerner into the temple of Cimarosa and the still-living Paisiello is understandable. Indeed, the advent of Rossini marked the end of Neapolitan dominance in Italian opera. But the powerful and shrewd impresario of the Neapolitan theatres, Domenico Barbaia, seeking to revitalize operatic life in Naples, invited Rossini both to compose for his theatres and, soon, to serve as their musical and artistic director. From 1815 until 1822 Rossini was to reign over this domain, and the initial resistance he encountered from the fiercely nationalistic Neapolitans gradually dissolved as he became their adopted favourite son.

Although Rossini was granted the right to travel and compose for other theatres, after *La gazza ladra* few of the fruits of these travels could bear comparison with the Neapolitan operas. Indeed Rossini's Neapolitan period was important precisely because he wrote for a specific theatre, the Teatro S Carlo, with a fine orchestra and superb singers. He could write more deliberately and be assured of adequate rehearsals. He could come to know the strengths of his company and they could develop together. The growth of Rossini's style from *Elisabetta, regina d'Inghilterra* to *Zelmira* and, ultimately, *Semiramide*, is a direct consequence of this continuity. Not only did Rossini compose some of his finest operas for Naples, but these operas profoundly affected operatic composition in Italy and made possible the developments that were to lead to Verdi.

It is often asserted that Rossini's first Neapolitan opera, *Elisabetta*, opened a new stylistic era, but the chronologically significant point is not equally important musically. *Elisabetta* belongs to the world of *Aureliano in Palmira* and *Sigismondo*, not to the world of *Mosè in Egitto* or *La donna del lago*. To call it the first opera in which Rossini wrote out the coloratura is a great exaggeration (see above). Although it is the first of his operas in which all recitative is accompanied by strings, Mayr had done this two years earlier in *Medea in Corinto*, written for the same Neapolitans who, largely under French influence, were demanding the rejection of secco recitative in *opera seria*. Much of the music of *Elisabetta* is salvaged from earlier operas, and the new pieces offer little novelty. As Rossini's first opera for Isabella Colbran, whose highly ornamental style of singing was to affect Rossini's musical thought, *Elisabetta* is important, but it marks no significant reform or progress in the character of the *opera seria*.

The same cannot be said of *Otello*, composed a year later. After the première of *Elisabetta*, Rossini returned to Rome for *Torvaldo e Dorliska* and *Il barbiere di Siviglia*. During his absence fire destroyed the old Teatro S Carlo. While Barbaia rapidly rebuilt it, Rossini composed two operas for other Neapolitan theatres, *La gazzetta* and *Otello*. The former was given at the Teatro dei Fiorentini on 26 September 1816. This theatre was the home of traditional Neapolitan *opera buffa*, and Rossini used Neapolitan dialect for the main *buffo* role, Don Pomponio, sung by Carlo Casaccia, who made a

4. Stage design (Act 2 scene ii) by Alessandro Sanquirico for the first Milan performance of Rossini's 'Semiramide', 1824 (Museo Teatrale alla Scala, Milan)

speciality of such parts. Indeed, when *La Cenerentola* was revived for the Teatro del Fondo in spring 1818, Casaccia played Don Magnifico in dialect, perhaps with Rossini's approval. *La gazzetta* was even more derivative than *Elisabetta*. It is as if Rossini were gauging his new audience by drawing together successful numbers from lesser-known operas before attempting an original work. Several numbers are lifted whole from *Il turco in Italia*, including the entire masked ball scene in Act 2, with the chorus 'Amor la danza mova' and the quintet, 'Oh! vedete che accidente'; a trio is taken without change from *La pietra del paragone*; and several pieces are largely derived from *Torvaldo e Dorliska*. These operas were unknown in Naples, Rossini had no desire to revive them there (unlike *L'italiana in Algeri*, which he offered in 1815 contemporaneously with the production of *Elisabetta*), and thus they could be freely pillaged. After *La gazzetta* he rarely resorted to borrowing for his Neapolitan operas.

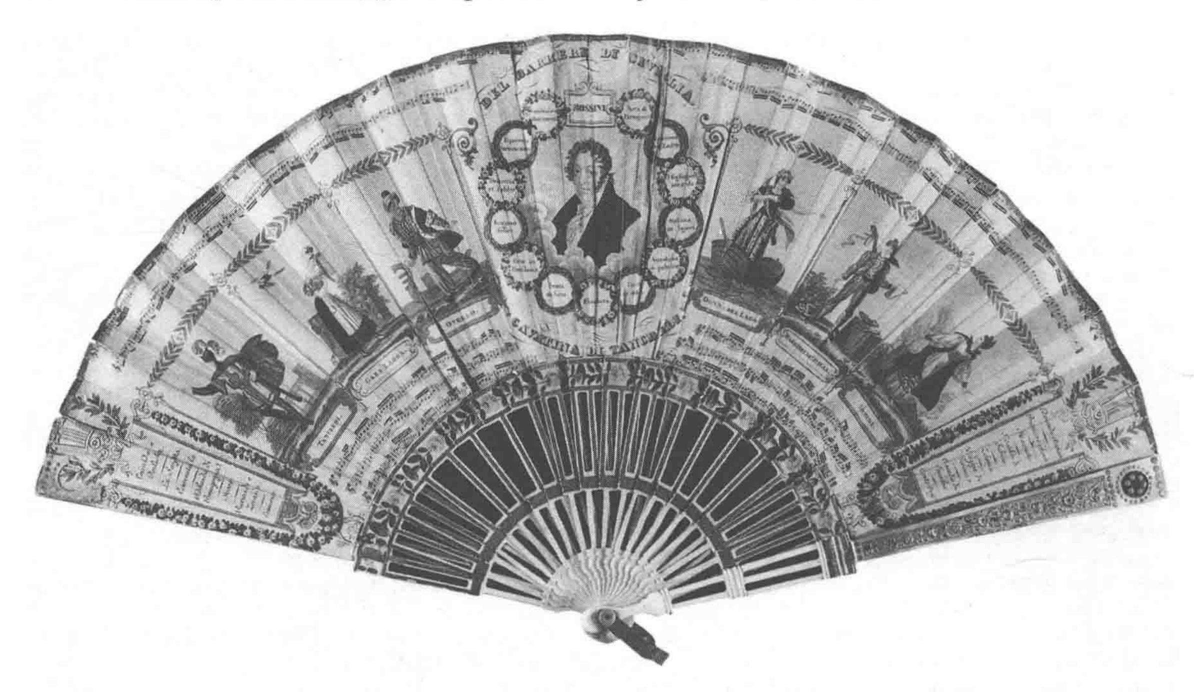
With *Otello*, given at the Teatro del Fondo on 4 December 1816, Rossini emerges as a composer of quite a different stature. The work has had a complicated reception in the English-speaking world: Byron notoriously wrote in 1818 'They have been crucifying Othello into an opera'. But this intolerance with respect to Berio's libretto fails to recognize that the direct source of the opera was not the Shakespeare play but rather its French adaptation by J.F. Ducis, the version commonly known throughout Europe at the time. Even the first two acts provide the composer with some wonderful musical opportunities: memorable are the Duettino for Desdemona and Emilia ('Vorrei che il tuo pensiero'), with its elaborate orchestral introduction; the extended first-act finale, with its notable ensembles ('Ti parli l'amore' and 'Incerta l'anima'); and the duet in which Iago encourages Othello's jealousy ('Non m'inganno; al mio rivale').

While Berio's libretto reduces the complexities of the drama into a standard story of rivalry, with two tenors striving for the hand of a prima donna, it rises to an altogether different level in its masterful third act. Rossini treats the act as a single musical entity, and although one can identify the Gondolier's canzona, the Willow Song and prayer, the duet, and the final catastrophe, none is truly independent. Desdemona's Willow Song is ostensibly strophic, but Rossini's handling of vocal ornamentation gives it a more sophisticated structure. The first strophe is simple, a beautiful harp-accompanied melody. The second is more ornamented, and the third is quite florid. But the storm brews without and within, and when, after a short section of arioso, the frightened Desdemona begins the final strophe, it is utterly barren of ornament. Finally, unable to finish, she trails off into arioso. Although the first section of the Othello-Desdemona 'duet' is traditional, its ending, which builds in intensity until Othello kills Desdemona, is not. There is no dramatic room for a cabaletta, and Rossini offers none, though the text had been fashioned to suggest the typical cabaletta structure. Throughout this act, the drama is the controlling element, and the music, while never abdicating its own rights, reinforces it. In Act 3 of *Otello* Rossini came of age as a musical dramatist.

After trips to Rome and Milan for *La Cenerentola* and *La gazza ladra*, Rossini returned to Naples, where from

1817 until 1822 his most significant operas were written. These include *Armida* (9 November 1817), *Mosè in Egitto* (5 March 1818), *Ricciardo e Zoraide* (3 December 1818), *Ermione* (27 March 1819), *La donna del lago* (24 October 1819), *Maometto II* (3 December 1820) and *Zelmira* (16 February 1822). Though written for Venice, *Semiramide* (3 February 1823) is a fitting climax to this period and brings to a close Rossini's Italian career. Few of the works written for other cities approach the Neapolitan ones. *Adelaide di Borgogna* (Rome, 27 December 1817), *Adina* (a one-act *farsa* written in 1818, though not performed until 12 June 1826 in Lisbon) and *Eduardo e Cristina* (Venice, 24 April 1819, but a pasticcio) are inferior in quality. *Bianca e Falliero* (Milan, 26 December 1819), while dramaturgically undistinguished, contains some of Rossini's most beautiful music, with a piquant harmonic palette and a surprisingly elaborate approach to phrase structure. *Matilde di Shabran* (Rome, 24 February 1821) is an unusually serious and extended *opera semiseria*, the only one of these operas that Rossini produced in Naples (at the end of 1821, extensively revised, with one of the comic roles recast in Neapolitan dialect).

Criticism of Rossini's Neapolitan operas, beginning with Stendhal, has concentrated too heavily on the singers Isabella Colbran, Andrea Nozzari, Giovanni David and Rosmunda Pesaroni, whose vocal talents left an indelible and not wholly positive mark on Rossini's style. They all specialized in florid singing that could be dazzling in its splendour but monotonous in its ubiquity. In his Neapolitan works Rossini rarely failed to exploit the characteristic strengths of these voices. Attention given to this aspect of Rossini's art was intensified by his personal relations with Isabella Colbran. When Rossini arrived in Naples, she appears to have been Barbaia's mistress. Her unusual vocal abilities, as a dramatic soprano capable of elaborate *fioritura*, and her Spanish beauty combined to entrance the composer. Some time between 1815 and 1822 he replaced Barbaia as Colbran's favourite, and in 1822, in Bologna, married her. The marriage was never very fortunate, but a false image of Rossini led by the whims of his prima donna has persisted. Though she clearly exerted some influence on his musical style, the exaggeration of its importance is based on a misreading of the Neapolitan operas. That all these works have seen major revivals in the theatre over the past 20 years has cast them in a very different light.



Solo singing is of course important in these works. Malcolm's cavatina 'Elena! oh tu che chiamo' from *La donna del lago*, Orestes' cavatina 'Che sorda al mesto pianto' from *Ermione*, and Arsace's cavatina 'Ah! quel giorno ognor rammento' from *Semiramide*, each a standard entrance aria with an introductory scena, a slow and florid *primo tempo* and a rousing cabaletta, are all beautiful pieces, but they define their characters so generically that they were used almost interchangeably during the 19th century. Rossini himself put 'Che sorda al mesto pianto' into *La donna del lago* (1819, Naples) and its *primo tempo* (together with a cabaletta from *Otello*) into *Matilde di Shabran* (1829, Paris). Since he had 'neglected' to compose a cavatina for Desdemona in *Otello*, the great singer Giuditta Pasta supplied her own, adopting 'Elena! oh tu che chiamo' for the purpose. This same interchangeability affects the final rondos Rossini composed for a few operas. Elena's 'Tanti affetti in tal momento', which brings down the curtain in *La donna del lago*, found a home in many Rossini operas, at least twice through the composer's own actions (in *Bianca e Falliero* and in the 1823 Venetian revision of *Maometto II*). These arias, all virtuoso pieces, offer enormous technical difficulties, but also contain simpler vocal periods and delicate orchestral shading to raise them above the level of pure technique. What they may lack in delineation of character they recover in the glorious sound that wells inexhaustibly from Rossini.

Focussing undue attention on the soloists can mask the far-reaching advances in musical thought in these Neapolitan operas. Though *Guillaume Tell* is Rossini's most ambitious opera, its basis is laid in Naples. And Rossini was not first exposed to French opera in Paris: he directed the revival of Spontini's *Fernand Cortez* at the Teatro S Carlo in 1820, shortly before he composed *Maometto II*. The importance Rossini attached to the latter is apparent. After its indifferent reception in Naples, he revised it for Venice in 1823, immediately before the *Semiramide* première, and in 1826 used it to initiate his Parisian career, as *Le siège de Corinthe*. Similarly, the finest numbers in *Moïse*, Rossini's second Parisian opera, are already found in its Italian model, *Mosè in Egitto*.

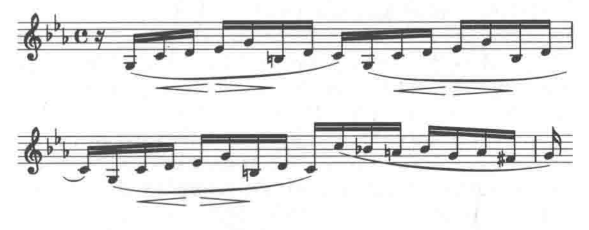
From a dramaturgical viewpoint, the Neapolitan operas are strikingly original and diverse. Their literary sources run the gamut. An Italian Renaissance verse epic, Tasso's *Gerusalemme liberata*, provides the source for *Armida*. Two major dramatic traditions of the 17th century are represented: English Renaissance drama (Shakespeare's *Othello* for *Otello*) and French classical tragedy (Racine's *Andromaque* for *Ermione*). Among 18th-century literary genres there are characteristic mock-epics (Forteguerri's *Riciardetto* for *Ricciardo e Zoraide*) and neo-classical drama from France (De Belloy's *Zelmire* for *Zelmira*) and Italy (Ringhieri's *L'Osiride* for *Mosè in Egitto*). Among the more recent literary genres we find the gothic novel (Sophie Lee's *The Recess* for *Elisabetta, regina d'Inghilterra*), English Romantic poetry (Sir Walter Scott's *The Lady of the Lake* for *La donna del lago*), and early Italian Romantic drama (Della Valle's *Anna Erizo* for *Maometto II*). Had Rossini laid down a formal programme for the absorption of the major European literary genres on to the Italian operatic stage, he and his librettists could not have produced a more impressive and varied list of sources.

To bring such a range of subjects on to the operatic stage, Rossini's Neapolitan operas show an enormous expansion in musical means, particularly an increase in the number and length of ensembles. There is a corresponding decrease in the prominence of solo arias and a profound shift in the role of the chorus, which now acts not as passive observer but as active participant. For the musical and dramatic requirements these changes imply, Rossini created a more dramatic accompanied recitative (nowhere more strongly exemplified than in Ermione's soliloquy before the temple where Orestes is murdering Pirro at the altar), and generally made his orchestra more prominent (earning himself the criticism of being Germanic). He attacked the tyranny of the 'number' from within, and the Neapolitan version of *Maometto II* is certainly more audacious in this respect than its French revision.

Most operatic reformers are credited with expanding musical means, achieving a more continuous dramatic structure, and turning from a style dependent on the solo

5. Commemorative fan with a portrait of Rossini and music and characters from his operas, c1819 (Museo Teatrale alla Scala, Milan): (from left to right) Tancredi, Ninetta ('La gazza ladra'), Otello, Ellen ('La donna del lago'), Figaro and Armida

aria. A traditional way of achieving this is seen in the second act of *Armida*. This act reveals a continuous, additive musical and dramatic structure (short choruses alternating with recitative, duets, dances, even a *tema con variazioni* for soprano 'D'amore al dolce impero'), deriving from earlier French tradition and characteristic of the Gluckian reform. Such a musically shapeless but dramatically responsive series of elements is scarcely original with Rossini. Paer and Mayr both featured this technique prominently, and it occurs in Rossini's earliest operas. The finale of Act 2 of *Semiramide* is a later example of such scenic construction.



Central to Rossini's reform, though, is the internal expansion of the musical unit. The simpler forms of *Tancredi* are pressed far beyond their original confines to incorporate extended dramatic action and diverse musical elements. The introductions of *Tancredi* and *Semiramide* are recognizably in the same tradition, but the latter is enormously expanded, presenting most of the characters, establishing the main lines of the plot, and comprising an introductory solo scena, a chorus, a trio for Idreno, Oroe and Assur, another chorus followed by a quartet in pseudo-canon, a dramatic scena for soloists and chorus, and a final cabaletta led by Semiramide but incorporating all four soloists and chorus. The music is largely continuous, themes recur from one section to another, and the entire composition forms a dramatic, musical and tonal entity.

Perhaps the most remarkable number in these operas is the first-act 'terzettone' (as Rossini called it) in *Maometto II*, 'Ohimè! qual fulmine'. Practically the longest unit in the opera, this number shows in the extreme how Rossini expanded internally standard forms. The ensemble begins as if it were to be a simple trio, with a static section followed by a kinetic one. Though normally this would address a concluding cabaletta, here a cannon shot announces Maometto's impending siege, and Anna, Erisso and Calbo leave the stage. As the scene changes, the 'trio' is left incomplete, but the music continues into a chorus and solo prayer for Anna. Erisso and Calbo return, and with the members of the initial trio reassembled, they launch a typical four-part design that concludes with a cabaletta to bring the entire scene to completion. The whole composition is tonally closed, with the initial 'Ohimè! qual fulmine' and concluding cabaletta 'Dicesti assai! t'intendo' both in E major. Tonal closure is essential to Rossini's technique, and helps unify his expanded ensembles. Though this *terzettone*, which fills more than a third of Act 1, incorporates many different dramatic events and musical sections, it clearly represented a unit for Rossini and must be heard as such to make formal sense. To break it up into a 'Scena e Terzetto', 'Scena', 'Coro', 'Preghiera' and 'Scena e Terzetto', as in standard vocal scores of the opera, is to substitute chaos for an effective and coherent plan. This is an extreme but characteristic example of Rossini's efforts to incorporate more musical material and dramatic action into the individual number. Though the number remains sectional, these sections define a larger design, as the composer expands, almost to the limits of intelligibility, the possibilities of those formal patterns he had established earlier as basic elements in Italian operatic structure.

Equally important is the new emphasis Rossini placed on the chorus. From an inert mass in *Tancredi*, the chorus becomes in *Mosè in Egitto* or *La donna del lago* a central character in the drama, a role further developed in Rossini's French operas. Whereas in earlier operas the chorus merely comments on the actions of the principal characters, in the first-act finale of *La donna del lago*, with its famous 'Coro dei Bardi', the chorus dominates as the various melodic strands of the finale are brought together into a powerful ensemble. The opening chorus from *Mosè in Egitto*, 'Ah! che ne aita!', draws its source from the tradition of the Bach prelude rather than from

simple song forms, with the melody of ex.6 winding from key to key as the chorus intones its pleas for mercy, interspersed with cries from the soloists. The simplicity and strength of these choruses, the most famous of which is the prayer for soloists and chorus from *Mosè*, 'Dal tuo stellato soglio', further balance the florid solo writing.

Ex.6

Even Rossini's approach to the overture changed drastically in Naples. After *Elisabetta* and *Otello*, both of whose overtures were composed for other operas, the former for *Aureliano in Palmira*, the latter for *Sigismondo*, Rossini firmly avoided prefacing his Neapolitan operas with standard overtures. Indeed *Mosè*, *Ricciardo e Zoraide*, *La donna del lago*, *Maometto II* and *Zelmira* have no overtures at all, but at most introductory orchestral material melodically related to the ensuing introductions. *Armida* has an overture, but it is not in Rossini's traditional mould. The overture to *Ermione* is the most fascinating, for although its structure largely parallels the norm, at several points during this overture the chorus is heard, from behind the curtain, lamenting the fate of Troy; in the introduction, these choral interjections are developed into a full chorus. In his operas for other cities, however, Rossini continued to supply overtures, though many are derivative and only the overtures to the second version of *Maometto II* and to *Semiramide* (both written for the carnival season of 1823 in Venice) are worthy of the composer. Impresarios elsewhere were presumably in a position to demand overtures, whether the composer wanted to write one or not, but in Naples Rossini could exercise his will. The absence of traditional overtures there evidently reflects an artistic decision, and it seems likely that Rossini sought to involve his audience with the drama from the opening moment. A formal overture was extraneous, and hence was sacrificed. The significance of this approach for later Italian composers needs hardly be stressed. Indeed it is to Rossini's Neapolitan operas that a generation of composers, including Bellini and Donizetti, looked for inspiration and guidance.

Rossini also composed in these years a number of charming cantatas for state occasions and royal visits, as well as a *Messa di gloria*. In the mass Rossini returned to a tradition he had absorbed while a child in Lugo, but the result goes far beyond those juvenile compositions. It draws both on Rossini's operatic style and on techniques characteristic of sacred music generally absent from the operas, such as the extensive participation of obbligato orchestral instruments in complete ritornello arias and the employment of more contrapuntal textures. Far from being pieced together from fragments of his operas, as earlier writers ignorant of the score claimed, the *Messa di gloria* is an original and excellent work, as worthy of modern performance as the great sacred works of Rossini's post-operatic career.

5. Europe and Paris, 1822–9. Rossini's operas had gained international acclaim. Both France and England were bidding for his services, but Barbaia provided the impetus for Rossini's first foreign voyages just as he had initiated the composer's stay in Naples. The men were tied professionally, personally (through Colbran) and financially. Indeed, Rossini's wealth grew from his association with Barbaia in a company running the profitable gambling tables in the foyer of the Teatro S Carlo. Assuming directorship of the Kärntnertortheater in Vienna at the end of 1821, Barbaia imported his Neapolitan company, together with its composer, for a Rossini festival. It began on 13 April 1822 with *Zelmira*, which had had its Neapolitan première in February, and lasted until July. Six operas were given with extraordinary success. The city of Beethoven and Schubert welcomed Rossini as a hero. He may have been introduced to Beethoven, who according to Michotte told him to write only comic operas, faintly malicious advice to a composer who had written little but *opera seria* since 1817.

After his Viennese stay, Rossini parted company with Barbaia and Naples. He returned to Italy during summer 1822 and remained until autumn 1823. At the invitation of Prince Metternich, he composed two cantatas for the Congress of Verona at the end of 1822 (both patched together from earlier works). The carnival season of 1823 found him at the Teatro La Fenice in Venice, revising *Maometto II* to open the season and composing his last opera for Italy, *Semiramide*. It is one of the few Rossini operas whose genesis can be followed in some detail. Gaetano Rossi, the librettist, was a guest of the Rossinis in Bologna during the autumn of 1822, and his letters to Meyerbeer frequently refer to the opera being composed.

The Rossinis spent summer 1823 in Bologna. On 20 October they departed for Paris and England. That they were abandoning Italian theatres for ever probably occurred to neither of them. Rossini left Italy as the most important and popular composer of his time. He had written 34 operas, the best of which formed a large proportion of the repertory in opera houses throughout the peninsula. He was 31 years old.

They stopped briefly in Paris, where many of Rossini's operas were known, even if productions at the Théâtre Italien were often so radically altered in content that Stendhal accused its directors of attempting to sabotage Rossini's reputation in France. Royally fêted, he began negotiations with the French government concerning future activities in Paris, both at the Théâtre Italien and at the Opéra. The Rossinis then continued to London, arriving late in 1823. A Rossini season was organized at the King's Theatre, but many of the operas were unsuccessful. *Zelmira* made a particularly poor impression because of the inadequacy of Colbran in the title role. Her voice was gone, her career effectively over. Rossini was supposed to write a new opera, *Ugo, re d'Italia*. Although he may have composed at least part of it, nothing survives. In the autograph score of *Ermione*, however, several pieces are underlaid with alternative texts, in which the character Ugo appears. Rossini, who had kept the *Ermione* autograph as he had those for all his Neapolitan operas, apparently intended to use at least part of this score, performed only in Naples, as the basis for his English opera. Again Rossini's first reaction to a new artistic environment was to adapt an older work rather than to compose a new one. Most of his time,

SIGNOR ROSSINI'S FIRST CONCERT,
ALMACK'S.
FRIDAY, MAY the 14th.

Her Excellency Countess Lieven, | Lady Grantham,
Marchioness of Lansdowne, | Countess Cowper,
Countess of Jersey, | Lady Gwydyr,
Marchioness of Waterford, | Countess of Sefton,
Marchioness of Cholmondeley, | Countess of Morley.
Countess Bathurst. | and
Marchioness of Conyngham, | The Hon. Mrs. Hope.

The Second Concert will be on *Friday* the 11th of June.

Subscriptions to both, *Two Guineas.*

Part the First.

Sinfonia—(Gazza Ladra) . . . . *Rossini.*
Duetto—"Della casa,"—M. and Madame Ronzi De Begnis *Generali.*
Quartetto—"Vedi come esulta,"—Madame C. Rossini, Madame Caradori, Signor Garcia, and Signor Curioni . . *Rossini.*
Sestetto—"E palese,"—Madame Caradori, Madame C. Rossini, Signor Curioni, Signor Placci, Signor Remorini, and Signor Benetti . . . . *Rossini.*
Cavatina—"Quell' istante,"—Madame Catalani . . . *Rossini.*
Duetto—"Un se puoi,"—Madame Pasta and Signor Curioni *Rossini.*
Cavatina—"Di piacer,"—Madame Caradori . . . . *Cimarosa.*
Duetto—"Se fiate in corpo avete,"—Madame Catalani and Signor Rossini . . . . *Cimarosa.*

Part the Second.

Sinfonia—(Tancredi) . . . . *Rossini.*
Terzetto—"Cruda sorte,"—Madame Catalani, Madame Vestris, and Signor Garcia . . . . *Rossini.*
Aria—Madame Pasta . . . . *Zingarelli.*
Terzetto—"In questo estremo,"—Madame C. Rossini, Madame Pasta, and Signor Garcia . . . . *Rossini.*
Aria—"Pensa a la patria,"—Madame Catalani, with chorus *Rossini.*
Duetto—"Ebben per mia memoria,"—Madame Caradori and Madame Vestris . . . . *Rossini.*
Cavatino—(Figaro)—Signor Rossini. . . . . *Rossini.*
Terzetto—"Giuro alla terra,"—Signor Garcia, Signor Remorini, and Signor Benetti . . . . *Guglielmi.*
Finale—God save the King.

*** To begin at *Nine* o'Clock.

Vouchers issued by the Ladies Patronesses, to be exchanged for Tickets, at the *Opera Office*, 105, Quadrant.

☞ Signor Rossini respectfully begs leave to state, that having unexpectedly been deprived of the assistance of M. and Madame Ronzi De Begnis, for the latter part of the Concert, Madame Caradori, although unwell, and Signor Benetti, both at a very short notice, most obligingly granted their services on the occasion.

6. Programme for Rossini's first concert at Almack's, London, 14 May 1824

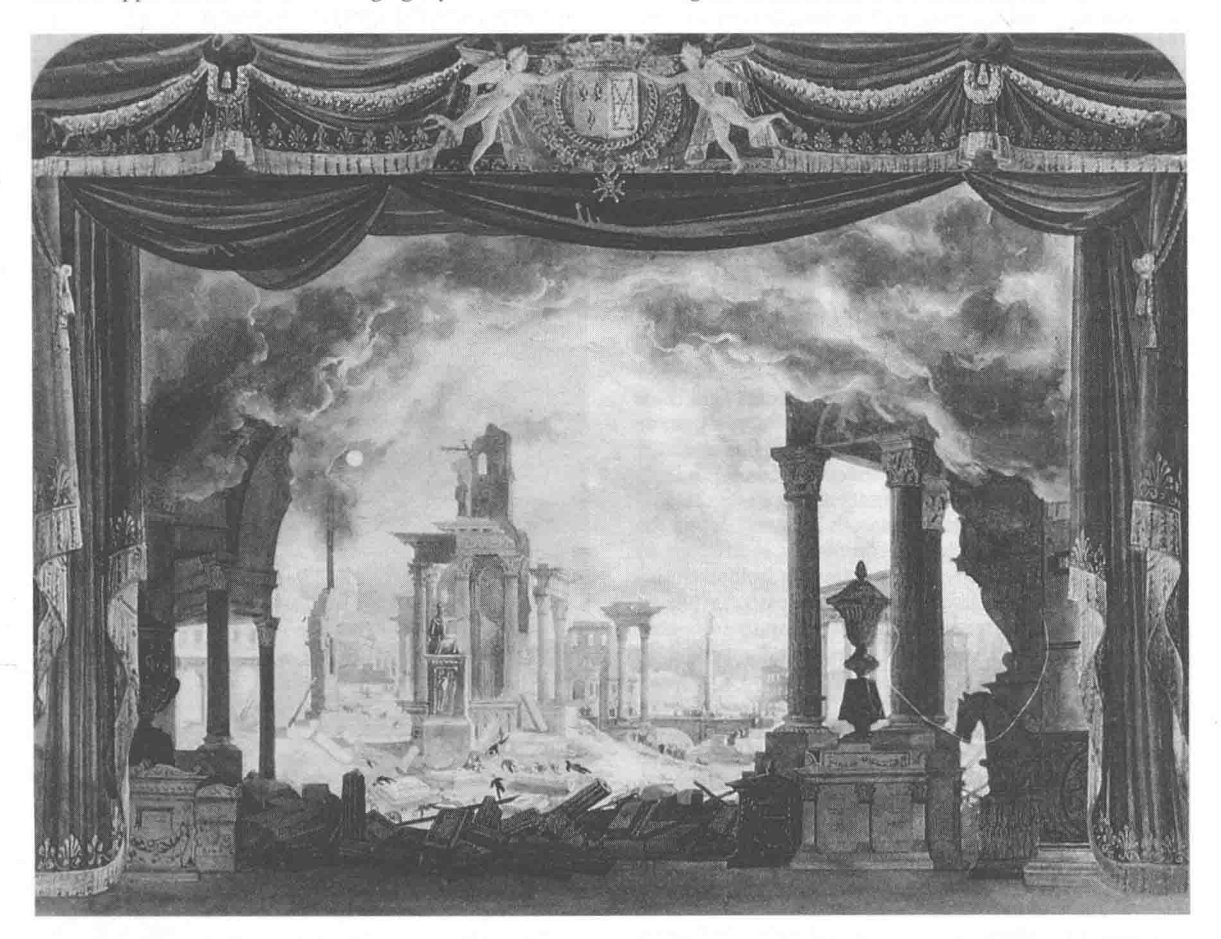
though, was spent growing wealthy on the foibles of English aristocrats, who were willing to spend outrageous sums to have the composer and his wife participate in household musical gatherings or to give lessons to their spoilt daughters.

By 1 August 1824 Rossini was in Paris. His contract with the French government had been signed in London on 27 February, at the home of the French ambassador. In it he agreed to remain in France for a year, writing new operas for the Théâtre Italien and the Opéra, as well as producing his older operas. The first work to be produced under his direction in Paris was *La donna del lago* at the Théâtre Italien on 7 September 1824. It achieved a great success, even though the public found the *banda sul palco* so loud that the setting had to be altered. Shortly thereafter Rossini returned to Bologna for a visit home, perhaps with the aim of finding singers for the Théâtre Italien. By the beginning of November Rossini and Isabella had returned to Paris, where they were to live together for almost five years.

Although as early as 12 November 1824 the administration of the Opéra had offered Rossini a libretto in French by Jouy, *Le vieux de la montagne*, for the composer's consideration, Rossini moved slowly. He first concentrated his attention on the Théâtre Italien, where he became *directeur de la musique et de la scène* according to a new contract signed on 25 November. As director of the theatre, Rossini introduced to Paris the finest Italian singers in first-rate performances of his most advanced Neapolitan operas, including *Zelmira* (14 March 1826) and *Semiramide* (8 December 1825), supervising the productions and often making significant revisions. The operas he produced by other composers included *Il crociato in Egitto* (22 September 1825), which launched Meyerbeer's phenomenal Parisian career. With Rossini at its helm, the Théâtre Italien enjoyed its moment of greatest glory, and until his seemingly definitive departure from Paris in 1836, Rossini continued to assist in running the theatre.

The first opera composed by Rossini for Paris, however, was to celebrate the coronation of Charles X in Reims on 29 May 1825. After the king's return to the capital, Parisian theatres vied with one another to recognize the occasion and Rossini's 'opera di circostanza' turned out to be more elaborate than perhaps he himself had originally intended. By early May the score was well under way, and the date of the royal visit to the Théâtre Italien was finally set for 19 June. *Il viaggio a Reims*, to a libretto by Luigi Balocchi, presents a group of travellers from all over Europe who stop to take the baths at Plombières in the Inn of the Golden Lily (the symbol of French royalty) on their way to the coronation. But no horses can be found to take them to Reims, and so they are compelled to celebrate the coronation at the inn with a series of national songs and hymns in praise of the king and the royal family.

What could have been tiresome in the hands of another composer becomes sheer magic through Rossini's art. Every singer in the company of the Théâtre Italien participated, and this elaborate cast allowed Rossini to write a piece for 14 solo voices, the *gran pezzo concertato* 'A tal colpo inaspettato', which was described by critics of the time as a 'veritable *tour de force*'. The music of the entire opera is enormously varied, ranging from the florid bass aria for the English Lord Sidney, 'Invan strappar dal core', to the patter aria for Don Profondo (a fanatical collector of antiquities), 'Medaglie incomparabili'; from the mock-tragic aria for the French Countess of Folleville, desperate over the destruction of her wardrobe in an accident, 'Partir, o ciel! desio', to the harp-accompanied



'improvisations' sung by Corinna, a character modelled on the protagonist of Mme de Staël's novel. Rossini's musical score is both serious and ironic at once, serious in the elaboration and complexity of the music, ironic in applying such extraordinary music to a series of operatic tableaux that gently mock the dramaturgical conventions of the genre.

Only a few performances of *Il viaggio a Reims* were given before Rossini withdrew the score. In the words of Marco Bordogni, the original Russian Count Libenskof, 'the opera given on the occasion of the coronation, while it pleased enormously, is not an opera that can be given very often, considering its subject'. Ultimately Rossini re-used some of its music in a later work for the Opéra, *Le comte Ory*, and for a century and a half it was assumed that the opera was lost. The recovery of much of the autograph manuscript, as well as performing materials, in libraries in Paris, Rome, Vienna and New York, made it possible to reconstruct the score. Its first modern performances at the Rossini Opera Festival in 1984 under the direction of Claudio Abbado, in the critical edition by Janet Johnson, represented perhaps the most important single event of the late 20th century in what the Italians refer to as the 'Rossini-Renaissance'.

Rossini's goal, however, was to compose operas in French for the Académie Royale de Musique. Having to learn French and master the intricacies of its declamation, Rossini approached his new task gingerly. He reserved two Neapolitan works for adaptation to the French stage, withholding them from production at the Théâtre Italien during his tenure. Thus *Maometto II* became *Le siège de Corinthe* on 9 October 1826 and *Mosè in Egitto*, on 26 March 1827, became *Moïse*. The success of *Le siège de Corinthe* was such that by 17 October 1826 the Vicomte de La Rochefoucauld, who was in charge of the Royal Theatres, suggested to the king that Rossini be relieved of most of his formal duties at the Théâtre Italien, permitting him to devote his energy to composition for the Opéra. An honorary post was created for him as *premier compositeur du roi* and *inspecteur général du chant en France*. A formal contract ratifying these agreements was signed by Rossini on 1 January 1827.

The differences between the two Neapolitan originals and their Parisian revisions is revealing. In the Neapolitan works extremely florid solo vocal lines, emphasizing the virtuoso and generic, co-exist with far-reaching structural experiments which seek to give musical expression to particular dramatic situations. In the Paris revisions both extremes are planed down, resulting in a more consistent, if less audacious, dramatic continuum, and a reduced gulf between declamatory lines and florid passages. Ex.7 shows the purification of a melody from the introduction of *Maometto II* (7*a*) in its French revision (7*b*). Similarly modifying his structural experiments, Rossini eliminated many internal sections from the *terzettone* analysed above, leaving a truncated and more conventional residue in *Le*

7. Final scene of Act 3 of Rossini's 'Le siège de Corinthe', Paris Opéra, 1826: set design by Auguste Caron, watercolour with gouache (F-Pn)

siège de Corinthe. Arias further decline in importance. Instead Rossini tended to compose larger units in which solo voices and chorus combine more dramatically. The scene in which Hiéros blesses the soon-to-be-martyred Greek warriors and prophesies future greatness for Greece is impressive and anticipates the patriotic scenes of Auber's *La muette de Portici* and, of course, Rossini's own *Guillaume Tell*. Three of the four original arias in *Mosè in Egitto* were omitted for Paris. The one added aria, Anaï's 'Quelle horrible destinée', is in its force of utterance and starkness of melodic line far removed from the Neapolitan florid aria.

These two revisions prepared for Rossini's great French operas, the *opéra comique Le comte Ory* (20 August 1828) and *Guillaume Tell* (3 August 1829). Both works effectively unite elements of Italian and French operatic style; by fusing Italian lyricism with French declamation and spectacle, they add another link to the chain that will lead to *grand opéra*. *Le comte Ory* is a problematical work, episodic in structure, but given its sources, it is surprising the opera hangs together at all. The librettists, Eugène Scribe and Charles Gaspard Delestre-Poirson, derived the second act from their own earlier vaudeville, adding to it a first act incorporating music from Rossini's *Il viaggio a Reims*. The plot has its origins in a medieval ballad that recounts deeds of the notorious Count Ory, and Rossini used the ballad's tune both in the orchestral prelude and the second-act drinking-chorus. Only the Countess's aria, 'En proie à la tristesse', borrowed from *Il viaggio a Reims*, features virtuoso solo writing. More characteristic of the opera are its ensembles: the trio 'A la faveur de cette nuit obscure' reveals a wealth of musical detail that belies common views of Rossini's style. (It is interesting that extensive sketches survive for this composition, a rare instance.) By this time Rossini could encompass and yet unify a wide variety of musical techniques, ranging from the delicacy of this trio to a boisterous drinking-chorus, 'Buvons, buvons soudain', with its parody of an unaccompanied prayer, 'Toi que je révère', and from the italianate aria of the Countess to Raimbaud's humorous tale of pillaging the wine cellars. In his orchestra Rossini could create the most miraculous turns with a few instruments, but when necessary he could pound on the bass drum too. His genius held these contrasting forces in equilibrium, and despite some illogical turns in the plot, *Le comte Ory* is a fine opera.

Rossini's last opera, *Guillaume Tell*, based on Schiller's play, is more honoured than understood. Its occasional revivals have suffered from excessive cutting, as if the music and drama would be completely indifferent to mutilation, as if music whose grandeur is built architecturally could sustain itself when the repeat of a phrase almost inevitably attracts the ignorant conductor's scissors, as if depleting the work of its personal approach to music drama would somehow render it more 'dramatic' in a Verdian or Wagnerian sense. The bitter anecdote in which the head of the Opéra met Rossini on the street and proudly reported: 'Tonight we are performing the second act of your *Tell*', only to have the composer respond: 'Indeed! All of it?', rings true; the opera must be heard as the towering entity it is to be properly appreciated. On the other hand, one must acknowledge that Rossini himself made a number of cuts, both before the first performance and immediately after, in order to bring the score within more traditional limits. Balancing the grandeur of the original conception with practical considerations of time and place will always represent a problem with no obvious solution for theatres seeking to produce Rossini's masterpiece. Nonetheless, *Guillaume Tell*, carefully written, harmonically daring, melodically purged of elaborate ornamentation (though the extremely high range of the tenor part poses problems for modern singers), and orchestrally opulent, represents a final purification of Rossini's style.

Rossini wove into this historical panorama elements of the pastorale (with actual quotations from Swiss 'ranz des vaches'), patriotic deeds (very much in vogue on the eve of the 1830 revolutions) and superbly drawn characters, particularly Tell himself and Arnold, the Swiss peasant torn between love and duty. If there is a dramaturgical problem in the opera, it lies primarily in the role of Mathilde, the Austrian princess in love with Arnold. While Mathilde is convincing in Act 2 and especially in Act 3, when she defies Gessler and takes Jemmy under her protection, Rossini and his librettists never quite figured out how to resolve her presence in the fourth act. Indeed Rossini made a number of cuts in the music of this act (including a trio for three women's voices and a touching prayer sung by Tell's wife, Hedwige), without ever quite getting its measure.

Nonetheless, the opera as a whole is a rich tapestry of the composer's most inspired music. Ensembles dominate and the interests of the drama are well served. Tell's declamatory solo within the finale of Act 3, 'Sois immobile', won the approval even of the mature Wagner,

8. Henri-Bernard Dabadie in the title role of Rossini's 'Guillaume Tell', which he created at the Paris Opéra, 3 August 1829: portrait by François-Gabriel Lépaulle, 1836 (Bibliothèque et Musée de l'Opéra, Paris)

and it is even more effective if Jemmy is allowed to sing his enthusiastic 'Ah! que ton âme se rassure' in the preceding moments. The great overture is unabashedly programmatic. The extensive spectacular elements, ballets and processions derive from French operatic tradition, but are effectively integrated into the opera. Particularly impressive are the dances in the third act, where the Swiss are forced to sing a Tyrolean chorus and dance under the eyes of their Austrian lords. Throughout the opera the chorus is central both musically and dramatically, and the score often revolves about magnificent choral ensembles such as 'Vierge que les chrétiens adorent' in the first-act finale, or the final ensemble, 'Tout change et grandit en ces lieux'. Act 2, in particular, is music theatre at its finest; its finale, in which the three Swiss cantons, each characterized musically, are called together to plan the revolt, has long been cited – even by Berlioz – as one of the greatest scenes Rossini ever wrote.

6. Retirement. And then, silence. For almost 40 years Rossini lived on, lauded by many, execrated by some, begged to compose; but no more operas issued from his pen. There are no simple reasons for such a personal decision, if indeed it was consciously made. That Rossini was tired in body and mind, indeed was a semi-invalid for much of the rest of his life, was partly responsible. His rate of composition of operas diminished significantly during his active career, from an average of three new operas a year from 1811 to 1819 to only one a year from 1820 to 1823, and even fewer in Paris. The death of his mother on 20 February 1827, during rehearsals for *Moïse*, had already thrown the composer into a difficult psychological state, and *Tell* absorbed more of his energy than any other work. Letters and contemporary reports show that while Rossini composed this opera he was already thinking of terminating his theatrical career. The financial security he had now gained may also have been a contributory cause.

Political and artistic events of the next years probably solidified his resolve to abandon his career at its height. On 4 May 1829, before the première of *Tell*, he had negotiated a contract with the government of Charles X, in which he was assured a lifetime annuity, independent of his activities, although he did declare his readiness to write at least four additional operas, one every other year, for the Opéra. During negotiations he had threatened to withdraw *Guillaume Tell* before its performance if the annuity was not guaranteed. With the agreements signed and *Tell* launched, Rossini and his wife returned to Bologna for a vacation, his next Parisian opera scheduled for 1831. He contemplated composing a *Faust* based on Goethe, but never received a completed libretto. Instead, his vacation was abruptly shattered by news of the 1830 Revolution, in which Charles X was dethroned and contracts under the old regime were suspended. In early September 1830 Rossini left for Paris alone, relations with his wife having grown strained. He hoped quickly to regulate his financial affairs, but the courts did not decide the future of his annuity until six years later.

The administration of the Opéra had changed hands. Rossini had been so closely associated with the old regime that his influence there was gone, but he maintained ties with the Théâtre Italien, actively supporting the production of works by his younger contemporaries, particularly Donizetti and Bellini. Mostly he was kept in Paris by a protracted legal battle to maintain his right to the annuity provided by Charles X. He composed little; two works, the *Stabat mater* and the *Soirées musicales*, were important. During a trip to Spain in 1831 with his banker friend Alexandre Aguado, Rossini was commissioned by Fernandez Varela, a state counsellor, to set the *Stabat mater*. He wrote only half the score (nos.1 and 5–9) before asking his friend Giovanni Tadolini to complete six additional movements. It was almost ten years before Rossini replaced Tadolini's handiwork, and then only under pressure from his Parisian publisher, Eugène Troupenas. Rossini's conduct was not motivated by pure laziness. By 1832 he was not well, and, whether psychological or not, his ills augured a period of morbid sickness that lasted for 25 years. In this sickness he was nursed and comforted by Olympe Pélissier. Their long affair began in Paris early in the 1830s, and in 1832 Rossini dedicated to her a cantata for soprano and piano, *Giovanna d'Arco*. Recently a group of some 25 letters from Rossini to Olympe from the 1830s surfaced in the Fondo Rossini-Hentsch of the G. Mahler library in Paris. They bear witness to the growing love between the two, a love that culminated in their marriage in 1846, after the death of Isabella Colbran.

In Paris Rossini did complete the set of eight chamber arias and four duets known as the *Soirées musicales*, pieces which prove that his departure from the operatic stage had nothing to do with any decline in his inspiration. They embrace a wide range of moods: the dramatic *Li marinari*, the Tyrolean *La pastorella dell'Alpi*, the Neapolitan abandon of the ever-popular *La danza*. Melodically attractive, they are filled with beautiful details manifesting Rossini's skill; note, for example, the unanticipated G and D harmonies near the end of the B♭ major *La serenata*. These pieces were probably composed individually for various society figures during the early 1830s and then collected into a volume for publication by Troupenas in 1835.

All these factors – illness, changes in the artistic and political climate, financial security, general exhaustion – together with the enormous success of Meyerbeer's first French operas, *Robert le diable* (1831) and *Les Huguenots* (1836), which took to an extreme many techniques of *Tell* while abandoning the 'Classical' tendencies of that opera, created a physical and artistic climate in which the composition of new operas had little savour for Rossini. But the reports of rivalry between Rossini and Meyerbeer seem fundamentally false. Whatever he thought about Meyerbeer's 'grand operas', Rossini remained on good personal terms with Meyerbeer from 1825, when he introduced him to the Parisian public, until his death in 1864, for which Rossini composed a *Chant funèbre*.

With the pension affair settled in his favour, Rossini took a short trip to Germany with another banker, Lionel de Rothschild, meeting both Mendelssohn and Hiller. Mendelssohn, despite himself, came away enormously impressed, writing to his mother and sister: 'intelligence, vivacity and polish at all times and in every word; and whoever doesn't think him a genius must hear him hold forth only once, and he'll change his mind immediately'. Hiller became a lifelong friend. By the end of summer 1836 Rossini returned to Paris to tidy up his affairs, departing again on 24 October for Italy. He did not take Olympe at first, but soon afterwards, in February 1837, she followed him to Bologna.

9. Autograph MS from the second version of Rossini's 'Stabat mater', composed 1841 (GB-Lbl Add.43970, f.95r)

An account of the events of Rossini's life between the time he left Paris and his return in 1855 makes depressing reading. He was continually ill, did almost nothing, seemed indeed to be living on the brink of spiritual, if not physical, death. He and Olympe established a salon in Milan during winter 1837–8 and gave a number of musical soirées similar in style to the more famous Parisian ones of the 1860s. But the death of his father in 1839 further weakened Rossini. His only activity was as honorary consultant to the Bologna Liceo Musicale. There, starting in 1840, he attempted to regenerate the conservatory and improve its curriculum. It is known that he played at least a small role in the performance of his works there, since in the library of the conservatory is a set of orchestral parts for the quartet from *Bianca e Falliero*, 'Cielo, il mio labbro ispira', in which the part for second horn is in Rossini's hand. A note on the manuscript reads: 'Original writing of Rossini. May 1844'. But his health was poor, urethral disorders in particular requiring prolonged and painful treatment, and so Rossini could do little for the conservatory.

When, after the death of Varela, the original version of the *Stabat mater* fell into the hands of the Parisian publisher Aulagnier, who printed it and arranged a performance, Rossini, partly at the prompting of Troupenas and partly because the work published by Aulagnier was a composite, disowned this version and decided to complete the work himself. The revised *Stabat mater* was ready by the end of 1841. The first performance, arranged by the brothers Léon and Marie Escudier, was in Paris at the Théâtre Italien on 7 January 1842. It was received with enormous enthusiasm. The first Italian performance, at Bologna, followed in March under the direction of Donizetti. Among the soloists were Clara Novello and Nikolay Ivanov, who became a close friend of Rossini and for whom, at Rossini's request, Verdi expressly composed some substitute arias. Donizetti, reporting the reception of the *Stabat mater* in Bologna, wrote:

> The enthusiasm is impossible to describe. Even at the final rehearsal, which Rossini attended, in the middle of the day, he was accompanied to his home to the shouting of more than 500 persons. The same thing the first night, under his window, since he did not appear in the hall . . .

The *Stabat mater* is often said to be operatic. If by this is meant that the work is lyrical rather than symphonic in conception, it seems a harmless statement. But it is important to recognize that the statement is really a disguised attack on its style, affirming by implication that the piece is neither specifically religious in quality nor deeply felt. Leaving aside the thorny problem of what is theoretically appropriate for religious music, Rossini's setting of the *Stabat mater* contains almost no music that would normally enter into his operas, whether for reasons of structure, orchestration, melody, use of chorus or a host of other considerations. No doubt the tenor aria 'Cujus animam' is melodically rich, but no similar

Andantino maestoso movement exists in any Rossini opera, especially with the wealth of orchestral detail present here. One need not point to the specifically 'sacred' conceptions, the magnificent unaccompanied quartet, 'Quando corpus morietur', with its sinking chromatic lines, the final choral fugue on 'In sempiterna saecula amen' (fig.9), or the dramatic interaction between soprano and chorus in 'Inflammatus', in order to recognize that Rossini was striving to apply his artistic talents to the service of sacred music. From beginning to end there is a spirit quite unlike that of the operatic world that Rossini had abandoned a decade before completing his hymn to the Virgin. The opening movement, beginning with the dark sonority of cellos doubled by bassoons leading to the tutti at 'juxta crucem lacrimosa', is a stunning testimony to the vitality and success of his efforts.

Though it did not stir Rossini to further composition, he seems to have been genuinely moved by its triumph. He was particularly grateful to Donizetti for directing the Bolognese performance, but was unsuccessful in convincing the younger maestro to assume the directorship of the Bologna Conservatory. Physically Rossini remained weak, and in search of medical help he travelled with Olympe to Paris in 1843. They soon returned to Italy, where Rossini remained indolent. In 1845 Isabella Colbran died, and on 16 August 1846 Rossini married Olympe Pélissier, with whom he had now lived for almost 15 years. He composed some trifles, mostly drawn from earlier works, adapting the famous 'Coro dei Bardi' from *La donna del lago* to unveil a monument to Tasso in 1844 and to praise Pope Pius IX in 1846, who was (for a brief time) thought to represent progressive political tendencies. Rossini also prepared a significant cantata in honour of the new pope, largely derived from pieces in his operas, *Ricciardo e Zoraide*, *Armida*, *Ermione* and *Le siège de Corinthe*. It was performed in Rome, at the Campidoglio, on 1 January 1847. A complete manuscript of the cantata recently came to light, and the work has proved to be more successful in modern revivals than one might have suspected.

The revolutionary movements that swept Italy in 1848 marked a significant turning-point in Rossini's life. He found himself out of favour with many Bolognese townsmen for what they considered his lack of enthusiasm towards the movement for national unity. Prompted by demonstrations directed against them, the Rossinis left Bologna for Florence. He always recalled this period in extremely morbid terms, claiming that his life and that of his wife had been in danger, and speaking of the Bolognese as assassins. The incident, together with his physical ills, further demoralized him. He stayed with Olympe in Florence or took cures at Montecatini or Lucca. Contemporary reports about him (from Emilia Branca Romani, Giuseppina Strepponi and many others) give uniformly depressing and pessimistic accounts. In a letter of 1854 Rossini wrote of 'the deplorable state of health in which I find myself for five long months, a most obstinate nervous malady that robs me of my sleep and I might say almost renders my life useless'. In the hope that French doctors might be able to help him where the Italians failed, the Rossinis decided to return to Paris in the spring of 1855.

7. A NEW LIFE. The last years of Rossini's life must be understood against the background of his physical illness and mental exhaustion during the previous 20 years; for it is no exaggeration to say that, in Paris, Rossini returned to life. His health improved dramatically; his famous sense of humour returned; he bought a parcel of land in the suburb of Passy and built a villa; he rented city quarters on the rue de la Chaussée d'Antin, where before long he reigned over one of the most interesting and elegant salons in Paris. Even more remarkably, he began to compose again. The first new work was *Musique anodine*, six settings of Rossini's favourite text for album leaves, 'Mi lagnerò tacendo'. There is something quite endearing about a composer, silent for so many years, who breaks his silence by producing multiple settings of a text that reads: 'I will lament in silence my bitter fate'. But the songs in *Musique anodine*, dedicated (14 April 1857) to 'my dear wife Olympe as a simple testimony of gratitude for the affectionate and intelligent care she offered me during my too long and terrible sickness', have far more scope than the albumleaves Rossini continued to dash off during his retirement. They were to begin a surge of composition that ultimately included over 150 piano pieces, songs, small ensembles and the *Petite messe solennelle*. Most of the shorter pieces were first performed at the Rossinis' 'Samedi soirs', whose participants included most of the great artists and public figures living in or passing through Paris.

Rossini referred to these pieces as his *Péchés de vieillesse*, the 'Sins of Old Age', and in them he turned his wit into musical terms, incorporating in various measure grace and charm, sharp parody, a dash of sentiment, and throughout a unique combination of sophistication and naivety. He refused to permit their publication, and although some did appear in the 19th century (when a set of authenticated copies was auctioned off in London after the composer's death), they remained barely known until the Fondazione Rossini began editing them in the 1950s. Since then they have received increasingly sympathetic attention. Their historical position remains to be assessed, but it seems likely that their effect, direct or indirect, on composers like Camille Saint-Saëns and Erik Satie was significant.

Many of the piano pieces are parodies, but parodies so appealing and plausible that they could sometimes be mistaken for the things they parody, were it not that blatant excesses and Rossini's superb titles reveal his intention. One of the best is the *Petit caprice (style Offenbach)*, allegedly a *quid pro quo* after Offenbach's outrageous 'Trio patriotique' in *La belle Hélène*, 'Lorsque la Grèce est un champ de carnage' (with its wonderful line 'Tu t' fich' pas mal de ton pays!'), which brought Rossini's *Guillaume Tell* trio, 'Quand l'Helvétie est un champ de supplices', to the stage of the Théâtre des Variétés. The tempo indication 'Allegretto grotesco' leads the way, but once the music begins one feels surrounded by a slightly tipsy Offenbach cancan. The chromatic inflection of the main theme (ex.8) is suggestive. Then,

Ex.8

within an apparently innocent F major context, Rossini first deploys a curious melodic D♭, and finally rings out a truly bizarre F♯; the piece continues as if nothing has happened, and modulates naively back to the tonic and

the main theme. The unusual fingering, with the second and fifth fingers extended, produces a superstitious Italian gesture meant to ward off the evil eye, for which Offenbach was notorious.

Although Rossini referred to himself as a 'pianist of the fourth class', these pieces are often technically challenging, but they are also constantly delightful. The *Prélude prétentieux* is just that, with a fugal subject and development that parody one contrapuntal cliché after another. *Mon prélude hygiénique du matin*, with its opening C major and A minor arpeggios, is sure to bring a wistful smile to those whose piano practice has started each day with appropriate exercises. The absurd dance rhythms of the *Fausse couche de polka mazurka* and the asthmatic theme of the *Valse torturée*, in which the tonic is defined by the chord progression D major – D augmented – D diminished – D major, take salon music as their target. Bach and Chopin are never far from the surface, but they are viewed through a level of ironic respect that renders Rossini's homages a pleasure.

The songs and choruses are no less enjoyable. *La chanson du bébé*, with its refrain, 'Pipi . . . maman . . . papa . . . caca', is a charming spoof on the nursery. *L'amour à Pékin*, Rossini's nod at the whole-tone scale, is preceded by several piano vignettes, harmonizations first of the chromatic scale, then of the whole tone scale, but the song itself is a disappointment. It is a straightforward *romance*, with the whole-tone scale appearing only briefly in a cadential context (using the harmonization worked out previously in the piano vignette). The descriptive *Choeur de chasseurs démocrates*, written by Rossini at the request of the Baroness de Rothschild for the visit of Napoleon III in December 1862 to the Château de Ferrières, is a fine hunting chorus. The D major tonality of the main section is nicely balanced in the centre by Rossini's use of chromatic sequences, a frequent device in these late works.

Among the songs there are more traditional, sentimental, even maudlin compositions, such as *L'orphéline du Tyrol*, or the *Chanson de Zora*. But even without a layer of ironic distance these pieces have great appeal, for Rossini at his most conventional remains a remarkable composer. A large number of these songs were originally written to the 'Mi lagnerò tacendo' text; subsequently Rossini called on two poets, Giuseppe Torre (in Italian) and Emilien Pacini (in French), to supply appropriate words. That works so vastly different in style as the Ariette Pompadour and the Elégie ('Adieux à la vie') from the *Album français* could have been written at first with the same text demonstrates unmistakably what it means to insist – as Rossini did – that music does not 'imitate' text so much as provide the means of expression itself.

The finest work of Rossini's late years, and indeed one of his greatest achievements, is the *Petite messe solennelle* for 12 voices, two pianos and harmonium, written for the Countess Louise Pillet-Will and first performed at the consecration of her private chapel on 14 March 1864. Rossini later orchestrated the work, for fear that someone else would do it if he did not, but the mass is most effective in its original form. (Actually there are two variants of the version for two pianos and harmonium: the one performed in 1864 – only recently recovered – and the familiar one probably first performed a year later, also for the Pillet-Wills, on 24 April 1865.) In an introductory note to 'le bon Dieu', Rossini referred to the mass as 'the last mortal Sin of my Old Age', and in an envoi at the end of the autograph score he addressed God as follows: 'Dear God. Here it is, finished, this poor little Mass. Have I written sacred music [*musique sacrée*] or damned music [*sacrée musique*]? I was born for *opera buffa*, you know it well! Little science, some heart, that's all. Be blessed, then, and grant me a place in Paradise'. There is something enormously appealing about this ironic naivety. Whatever Rossini's public defences that caused him to gain a reputation for coldness and aloofness, in his greatest music they fall, and here he sang the praises of God *con amore*.

From 1857 until his death, Rossini was among subscribers to the critical edition of the works of Bach. Many of his piano compositions reveal his knowledge of Bach, and this is true also of the *Petite messe*. There is no mere imitation, but an attempt to return to historical traditions while holding fast to a modern compositional vocabulary. And through all the contrapuntal writing, elaborate chromaticism and harmonic audacity, beautiful melodies abound. Some pieces, such as the tenor aria 'Domine Deus rex coelestis', reminiscent of 'Cujus animam' from the *Stabat mater*, give an operatic prominence to good tunes. But even knowing the contrapuntal movements of his earlier sacred works, one is unprepared for the richness of the double fugues on 'Cum Sancto Spiritu' and 'Et vitam venturi saeculi Amen'. The entire Credo (with its tempo indication 'Allegro cristiano') is a masterpiece of economy. A few musical ideas are basic to the entire composition, with the text and music 'Credo' acting as a refrain. The 'Crucifixus' is set apart from its surroundings, a soprano aria with the simplest possible accompaniment, the melody studded with chromatic alterations, the middle section modulating rapidly through the octave by minor 3rds. Here, as elsewhere in the mass,

10. Gioachino Rossini: photograph by Nadar

Rossini tended to be somewhat literal about his chromatic techniques, but within the context they seem entirely appropriate. The *Petite messe solennelle* has continued to impress later generations as a deep revelation of the man whose outward character often seemed a mere witticism.

In his last years Rossini lived in honoured retirement, a composer whose fame rested on work done 40 years before, and yet a composer who after a long silence had recovered his voice. Neither an anachronism, then, nor part of current musical trends, he was content to write for himself and his circle, while expounding to those who would listen his attitudes towards art and stories of his youth. Accounts of these years were published by many, including Hiller, Saint-Saëns and Hanslick. The most significant (even if perhaps in part invented) is the alleged transcription made by Edmond Michotte of the meeting between Rossini and Wagner in 1860. Rossini's last letters too are filled with aesthetic judgments and precepts to Italian composers. He wrote in 1868 to Lauro Rossi, head of the Milan Conservatory: 'Let us not forget, *Italians*, that Musical Art is all ideal and expressive ... that Delight must be the basis and aim of this Art: Simple Melody – clear Rhythm'. And in an aside, referring to modern tendencies in Italian music, he added: 'these new gross philosophers ... are simply supporters and advocates of those poor musical composers who lack *ideas*, *inspiration*!!!'. He expressed similar thoughts later that year in a letter to the Milanese critic Filippo Filippi, a champion of Wagnerian ideals in Italy. Here Rossini also entered into other favourite themes, the decline in vocal art and the need to seek 'expressive' rather than 'imitative' music. Though aware of his own compositional growth in 20 years of writing opera, he objected to instant progress, the search for extreme novelty that he observed in composers who fell under Wagner's influence. He railed against those who spiced their writings with 'certain dirty words, such as Progress, or Decadence, Future, Past, Present, convention etc.', adding:

> Do not think, my dear doctor Filippi, that I favour an anti-dramatic system, no indeed; and though I was a virtuoso of Italian bel canto before becoming a composer, I share the philosophic maxim of the great poet who said:
>
> All genres are good, Except the boring one.

It might be said that Rossini's ideals never changed. When he abandoned composition in 1829 the world was changing, but when he took up his pen again he foreshadowed a movement of neo-classicism one of whose earliest proponents was his young admirer Saint-Saëns, and whose effects can be felt still in the music of Stravinsky. Just as his operas had defined the nature of opera for the first half of the 19th century, the *Péchés de vieillesse*, the music that cultivated Paris flocked to hear at the 'Samedi soirs', cast their spell on a younger generation of French composers.

Rossini fell seriously ill in autumn 1868. Soon afterwards, on 13 November, he died in his villa in Passy. His funeral was attended by thousands, and memorial services were held throughout France and Italy. He was buried in Père-Lachaise cemetery in Paris. Olympe, who had hoped to be buried with him, was persuaded to permit Rossini's remains to be transported to Italy after her death. This occurred in 1887, and at a solemn ceremony on 2 May 1887 Rossini found his final resting-place at S Croce in Florence.

In his will, Rossini left a large endowment to found a conservatory in his birthplace, Pesaro. He also left to Pesaro his remaining autographs, including those of the *Péchés de vieillesse*.

8. Reputation. Until recently the image of Rossini as man and artist was distorted. As a man he most often appeared the indolent raconteur, the gourmet, the spirit of an elegant Second Empire salon. This image resulted from the abundance of biographical sources that reflected the period after he withdrew from operatic composition in 1829. Of his active career little was known but what Stendhal related in his brilliant but unreliable *Vie de Rossini*, what Rossini recounted to visitors in Paris some 40 years later, and what could be pieced together from the bald facts of his performed works and the few published early letters. The fascinating insights into a composer's growth that can be gleaned from the correspondence of Bellini or Verdi, the interrelations of the composer and his librettists, the aesthetic creeds formulated in moments of artistic inspiration, all these seemed to be totally lacking.

The general view of Rossini the composer was equally mistaken. Rossini's historical position was distorted by the prominence of his great comic operas which are among the last and finest representatives of *buffo* style. His ties with the 18th century were consequently emphasized, while his position in the 19th was misunderstood. Superb as the *buffo* operas are, Rossini is historically more important as a composer of *opera seria*. He threw off 18th-century formulae and codified new conventions that dominated Italian opera for half a century. Between 1810 and 1850 Italian opera was reformed in many ways. Techniques of singing and melodic style altered drastically; the Romantic theatre routed dramatic conventions that had tyrannized both theatre and opera, thus offering a new wellspring of operatic subjects and techniques; the self-image of the composer changed, that of the craftsman giving way to that of the creative artist, while each individual work of art consequently gained new significance. But throughout, Italian opera depended upon the musical forms, the style of orchestration, the rhythmic vitality and the role of music in defining and shaping the drama first developed fully in the operas of Rossini.

The last two decades of the 20th century saw a thorough re-evaluation of Rossini as a man and as a composer. Thanks to the efforts of scholars associated with the Fondazione Rossini of Pesaro, a vast quantity of documentary material from the composer's productive years has been located and published in the first volumes of his *Lettere e documenti*, edited by Bruno Cagli and Sergio Ragni. This material has greatly enriched our understanding of Rossini's artistic career. Furthermore, a critical edition of the complete works, under the direction of Philip Gossett, is well advanced. It has provided new insight into the composer's art. It has also made his music newly accessible, both the eternally popular comic works and the serious operas. Since 1980 the Rossini Opera Festival in Pesaro, drawing on the work of the Fondazione Rossini, has not only offered carefully studied productions of the operas but has also been responsible for providing a venue in which several generations of singers have been able to master the intricacies of Rossini's vocal practice. Thanks to an abundance of recordings and live productions throughout Europe and the USA, Rossini is no longer simply the composer of some delightful comic operas.

PHILIP GOSSETT

Rossino Mantovano (*fl* 1505–11). Italian composer and singer. He was employed as a male contralto in the Cathedral of Mantua in 1509 and as *maestro di canto* in 1510–11, with the responsibility of teaching the boy sopranos. He and the rest of the choir were released in 1511. He is the author of five frottolas (three *barzellete*, an *oda*, and a popular text) all published in Petrucci's frottola books (RISM 1505[3], 1505[4], 1507[4]; four ed. G. Cesari and others: *Le frottole nell'editzione principe di Ottaviano Petrucci*, Cremona, 1954; one ed. in Gallico). Of particular interest are two works that seem to be associated with Mantuan theatre. *Poi che fai, donna, el gaton* imitates the sounds of a cat's wailing ('Gnao, gnao, gnao gnao, vo cridando'). The well-known *Lirum bililirum* is a parodic serenade sung beneath a woman's window in Bergamasque dialect and to the accompaniment of bagpipes, rather than lute.

WILLIAM F. PRIZER

Rossiter, Will [Williams, W.R.] (*b* Wells, 15 March 1867; *d* Oak Park, IL, 10 June 1954). American publisher and composer of English birth. After moving to the USA in 1881, he settled in Chicago. His musical career started in

1891 when, under the pseudonym W.R. Williams, he published his first song, *Sweet Nellie Bawn*, followed by further popular titles during the 1890s. In 1898 he performed his songs at Tony Pastor's Music Hall in New York. By 1900 he had become the most successful popular music publisher in Chicago. In 1910 he purchased the rights to *Meet me tonight in dreamland* by Leo Friedman and Beth Slater Whitson, issued Shelton Brooks's *Some of these days*, which became Sophie Tucker's theme song, and published his own *I'd love to live in loveland with a girl like you*, which eventually sold over two million copies. Brooks's *The Darktown Strutters' Ball* (1917) also achieved lasting popularity. Other songwriters, lyricists and performers whose careers were furthered by their association with Rossiter include Charles K. Harris, Percy Wenrich, J. Will Callahan, Fred Fisher and Egbert Van Alstyne. An aggressive promoter of his publications, Rossiter initiated innovatory techniques in marketing and made use of radio broadcasting for promotional purposes.

Rosso, Giovanni Maria del. *See* ROSSI, GIOVANNI MARIA DE.

Rosso [Roth], **Hieronymus** [Girolamo] (*b* Ancona; *fl* 1614). German composer and organist of Italian birth. In his only known work, *Missae quatuor octonis vocibus, quae variis instrumentis chorisque coniunctis ac separatis concini possunt* (Frankfurt, 1614), he is described as 'Anconitanus' and organist of Worms Cathedral. The wording of the title defines him as an adherent of the concertato mass, which was being developed in Germany and Italy in the early 17th century. All four works are parody masses, and the material on which they are based is named (1 ed. A. Eglin in Laudinella-Reihe, St Moritz, 1983). (*EitnerQ*; *GerberNL*; *WaltherML*)

AUGUST SCHARNAGL/DIETER HABERL

Rosso, Il. *See* BIANCHINI, DOMENICO.

Rosso, Pietro. *See* RUBEUS, PETRUS.

Rosso de Chollegrana [Collegrana] (*fl* 14th century). Italian composer. His only known composition is the two-voice madrigal *Tremando più che foglia*, found only in *GB-Lbl* 29987 (ed. in CMM, viii/3, 1962 and PMFC, vii, 1971). His identity is still in question. On stylistic grounds and given the origin of the London manuscript, he may be associated with the Florentine circles of the mid- to late 14th century, and should not be confused with the Petrus Rubeus of *I-Bc Q15* and *GB-Ob* Can. Misc.213. The toponym is a known tuscanized form for 'Conegliano', a city in the Veneto, and the best candidate is a certain Magister Franciscus de Mercadellis de Chollegrana, a doctor of medicine who became a Florentine citizen in 1364 and died in 1405. The identification with the composer is possible given his prominent role in the Laudesi Company of S Zanobi from 1377 to 1399, and his connection with such important *litterati* as Giovanni Fiorentino and Franco Sacchetti. However, there is no evidence of his being known as 'Rosso'; Franciscus had many children, about whom nothing is known, and it is possible that one of them, retaining the family toponym, might be the musician in question.

KURT VON FISCHER/GIULIANO DI BACCO

Rossoni, Giulio (*fl* 1665–81). Italian singer and composer. He was a tenor and was employed as a chamber musician at the Bavarian court at Munich from at least the beginning of 1665 to 1681. In 1667 he sang in J.K. Kerll's opera *Le pretensioni del sole* (text by the court poet D. Gisberti). He composed the opera *L'Adelaide Regia Principessa di Susa* (to a libretto by G.B. Rodoteo), performed at Munich on 31 October 1669, in celebration of the birthday of Duke Ferdinand of Bavaria and formerly attributed to Giulio Riva. He sang in operas at Milan in 1678 and at Parma in 1681.

THOMAS WALKER

Rossum, Frederik (Leon Hendrik) van (*b* Elsene, Brussels, 5 Dec 1939). Belgian composer of Dutch origin. He studied composition at the Brussels conservatory with André Souris and Marcel Quinet. He became a lecturer at the conservatories of Brussels (piano, 1965; analysis, 1971) and Liège (counterpoint, 1968) and director of the academy of Watermael-Bosvoorde (1971). In 1991 he began working exclusively as a composer. In 1965 he won the Belgian Prix de Rome. Other composition prizes he has won include the Kopal Prize (1972) for *Threni*, the Paul Gilson Prize (1973) for *Rétrospection* , the Irène Fuérison Prize of the Royal Academy of Belgium and the First Prize of the International Composers Tribune of UNESCO (1981) for *Réquisitoire*.

His style is a synthesis of Expressionism and neo-classicism with roots in tradition. He is open to contemporary trends, which he incorporates into his music in an expressive way. By exploring diverse possibilities of rhythm and timbre, he strives towards music that is expressive and dramatic, without being programmatic. His language is clear and aims at direct communication with the listener. As is apparent from titles such as *Réquisitoire* and *Eloquences*, he often takes the model of human speech or the idea of dialogue between instruments as his starting point. His works show a predilection for

the mysterious, for virtuoso display and the opposition of the lyrical to the dramatic.

YVES KNOCKAERT

Rost, Franz (*b* Mahlberg, nr Lahr, Baden, probably shortly before 1640; *d* Strasbourg, 1688). German copyist and ?composer. He appears to have attended the Jesuit college at Baden-Baden and he sang at the collegiate church there. He started to learn the organ in 1653, and he may have learnt the violin as well. He may have been taught both instruments by the Kantor of the collegiate church, whom he later (at an uncertain date) succeeded in that office. He also entered holy orders. From about 1660, Rost seems to have been entrusted – possibly by the Margrave of Baden-Baden for use at court – with the copying of trio sonatas by prominent composers of the time. He was able to take his manuscript, the so-called Rost manuscript, with him when he moved to take up an ecclesiastical post at St Pierre-le-Vieux, Strasbourg, some time in the 1680s; it was thus saved from the destruction of the margrave's residence in 1689. Brossard bought it from Rost's heirs. From him it passed in 1726 to the Bibliothèque Royale, Paris (now the Bibliothèque Nationale, where it is manuscript Rés.Vm^{7}653).

The Rost manuscript consists of 157 works, the vast majority sonatas or sonata-like pieces; 27 composers are named and 28 works are known to be Italian. There are 81 anonymous pieces, some of which may be by Rost himself. Since the margraves were buried in the collegiate church it is understandable that the collection contains many *tombeaux* and funeral pieces and others marked 'grave', as well as several church sonatas. But it also contains chamber sonatas mostly for two violins and continuo, and comic and entertainment music, such as 'Polish bagpipe' and pieces by J.H. Schmelzer, numerous capriccios by Rosenmüller and Zamponi among others, and an even larger number of battaglias, including one by Schmelzer and four each by J.M. Nicolai and the younger Stoss of the Düsseldorf Kapelle.

Carl Rosier is the best-represented composer in the manuscript, with 22 works, followed by Schmelzer (18 works), Cazzati (14) and one Toleta (12). Of other well-known composers, G.B. Vitali and Bertali are represented by four works and Rosenmüller by three. There are also single pieces by more than a dozen composers, among them such well-known names as Fux, Kerll, J.P. Krieger and Carissimi, who is represented by the only motet, the solo Christmas piece *Salve, puellulae regalis animi*. Other composers include Zamponi and Balthazar Richard, both from Brussels, and the Pole, Marcin Mielczewski. Such names as these highlight the wide area upon which Rost drew in his compilation. This is possibly accounted for by the number of courts that had friendly relations with the young margrave (who was known as 'Türkenlouis' for his part in repulsing the Turkish threat to eastern Europe) and thus lent him manuscripts for copying. The Habsburgs seem to have been particularly generous, since the manuscript contains works by 13 German and two Italian composers working at the Viennese court.

FRIEDRICH BASER

Rost, Nicolaus. *See* ROSTHIUS, NICOLAUS.

Rostal, Max (*b* Teschen, Silesia, 7 Aug 1905; *d* Berne, 6 Aug 1991). British violinist of Austrian birth. He studied with Arnold Rosé in Vienna and Carl Flesch in Berlin, and gave public performances from the age of six. He also took composition lessons at the Berlin Hochschule für Musik with Emil Bohnke and Mátyás Seiber. In 1928 he was appointed assistant to Flesch, and later became the youngest professor at the Berlin Hochschule (1930–33). He left Germany to live in London, where he was a professor at the GSM (1944–58) and profoundly influenced a generation of violinists whom he taught and encouraged; among his pupils were Yfrah Neaman and members of the Amadeus Quartet. Rostal was also a co-founder of the CARL FLESCH Medal (1945) and one of the early judges of this competition. He was appointed a professor at the Staatliche Hochschule für Musik in Cologne in 1957, and in 1958 at the conservatory in Berne, where he settled.

During his years in Britain Rostal toured frequently as a soloist, winning consistent acclaim for a sweet, transparent tone underlaid by rhythmic drive and incisive attack. He introduced to Britain Khachaturian's Concerto and Bartók's Second Concerto (which he played with particular distinction), and gave the first performance of concertos dedicated to him by Alan Bush, Benjamin Frankel, Franz Reizenstein and Bernard Stevens, and the *Fantasia* by Mátyás Seiber. Many of his recordings, including the concertos of Bartók (no.2), Berg, Shostakovich (no.1) and Stevens, have been reissued on CD. As a chamber music player Rostal formed excellent duo partnerships with Franz Osborn and (from 1954) Colin Horsley, and played in a piano trio with his Cologne colleagues Heinz Schröter and Siegfried Palm. A number of his editions and teaching compositions have been published, as well as various transcriptions, including one for violin of the cadenzas Beethoven wrote when he transcribed his Violin Concerto for piano. He owned a 1698 violin by Antonio Stradivari, now known as the 'Max Rostal', the 'Charles Reade' Guarneri 'del Gesù' (1733) and a viola by Giuseppe Guadagnini. In association with Menuhin, Palm and others, he established in 1974 the European String Teachers' Association for the exchange of information on the technique and teaching of string playing. He was made a CBE in 1977, and was

honoured by the Austrian and German governments and the city of Berne.

NOËL GOODWIN

Rostand, Claude (*b* Paris, 3 Dec 1912; *d* Villejuif, Val de Marne, 9 Oct 1970). French music critic. He read literature and law at the Sorbonne and studied the piano, harmony, counterpoint, composition and music history privately with Edouard Mignan, Marc Vaubourgoin, Jacques Février and Norbert Dufourcq. For many years he was music critic of *Carrefour*, *Figaro littéraire* and *Le monde*, and French correspondent of *Melos*, the *New York Times* and *Musical America*; he was a humanist scholar of great erudition, but his articles and his popular lectures to the Jeunesses Musicales were lucid and direct. He also worked as a producer for ORTF and for various German radio stations. He was a constant student and supporter of contemporary music, becoming vice-president of the ISCM in 1961; he gave a weekly series of radio lectures called 'Ephémérides de la musique contemporaine' and from 1958 organized concerts of contemporary music called 'Musique d'aujourd'hui' in the Théâtre National Populaire. Rostand's *Dictionnaire de la musique contemporaine*, his last book, is a further product of his deeply felt desire to bring 20th-century music to a wider audience.

YVONNE TIÉNOT

Rosthius [Rost], **Nicolaus** (*b* Weimar, *c*1542; *d* Kosma, nr Altenburg, Thuringia, 22 Nov 1622). German composer. He may have been a pupil at the choir school in Torgau, but by 1560 was attending school in Altenburg where he was also a member of the municipal choir, at that time directed by David Köler. Rosthius followed Köler to the court at Schwerin in 1563, but returned to Altenburg in 1564. In 1568 he is known to have been a member of the court chapel in Weimar, being promoted to Kapellmeister in 1569; the choir was disbanded in 1571.

After 1571 Rosthius became a citizen of Weimar and probably held a municipal appointment. From 1578 to 1579 he taught music at the Protestant state school in Linz (on the Danube). Late in 1579 he matriculated at Heidelberg, where, shortly afterwards, he was appointed a master and singer at the academy. He was in the service of Count von Erbach (Odenwald) in about 1590, but returned to Altenburg probably in 1593 to serve in the court chapel of Duke Ernst of Saxe-Altenburg: there in 1594 he described himself as 'Cappelneltester'. He held the post of court Kapellmeister until 1601, then moving to nearby Kosma where, until his death, he was a minister.

Rosthius's song motets and occasional *Spruchmotette* show him to have been a master of the smaller forms. The *Newer lieblicher Galliardt* are the first published examples of the short-lived genre of German-texted galliards. Of greater significance, however, is his *Trostreiche Historie von der fröhlichen Auferstehung ... Jesu Christi*, which forms a link between, on the one hand, the corresponding anonymous work of around 1550 and that of Antonio Scandello, and on the other hand, that by Schütz. It belongs to the so-called mixed type, involving elements of both the motet-Passion and the dramatic Passion.

WALTER BLANKENBURG

Rostirolla, Giancarlo (*b* Rome, 11 March 1941). Italian musicologist. After having private tuition with F.M. Saraceni (1957–60), he studied at the Scuola di Paleografia e Filologia Musicale in Cremona (1967–70). Since 1999 he has taught music history at the University 'G. D'Annunzio' (Chieti). His research interests include the history of Italian musical institutions from the 16th century to the 19th, musical iconography, the *lauda spirituale* and Palestrina. He has also played a prominent part in encouraging Italian interest in the performing practice of older music. He began work for the journal *Nuova rivista musicale italiana* in 1968, becoming co-editor in 1985. In 1970 he founded the Società Italiana del Flauto dolce, later the Fondazione Italiana per la Musica Antica, and the Ganassi Music Library, and in 1979 he established the Istituto di Bibliografia Musicale in Rome for the study and consolidation of Italian music collections. He became the artistic director of the Fondazione G. Pierluigi da Palestrina in 1985, and in 1987–8 he lectured at Naples University on musical iconography and the history of musical instruments. In 1994 he was

awarded a gold medal by the Italian Ministry of Cultural Partimony.

TERESA M. GIALDRONI

Rostock. German city in Mecklenburg-Vorpommern, at the estuary of the Warnow. The earliest records of musical activity date from the late 13th century; names such as Herbordus 'timponator' (1287), Stacius 'basunre' and Johannes 'lireman' (1288) probably refer to civic musicians. Records have survived from before the Reformation listing town musicians, minstrels and organists. Rostock was an important Hanseatic centre until the Thirty Years War (1618–48), and the oldest university in northern Europe, after St Andrews, was founded there in 1419. During 1465–87 the Rostocker Liederbuch was compiled at the university. The first hymnbooks in Low German were published in Rostock in 1525 and 1531 by the reformer Joachim Slüter. The number of town musicians (*fistulatores*, *piper*, *bassuner*, and in the 16th century *stadt spellude* or *Kunstspielleute*) was increased to three in 1453 and four in 1574.

In 1623 the council appointed Balthasar Kirchhof as the first director of instrumental music. Joachim Burmeister was Marienkantor until 1593 and Magister of the Nikolaischule until 1629, Daniel Friderici, Rostock's most important composer, was Marienkantor in 1618–38 and 'Kapellmeister in allen Kirchen' from 1623, and Nikolaus Hasse was organist of the Marienkirche from 1642 to 1670. Other notable Kantors and organists were Antonius Mors, Nikolaus Gottschovius and Georg Patermann. The collection of songs of Petrus Fabricius, a student there from 1603 to 1608, and the two-volume *Delitiae musicae* (1656–8) by Hasse, dedicated to members of the university, testify to the musical activities of students.

The Thirty Years War and a disastrous fire in 1677 impaired the development of Rostock's musical life. After 1697 only one Stadtmusikant was employed. However, in the 18th century middle-class concert life developed. After 1726 public amateur concerts were given, known from 1757 as 'Wochenkonzerte', which achieved particular importance under the composer, author and organist Eucharius Florschütz (1756–1831) and F.W. Pannenberg. The first concerts by travelling virtuosos were given in 1769 and in 1781 Florschütz founded monthly public

concerts, given by the Stadtkapelle. German and Italian troupes performed opera and operetta in the Hoftheater (opened 1751), Ballhaus, and, after 1786, the new Schauspielhaus. However, a permanent opera company was not formed until the second half of the 19th century.

In 1819 the first Rostocker Musikfest was held under the direction of J.A. Göpel, organist of the Jakobikirche, with the choral society that he had founded in the same year, later the Singakademie. In 1843 the fourth Norddeutsche Musikfest, directed by Heinrich Marschner, was held in Rostock and three of the 15 Mecklenburg festivals, of which the most important was the ninth (1885, directed by Hermann Kretzschmar), were subsequently held there. As a teacher of music, director of music and lecturer on music history at the university, Kretzschmar was the most important musical figure in Rostock in the decade 1877–87. He founded the Rostocker Konzertverein (1877), which organized four concerts annually with the orchestra of the Verein Rostocker Musiker, formed from the 'Bürgerkapelle' and the Hautboisten-Corps.

Gustav Eggers (1835–60), a lieder composer admired by Liszt, and Carl Gradener were the leading composers of 19th-century Rostock. The new Stadttheater was opened in 1895 and in 1897 the Stadt- und Theaterorchester was founded, which gave a new impetus to Rostock's musical life. Willibald Kähler was conductor there from 1897 to 1899, establishing a tradition of Wagner opera that drew many famous singers and such conductors as Nikisch and Richard Strauss. Eduard Mörike and Schmidt-Isserstedt also conducted in Rostock.

Before World War II musical life in Rostock was dominated by such figures as the composers Emil Mattiesen and Carlfriedrich Pistor, as well as Erich Schenk, who directed the musicological institute he founded in 1934 and also directed the collegium musicum until 1939. After the Stadttheater was destroyed in an air raid in 1942, the former 'Philharmonie' building was used as a theatre and converted several times; in 1951 it was renamed the Volkstheater. The theatre's orchestra was known as the Rostock PO from 1960 to 1990, when it became the Norddeutsche Philharmonie Rostock. Its conductors have included Gerhard Pflüger (1946–9), Gerd Puls (1957–91), Michael Zilm (1991–7) and Michail Jurowski (1997–99). Hans-Joachim Wagner, Marienkantor from 1948 to 1980, and above all Hartwig Eschenburg, director since 1960 of the St Johannis choir school and the affiliated Rostocker Motettenchor, have been prominent in the field of sacred music. In 1995 the 70th Bach Festival of the Neue Bachgesellschaft was held in the city. A state Musikhochschule, founded in 1947 and directed by Rudolf Wagner-Régeny, underwent several metamorphoses during the period of the German Democratic Republic: it became a conservatory in 1950, a district Musikhochschule in 1963 and a branch of the East Berlin Musikhochschule under Hanns Eisler in 1978 before being re-founded in 1994 as the Hochschule für Musik und Theater. The department of musicology at the university has also experienced a number of vicissitudes. Rudolf Eller was its director from 1959 to 1979, and Karl Heller was appointed to the position in 1992. The university library contains, among other items, the valuable music collection of Duke Johann Albrecht I of Mecklenburg-Schwerin (1525–76), and the estate of the widowed Duchess Louise Friederike of Mecklenburg, who died in Rostock in 1791.

DIETER HÄRTWIG

Rostomian, Stepan Arzumani (*b* Kirovakan, 4 April 1956). Armenian composer. He began his education as a violinist in 1972 at the Kirovakan Music College, continuing his studies in Yerevan at the Melikian Music College (1974–6) with Aram Shamshian. He then studied in the Komitas Conservatory: composition under Sar′ian and orchestration under Avet Terterian (1976–81). He then became a singer and arranger at the Academic Choral Cappella of Armenia (1981–4). In 1989 he began teaching composition (including electronics) and orchestration at the conservatory. He worked as music adviser for the Sundukian Theatre (1990–93), and from 1994 as manager of the Sharakan publishers in the Gandzasar Theology Centre of Yerevan. In 1989 he was commissioned by the 'New Beginnings' festival of Soviet art in Glasgow to write his Third Symphony and Second Wind Quintet, then in 1997 he was commissioned by the Paragon Ensemble and the Scottish Music Council to write his Fourth Symphony.

Refinement and economy of means are features of Rostomian's musical style; these are achieved through his sophisticated rhythmic structures. Free metres and polyrhythms abound in asymmetrical structures in which there is no metrical accent despite the prevalence of periodic repeats. His interest in religious tradition, which began in the mid-1980s, introduced ritualistic elements into his music. He combined Armenian sacred monodic hymns (sharakanï) and the use of church instruments (including the *censer* and bells) with tape recordings of prayers and the chanting of psalms, synthesizing them with electronics and natural sounds. A reflection of these principles is seen in his third and fourth symphonies which are conceptually comparable with the symphonies of Terterian.

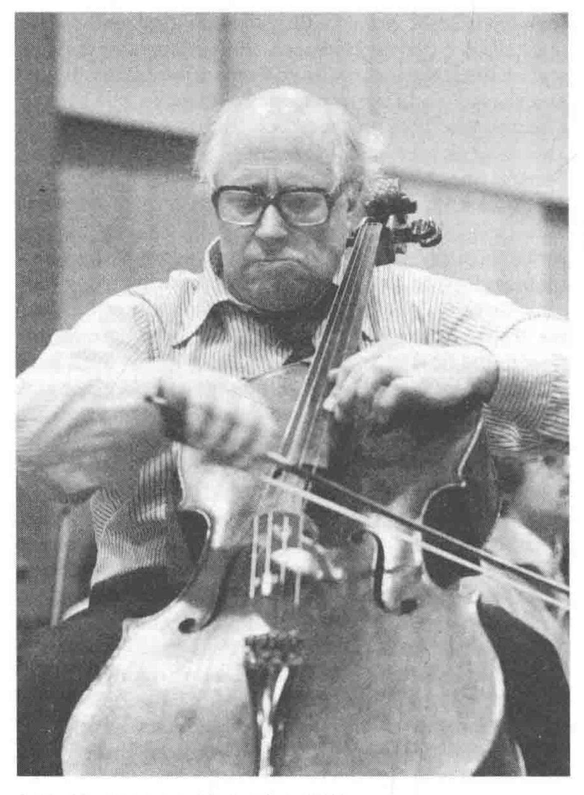
SVETLANA SARKISYAN

Rostov-na-Donu. Town in southern Russia. At the end of the 19th century a branch of the Imperial Russian Music Society was founded, and brought in such distinguished visitors as Rachmaninoff, Skryabin, Ziloti and Chaliapin. In 1939 a regional organization of the Union of Composers was instituted, under whose auspices a contemporary music festival, Donskaya Muzïkal'naya Vesna (Don Musical Spring), was established in 1967. Alongside Russians, leading composers from Germany, Great Britain and elsewhere have taken part.

The Rostovskiy Muzïkal'nïy Uchilishcha (Rostov Music School, renamed in 1963 the Rostovskiy Uchilishcha Iskusstv, Rostov School of the Arts) opened in 1900 as one of the first musical secondary schools in Russia. Though covering all fields, it enjoys particular renown as a jazz school, and its big band and Dixieland group have been winners in Russian and international competitions and festivals. The Rostovskiy Gosudarstvennïy Muzïkal'no-Pedagogicheskiy Institut (Rostov State Music Pedagogical Institute) was founded in 1967, and in 1992 renamed the Rostovskiy Gosudarstvennïy Konservatoriya imeni S.V. Rakhmaninov (Rachmaninoff State Conservatory). Besides offering courses up to postgraduate level it hosts conferences and publishes scholarly books. Its performing groups, which engage in extensive concert work within Russia and abroad, include a symphony orchestra, a choir, folk ensembles, a chamber orchestra for early music, the Tikhiy Don (Quiet Don) Barbershop Quartet and numerous jazz groups.

Founded in 1935, the Rostov regional Filarmoniya (Philharmonia) is the centre of musical and cultural life. Its symphony orchestra, set up in the year of its foundation, is one of the finest in Russia. In 1936 another important body was organized under the aegis of the Philharmonia: the Ansambl' Pesni i Plyaski Donskikh Kazakov (Don Cossacks' Song and Dance Ensemble), which has toured the world. Other groups managed by the Philharmonia include the Kamerata ensemble for early and contemporary music (1986), the show group Amazonki (The Amazons, 1987), the Dontsi folk instrumental ensemble (1990), the Don wind orchestra (1991) and the jazz orchestra Don-Band (also 1991).



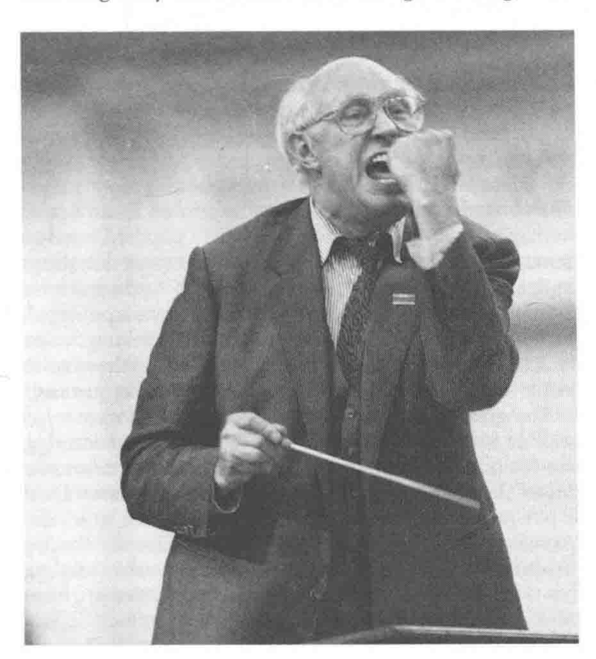
Concerts are also arranged by the music club Rondo (1977) and the Munitsipal'nïy Kontsertnïy Tsentr Kima Nazaretova (Kim Nazaretov Municipal Concert Centre, 1992), which has become home to the Big-Band (1975), a laureate of many jazz festivals. Altogether Rostov is acknowledged as one of the main Russian centres for jazz, though choral music has a high place too. In 1962 a Khorovnoye Obshchestvo (Choral Society, from 1991 Muzïkal'noye Obshchestvo, Music Society) was founded, its responsibilities including the town choral festivals and, from 1993 onwards, the Mezhdunarodnïy Prazdnik Khorovoy Dukhovnoy Muzïki (International Festival of Sacred Choral Music). Leading choirs include the Pevchiye Tikhogo Dona (Choristers of the Quiet Don), Anastasiya and the children's ensemble Solovushka (Nightingale). There are also bands and ensembles run by the Severo-Kavkazskogo Voyennogo Okruga (North Caucasian Military Command).

The Rostovskiy Gosudarstvennïy Teatr Muzïkal'noy Komedii (Rostov State Theatre for Musical Comedy) opened in 1931 to present operettas and musicals. Radio and television contribute further to musical life, which is covered by the several local newspapers.

ANATOLY MOISEYEVICH TZUKER

Rostropovich, Mstislav (Leopoldovich) (*b* Baku, 27 March 1927). Russian cellist, pianist and conductor, naturalized Swiss. He began musical studies in early childhood with his parents, his mother being an accomplished pianist and his father a former student of Casals and a distinguished cellist who taught at the Gnesin Institute, Moscow, where Mstislav first studied. In 1943 he entered the Moscow Conservatory, studying the cello with Kozolupov and composition with Shostakovich and Shebalin. Rostropovich graduated with the highest distinction, and in the late 1940s won competitions in Moscow, Prague and Budapest. He received a Stalin Prize in 1951, and in 1956 he was appointed cello professor at the Moscow Conservatory. In 1970 he was awarded the Royal Philharmonic Society's gold medal, and in 1975 the honorary degree of MusD from Cambridge University. In 1987 he was appointed honorary KBE, and received the Presidential Medal of Freedom in the USA. He has also received awards from the French and German governments.

After the improvement in cultural relations between the USSR and the West in the 1950s Rostropovich travelled widely on concert tours, making his British début at the Festival Hall in March 1956, and his



1. Mstislav Rostropovich, London, 1977

American début at Carnegie Hall, New York, in April the same year. Musicians and audiences alike were quick to appreciate his exceptional mastery of style and technique. His playing combines unusual accuracy of intonation and fullness of tone in all registers, and his range of colour extends from eerie *sul ponticello* to a threatening rasp, from a lute-like plangency in pizzicato to a sonorous bell-like thrum. He effortlessly employs a variety of special techniques, such as *style brisé*, left-hand pizzicato, gradations of pizzicato dynamics and cross-rhythms, and sustains a powerful initial attack with continued intensity of character (for photograph, *see* VIOLONCELLO fig.9). His instinctive feeling for the composer's intentions is as apparent in contemporary works as in the repertory of established classics, although on occasion his enthusiasm has been known to get the better of his judgment.

Several composers have written works for Rostropovich, beginning in the USSR with Glière, Khachaturian, Myaskovsky and Prokofiev, whose Sinfonia concertante op.125 was revised in 1952 with the cellist's collaboration, and whose unfinished Concertino op.132 was completed by Rostropovich and Kabalevsky after the composer's death in 1953. Shostakovich wrote his Cello Concerto no.1 op.107 for him, and it was when he introduced this to London in 1960 that he met and formed a lasting friendship with Britten, reawakening the latter's interest in instrumental music after a long period of mostly vocal composition. It brought about Britten's Sonata for cello and piano op.65, the Symphony for cello and orchestra op.68, and the three suites for unaccompanied cello opp.72, 80 and 87. They were all written for Rostropovich and first performed by him, mostly during the 1960s, with the Suite no.3 in 1974.

Rostropovich's skill and musical perception as a pianist was readily apparent in song recitals with the soprano Galina Vishnevskaya, whom he married in 1955; and he made his operatic conducting début in 1968 with *Yevgeny Onegin* at the Bol'shoy Theatre, Moscow, in which his wife sang Tat'yana. He conducted this again during a visit by the Bol'shoy company to Paris in December 1969 to January 1970, when a performance was also recorded. His conducting at this time was widely felt to be over-indulgent towards the music's sentiment, and in his British début as a conductor with the New Philharmonia Orchestra at the Festival Hall in September 1974, his freedom and flexibility of phrasing made the most of emotional character at the cost of some precision of orchestral ensemble. A recording of *Tosca* made in Paris with the Bol'shoy company was vetoed by the Soviet authorities, but he conducted *The Queen of Spades* at San Francisco in 1975. That year he bought from the estate of Gerald Warburg the 'Duport' cello of 1711 by Stradivarius. It was in perfect condition except for a scar on the lower part of its body, reputedly inflicted accidentally by Napoleon's spur after Duport had played to him. Rostropovich was appointed music director of the National SO of Washington, DC, in 1977, a post he held until 1994, and became a regular guest conductor with the LPO, with whom he performed and recorded the cycle of Tchaikovsky symphonies and also made the first recording of Shostakovich's *Lady Macbeth of the Mtsensk District*. He conducted *Yevgeny Onegin* at the Aldeburgh Festival (of which he became a joint artistic director) in 1979 and at the Florence Maggio Musicale in 1980. His premières as an opera conductor include Schnittke's *Life with an Idiot* (1992) and *Gesualdo* (1995). Besides his operatic recordings, which also include *Boris Godunov*, *War and Peace*, *The Queen of Spades* and *Iolanta*, he has made recordings of virtually all the standard cello repertory as well as a number of more recent works written for him, among them concertos by Lutosławski and Panufnik and Schnittke's Cello Concerto no.2.

2. *Mstislav Rostropovich, 1996*

In 1970 Rostropovich wrote an open letter (which remained unpublished) to leading Soviet newspapers and magazines in support of the proscribed author and Nobel prizewinner Aleksandr Solzhenitsïn, and in protest at new Soviet restrictions on cultural freedom. His travels in the West were thereupon much curtailed until, in 1974, he was allowed to leave the USSR with his wife and family for a two-year stay abroad, based in Britain. He gave his reasons in a letter that appeared in *La pensée russe*, a Russian-language weekly published in Paris, and in a signed article in the *New York Times* (6 March 1975). In 1978 Rostropovich and his wife were deprived of their Soviet citizenship for 'acts harmful to the prestige of the USSR'. He did not return to his homeland until 1990 when, following the break-up of the Soviet Union, he toured Russia with his Washington orchestra. In a gesture of political thanksgiving he played Bach on site at the demolition of the Berlin Wall in 1989, and in 1991 flew to Moscow to show support for Boris Yeltsin, then besieged in the Russian government building. In 1990 he played with the English Chamber Orchestra at Buckingham Palace in a concert to mark the 90th birthday of Queen Elizabeth the Queen Mother. Rostropovich's compositions include two piano concertos, several piano pieces and a string quartet. He contributed to *Tribute to Benjamin Britten on his Fiftieth Birthday* (London, 1963) and edited a Festschrift *Dank an Paul Sacher* (Zürich, 1976).

NOËL GOODWIN

Rosvaenge [Roswaenge, Rosenvinge Hansen], **Helge** (*b* Copenhagen, 29 Aug 1897; *d* Munich, 19 June 1972). Danish tenor. Engaged at Neustrelitz, he made his début as Don José in 1921. Engagements followed at Altenburg, Basle, Cologne (1927–30) and the Berlin Staatsoper, where he was leading tenor from 1930, being especially distinguished in the Italian repertory; he also sang regularly in Vienna and Munich. He appeared at Salzburg between 1933 and 1939 as Tamino (a role he recorded memorably under Beecham), Huon (*Oberon*) and Florestan, which he also sang at Covent Garden in 1938. He sang Parsifal at Bayreuth in 1934 and 1936 but otherwise avoided the Wagnerian repertory. After World War II Rosvaenge divided his time between Berlin and Vienna, continuing to sing until the late 1960s as Calaf, Radames and Manrico. His brilliant, lustrous voice, with its thrilling high register, is preserved on numerous recordings that encompass every aspect of his large repertory. He was able to reproduce in the recording studio the excitement of his live performances, as can be heard in his accounts of Florestan's scena and Wolf's *Der Feuerreiter*.

ALAN BLYTH

Rota (Lat.: 'wheel'). A term used to designate a round in the 13th century (and possibly the 14th). The only differences between the rota and the rondellus are the successive entries of the voices in the former, as against the simultaneous entries in the latter and the necessity for ending it arbitrarily. The difference between rota and canon (the medieval *fuga*) is more fundamental. The former achieves tonal equipoise through static circularity, while the latter is characterized by dynamic pursuit of an end. It is the difference between chordal homogeneity achieved with a melody whose built-in harmonic potential must be realized through imitative projection, and counterpoint, whose rigidly canonic procedure is not restricted to imitation at the prime.

The singing of rotas in medieval England was doubtless based on a pre-13th-century tradition and must have been practised to a much greater extent than the surviving sources show. These assumptions are justified not only by the fragmentary preservation of the sources, particularly the almost complete absence of manuscripts containing polyphony with vernacular texts, but also by the fact that rounds are rather easily improvised and therefore, unlike motets, were probably not regarded as *ars musica* requiring notation, unless they were unusually artful. One such composition, the only known piece specifically labelled rota in the manuscript, is the famous setting *Sumer is icumen in* (for further information and facsimile see SUMER IS ICUMEN IN). Another, with strophically continuous text, though lacking any designation as a rota, is identifiable as such, because the three successive voice entries are indicated in the manuscript (ed. in PMFC, xiv, 1979, no.35). Baude Cordier's 'rode' (?ronde) *Tout par compas* (early 15th century) is not so much a round as a French caccia in the quasi-strophic rondeau form; it is therefore sung three times fully as the text indicates, and twice in part. On the other hand, Robert Wilkinson's setting of *Jesus autem transiens – Credo in Deum* (*c*1500) is a true 13-part rota, though not specifically designated as such in its source, the Eton Choirbook. No medieval writer on music reported on the use and meaning of 'rota' (Johannes de Grocheo's discussion of 'rotunda vel rotundellus' refers to the rondeau).

ERNEST H. SANDERS

Rota, Andrea (*b* Bologna, *c*1553; *d* Bologna, June 1597). Italian composer. Nothing is known of his early life, but he may have worked in Rome. His first publication, the *Primo libro de madrigali a cinque voci*, was printed in Venice in 1579. In May 1583 he was proposed for the position of *maestro di cappella* at S Petronio, Bologna, by Cardinal Giacomo Boncompagni, who claimed that Rota was 'already known to be as good a musician and composer as anyone today, and a skilled teacher, having had many years' experience and a great many pupils'. Rota was duly appointed and in June took charge of the exceptionally large choir which comprised 34 *cantori*, 12 *chierici* and three instrumentalists.

As *maestro di capella* Rota seems to have enjoyed considerable esteem. In 1584 he published his *Motectorum liber primus*, and this work was reprinted as an act of homage three years later by one of his pupils, Damiano Scarabelli. Between 1586 and 1594 he received donations and a salary increase from the church authorities; in December 1594 a *maestro di canto* was appointed, presumably to free Rota from some of his teaching duties. In 1595 he was given 80 lire by the church authorities to assist with the publication of his *Missarum liber primus*.

The greater part of Rota's second book of motets, as well as his unpublished motets and *Magnificat* settings, are for *cori spezzati*. One of his unpublished masses, the Missa 'En voz à Dieux', and the two printed masses 'Qual è più grand'amore' and 'Non mi tolga il ben mio', are parodies on secular works by Rore. Charles Burney described Rota as an admirable contrapuntist, singling out for praise his six-voice *Da pacem Domine* (from *Motectorum liber secundus*).

As a madrigalist, Rota seems to have had close connections with the court of Ferrara: he contributed to

two Ferrarese anthologies, and his second book of five-voice madrigals was dedicated to Alfonso d'Este. Nevertheless, his madrigals tend to be conservative in style. The first books for four and five voices make sparing use of word painting, chromaticism and dissonance, while demonstrating considerable contrapuntal skill. His second book of five-voice madrigals and those written for the Ferrarese anthologies are more up to date, showing some influence of the Ferrarese luxuriant style and with a more frequent use of expressive dissonance. The Bolognese poet Cesare Rinaldi dedicated a sonnet to Rota, who set some of his verse.

WORKS

printed works except anthologies published in Venice

SACRED

Motectorum liber primus, 5–8vv (1584)
Motectorum liber secundus, 5–8, 10vv (1595)
Missarum liber primus, 4–6vv (1595); 1 ed. in AntMI, *Monumenta bononiensia*, iv/3 (1961)
Works in 1598[2], 1600[2]
Salmi a 3 chori, lost, see Waldner
4 masses: Missa brevis, 4vv (also in 1595); Missa de bello, 6vv; Missa 'En voz à Dieux', 5vv; Missa primi toni, 6vv: *I-Bsp*
2 psalms: Dixit Dominus, 8vv (2 copies), *Bc*, 1 ed. in AMI, i (1897/*R*); Hodie Christus natus est, 9vv, *Bc*
11 Magnificat, 8vv, 12vv, *Bc*, *Bsp*

K. BOSI MONTEATH

Rota, Antonio. *See* ROTTA, ANTONIO.

Rota, Nino (*b* Milan, 3 Dec 1911; *d* Rome, 10 April 1979). Italian composer. He grew up surrounded by music: his mother Ernesta Rinaldi was a pianist and the daughter of the composer Giovanni Rinaldi (1840–95). At the age of eight he was already composing, and in 1923 a well-received performance of his oratorio *L'infanzia di S Giovanni Battista* established him as a child prodigy. In the same year he entered the Milan Conservatory, where his teachers included Giacomo Orefice. After a brief period of study with Pizzetti, he moved to Rome (1926), where he studied with Casella, and took his diploma at the Conservatorio di S Cecilia three years later. On the advice of Toscanini he studied at the Curtis Institute in Philadelphia (1931–2) with Rosario Scalero (composition) and Fritz Reiner (conducting). He formed a friendship with Aaron Copland and discovered American popular song, cinema and the music of Gershwin: all these elements were grafted on to his passion for Italian popular song and operetta.

On his return to Italy, barely into his twenties, Rota attracted the attention of audiences and critics with a large body of music, predominantly chamber and orchestral works. At a time of open warfare between innovators and traditionalists (sustained by the mood established by the Fascist régime favouring warfare), Rota's style, in part building on the example of Malipiero, displayed original characteristics. Works such as *Balli* (1932), the Viola Sonata (1934–5), the Quintet (1935), the Violin Sonata (1936–7) and his first two symphonies (1935–9 and 1937–41) show Rota's trust in an unbroken link with the music of the past. This made Rota's idiom exceptionally and uninhibitedly responsive to the widest variety of influences, supported, as it was, by a masterly technique, an elegant manner and a capacity for stylistic assimilation. His language at this time is strikingly different from the contemporary predominant directions in Italy. For example, the symphonies draw on a middle-European, Slav symphonic tradition (Tchaikovsky, but possibly Dvořák even more so), probably absorbed during his American period and already infused with cinematic mood. He contributed to the renewal of Italian music with a body of work that has an immediacy of gesture and is rooted in a rare lyricism, built on harmonic languages, formal structures and a rhythmic and melodic idiom which sound distinctive and original. Gianandrea Gavazzeni commented of the Sonata for flute and harp (1937) that he heard 'the voice of an Italian Ravel, archaic, intimate, the voice of one who has invented a style that did not exist before'.

After World War II, Rota's critical fortunes altered considerably when, in the wake of the post-Webern movement, his work was increasingly judged to be anachronistic. This opinion was strengthened by his growing establishment as a film composer, held by many to be insignificant and uninvolved in the contemporary music scene. He continued, however, to write music for the concert hall and the opera house, with a constant cross-fertilization between the two areas: for a European composer this was an oblique, pioneering approach. In film music he used his eclectic inclinations and treated the boundaries of the film medium as a challenge, so producing some of the finest music of the genre.

He became a lecturer at Bari Conservatory (1939), and later its director (1950–77). In 1942, Rota began his long collaboration with the Lux Film company, directed by, among others, Guido M. Gatti and Fedele D'Amico. He created the music for around 60 films in ten years by such directors as Renato Castellani (*Mio figlio professore*, *Sotto il sole di Roma*), Mario Soldati (*Le miserie del signor Travet*), Alberto Lattuada (*Senza pietà*, *Anna*) and Eduardo De Filippo (*Napoli milionaria*, *Filumena Marturano*). In 1952, with *Lo sceicco bianco* (The White Sheik), he began an association with Fellini which lasted until the composer's death. Of their 16 films, some achieve an extraordinary marriage of music and image, such as *I vitelloni*, *La strada*, *La dolce vita*, *8½*, *Amarcord* and *Il Casanova di Federico Fellini*. Although it is generally thought that the director dominated the composer, the situation was more subtle and problematic as the music was required to fulfil a narrative and psychological role, frequently featured at the expense of the text itself. Fellini's film style owes a great deal to Rota's virtuosity, adaptability and insight. Examples include the many circus marches inspired by Julius Fučík's *Einzug der*

Gladiatoren and the engaging parody of Weill's *Moritat von Mackie Messer* in the theme of *La dolce vita*. In addition, Rota's tendency to quote, sometimes to the point of plagiarism – the theme for Gelsomina in *La strada* is based on the Larghetto of Dvořák's Serenade, op.22 – was a genuine inclination which converged with Fellini's imagery, to the point where it identified with it and lent it dignity. Rota's film career, amounting to over 150 titles, included collaborations with Luchino Visconti (*Rocco e i suoi fratelli* and *Il gattopardo* [The Leopard]) and directors such as René Clément, Franco Zeffirelli, King Vidor, Sergei Bondarchuk, as well as on the first two parts of Francis Ford Coppola's *The Godfather*.

Rota composed in a wide variety of genres, writing pieces of an almost provocative simplicity. His *Ariodante* (1942), audaciously 19th-century in manner, was followed by works reminiscent of operetta and vaudeville, such as *I due timidi* (1950), *La notte di un nevrastenico* (1959) and the overwhelming farce *Il cappello di paglia di Firenze* (1955). These works show an ability to produce instant sketches which the composer himself described as the product of his familiarity with the rhythm of film-making. Another favoured genre was that of the fairy tale as in *Aladino e la lampada magica* (1968) and *La visita meravigliosa* (1970), considered perhaps his finest score for the theatre.

The most significant orchestral works are the 3 piano concertos, the *Sinfonia sopra una canzone d'amore* (1947), the *Variazioni sopra un tema gioviale* (1953), Symphony No.3 (1956–7) and several concertos for various instruments. His piano and chamber music includes many original compositions, such as the 15 Preludes or the *Due Valzer sul nome di Bach* for piano (1975; re-used in *Casanova*), the Violin Sonata (1936–7), the String Quartet (1948–54), two trios (1958 and 1973) and a nonet (1959–77). His vocal music includes the oratorio *Mysterium* (1962) and the *rappresentazione sacra*, *La vita di Maria* (1968–70), in which a style derived in part from the neo-madrigalist manner of such composers as Petrassi and Dallapiccola results in an operatic-sounding eclecticism, with influences filtered through Stravinsky but rooted in other Eastern European styles (Musorgsky, for example).

Rota had frequent recourse to self-borrowing, increasingly apparent in the later film music and stage works. As a whole, Rota's work is a dense web of continual, multiple references where – in line with the composer's declared intention – film music and art music are allowed equal dignity. As early as *Il cappello di paglia di Firenze* he drew together material from preceding works, but it is particularly in a masterpiece like the ballet *La strada* (1966) and in the opera *Napoli milionaria* (1977) where self-quotation becomes a point of synthesis and revelation of his essential style. His first film score for Fellini, *Lo sceicco bianco*, stands out as a source-composition, a model of one of Rota's specific musical languages; other scores for Fellini as well as *Il cappello di paglia*, *Il giornalino di Gian Burrasca* and the incidental music for *Much Ado about Nothing* draw material from it. *La strada* makes use of themes from many works, including *Lo sceicco bianco*, *Le notti di Cabiria*, *Rocco e i suoi fratelli*, *Concerto soirée* and *8½*, while *Napoli milionaria* uses quotations from *Filumena Marturano*, *Plein soleil*, *La dolce vita*, *Rocco e i suoi fratelli* and *Waterloo*. Rota's uninhibited language corresponds in aesthetic terms to this flood of quotation, and the two aspects offer new definitions of such terms as 'new' or 'originality'.

WORKS

OPERAS

Irminque (A. Valcarenghi, after G.Cesare: *De bello gallico*), 1923, vs, inc., unperf.

Il principe porcaro (oc, 3, N. Rota, after H.C. Andersen: *The Swineherd*), 1925–6, vs, unperf.

Ariodante (3, E. Trucchi, after L. Ariosto: *Orlando Furioso*), 1938–41, Parma, Regio, 22 Nov 1942

Torquemada (4, Trucchi, after V. Hugo), 1943, Naples, S Carlo, 24 Jan 1976;

I due timidi (radio opera, 1, S. Cecchi D'Amico), 1950 (Milan, 1953)

Il cappello di paglia di Firenze (farsa musicale, 4, E. Rota and N. Rota, after E. Labiche and M. Michel: *Un chapeau de paille d'Italie*), 1945–55, Palermo, Massimo, 21 April 1955; (Milan, 1956) [incl. material from film scores Il birichino di papà, Le miserie del signor Travet, Lo sceicco bianco, and from the stage revue Il suo cavallo]

Scuola di guida (M. Soldati), spoken vv, orch, 1959, Spoleto, Caio Melisso, 12 June 1959

La notte di un nevrastenico (dramma buffo, 1, R. Bacchelli), 1959, RAI, 19 Nov 59 (Milan, 1961) [incl. material from La dolce vita]

Lo scoiattolo in gamba (favola musicale, 1, E. De Fillippo, after L. De Filippo), 1959, Venice, Fenice, 16 Sept 1959, rev. Bari, Conservatorio Piccinni, 13 June 1973 (Mainz, 1998)

Aladino e la lampada magica (fiaba lirica, 3, V. Verginelli, after *The Thousand and One Nights*), 1963–5, Naples, S. Carlo, 14 Jan 1968

La visita meravigliosa (2, N. Rota, after H.G. Wells), 1965–9, Palermo, Massimo, 6 Feb 1970 (Mainz, 1999)

Napoli milionaria (dramma lirico, 3, E. De Filippo), 1973–7, Spoleto, Nuovo, 22 June 1977 [incl. material from film scores Napoli milionaria, Filumena Marturano, Le notti di Cabiria, Plein soleil, La dolce vita, Rocco e i suoi fratelli, Le tentazioni del dottor Antonio, Toby Dammit and Waterloo]

OTHER DRAMATIC WORKS

Ballets: Rappresentazione di Adamo ed Eva (A.M. Milloss), 1957, Perugia, Morlacchi, 2 Oct 1957; Fantasia tricromatica. Balletto sulla musica delle 'Variazioni sopra un tema gioviale' (U. Dell'Ara), 1953, 1961, Naples, San Carlo, 3 Dec 1961 (Milan, 1953); La strada (12 scenes, F. Fellini, T. Pinelli and M. Pistoni), 1966, Milan, Scala, 2 Sept 1966 (Milan, 1966) [incl. material from film scores La strada, Lo sceicco bianco, Il bidone, Le notti di Cabiria, La dolce vita, Rocco e i suoi fratelli, Le tentazioni del dottor Antonio, 8½, Giulietta degli spiriti and from Concerto soirée]; Aci e Galatea (balletto mitologico, M. Otinelli after Ovid: *Metamorfosi*), 1971, Rome, Villa Celimontana, 1971; Le Molière imaginaire (ballet-comédie, 2, M. Béjart), 1976, Paris, Comédie française, and Bruxelles, Cirque Royal, Dec 1976 (Mainz, 1998), arr. suite, orch 1976–8 [simultaneous first perf.; incl. material from film score Caro Michele]; Dichterliebe–Amore di Poeta (M. Béjart, after R. Schumann and H. Heine), 1978, Bruxelles, 4 Dec 1978

Incid. music: 23 works for stage, radio and TV, incl. L'isola dei pappagalli. Con Bonaventura prigioniero degli antropofagi (S. Tofano), Turin, Alfieri, 18 Jan 1936; Il suo cavallo (R. Castellani, L. Longanesi, Steno and A.M. Milloss), Rome, Valle, 4 Sept 1944; L'impresario delle Smirne (C. Goldoni), Venice, Fenice, 30 Jul 1957; Veglia la mia casa, Angelo (K. Frings), Rome, Quirino, 10 Oct 1958; Romeo and Juliet (W. Shakespeare), London, Old Vic, 4 Oct 1960; L'Arialda (G. Testori), Rome, Eliseo, 22 Dec 1960; Dommage qu'elle soit une p. . . (J. Ford), Paris, des Nations, 29 Mar 1961; Much Ado About Nothing (Shakespeare), London, Old Vic, 1965 [incl. material from film scores Lo sceicco bianco, Plein soleil and Le tentazioni del dottor Antonio]; Il giornalino di Gian Burrasca (Vamba), RAI, 1965; La dodicesima notte (Shakespeare), Rome, Eliseo, 16 Mar 1979 [incl. material from film score Le notti di Cabiria]

GIORDANO MONTECCHI

Rotaru [Nemţeanu-Rotaru], **Doina (Marilena)** (*b* Bucharest, 14 Sept 1951). Romanian composer. A pupil at the No.1 Music School, Bucharest, she continued her musical education at the Bucharest Conservatory (1970–74), where her teachers included Cosma, Comişel, Ciortea, Niculescu and Olah; she was a postgraduate pupil of the latter in 1975–6. A lecturer at the Enescu Academy from

1974, in 1990 she was appointed professor of harmony, counterpoint and composition at the Bucharest Conservatory (now the University of Music). She was active in a number of youth organizations and for a period headed the Romanian Young Women Composers group. She is co-author of the treatise *Tratat de contrapunt vocal si instrumental* (Bucharest, 1977, 2/1986).

Shortly after completion of her studies, Rotaru became one of the most frequently performed composers in Romania. In addition, chamber works of hers were performed at Darmstadt in 1984, at the Warsaw and Edinburgh festivals in 1985, and, during the next four years, in Bremen, St Petersburg, Berlin and Hiroshima. Her talent as a composer was universally recognized at an early stage, thanks largely to her precocious discovery of an individual style. In its lyricism, its particular receptiveness towards poetry and subtle use of tone-colour her music may be considered typically Romanian, as with its contemplative nature. Her compositional technique is derived from the work of Marbe and Niculescu, particularly in its heterophonic writing. More generally her music is reminiscent of improvisation, representing a kind of musical Impressionism without clearcut contours in which tone-colour with its diffuse nuances is all-important. This impression, however, is an illusion as her music is constructed in a very deliberate and logical manner, particularly with regards melody. Her works also point to extensive knowledge of the technical capabilities of instruments.

She received the prize of Romanian Composers' Union in 1981, 1986 and 1990, the Enescu Prize in 1986 and first prize of the GEDOK International Competition for Women Composers in 1994.

CORNELIU DAN GEORGESCU

Rotaru, Vladimir (*b* Skulen', 15 Oct 1931). Moldovan composer. From 1951 to 1960 he studied at the Kishinyov Institute of Arts in the flute class of Yevtodiyenko, the composition class of Lobel' and Gurov, and the conducting class of Gurtovsky. In 1989 he became a professor of the Musicescu Academy of Music of Moldova, heading the chamber ensemble department. He is an Honoured Representative of the Arts of the Republic of Moldova (1967), and received the State Prize of Moldova (1993) for his four instrumental concertos. The larger part of his output was written between the 1970s and 90s. For Rotaru the most attractive genres are the instrumental concerto and chamber music. The most prominent features of his style are neo-folklorism and neo-romanticism, although he is not averse to other influences of 20th-century music. His musical thinking, which is essentially nationalist, tends towards improvisatory development, rhapsodic forms and emotional expansiveness. Rotaru's works have been performed in the Balkans, Russia, Germany, Finland, France and Hungary.

Rotenbucher [Rothenpucher, Rottenbücher, Haunreuter, Hannreither, Haureuther], **Erasmus** (*b* Braunau, Upper Austria, *c*1525; *d* Nuremberg, bur. 15 July 1586). German music editor, ?composer and schoolmaster. He was originally called Haunreuter; it is not known how he came to be called Rotenbucher. He probably attended the school of the monastery of St Nikola, just outside Passau, where Leonhard Paminger was headmaster; he enjoyed a lifelong friendship with Paminger's son Sophonias and wrote an elegy on Paminger's death in 1567. In 1542 he began his studies at the University of Ingolstadt, moving to Wittenberg University in 1543. It was there, encouraged by Georg Rhau, that he decided to edit collections of music. Soon after Rhau's death, probably in 1548, Rotenbucher joined the staff of the St Egidien school at Nuremberg, where he eventually became *supremus* (i.e. ranking third, after the Rektor and Kantor). He may have taught Hans Leo Hassler. With the arrival of Friedrich Lindner as Kantor in the late autumn of 1574 he retired

from teaching and became sacristan and almoner at St Sebaldus. His two anthologies of bicinia are extremely important both in their size and in the nature and quality of their contents: several pieces, including some by leading composers of the early 16th century, are known only through them. The first, *Diphona amoena et florida* (Nuremberg, 1549[16]; 22 ed. in HM, lxxiv, 1951), contains 99 pieces all with Latin texts, most of them very short and written in the florid contrapuntal style of the time; the composers are mainly Franco-Flemings, and include Isaac and Josquin. In this varied and colourful collection, a cycle of six songs in praise of music (nos.1–5 and 98) and two complete groups of mass and *Magnificat* movements (nos.40–64 and 66–72 respectively) are particularly notable. The anonymous five-part circular canon on the title-page of both partbooks and the first piece, *Encomium musices*, which is also anonymous, may be by Rotenbucher himself. His second anthology, *Bergkreyen* (Nuremberg, 1551[20]; three ed. F. Piersig, Kassel, 1930), comprises 28 German sacred and secular songs by German composers of a younger generation, including Heller and Stoltzer, and ten anonymous pieces all with French texts. As the title of the collection would lead one to expect (*see* BERGREIHEN), the pieces are in strict note-against-note style in the manner of improvised discant. (*MGG1*, F. Krautwurst [incl. full bibliography])

FRANZ KRAUTWURST

Roth, Christian (*b c*1585; *d c*1640). German composer and organist. In the early 17th century he worked as a church organist at Leitmeritz, Bohemia (now Litoměřice). He published *Couranten Lustgärtlein, in welchem 74 Couranten, so zubevor nie in Druck ausgangen, zu finden, welche auff allerhand musicalischen Instrumenten gantz lieblich und lustig können gebraucht werden*, in four and five parts (RISM 1624[18]). The courantes have attractive melodies and rhythms; two of them are by Albert Crantz. Another collection by Roth, *Opusculum sacrarum cantionum*, for four to eight voices, is recorded in an inventory at Pirna of 1654 but is lost. Two works, copied by Johann Cadner of Pirna in 1615 – *Gloria in excelsis Deo*, for two voices, and *Nun lob mein Seel den Herren*, for eight – are extant (*D-Dl*).

BERND BASELT

Roth, Daniel (*b* Mulhouse, 31 Oct 1942). French organist and composer. After completing his studies at the Paris Conservatoire, where he won five *premiers prix* in the classes of Duruflé (harmony), Marcel Bitsch (fugue and counterpoint), Henriette Puig-Roget (accompaniment) and Rolande Falcinelli (organ), he studied early music with Marie-Claire Alain, and at 20 became organist of the Sacré-Coeur in Paris. After winning the Grand Prix de Chartres in 1971 he was appointed organist at St Sulpice (1985). From 1984 to 1994 he was a member of the commission for historic organs. He has also taught in various institutions in Marseilles, Washington, Strasbourg, Saarbrücken and Frankfurt. Specializing in French 19th-century music and Bach, he has recorded Franck's complete organ works and several organ symphonies by Widor, and in 1974 was the first to dedicate an entire disc to the music of Boëly. Roth is widely recognized as a brilliant performer and one of the best improvisers of his generation. His own organ compositions are specifically tailored to French 19th-century instruments.

FRANÇOIS SABATIER

Roth, Ernst (*b* Prague, 1 June 1896; *d* Twickenham, 17 July 1971). English music publisher and writer of Czech birth. He studied law, music and philosophy at Prague University, both before and after military service on the Eastern Front in World War I. In 1921, after gaining the doctorate in law, he settled in Vienna, studying music at the university there under Adler. In the following year he began his career as a music publisher, at first with Universal Edition, of which he became head of publications in 1928. After the German annexation of Austria, Roth moved to London in 1938 and joined the firm of Boosey & Hawkes: he became chairman of the music publishing company in 1963. In the development of this catalogue Roth was closely associated, as publisher, friend and adviser, with both Strauss (the final setting of whose *Vier letzte Lieder* is dedicated to him) and Stravinsky; in his book *The Business of Music* he has left absorbing reminiscences about each. Apart from an early novel, *Magalhaes* (Berlin, 1919), Roth also wrote *A Tale of Three Cities*, an evocative account of Vienna, Budapest and Prague in the early part of the 20th century, and numerous articles on literature, history, art, philosophy and music. His fluency in most European languages was put to use in his many translations of operatic and vocal music. His professional expertise in both music and law enabled him to play a leading part in formulating the complex legislative control of international rights in music (he became in 1959 vice-president of the Music Section of the International Publishers' Association). His widely varied knowledge ensured his reputation as one of the leading music publishers of the 20th century.

ALAN FRANK

Roth, Friedrich (*fl* Milan, 1908–11). Wind instrument inventor, active in Italy. He is best known for the ROTHOPHONE, first introduced in 1911. He also invented the 'rothcorno' in 1908.

Roth, Hieronymus. *See* ROSSO, HIERONYMUS.

Roth [Rothe], **Martin** (*b* ?Naumburg, *c*1580; *d* 1610). German composer. From 1606 to 1608 he was Kantor at Schulpforta, where his pupils must have included the young Schein. His only known printed works are 16 motets for seven and eight voices which appear in the two-volume anthology edited by Erhard Bodenschatz,

one of his predecessors at Schulpforta: *Florilegium Portense* (RISM 1618[1]) and *Florilegium musici Portensis* (RISM 1621[2]). In the latter he is represented by no fewer than 15 pieces, giving him by far the largest share of any composer. These motets are settings of both Latin and German texts, and nearly all are written for the eight-part, double-choir arrangement which was so popular in Germany at the turn of the century and which predominates throughout the *Florilegium*. Their style resembles most closely that of Jacob Handl, particularly in their use of choirs of the same pitch and in the resultant unison antiphony which, when applied to very short phrases, becomes almost like an echo. Also common to both composers is a fundamentally diatonic harmony and a syllabic style of contrapuntal writing in which the interest is not so much in the movement of lines as in the juxtaposition of blocks of chords. The harmonic rather than melodic nature of the bass lines is another indication of this tendency towards vertical thinking. An interesting feature of Roth's eight-part writing is that, although the original division is into identical choirs, he sometimes employs cross-groupings such that high and low vocal groups are contrasted with each other. Although all the pieces are provided with a continuo part, it is virtually certain that this was added by Bodenschatz; it is in every case no more than a *basso seguente*. While he showed little originality in either melody or rhythm, Roth's attempts at formal organization and his vertical concept of composition are indications of progressive thought.

A. LINDSEY KIRWAN

Röth, Philipp (*b* Munich, 6 March 1779; *d* Munich, 27 Jan 1850). German composer. He studied the cello and other instruments with Anton Schwarz, a Bavarian court musician, and composition with Peter von Winter. He was appointed a Bavarian court musician in 1796. His early works include songs, variations for flute, and a number of concertos. In 1809 an opera, *Holnara*, was performed with success at the Munich court theatre, and a second, *Pachter Robert*, followed two years later. He also wrote a number of Singspiele in the Vienna pattern for Munich (e.g. *Zemire und Azor*, a version of Bäuerle's *Der verwunschene Prinz*, given at the Isartortheater on 22 March 1823). Perhaps his most successful score was the *Freischütz* parody music that he and Riotte provided for Heigel's *Staberl in der Löwengrube* (also known as *Alles à la Freischütz* and *Staberl als Freischütz*), mounted at the Isartortheater on 4 December 1822 by Karl Carl and performed frequently before the company (including Röth himself) brought it to the Theater an der Wien during their guest season in 1826. It continued to be performed in Vienna until 1850. Röth's other successes in Vienna include *Der hölzerne Säbel* (staged successfully in all three Viennese suburban theatres between 1820 and 1822), *Der Kampf mit dem Drachen* and *Das Abenteuer im Guadarama-Gebirge* (both performed in 1825). Röth returned to Munich in 1828. His published works include a flute concerto, dances and chamber music.

PETER BRANSCOMBE

Roth, Wilhelm August Traugott (*b* nr Erfurt, *c*1720; *d* Halle, 20 April 1765). German composer. He studied the organ with Jakob Adlung in Erfurt and composition and the harpsichord with J.G. Walther in Weimar. At Halle University he studied philosophy and theology, after which he went to Berlin as a music teacher (1754). There he contributed a number of compositions to the weekly journal *Der Freund*, whose music editor he became in 1757. In the same year ten of his lieder for the journal were published separately. This collection was followed by his *Neueste Sammlung teutscher Lieder* (1759), with a treatise on the German lied, and, in the next year, by its sequel, *Erste Nachlese zu den neuesten Sammlungen von teutschen Liedern*. During these years he continued his music studies in Berlin with J.G. and C.H. Graun, C.P.E. Bach, J.F. Agricola and F.W. Marpurg, and served as organist at the Petrikirche (from 1758). From summer 1764 he briefly succeeded W.F. Bach as organist at the Marienkirche in Halle. His only other known works are a few lieder and a harpsichord sonata in contemporary collections. Most of his lieder are in the *galant* style, often with highly embellished melodies in an instrumental idiom and with figured basses.

RAYMOND A. BARR

Rothenberg, Ned (*b* Boston, 15 Sept 1956). American composer and woodwind performer. He attended the Berklee School of Music and Oberlin College (BA 1978), where he studied the flute with Judith Bentley. He also had lessons in composition with Logan and Mizelle and in performance with Joseph Viola (saxophone), Dick (flute), George Coleman (jazz improvisation) and Les Scott (saxophone and clarinet). During his formative years in the middle and late 1970s he was active as a performer in the flourishing 'downtown' scene in New York; in 1977 he co-founded the trio Fall Mountain (with Bob Ostertag, synthesizer and Jim Katzin, violin), which was active until 1981, touring the USA and Europe. He is a member of New Winds, a cooperative ensemble, and has appeared in concert with Braxton, La Barbara, Teitelbaum and others. In 1985 he was awarded a New York Foundation for the Arts fellowship. Additional awards include grants from the New York State Council on the Arts, the Lila Wallace Foundation, Chamber Music America and ASCAP, among others.

Rothenberg has made a notable contribution to the repertory of extended techniques for wind instruments, including flute, bass clarinet, ocarinas and the soprano, alto and tenor saxophones. In particular he has perfected methods of circular breathing and developed unorthodox fingerings to achieve complex multiphonics which allow for the simultaneous performance of several rhythms or melodic ideas. In his improvisations he displays a markedly individual expressive profile. The motifs and

rhythms on which he elaborates in performance are often reminiscent of non-Western musical idioms. Rothenberg has transcribed a number of shakuhachi compositions by Kurosawa Kinko (1710–71) for performance on alto saxophone. During a six-month residency in Japan he studied shakuhachi with two masters, Goro Yamaguchi and Katsuya Yokoyama.

JOAN LA BARBARA

Rothenberger, Anneliese (*b* Mannheim, 19 June 1924). German soprano. She studied in Mannheim with Erika Müller and made her début in 1943 at Koblenz, where she was soon singing such parts as Gilda and the title role in Pfitzner's *Das Christ-Elflein*. From 1946 to 1973 she was a member of the Hamburg Staatsoper, where her roles included Cherubino, Blonde, Oscar, Musetta, Olympia and the three soprano roles of von Einem's *Der Prozess* in its first performance in Germany. At the 1952 Edinburgh Festival she sang Regina with the Hamburg company in the British stage première of *Mathis der Maler*. She first appeared at Salzburg in 1954, creating Telemachus in Liebermann's *Penelope*; she returned to create Agnes in the German version of his *Die Schule der Frauen* (1957) and to sing Zdenka (*Arabella*), Flaminia (Haydn's *Il mondo della luna*), Sophie and Konstanze. Her many appearances as Sophie included those at Glyndebourne (1959–60); in 1960 she made her Metropolitan début as Zdenka. She sang regularly at Munich and Vienna from the mid-1950s. Her large repertory included Mozart's Ilia, Susanna and Pamina, Berg's Lulu, Adele (*Die Fledermaus*), and the title role of Heinrich Sutermeister's *Madame Bovary*, which she created in Zürich (1967). Rothenberger had unusual acting ability and a light, well-schooled voice. She made several complete recordings of both opera and, especially, operetta, and wrote an autobiography, *Melodie meines Lebens* (Munich, 1972).

HAROLD ROSENTHAL/R

Rothenpucher, Erasmus. *See* ROTENBUCHER, ERASMUS.

Rother, Artur (Martin) (*b* Stettin [now Szczecin], 12 Oct 1885; *d* Aschau, 22 Sept 1972). German conductor. He was taught by his father, and then studied composition under Hugo Kaun in Berlin, and musicology and philosophy in Tübingen and Berlin. In 1905, as a pianist, he gave concerts with the violinist Willy Burmester. From 1907 to 1914 he was an assistant at the Bayreuth Festival, and from 1927 to 1934 Generalmusikdirektor in Dessau. From 1938 to 1958 he was principal Kapellmeister at the Städtische Oper in Berlin, and from 1946 to 1949 he was also principal conductor of Berlin Radio. Rother was an accomplished musician of wide interests. He prepared new editions of Gluck's *La rencontre imprévue* and Mozart's *Idomeneo*, and composed chamber music, lieder and dramatic music. In 1952 he was awarded the Kunstpreis der Stadt Berlin.

HANS CHRISTOPH WORBS/R

Ròthfono (It.). *See* ROTHOPHONE.

Rothier, Léon (*b* Reims, 26 Dec 1874; *d* New York, 6 Dec 1951). French bass. His early training was as a violinist, but he was persuaded to pursue singing instead. He studied at the Paris Conservatoire (1894–9) with Crosti (singing), Lhérie (*opéra comique*) and Melchissedec (opera). He made his début in 1899 as Jupiter in Gounod's *Philémon et Baucis* at the Opéra-Comique, where he remained until 1903; his roles included Zuniga, the King (*Cendrillon*), Don Fernando (*Fidelio*), Maître Ramon (*Mireille*), Colline, and the junk-seller in *Louise*, which he created in 1900. He then sang with the Marseilles (1903–7), Nice (1907–9) and Lyons (1909–10) companies before going to the USA. His Metropolitan début was in 1910 as Gounod's Méphistophélès, and he remained with the company for 30 years. His roles included Ramfis, Pimen, Alvise Badoero, Raimondo, Arkel, the King (*Le roi d'Ys*) and Sparafucile. He sang Bluebeard at the American première of Dukas' *Ariane et Barbe-bleue* (1911) and created Father Time in Albert Wolff's *L'oiseau bleu* (1919) and Major Duquesnois in Deems Taylor's *Peter Ibbetson* (1931). His last appearance was as Massenet's Count des Grieux (1939). He also sang in San Francisco and with the Chicago summer opera at Ravinia Park.

KATHERINE K. PRESTON, ELIZABETH FORBES

Rothmüller, (Aron) Marko (*b* Trnjani, nr Prijedor, 31 Dec 1908; *d* Bloomington, IN, 20 Jan 1993). Croatian baritone. He studied in Zagreb and then in Vienna, with Berg, Regina Weiss and Franz Steiner. He made his début at Hamburg-Altona in 1932 as Ottokar (*Der Freischütz*). He returned to Zagreb for two years and in 1935 was engaged by the Zürich Opera, where he sang regularly until 1947, scoring particular successes in Verdi and Wagner and creating Truchsess von Waldburg in *Mathis der Maler* (1938). In 1946 he joined the Vienna Staatsoper, singing there until 1949. Having made his London début in 1939 as Krušina (*The Bartered Bride*) at Covent Garden, in 1947 he sang Rigoletto with the New London Opera Company at the Cambridge Theatre and John the Baptist (*Salome*) during the Vienna Staatsoper's season at Covent Garden. He was a member of the Covent Garden company from 1948 to 1952, singing a wide variety of roles including Amonasro, Rigoletto, Scarpia, Gunther, Tomsky (*The Queen of Spades*) and the title role in *Wozzeck* in its first British stage performance (1952). He appeared with the Glyndebourne company (1949–55) as Guglielmo, Count Almaviva, Don Carlo (*La forza del destino*), Macbeth and Nick Shadow. He made his New York début with the New York City Opera (1948) and later sang at the Metropolitan (1959–65), making his

début as Kothner. From 1955 to 1979 he taught at Indiana University, Bloomington.

Rothmüller had a magnetic stage presence and a voice of incisive and individual timbre. He made a few operatic recordings, among them Wolfram's solos and Scarpia's 'Te Deum' as well as a bleak 1944 recording of *Winterreise*. Interested in Jewish music, he wrote *Die Musik der Juden* (Zürich, 1951; Eng. trans., 1953, rev. 2/1967). He composed a number of works, including Sephardi religious songs, a setting of Psalm xv, a Symphony for strings and two string quartets.

HAROLD ROSENTHAL/ALAN BLYTH

Rothophone [Rothphone] (It. *ròthfono*; Ger. *Rothphon*). A double-reed wind instrument of conical bore, made of brass. It closely resembles both the SARRUSOPHONE and saxophone in terms of fingering, although it has a somewhat narrower bore, and its outward appearance is like that of the saxophone. The complete family comprises soprano in B♭, alto in E♭, tenor in B♭, baritone in E♭ and bass in B♭.

The rothophone is named after its inventor Friedrich Roth, who in 1908 had also invented the 'rothcorno'. The baritone rothophone in E♭, pitched one octave above the reed contrabass that it was intended to complement, was first introduced in 1911 at the *International Music Congress* in Rome. The following year the complete family of five sizes was patented by the firm of Fratelli A. & M. Bottali of Milan, who were to become their principal manufacturer. The Bottali brothers had in 1898 taken over the workshop of Antonio Bottali's father-in-law Ferdinando Roth, doubtless a kinsman of Friedrich, which was known for saxophones and innovative brass instruments. The rothophone, like the sarrusophone, was intended to replace the oboe and bassoon in wind bands. Its convenient shape, similar to that of the saxophone, which by then was no longer protected by patent, meant that the rothophone offered several advantages over the sarrusophone. It was less heavy and used lighter reeds, and thus enjoyed some degree of success in Italian bands between the wars.

In 1937, shortly after the demise of Bottali, their successor Orsi advertised the rothophone under the name of 'saxorusofono' in an attempt to promote Bottali's unsold stock more successfully. This was an apt name for an instrument possessing features common to both the saxophone and sarrusophone, although as a marketing strategem it was insufficient to revive interest in the rothophone. Although mass-produced and notably cheaper than the sarrusophone, the rothophone failed ever to supplant it. It was never manufactured outside Italy, and its distribution was restricted entirely to that country's sphere of influence. Remaining unknown abroad and represented in few collections, it has hitherto been almost totally ignored in the literature.

WILLIAM WATERHOUSE

Rothstein, Edward (*b* Brooklyn, NY, 16 Oct 1952). American music critic. He studied mathematics at Yale University, where he obtained the BA in 1973 and then gained the MA in English literature at Columbia University (1978) and the PhD at Chicago University, with a dissertation on social thought (1994), studying among others, with Charles Rosen. In 1980 he became a music critic for *The New York Times* and was made chief music critic in 1991, writing about art, literature, culture and technology for all sections of the paper. He has also worked as the senior editor of *The Free Press* (1984–87), a music critic for *The New Republic* (1984–91) and has had a monthly column in *The Independent Magazine* (UK). His principal areas of interest are the relationship between music and the other arts and sciences, aesthetics, technology and consciousness and the nature of criticism. He has received various awards, including the Guggenheim Fellowship for the study of music (1991) and the ASCAP-Deems Taylor Award for Music Criticism (1986 and 1989).

PAULA MORGAN

Rothwell [Barbirolli], **Evelyn** (*b* Wallingford, 24 Jan 1911). English oboist. She studied with Leon Goossens at the RCM, London. In 1931 she joined the Covent Garden Opera touring orchestra (where she met the conductor John Barbirolli, whom she was to marry in 1939). Engagements followed with the Scottish Orchestra (1933–6), the LSO (1935–9) and the Glyndebourne Festival Orchestra (1934–9). After her marriage she began her career as a soloist. Gordon Jacob, Arnold Cooke, Stephen Dodgson, Arthur Benjamin, Edmund Rubbra and Elizabeth Maconchy, as well as her husband, have dedicated works to her. In 1934 at Salzburg she gave the first performance of the rediscovered Mozart Oboe Concerto K314/271K. From 1971 she taught at the RAM. She retired from performing in the late 1980s, and has subsequently served on the jury for many competitions.

PHILIP BATE/JANET K. PAGE

Rothwell, Walter Henry (Rothschild) (*b* London, 22 Sept 1872; *d* Los Angeles, 12 March 1927). American conductor of English birth. He spent his childhood in Vienna, where he studied at the Musikverein Konservatorium (1881–7): the piano with Julius Epstein, and harmony and counterpoint with Robert Fuchs and Bruckner. Upon graduation, he had further studies in composition with Ludwig Thuille and Max von Schillings in Munich. He was assistant conductor to Mahler at the Altona Stadttheater, Hamburg (1895–7), and then conducted in various European opera houses before settling at the Stadsschouwburg, Amsterdam (1903–4). He went to the USA under the auspices of the Henry Savage Opera Company and conducted the first American performances in English of *Parsifal* (1904–5) and *Madama Butterfly* (1906). He conducted the St Paul SO from its inception in 1908 until its disbandment in 1915, during which time he inaugurated the first children's concerts given in America. From 1915 to 1918 his activities were centred in New York, where he taught, composed and conducted. Rothwell became the first conductor of the Los Angeles PO in 1919 and served there until his death. Among the prominent soloists whom he had worked with in Europe and was able to engage for his American orchestras were Alma Gluck, Mischa Elman, Teresa Carreño, Nellie Melba, Eugene Ysaÿe and John McCormack. His ability to attract top musicians from other orchestral posts and his choice of popular programmes based on the Romantic repertory contributed to the early development and success of the Los Angeles PO.

JUDITH ROSEN

Roto-toms. Tunable single-headed drums without a shell – in effect, tunable drumheads. They were invented in the 1960s by the American composer and percussionist Michael Colgrass. Roto-toms may be used singly or in sets, each drum connected by a light metal frame to a centre spindle; the pitch is raised by turning the drum clockwise and flattened by turning it anticlockwise. A small glissando may be produced by turning a drum with one hand while playing with the other. Roto-toms are made by the American manufacturer Remo in seven sizes, from 15 cm to 46 cm in diameter, and with an overall range of *e*″–*e*⁗. To a percussionist they are extremely useful instruments because of the ease of changing pitch and because without a shell, roto-toms fit easily into a multiple percussion set-up. By using several drums of the same size a chromatic range can be created. Tippett used a two-octave range in *Byzantium* (1991) and a three-octave range in *The Rose Lake* (1995). Roto-toms are normally played with timpani or vibraphone mallets.

JAMES HOLLAND

Rotrouenge [rotruenge, retroncha]. A medieval term applied to certain troubadour and trouvère poems, usually denoting the presence of a refrain and of distinguishing features of rhyme scheme. The term in its various forms occurs fairly seldom in the surviving troubadour and trouvère repertory; nevertheless, it has attracted considerable attention among modern scholars.

From Provençal treatises about poetry we can conclude that the *retroncha* had a refrain, but it is not clear what other distinguishing elements it had, if any. Songs with refrain are relatively rare in the surviving troubadour repertory, but neither in treatises nor in song collections does there appear to be any reason for using the term 'retroncha' for all troubadour songs with refrain. According to Jeanroy, only four Provençal poems bear the term as a label in the manuscripts; all four have a refrain, which in Jeanroy's estimation is the only detail in the text that distinguishes them from the ordinary chanson. Of these four songs, three survive with music – all three (labelled 'retroencha') are by Guiraut Riquier and occur in *F-Pn* fr.22543, f.111*v*. An evaluation of the style and form of these melodies in comparison with troubadour melodies in general is hazardous because of the small number of troubadour melodies that survive, and because those by Guiraut amount to almost a fifth of the total

repertory. Nevertheless, it can safely be said that the three melodies under consideration differ from one another approximately as much as all of Guiraut's 48 melodies differ from one another.

Among the trouvère chansons there are six that are called 'rotrouenge' in the texts of the poems. Four of these are attributed to Gontier de Soignies (R.354, 636, 1505*a* and 1914; R.2082 has sometimes erroneously been included among these). One more song called 'rotruenge' by its author may have been composed by Gontier, because the name 'Gontier' is mentioned in the song in a manner similar to that in which it occurs in some of the songs that are ascribed to him. The remaining song is *Retrowange novelle Dirai et bone et belle* (R.602), attributed to Jaque de Cambrai. Gontier de Soignies lived around 1200 or before, and Jaque de Cambrai lived in the second half of the 13th century. Both are rather unusual trouvères, Gontier because he used exclusively certain rhyme patterns that were infrequently used by other trouvères and Jaque because he wrote almost exclusively contrafacta. The music for only one of the six songs (R.636) has survived along with the text, and there is nothing unusual about the melody except for its form, which corresponds to the form of the poem. Ex.1 shows the first and last strophes. In content the poems do not reveal any significant aspects that set them apart as a group from the trouvère repertory in general. Thus only form or rhyme scheme can give any indication of what, if anything, may have been the distinct properties of a medieval song genre called 'rotrouenge'. Table 1 shows the metrical scheme and rhyme patterns of the songs (letters denote rhyming sounds; the sign ˘ denotes a feminine rhyme; capital letters signify refrains; subscript numerals indicate the number of syllables in the line). It indicates clearly that in rhyme scheme these songs differ from the vast majority of the trouvère poems. Four of the rotrouenges have a refrain at the end of the strophe, another has its refrain approximately in the middle of the stanza, and one has no refrain at all. Refrains are not unusual in the trouvère repertory, although songs with a refrain form only a fairly small minority. The monorhyme

opening found in all six songs is decidedly an infrequent phenomenon, but it is certainly not unique to the songs called 'rotruenge'; in fact, there are several dozen songs with similar rhyme patterns, including seven others by Gontier de Soignies. Some of them (none by Gontier however) are called 'chanson' in their text. There is one song (R.1312) with exactly the same metrical scheme and rhyme pattern as the two 'rotruenges', R.354 and R.1914, except that their refrains have a feminine ending instead of a masculine one.

Despite the absence of unambiguous medieval information about the specific characteristics of the rotrouenge, both Gennrich and Spanke developed extensive theories about its textual and melodic form. Even though the two scholars disagreed on certain details, by implication both excluded from the genre 'rotrouenge' certain songs that were explicitly given that name in the Middle Ages. Frappier, in his survey of medieval lyric poetry, remarked: 'we are not absolutely sure that we have any authentic specimens of the rotrouenge'. Thus the best conclusion may well be that by the late 12th century and the 13th 'rotrouenge' was no more than an attractive old term and that, as far as form and content are concerned, the rotrouenge had lost its identity if it ever had one.

HENDRIK VAN DER WERF

Rott, Hans (*b* Vienna, 1 Aug 1858; *d* Vienna, 25 June 1884). Austrian composer. He studied at the Vienna Conservatory with Bruckner (organ), L. Landskron (piano), H. Graedener (harmony) and F. Krenn (counterpoint and composition). For some years up to 1878 he was organist at the Piarist church in Vienna but thereafter remained without a post. On 17 September 1880 he visited Brahms to seek his advice, but, like Wolf, he was rebuffed; within a month he had become insane. His importance as a composer lies in his influence on his close friend Mahler. In particular, his Symphony in E (1878–80) anticipates those of Mahler in its thematic material and compositional techniques. Rott's many other works (in *A-Wn*) include songs, several orchestral pieces, a string quartet and a string quintet.

PAUL BANKS

Rotta. Stock piece played directly after a trumpet ensemble sonata in the 16th and early 17th centuries and into which the sonata gradually merged. It consisted of irregularly phrased sections in which the rhythmic activity gradually dissipated. For further information, see P. Downey, *The Trumpet and its Role in Music of the Renaissance and Early Baroque* (diss., Queen's U., Belfast, 1983).

PETER DOWNEY

Rotta [Rota], **Antonio** (*b* ?Padua, *c*1495; *d* Padua, 1549). Italian lutenist. Canon Scardeonius of Padua wrote in 1560 that Rotta was not only virtually unrivalled in Italy as a lutenist, but was also an excellent teacher and had grown quite rich by giving lessons on the lute. Scardeonius also mentioned that Rotta had published 'praecepta notabilia' for playing the lute, presumably meaning the appendix to Rotta's *Intabolatura* (Venice, 1546), 'Regula alli lettori', an introduction to the lute based on Italian tablature. The *Intabolatura* contains intabulations of six French chansons, six madrigals, four motets by Jacquet of Mantua, Mouton, Willaert and Gombert, 26 dances and dance-songs and six ricercares. The composers of the vocal models are Arcadelt, de Porta, Costanzo Festa, Maille, Robert Meigret, Rogier Pathie and Nicolas Payen. Rotta's own dance suites comprise passamezzo, galliard and paduana in triple time. The galliard and paduana are developed from the passamezzo, using different rhythms. The writing is chordal but enlivened by diminutions. Some of his ricercares are in an imitative polyphonic style, others are more impromptu in character.

HANS RADKE/R

Rotte (i). Another name for the triangular PSALTERY (see illustration). In a 12th-century copy made at St Gallen of Notker Balbulus's translation of the psalms, the Greco-Latin word 'psalterium' is consistently glossed as 'rotta'. The copyist has added to the blank last page his own complaint that the ancient ten-stringed psaltery has been adopted by musicians and actors, who have altered its mystic triangular shape to suit their own convenience, increased the number of strings and given it the barbarian name 'rotta'. Among the unfamiliar instruments being brought back to western Europe at this time by returning Crusaders was the santir, a Middle Eastern plucked chordophone which normally had the shape of an equilateral triangle with one point truncated to form a trapezium. It is probable that the similar-sounding biblical name 'psalterium' attached itself to this new instrument, which rapidly became popular in secular society. The santir/psalterium appears frequently in illuminated manuscripts from the 11th century, and also, further modified, as the 'istromento di porco', so called because its shape resembled that of a pig's head. It was perhaps this sort of alteration that prompted the complaint by the 12th-century copyist of Notker Balbulus. The musicians and actors he speaks of may well also have applied to the new instrument, whatever its shape, the name of one already familiar to them though different in appearance – the Germanic lyre. An epigram in an 11th-century German manuscript refers to 'psalterium triangulum, i.e. rottam'.

Galpin was of the opinion that by the late Middle Ages there were two kinds of rotte, the Germanic lyre (*see* ROTTE (ii)) and 'a southern form, somewhat triangular in shape, with many more strings, backed by a sound-board similar to that of the Psaltery but distinct from it . . .'. He cites as evidence a couplet from a 15th-century poem:

> 'rotys of Almayne
> And eke of Arragon and Spayne'

and adds that the Arab writer Ashshakandi had declared in 1231 that the 'rotteh' was a musical instrument made in Seville.

King David playing a rotte or triangular psaltery: miniature from an 11th- or 12th-century MS (D-Mbs Clm 13067, f.18r)

The name 'rotte' has, in fact, been loosely applied to various kinds of stringed instruments at one time or another. A 15th-century dictionary, for example, gives the definition 'Rott, rubeba, est parva figella' (A rotte, or rybybe, is a small fiddle).

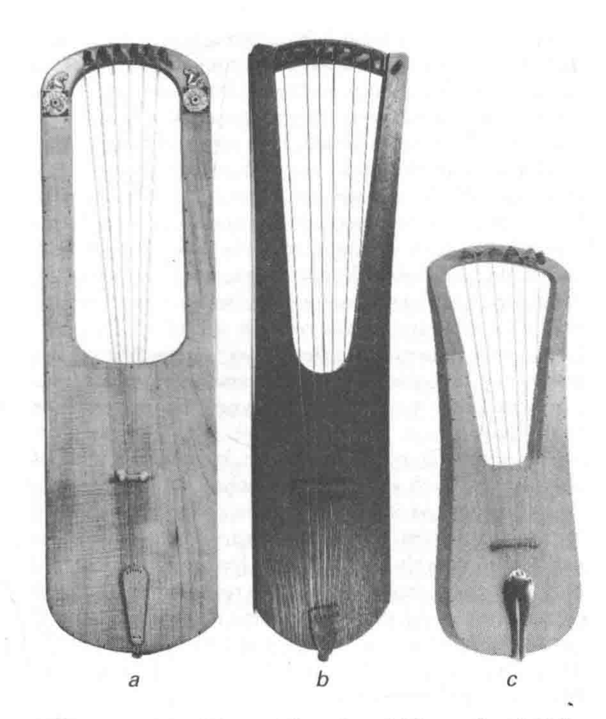
MYRTLE BRUCE-MITFORD

Rotte (ii) [round lyre, Germanic lyre]. The name given in Middle German to one of the most widely used plucked string instruments in north-western Europe from pre-Christian to medieval times. (For some related meanings of the term, *see* ROTTE (i).)

This instrument, now usually known as the 'round' or Germanic lyre, was a descendant of the ancient LYRE which originated in western Asia, was thence introduced into Egypt and later adopted and developed by the Greeks (see Panum). Representations of lyre-playing figures incised on pottery urns of the 6th century BCE from Sopron, Hungary, and on a bucket from Kleinglein in Styria, Austria, both of the Hallstatt 'C' culture, show that the early Iron Age peoples of Europe possessed a similar instrument; of the later pre-Christian Celts the historian Diodorus Siculus, writing in the 1st century BCE, records that they played on instruments 'resembling lyres'. In Wales a curved antler plaque with circular perforations, very possibly part of the yoke of a lyre, was excavated in 1957 from a Celtic hill-fort of the 3rd century BCE at Dinorben, Denbighshire (Gardner and Savory, 1964).

The Celtic 'crwth', 'cruit' and 'crot', English 'rote' and 'crowd', French 'rote' and German 'rotte' are obviously closely related etymologically. It is uncertain, however, whether the use of the instrument spread to Germany eastwards from Ireland or north-westwards from central Europe, or whether, as seems most likely, it developed in several countries simultaneously. The generic Latin term for plucked instruments, 'cithara', comes from a verb meaning 'to pluck', as does the Anglo-Saxon word 'hearpe'. Archaeological findings combined with the evidence of manuscript illustrations and the writings of early theorists suggest that, in Anglo-Saxon and early medieval times at least, the words 'hearpe', 'rotte' and 'cithara' were all used to describe the same instrument, or type of instrument. It seems probable that the 6th-century poet Venantius Fortunatus was referring to varieties of the same class of instrument in his much quoted couplet:



> Romanusque lyra, plaudat tibi barbarus harpa,
> Graecus achilliaca, chrotta Britanna canat.

('Let the Roman praise you with the lyre, the barbarian with the harp, the Greek with the achilliaca; let the British [or Breton] rotte sing.')

Instruments of the lyre class consist of a soundbox with two symmetrical arms rising from it and a yoke or crossbar joining them at the top. The strings run across the soundbox and are usually connected to it by a bridge. The rotte, or Germanic lyre, had more in common with the ancient Greek kithara than with the other important Greek string instrument, the lyra. In both kithara and rotte the upright arms formed a continuation of the soundbox and were hollowed out for part of their length to provide an extension of the resonating space. In the kithara, however, the strings were secured to a straight crossbar which projected beyond the arms at either end, whereas in the rotte this yoke section was curved and in almost all cases merged with the arms so that the rounded shape of the upper part resembled, or sometimes exactly mirrored, that of the lower.

Remains of several 'round' lyres have been excavated since the mid-19th century, and the combined evidence of these sets of fragments provides us with precise details of the shape, dimensions and construction of rottes during the 5th to 8th centuries. To date three examples have been found in Germany and six in England. Of the two lyres from the Alemannic cemetary at Oberflacht, Württemburg (see Paulsen, 1992), one, from Grave 31, was excavated in 1846 by F. Dürrich and W. Menzel and the other, from Grave 84, is recorded as having been acquired in 1896 by the Berliner Museum für Völkerkunde but was probably excavated at the same time. Just under half of the first instrument, which was of oak, has survived, including the whole length of one side and a considerable portion of the soundbox. The remaining arm is hollow for most of its length and an incipient curve at the top indicates both that the yoke was of a piece with the arms and that, at the point where the vertical line of the grain would have become a disadvantage, the front face was cut away to a depth of 6 mm to accommodate an inserted facing (presumably of wood, with the grain running at right angles to that of the original) to give extra strength to this part of the instrument. The rest of the yoke and the whole of the inserted piece are missing and the number of peg-holes cannot be estimated. The lyre is 7th century, and is now in the collection of the Württembergisches Landesmuseum, Stuttgart. The second instrument, probably from the 6th century, had six peg-holes and was also of oak. It was complete apart from strings, pegs and tailpiece, but was destroyed during World War II. Photographs show that the upper part of this rotte did not have the padlock shape of the other excavated examples; the crossbar slotted into the upright arms and was secured with a wooden nail at either end (fig.1*b*). The Cologne lyre (fig.1*c*; Werner, 1954), dating from about CE 700, was discovered in a Frankish grave beneath the floor of St Severin in 1938 by F. Fremersdorf. The pegs disintegrated on exposure to the air but the greater part of the instrument survived until its destruction by bombing during World War II. The arms were partially hollowed out, and there were six peg-holes in the yoke. Remains of a substantial iron tailpiece were also recovered. The lyre itself was of oak, with a maple soundboard.

Of the instruments found in England, four were excavated from pagan Anglo-Saxon graves in the eastern part of East Anglia, within a circle of less than 18 miles' radius; not surprisingly, they are very much alike in design and construction. The lyre from the royal ship-burial at Sutton Hoo, Suffolk (fig.1*a*; M. Bruce-Mitford, 1983), excavated in 1939, is the best preserved of these because, when the burial chamber housing the grave-goods collapsed, the upper part of the instrument was fortuitously trapped between two bronze bowls, and these protected the wood. The remains consist of a yoke with six peg-holes, fragments of pegs, substantial portions of two parallel arms which are hollow for part of their length, and two bird-headed escutcheons of gilt-bronze covering the joints between arms and yoke. The hollowed area was

1. *Reconstructions of Germanic lyres from: (a) Sutton Hoo, Suffolk, early 7th century (British Museum, London); (b) Oberflacht, Württemberg, ?6th century (Museum für Vor- und Frühgeschichte, Berlin); (c) Cologne, c700* CE *(Römisch-Germanisches Museum, Cologne)*

originally covered by a soundboard secured with headless bronze tacks. The instrument, which is made entirely of maple, with pegs of poplar or willow, dates from the 7th century, before CE 625, and is now in the British Museum. Of the lyres discovered in 6th–7th-century inhumations at Bergh Apton and Morning Thorpe, Norfolk (Lawson, 1978, 1987), and at Snape, Suffolk (Lawson, 1999), the only parts to survive were, again, those which had been in contact with, and thus preserved by, metal: i.e. the bronze fittings covering the joints or attached to the arms. Although the relatively lowly context of the Bergh Apton and Snape burial indicates that they were probably the graves of scops (minstrels) the rottes found in them are as finely wrought as the royal instrument from Sutton Hoo, and very similar to it in construction. Only the fittings are less elaborate: the bronze joint-plates of the Bergh Apton lyre are polished but undecorated, and those of the Snape instrument consist merely of plain, disc-headed rivits. In both cases, as also in the vestigial remains of the lyre from the warrior's grave at Morning Thorpe, a bronze strip was wrapped around the base of each arm, apparently to secure the soundboard.

The earliest of the Germanic lyres found in England, indeed the earliest-known to date in Europe (unless one includes the 3rd-century BCE antler plaque from Dinorben), comes from a 5th-century emigrant's grave at Abingdon, Berkshire, excavated in 1934 by E.T. Leeds and D.B. Harden and now in the Abingdon Museum (R. Bruce-Mitford, 1983). In the absence of any protective metal components, all the wood had perished leaving only the bone facings from the yoke, or arch, which indicate that the instrument had six strings. The remains of the lyre from the royal burial ground mound at Taplow, Buckinghamshire (R. Bruce-Mitford, 1983), not far from Abingdon, which were excavated in 1883 by Joseph Stevens and are now in the British Museum, date from around CE 600 and consist of the yoke section, fragments of the arms at their junction with the yoke and a pair of bronze escutcheons (gilded, ornate and bird-headed, as at Sutton Hoo) covering the joints between arms and yoke. The instrument exhibits features of both the English and the German methods of construction. the bronze joint-plates are a structural detail peculiar, it seems, to English lyres, since they do not appear in any of the German instruments. On the other hand, the peg-hole area of the yoke is reinforced with countersunk facings or inlays (like those at Abingdon but in this case made of horn, held in place by bronze rivets); this method of construction is a feature of two of the three German lyres but was not used for any of the East Anglian instruments. The Taplow, Snape and Bergh Apton lyres appear to have been fitted with wrist-straps, as, possibly, was the one from Grave 31 at Oberflacht.

At Hedeby, the great Viking market and trading centre in Jutland, Denmark, the arch or yoke section of a lyre dating from the 10th century was unearthed in the early 1980s (Lawson, 1984). It is made of yew, at present the only known example of a string instrument constructed from this type of wood, though yew (along with oak, maple and holly) is mentioned in the 53rd riddle of the Exeter Book, which is thought to describe a lyre. The yoke has at least six peg-holes and closely resembles those from Abingdon and Cologne in shape and proportions.

In addition to instruments, at least a dozen lyre bridges have been found, most dating from the 7th–9th centuries. Those from a Frankish cemetery at Concevreux, northern France (now in the Römisch-Germanisches Museum, Cologne) and a site near Scole, Norfolk (7th century, now in the British Museum) are both of bronze; the 9th-century bridge from Birka, Sweden, is of bone (fig.2*a*). An 8th-century lyre bridge from Broa i Halle, Gotland (fig.2*b*), two 8th-century examples from Elisenhof, Schleswig, and three from Dorestad, the Netherlands, probably dating from the 8th–9th centuries (Werner, 1955; M. Bruce-Mitford, 1983), are all of amber. Buried wooden artefacts tend to survive only in exceptional conditions such as those at the waterlogged 10th–11th-century site at York which in 1979 yielded the only wooden lyre bridge to have been found in England to date (Morris, 1999). Identification of the wood is not possible, but the two 13th-century wooden bridges found at Gamlebyen,

2. *Lyre bridges: (a) from Birka, Sweden, 9th century; (b) from Broa i Halle, Gotland, 8th century (Riksantikvarieämbetet och Statens Historiska Museum, Stockholm)*

Oslo (Kolltveit, 1997), one of which (excavated in 1971) appears to have belonged to a lyre, are both of pine. In no case has a bridge been found together with lyre remains, but notches cut for the strings show that with two exceptions (the Birka and Oslo bridges, apparently intended for seven-string instruments) all the bridges were designed to take six strings.

To the catalogue of 'accessories' can be added a single bronze tuning-peg with a spatulate head, which was found with the 7th-century lyre bridge near Scole. Apart from this isolated example and the fragmentary wooden pegs belonging to the Sutton Hoo lyre, all pegs found in England so far are of bone and none predates the 12th century (M. Bruce-Mitford, 1983). There is some doubt as to the age of the four diverse and unstratified pegs excavated in 1925 from the site of the Saxon monastery at Whitby, Yorkshire, but recent opinion inclines to a late 11th- or 12th-century, rather than a 7th-century, date.

3. Remains of a lyre found at Kravik, Numedal, 14th century (Norsk Folkemuseum, Oslo)

On the question of size, Schlesinger argued convincingly that there must have been at least three different sizes of rotte, basing her theory on the evidence provided by an illustration in an 11th-century manuscript at Klosterneuburg, near Vienna, in which three rottes of treble, tenor and bass size are depicted, each held in a different position. However, all these rottes are bowed, not plucked. The bow appears to have been introduced some time during the 9th or 10th century, and the evidence of both archaeological material and manuscript illustrations indicates that during the centuries before the bowed version was adopted only one size of rotte was used. The small lyre-playing figure in the 9th-century Utrecht Psalter, also mentioned by Schlesinger, is too ambiguous to allow a firm conclusion as to the size of the instrument in relation to the player.

The surviving remains, though incomplete, tend to complement each other so that when studied together they yield positive information about almost every detail of the instrument. Thus it appears that (with some variations, notably the Cologne lyre, which measured only 51·3 cm in length) an average rotte of the 5th to 8th centuries was a six-string instrument measuring about 76 cm in length, 20 cm in breadth and 2·5 cm in depth. The strings were attatched to a tailpiece which was either clamped round the bottom of the instrument and fastened at the back or secured by a cord tied round a button or peg as on a violin; they then passed over a bridge and up to the pegs in the yoke. The body and arms, and in German instruments the yoke section as well, were cut from a single piece of wood. The yoke was either oval in section, as at Sutton Hoo, or had flat front and back surfaces which were reinforced with an inlay of bone or horn, or of wood with the grain running at right angles. The resonating space was hollowed out of the solid, extending part of the way up the arms. The hollowed area was covered by a soundboard about 2 mm thick; sometimes bronze pins or strips were used to secure the soundboard to the body. There is positive evidence that rottes of this period had no soundholes (M. Bruce-Mitford, 1983). The shape of the instrument varied, some versions being gently waisted or tapered from top to bottom and from front to back (e.g. Cologne, Morning Thorpe and Oberflacht Grave 84), while others were straight-sided (e.g. Sutton Hoo, Oberflacht Grave 31, Bergh Apton and Snape).

The scanty remains of the rotte from Taplow are of maple wood, as is the whole of the Sutton Hoo instrument, the best-preserved English specimen. In the German rottes, however, maple or some other equally fine-grained wood was used for the soundboard only, and the rest of the instrument was made of oak. The pegs at Sutton Hoo were of softwood but the facings strengthening the peg-hole area in many of the excavated lyres suggest that hardwood or bone pegs may have been equally common during the 5th to 8th centuries, though no bone pegs of earlier than 12th-century date have yet been found in western Europe. There were wooden pegs in position in the yoke of the Cologne instrument but they disintegrated on exposure to the air. The use of harder materials for bridges and for the reinforcement of peg-holes is a possible indication that strings were made of metal; the technology for wire-drawing certainly existed in Anglo-Saxon times. The Sutton Hoo lyre, however, was very probably strung

with gut (though twisted or plaited horsehair is a possibility), for even this cuts into softwood under tension and the pegs would soon have been destroyed by the pressure of metal strings. Lyres with softwood pegs and gut strings would probably have been equipped with wooden bridges. Wood is, of course, much less likely to survive, but may well have been the most commonly-used material for both pegs and bridges.

With one exception (fig.3) there is as yet no archaeological material to show how the rotte developed during the centuries between the Hedeby instrument and the Welsh CRWTH (a folk instrument, directly descended from the rotte). Representations in illuminated manuscripts and sculpture reflect the evolution of the instrument during this period. The earliest illustrations of the rotte, in Anglo-Saxon manuscripts of the 8th century, show an instrument closely similar to the excavated specimens of the same period (fig.4), but within two centuries several important changes can be observed. Two French manuscripts of the 9th century depict a plucked instrument of rotte-like shape (though executed in late antique style) with a fingerboard running down the centre parallel with the upright arms. In south German manuscripts the waisted shape persists, with the curves becoming increasingly pronounced (fig.5); from the 10th–11th centuries it frequently resembles a figure 8 (fig.6). Round-topped lyres on Irish stone crosses of the 8th–10th centuries, on the other hand, are usually straight-sided with a squared-off bottom edge (Rimmer, 1969). Soundholes are occasionally depicted from the 10th century onwards, and in the Klosterneuburg manuscript bow and soundholes appear together. A particularly interesting example in a mid-11th-century French manuscript (St Martial Troper, *F-Pn* lat.1118, f.104*r*) shows a bowed rotte with fingerboard and bridge, but without soundholes – an early version of the crwth. In all these representations the instrument is shown being played by King David.

The plucked rotte was usually held on the lap either upright or inclined slightly away from the player. An 8th-century Anglo-Saxon manuscript (*GB-DRc* B.11.30, f.18v) shows a strap extending from the base of one of the arms of the instrument and encircling David's left wrist. The left hand is plucking the strings, while the right lightly touches one arm near the top, providing additional support. Remains of leather straps and bronze strap-terminals, very probably from lyre wrist-straps, were found at Taplow, Bergh Apton and Snape; a similar device may also have been a feature of the lyre from Grave 31, Oberflacht. In iconography where no wrist-strap is shown, left- and right-handed players appear with equal frequency. In many instances one hand is shown gripping the frame – very often at the top with the index and middle fingers clamped round the yoke – while the other plucks the strings in the open area (*SachsH*). There is a possibility that the instrument was held with the front facing the player; manuscript evidence is conflicting on this as on almost every other point, but several illustrations clearly show it in this position, and the lyre in the Cologne grave was buried bridge-side down. Both here and in Grave 31 at Oberflacht the instrument was clasped in the right arm of the deceased (Werner, 1954).

There is no record of how the rotte was tuned; the prevalence of the six-string version suggests either a pentatonic scale or the first six notes of a heptatonic scale

4. King David playing a round lyre, or rotte, with horns and trumpets: miniature from the Vespasian Psalter, Anglo-Saxon, 720s–760s (GB-Lbl Cotton Vespasian A 1, f.30v)

5. King David playing a waisted lyre: miniature from the Egbert Psalter (Codex Gertrudianus), from Reichenau, 10th century (Museo Archeologico Nazionale, Cividale del Friuli, Codex CXXXVI, f.20v)

6. *King David playing a lyre in the shape of a figure 8: miniature from a MS from St Gallen, 12th century (CH-SGs Codex 21, p.5)*

after Hucbald, as favoured by Lawson, although other solutions are possible. Tuning-keys are often depicted in use, possibly suggesting the need for frequent retuning to different modes, or perhaps pointing to the use of gut for strings, since gut is more susceptible than metal to changes in temperature and humidity.

The triangular harp, which first appears in manuscripts and sculpture about 900, gradually supplants the round lyre in representations of King David the musician, and from the 13th century the lyre occurs less and less frequently, its disappearance from manuscripts reflecting its loss of status as an instrument associated with royalty and the nobility. A 14th-century lyre from Kravik, Numedal (now in the Norsk Folkemuseum in Oslo; see fig.3), which probably belonged to a prosperous farmer, is crudely designed and finished in comparison with the clean lines and superior craftsmanship seen in earlier instruments.

A bowed instrument of lyre type continued to flourish in rural cultures for several centuries. The Finnish *jouhikantele*, Swedish *stråkharpa*, Norwegian *giga*, Shetland *gue* and Welsh crwth, all varieties of bowed rotte, were still being played until well into the 19th century and even later (see Andersson, 1923). A similar instrument also existed among the east European peoples. 13 *gusli*, dating from the 11th to 15th centuries, were found during the 1960s at Novgorod, Russia, and in Poland others of the 11th and 13th centuries have been excavated in Opole and Gdańsk respectively. The medieval *gusli*, or *gęśle*, was a plucked instrument with strings varying in number from three to eight according to size. There appear to have been two types: one with a 'playing window', no fingerboard and an asymmetrical top, the other a kind of psaltery which was held flat across the knees like a zither. This instrument, too, persisted until well into the 19th century.

Rottenbücher, Erasmus. *See* ROTENBUCHER, ERASMUS.

Rottenburgh. Belgian family of instrument makers and musicians. The most important member of the family, Jean-Hyacinth (1672–1756), was the son of Herman-Arnold (*d* 1711), a violinist of the chapel royal in Brussels. Jean-Hyacinth made recorders, flutes, oboes, bassoons, violins and cellos. His signature I.H./ROTTENBURGH continued to appear on instruments made by his son Godfroid-Adrien (1703–68) and grandson François-Joseph (1743–1803). Godfroid-Adrien also produced flutes, oboes, clarinets and bassoons bearing his own mark, G.A./ROTTENBURGH. Jean-Hyacinth-Joseph (1715–83), Jean-Hyacinth's nephew, was also an instrument maker and musician, producing violins and playing at the chapel royal. The Rottenburgh family of Brussels was the leading provider of wind instruments to the Belgian market, supplying the court and the city's cathedral. During the earlier part of the century they faced little competition.

The surviving instruments produced by Jean-Hyacinth during the first three decades of the 18th century are particularly fine, and still easy to play. The recorders and flutes are in the French tradition, made with a narrow bore; indeed the earliest-known flute by Jean-Hyacinth is almost identical in proportions to contemporary

Hotteterre flutes. As a whole, the family's recorder output gives a clear picture of the rise in chamber pitch during the century, from a′ = 390 at the beginning to a′ = 432 at the end. The stringed instruments made by the Rottenburgh family follow Flemish and German traditions in their construction, whilst Italian influence may be detected in their tone and proportions.

Rottenstein-Pock. *See* RODENSTEEN family.

Rotterdam. City in the Netherlands. Regular concert life outside the church started in 1697 with the foundation of a collegium musicum, which played every Wednesday evening in a tavern called the Doele. The subsequent development of Rotterdam as a musical centre owed much to its geographical position. In the 18th century many prominent singers and instrumentalists from Italy and Germany visited the city travelling to or returning from London. It is significant that the first official concert hall was situated in the dockland. It was founded in the Bierstraat by the German violinist Petrus Albertus van Hagen, who had studied in London with Geminiani and arrived in Rotterdam around 1731. Van Hagen became organist of the Oosterkerk in 1741 and of St Laurens in 1764. In 1773 the concert organization was taken over by another German musician, the flautist Johan Carl Zentgraaff. He was forced to leave the house in the Bierstraat in 1784 and opened a second concert hall across the road, with J.H. Schröter as his musical partner. Concerts were also held in a building behind the town hall. The city's principal theatre, the Schouwburg, employed its own orchestra in the 1770s.

Music publishing developed in Rotterdam in the mid-17th century, and canzonas by Merula and Legrenzi were printed in 1647. Between 1656 and 1661, Jan van Geertsom published four collections of Italian vocal music, both sacred and secular. Nicolaas Barth was the leading music publisher in the second half of the 18th century, followed by Ludwig Plattner in the early 19th century.

Rotterdam's position as an important musical centre was further consolidated during the 19th century. Wouter Hutschenruyter, a conductor and director of the school of music, contributed significantly to the popularization of music. Important work was done by the Maatschappij tot Bevordering der Toonkunst (Association for the Promotion of Music), founded in 1829: it encouraged and supported composers, founded choirs and schools of music and organized music festivals. Under the direction of Johannes Verhulst the Toonkunst branch in Rotterdam flourished; after he left for Amsterdam in 1863 and was succeeded by Woldemar Bargiel, a German, Rotterdam musical life came under strong German influence. The Duitse Opera, established in Rotterdam in 1860, greatly affected musical life in the Netherlands. The best German singers went to Rotterdam, as guests or on long-term engagements, and many excellent German instrumentalists were engaged in the opera orchestra and contributed to the development of instrumental education as teachers at the school of music. The society was abolished in 1890 because of financial deficits.

In the 20th century Rotterdam again became an important musical centre, with several flourishing choirs and an important orchestra. The Rotterdam PO was founded in 1918 through the initiative of a number of local musicians; Eduard Flipse, a pioneer of the interpretation of modern music, became its conductor in 1930. During the bombing of Rotterdam in 1940 all the instruments and scores were lost, and the old Doele, the orchestra's concert hall, was destroyed. Various buildings were used until the Doelen was opened in 1966. This hall has a capacity of 2230; its organ, made by D.A. Flentrop, has a predominantly horizontal formation. Eduard Flipse was succeeded by Franz Paul Decker, Jean Fournet, Edo de Waart, David Zinman, James Conlon, Jeffrey Tate and Valery Gergiyev. The orchestra has made many world tours.

The most important church is St Laurens (begun in 1409), which has a long history of organ playing. From the 17th century recitals were given daily on the organ, built by H. Goldfuss in 1644. A new instrument was begun by A. Wolferts in 1791 and completed in 1844 by C.G.F. Witte. During World War II the church was badly damaged and the organ was totally destroyed; a new organ was built by the Danish organ builders Marcussen & Søn in 1973.

HANS VAN NIEUWKOOP/THIEMO WIND

Rouart-Lerolle. French firm of music publishers. It was founded in Paris in 1905 by Alexis Rouart (1869–1921) through the acquisition of the publishing companies Meuriot and Badoux. Badoux had published several works of Jaques-Dalcroze and C.E. Lefebvre, as well as Satie's *Le fils des étoiles*. Satie's cabaret works, which had been published in 1903–4 by Bellon, Ponscarme & Cie, were also acquired. In 1908 Jacques Lerolle, a nephew of Chausson, joined the company and directed it after Rouart died. With Jacques Durand, Rouart had the idea of creating a collected French classical edition, and he began issuing new editions by d'Indy, Bordes and others. The company maintained a progressive programme, publishing works by notable French and Spanish composers including Albéniz, Chausson, Duparc, d'Indy, Koechlin, Hüe, Ladmirault, Poulenc, Ropartz, Satie, Séverac and Joaquín Turina. In October 1941 the company was bought by Francis Salabert, and its publications were incorporated into the Salabert catalogue.

ALAN POPE

Roucourt, Pierre de. *See* ROCOURT, PIERRE DE.

Rouen. City in north-west France. In 912 it became the capital of Normandy. Important among early archbishops were St Ouen (640–83), during whose episcopate the monasteries of Fontenelle, Jumièges and Fécamp were founded; St Remi (Remigius, 754–72), who persuaded his brother King Pepin to ask Pope Paul I to send a cantor from Rome to instruct the diocese, and who sent two monks to Rome to learn chant; and Jean de Bayeux (John of Avranches, 1069–79), whose book on liturgical use became a model for the diocese. Surviving chant books (reviewed by Hesbert, 1955–6), include a gradual published in facsimile by Pothier, Collette and Loriquet (1907) and another 13th-century gradual (*F-R* 277) with a polyphonic sequence, although there is no clear evidence that Parisian polyphony of this period was taken up in Rouen. The cathedral of Notre Dame had a strong musical tradition and its choir was noted always for singing from memory from the Middle Ages right up to the Revolution. In 1517 François I heard the choir and expressed his desire to have some of the boys for his own chapel, whereupon a band of his courtiers abducted two of the choristers by night. The 1546 registers record possession of masses by Certon and Morales. Pierre Caron (master of the song school, 1565–79) performed masses by Certon, motets by Guerrero and chansons by Arcadelt and Lassus. Masters of the choristers whose compositions were published were Dulot (1522–30), Guillaume Leroy (1530–36), Frémart (1611–25) and Lallouette (1693–5). The choir school was known as the Maîtrise St Evode from 1898 and the Institut Jehan Titelouze from 1956. Among its more distinguished pupils were Adrien Boieldieu, Paray and Duruflé.

Rouen's most celebrated organist was Titelouze, who was at St Jean from 1585 and at the cathedral from 1588, where the instrument was rebuilt by Crespin Carlier in 1606. Jacques Boyvin worked in Rouen from 1674; two books of his organ music were published in 1689 and 1700. Robert Clicquot restored the organ between 1685 and 1692; it then had four manuals and pedals, and 48 stops. Charles Broche published keyboard sonatas (1782–7), and from 1786 to 1792 taught the young Boieldieu. The Dupré family of organists are from Rouen: Albert Dupré was organist at the old abbey church of St Ouen (1911–39), and Marcel Dupré's first post, which he held at the age of 12, was at the church of St Vivien. St Ouen has a Cavaillé-Coll organ of 1890. New organs were built in the cathedral by Merklin & Schütze (1858–60) and, after World War II, by Jacquot-Lavergne.

In 1688 Bernard Vaultier was granted permission to found an Académie Royale de Musique, whose first performance, in the Théâtre des Deux Maures, was of Lully's *Phaëton*. The Grand Théâtre was opened in 1776, maintaining a repertory of *tragédie lyrique* and *opéra comique*; it was renamed the Théâtre de la Montagne in 1793 and the Théâtre des Arts in 1794. Boieldieu's first two dramas had their premières there, *La fille coupable* (1793) and *Rosalie et Myrza* (1795, the year he left for Paris); his *La dame blanche* was given there in 1826, shortly after its première in Paris. It was burnt down in 1876. It opened again in 1882, and in 1890 staged the first French production of Saint-Saëns's *Samson et Dalila*. This house was destroyed in 1940, and a new Théâtre des Arts was built after the war, opening in 1962. Its season usually lasts from November to April, with productions of about a dozen operas and operettas.

In 1945 a Conservatoire Municipal de Musique was opened in Rouen; it became the Ecole Nationale de Musique in 1947, and in 1949 the Conservatoire National de Musique de Rouen.

DAVID HILEY

Rouge, Filippo. *See* RUGE, FILIPPO.

Rouge, Guillaume. *See* LE ROUGE, G.

Rouget, Gilbert (*b* Paris, 9 July 1916). French ethnomusicologist. He studied at the Sorbonne (1935–42) under Constantin Brăiloiu, Claude Lévi-Strauss, Paul-Marie Masson and André Schaeffner. He joined the ethnomusicology department at the Musée de l'Homme in 1941, later becoming its director (1965–85) he was also director of research at CNRS (1968–85). His research has focussed on the music of sub-Saharan Africa, particularly southern Benin. In the course of field research from 1946 to 1970 he made three documentary films in collaboration with Jean Rouch entitled *Sortie des novices de Sakpata* (1963), *Batteries Dogon: éléments pour une étude des rythmes* (1964) and *Danses des reines à Porto-Novo* (1964/*R*1996 as *Porto-Novo: ballet de cour des femmes du roi*). He was the founder of the recording series Collection CNRS/Musée de l'Homme, and produced recordings of pygmy and Bantu music of the Central African Republic and Gabon, Moorish music, Maninka music of Guinea, Baoulé music of Côte d'Ivoire, and the music of the Fon, Gun and Yoruba of Benin. His publications have focussed on the coextensive relationships between music and language, spirit possession and history. His study *La musique et la transe* is an exemplary application of a general universalist theory. His most recent scholarship draws on his historical work with the music of the Porto Novo court. The theoretical positions adopted in his scholarship make Rouget's work a valuable contribution to Africanist ethnomusicology.

CHRISTIANE SPIETH-WEISSENBACHER/GREGORY F. BARZ

Rouget de Lisle [l'Isle], **Claude-Joseph** (*b* Lons-le-Saunier, 10 May 1760; *d* Choisy-le-Roi, 26 or 27 [about midnight] June 1836). French poet and composer. He entered the Ecole Royale du Génie at Mézières in 1782, became a cadet officer in 1784 and was promoted to second lieutenant in 1788 and lieutenant in 1790. On 1 May 1791 he was posted to Strasbourg, where he soon became popular owing to his talent as a poet, violinist and singer. His *Hymne à la liberté*, set to music by Ignace Pleyel, was performed on 25 September, and of his several plays *Bayard dans Bresse* was set to music by Stanislas Champein and performed in Paris on 21 February. In Strasbourg, during the night of 25 April 1792, he wrote the words and music of the *Chant de guerre pour l'armée du Rhin*, which, because of its frequent performance by the Marseilles Volunteer Battalion, became known as the *Marseillais' Hymn* and, finally, the *Marseillaise*.

The son of royalist parents and a member of the Constitutional party, Rouget de Lisle opposed the abolition of the monarchy and was cashiered and imprisoned until the fall of Robespierre (an event which he celebrated by writing a *Dithyrambic Hymn*). He was then reinstated in the army and fought in the wars of the Vendée, under the command of Hoche. The *Marseillaise* was sanctioned as a national song in 1795 but fell out of favour during the Empire and the Restoration. Rouget de Lisle lived deserted and in poverty, and was harassed by the authorities, who even imprisoned him for debt. Béranger and David d'Angers defended him, and towards the end of his life he was befriended by the Voïart family in Choisy-le-Roi, who provided him with aid and shelter. With the July Revolution in 1830, the *Marseillaise* regained acceptability and Rouget de Lisle was granted a pension by Louis-Philippe.

Rouget de Lisle died unmarried, without descendants, but his nephew Amédée Rouget de Lisle later became involved in lengthy disputes with historians who sought to cast doubt on the authorship of the *Marseillaise* because of its success, in stark contrast to the mediocrity of Rouget de Lisle's other compositions; his authorship is now, however, commonly accepted. Once definitive official recognition of the *Marseillaise* as the French national anthem was confirmed in 1879, various marks of honour were granted to its author; statues were erected to his memory in Lons-le-Saunier and Choisy-le-Roi. On Bastille Day (14 July) 1915 his ashes were transferred to the Invalides, an event which marked the culmination of the glorification of the *Marseillaise* as the song symbolizing the 'Sacred Union' (Poincaré's words when speaking of the union of all French people against the enemy). In 1936, the centenary of Rouget de Lisle's death, solemn and impressive tributes were paid to his memory, but for a different purpose. Maurice Thorez made a speech at Choisy-le-Roi, reminding the public of the origin and Revolutionary inspiration of the song, contrasting it with the *Internationale*. In 1960 official celebrations took place at a local level in Lons-le-Saunier, and in the town's library musical works were discovered which were previously unknown or which had been thought lost.

The *Marseillaise* has been quoted by Schumann (*Die beiden Grenadiere*) and Tchaikovsky (*1812 Overture*) among others. Besides other Revolutionary works Rouget de Lisle also composed *romances* and wrote librettos for operas by Chelard, Della-Maria and Grétry. *See also* NATIONAL ANTHEMS.

WORKS

Chant de guerre pour l'armée du Rhin (La Marseillaise), 1v, hpd (Paris, *c*1792); numerous edns and arrs.

FRÉDÉRIC ROBERT

Rough music. *See* CHARIVARI.

Rough Trade. English record company specializing in punk rock and experimental popular music. It was founded as a record shop in 1976 in the Notting Hill district of London to sell rare records and reggae and dub singles. Next it stocked and distributed independently produced recordings of punk and post-punk music. The Rough Trade label was launched in 1978 with a single by French 'industrial' group Metal Urbain. Other groups featured on the label were the all-female bands the Raincoats and the Slits, the Belfast punk group Stiff Little Fingers, Scritti Politti and American avant gardists the Red Crayola. They were followed by Cabaret Voltaire, Young Marble Giants and the Fall. The Smiths provided Rough Trade's

greatest commercial success with several hit albums between 1984 and 1990. The company retained its idiosyncratic aura, however, by issuing recordings by artists as varied as Ivor Cutler, Sandie Shaw and Pere Ubu. The company expanded in the early 1980s by forming the Cartel, an alliance of regional distributors which became an effective alternative to the national distribution systems of major UK record companies. Branches of the Rough Trade label were also set up in Germany, the Netherlands, Belgium and the USA, primarily as outlets for British artists. In 1991 the Rough Trade distribution company collapsed and the record label was purchased by the One Little Indian record company which continued to issue recordings on Rough Trade by Robert Wyatt, the Raincoats and others.

DAVE LAING

Rouince, Luigi. *See* ROINCE, LUIGI.

Roulade. A term used to denote particular ornaments. *See* ORNAMENTS, §6.

Roullet [Rollet, Roller], **Johannes** (*fl c*1435–45). Composer, probably French or South Netherlandish in origin. He was perhaps from the Flemish town of Roulers, but was active mainly in the southern Germanic region. A coat of arms was granted to Hanns Rolle by Emperor Friedrich III in 1454, but identification with the composer is uncertain. His music is found mainly in two manuscripts in the Bayerische Staatsbibliothek, Munich, and the Museo Nazionale, Trent; and the prominence of his name in the first of these indicates that he may have had some close connection with the compiler of that manuscript.

Some of Roullet's compositions are modest functional settings, often employing fauxbourdon, of liturgical texts with simple chant elaboration in the discantus. The Gloria, however, originally formed part of a mass pair, and the Sanctus incorporates three trope sections for the unusual combination of two discantus voices labelled 'gemell', one of the earliest uses of that term in a musical source.

The greatest interest lies in the four sequence settings, in which Roullet offers a variety of formal solutions to accommodate the lengthy texts, including the use of three-voice, duo and fauxbourdon textures and a number of different mensurations to create contrast between verses. Plainchant alternates with polyphony in each binary verse and, except in the case of *O beata beatorum*, where space in the manuscript was limited and both halves of each verse were underlaid to the polyphony, the chant is provided in mensural notation. In *Laus tibi Christe* the text of the first half of each verse was underlaid to both the chant and the polyphony, probably in error; the second half was surely intended to be sung to the polyphony. Charles Hamm has remarked that the sequences of Roullet may have had a common origin with the three sequences of Du Fay that immediately precede them and are the only other music in the sixth gathering of the Trent manuscript.

The songs survive only as sacred contrafacta or without text, with the original titles added in the margin, but their form leaves little doubt as to their origin.

WORKS

MASS MOVEMENTS

Kyrie paschale, 2vv + fauxbourdon (discantus paraphrases Kyrie paschale or 'Lux et origo'), *D-Mbs* Clm 14274, f.95*v*, *I-TRmp* 87, f.99

Et in terra, 3vv, *A-Z*, frag. MS without shelf-mark, ff.80*v*–81 (orig. paired with Patrem, f.175*r*, lost)

Sanctus paschale, 3vv with tropes 2vv ('Crux columpna'/'Sanctire Christi'), *D-Mbs* 14274, ff.143*v*–145

Benedicamus Domino, 3vv, *I-TRmp* 87, f.92

HYMN

Rex gloriose martyrum, 2vv + fauxbourdon (discantus paraphrases chant, *LU* 1144), *D-Mbs* 14274, f.85, *I-TRmp* 87, f.16

SEQUENCES

Laus tibi Christe (St Mary Magdalen; AH, l, 1907/*R*, 346), 3vv alternating with 2vv + fauxbourdon, *I-TRmp* 87, ff.67*v*–69*v*

O beata beatorum (Martyrs; AH, lv, 1922/*R*, 20), 2vv + fauxbourdon alternating with 2vv, *TRmp* 87, f.72*v*

Omnes sancti seraphin (All Saints; AH, liii, 1911/*R*, 196), 3vv alternating with 2vv + fauxbourdon, *TRmp* 87, ff.71*v*–72

Sacerdotem Christi (St Martin; AH, liii, 1911/*R*, 294), 3vv alternating with 2vv + fauxbourdon, *TRmp* 87, ff.70–71*v*

SECULAR WORKS

Amours helas (rondeau), 3vv [texted: Vexillum victoris], *D-Mbs* 14274, ff.142*v*–143

Hardament (ballade), 3vv, *Mbs* 14274, f.98*v* [texted: Christus natus est hodie], f.93

Joye et confort (rondeau), 3vv [texted: Post biduum victor], *Mbs* 14274, f.143

Umb im pad, 3vv [texted: Ecce panis angelorum], *Mbs* 14274, f.120

Wo ich in aller werld hin var, 3vv, *Mbs* 14274, f.97

RICHARD LOYAN/IAN RUMBOLD

Roullet [Rollet, Durollet, Du Rollet], **Marie François Louis Gand Leblanc,** Bailli du (*b* Normanville, Eure, 10 April 1716; *d* Paris, 2 Aug 1786). French writer. A nobleman, who served as an officer of the Gardes Françaises and as a *commandeur* in the Ordre de Malte, he also had a literary career. His first stage work, a comedy entitled *Les effets du caractère* (1752), was a failure. As an attaché to the French embassy in Vienna, he met Gluck and became his first and principal propagandist in Paris. Supported by Marie-Antoinette, he made imperious demands on the Opéra in 1774; later, he may have acted discreditably in Gluck's interest by endeavouring to prevent improvements in the libretto of Sacchini's *Renaud*. He started the fashion for adapting 17th-century tragedies for the Opéra with *Iphigénie en Aulide* (for Gluck) in 1774, apparently the only libretto for which he was wholly responsible. He also translated the prefaces to Gluck's *Alceste* and *Paride ed Elena* for the *Gazette de littérature* (1774), wrote a *Lettre sur les drames-opéras* (1776, reprinted in Lesure) and probably 'ghosted' French articles signed by Gluck. He undertook the extensive alteration and translation for the French *Alceste* (1776) and collaborated with Baron Tschudi on *Les Danaïdes* (1784), taken without permission from Calzabigi and staged with Salieri's music, although advertised as being partly by Gluck. Articles by Roullet are included in a compilation entitled *Mémoires pour servir à l'histoire de la révolution opérée dans la musique par … Gluck* (Paris and Naples, 1781). He is generally regarded as an *homme d'esprit* rather than a major literary figure.

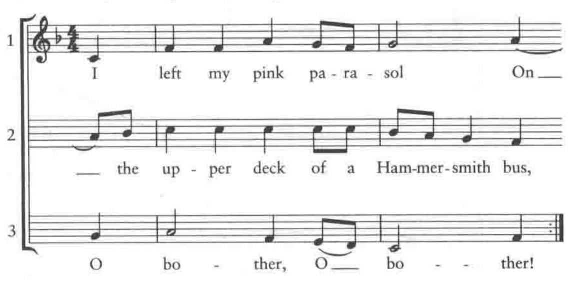
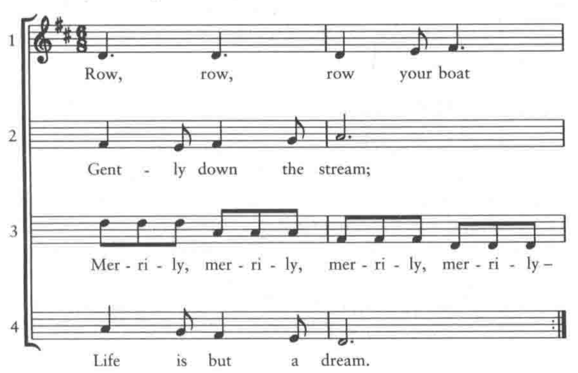
JULIAN RUSHTON

Round. A generic term for a song consisting of a single-line melody constructed so that it forms its own harmony when sung as a canon at the unison. It is for at least three voices, which enter at equally spaced time-intervals. In performance the melody is usually repeated several times; at the end the voices may 'tail off', each stopping when it has completed the melody, leaving the last voice to conclude the piece alone, or they may finish together on a chord. Some rounds are designed to have accompaniments, provided by instruments or by a separate group of singers.



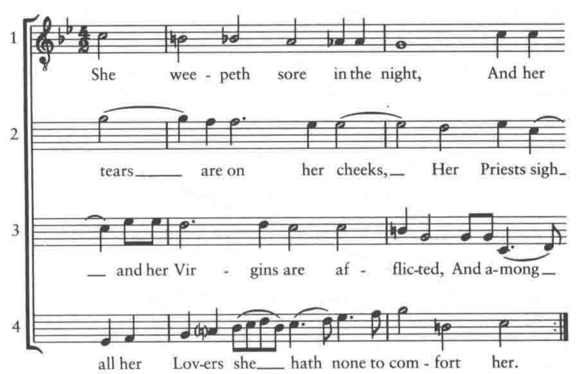
The essence of the round is its sense of stasis and circularity. It is a type of canon, but a limited one, since in a round the subsequent voices cannot transpose the melody's pitch, alter its rhythm or enter in an irregular time sequence. (It is a source of confusion that the German term for round is *Kanon.*)

The term seems to date from the early 16th century. Medieval English forms of round (such as *Sumer is icumen in* of about 1250) were known as ROTA or RONDELLUS. Other terms include 'roundel' (as in David Melvill's manuscript *Ane Buik off Roundells*, made in Aberdeen in 1612), CATCH (a term used to designate comic English rounds written between about 1580 and 1800), and 'canon' (used in 17th- and 18th- century England specifically for rounds with religious words).



Since about 1850 rounds have become the property of educationists. The advantages of rounds as teaching material are obvious: most are short and simple enough to learn by ear, so that children (and adults with limited musical knowledge) can experience partsinging without needing to grapple with a notated score; rounds taught in a foreign language make a useful introduction to another country's culture; and once practised in the classroom they are easily transportable and can be sung in less formal situations. Rounds have been particularly successful in the 20th century in England, Germany and the USA; German collections are printed in small formats, suitable to fit into students' pockets. Rounds have taken on some of the characteristics of folksongs: composers' names are usually unknown to singers (ex.1 is definitely 'anonymous', though only about 120 years old); some rounds have diversified through oral transmission (for example *Frère Jacques* now has a minor as well as a major version, and words in English and Polish as well as in the original French; ex.2 has a Scottish variant in which 'Hammersmith', a district in west London, has been replaced by 'Waverley', the railway station in Edinburgh); and when sung by mixed ensembles the different octaves are allocated among the voice lines at random, blurring the distinction between root position and inverted chords in the harmony.

This success in schools has brought artistic penalties. Educationists tend to fight shy of controversial matters, so that subjects such as politics, religion, social injustice and sex, which are the staple diet of folksongs, have become taboo in rounds. As a result, the round is now perceived as a children's art form, focussed on middle-class leisure activities and suburban trivia (ex.2), even reflecting the desire of some educators to protect children from the realities of adulthood (ex.1). Where rounds from earlier periods have survived in the modern repertory, they have usually had their words altered, or been so far removed from their original social contexts as to become almost meaningless (as is the case with those about street vendors' cries in 17th-century cities). Rounds are no longer written in modern musical styles, and remain untouched by developments in chromatic harmony, atonality, jazz idioms, serial structures and folk modes.



Ex.2 Round by Christopher le Fleming, *c*1960

Ex.1 Anonymous English round, ?1880

Ex.3 Round by William Lawes, *c*1640

Ex.4 Round by Carl Gottlieb Hering, ? 1820

[Coffee, don't drink so much coffee! The Turkish drink isn't for children, it weakens the nerves, makes you pale and ill. Don't be a Muslim, who can't leave it alone!]

Ex.2, though composed about 1960, might have been written in the late 18th century as far as its style is concerned.

One has only to dip into the pre-1850 repertory to realize that in earlier periods rounds had much greater intellectual muscle and social relevance. William Lawes's *She weepeth sore* (ex.3) is a genuine piece of religious music, whose text about the downfall of Jerusalem is taken from *Lamentations*; it is artfully written so that the harmony thickens and intensifies as the four tenors enter, then gradually thins out again at the end (the 'tail off' performance procedure is required here) to leave an image of utter desolation. Purcell's 63 known rounds are also a magnificent and varied corpus of work (see P. Hillier, ed.: *The Catch Book*, Oxford, 1987), and there are some fine ones ascribed to William Byrd.

C.G. Hering's round about coffee (ex.4) is an equally impressive example from the German tradition. It opens with a six-note letter motif (C–A–F–F–E–E), handled with aplomb; its counterpoint is designed to invert, so that it can successfully be sung by any vocal combination (SSS, SSB, SBB or BBB); and its subject is a delicious satire on Islamic culture, written at a time when the Turkish threat to Germany had retreated to a safe distance. Mozart's two dozen or so rounds are mainly quick sketches, though very beautiful ones, and this type of vocal counterpoint significantly informs his instrumental writing (such as in the last movement of his Quartet K575). Beethoven's rounds are mostly hasty *pièces d'occasion*, but that Beethoven took the form seriously is shown by his periodic excursions into round structures in his larger works, notably the quartet 'Mir ist so wunderbar' in *Fidelio*, and the first movement of his Symphony no.6 (bridge passages: bars 67–92, 346–71).

Even since 1850 rounds have made occasional appearances in large-scale classical works, for instance in Mahler's Symphony no.1 (third movement) and Britten's opera *Peter Grimes* ('Old Joe has gone fishing', finale of Act 1). It would be strange if this form, so central to Western art music for hundreds of years, were not to emerge from neglect at some time in the future.

Round, Catch and Canon Club. London club founded in 1843. *See* LONDON (i), §VI, 2(ii).

Round O. English corruption of the French term 'rondeau'. It occurs in Jeremiah Clarke's *Choice Lessons for the Harpsichord or Spinett* (London, 1711) and similar publications of the time, in conjunction customarily with compositions of a five-section rondeau design, *ABACA*. A keyboard piece by Matthew Locke provides an early instance of its use applied to an even simpler structure. From the realm of practice, this terminological variant found its way into some music dictionaries of the later 18th century, such as John Hoyle's *A Complete Dictionary of Music* (London, 1770), where it appears as an alternative spelling in a definition of 'rondeau' that is little more than a reprint of James Grassineau's translation and codification (1740) of Brossard. *See* RONDO, §2.

MALCOLM S. COLE

Round Top, International Festival-Institute at. Summer festival held in the small town of Round Top, Texas. It was founded in 1971 by the pianist James Dick. About 100 musicians, all on full scholarships, come to Round Top each June and July to study and perform with faculty such as Martin Lovett, Pascal Verrot, Christopher Hogwood and the Dorian Wind Quintet. In addition to a 1200-seat concert hall featuring the woodwork of local artisans, the 200-acre festival grounds comprise a recording studio and a number of restored historic buildings. Among the works that have been commissioned for the festival are three large-scale pieces for piano and orchestra celebrating Hindu philosophy by Malcolm Hawkins, Chinary Ung and Dan Welcher.

Rourke, William Michael. *See* ROOKE, WILLIAM MICHAEL.

Rouse, Christopher (Chapman) (*b* Baltimore, 15 Feb 1949). American composer. As a child he manifested interest in both classical and popular music, and learnt percussion. He attended the Oberlin College Conservatory of Music (BM 1971), studying composition with Hoffmann and Coleman, and for two years had private lessons with Crumb (1971–3). He then studied with Husa and Palmer at Cornell University (DMA 1977). After teaching at the University of Michigan between 1978 and 1981, he joined

the composition faculty at the Eastman School of Music, where his students have included Torke and Ince. Since 1997 he has also taught at the Juilliard School. He has been composer-in-residence with the Baltimore SO (1986–9), the Santa Cecilia and Schleswig-Holstein festivals (1989), the Aspen Music Festival (1990) and the Tanglewood Music Center (1997), Helsinki Biennale (1997) and Pacific Music Festival (1998).

Even before he won the Pulitzer Prize for his Trombone Concerto in 1993, he was one of the most sought-after composers in the USA, commissioned by the New York PO, the Philadelphia Orchestra, the Los Angeles PO, the Saint Louis SO and the Houston SO. In earlier works he favoured atavistic motor rhythms and grinding dissonance. His interest in pushing the boundaries of fast tempos led to sustained, intense allegro movements. *The Infernal Machine* (1981), *Gorgon* (1984) and *Bump* (1985) are characteristic of the explosive volume and almost violent energy of his early 1980s orchestral scores. He openly acknowledged the influence of 1960s and 70s rock, particularly the group Led Zeppelin. *Bonham* (1988), for eight percussionists, was written to honour the memory of the group's drummer. His orchestral scores also reflect his instrumental training, often allotting a prominent role to an expanded percussion section. He is a passionate admirer of Berlioz and Bruckner, and has a particular feeling for the latter's extended adagios. In his First Symphony (1986) he incorporated quotations from Bruckner and Shostakovich, enhancing the affective eloquence of his own elegiac music. This introspective work confirmed a change already discernible in his Contrabass Concerto (1985), towards the soulful and metaphysical. Nightmarish and hallucinatory elements persist in the faster sections of his major works, but they tend to be framed within elegiac outer sections that emphasize a dark world view: death, and the void it leaves within those who remain, are recurrent themes. His Second Symphony (1994), one of his strongest works, is representative of this trend. Its three movements, played without pause, consist of a central elegy in memory of the composer Stephen Albert between two brisk, often thunderous motoric sections. The symphony reflects Rouse's predilection for minor 3rds and minor 2nds as effective vehicles for feelings of anguish or despair.

From the mid-1980s he concentrated on reconciling clear diatonicism with aggressively chromatic atonality: such works as his Trombone Concerto (1991), Cello Concerto (1992) and Flute Concerto (1993) exhibit his interest in effecting smooth transitions from one musical language to another. A stylistic element that has remained constant is his free adaptation and incorporation of other composers' ideas into his highly personal musical fabric. This absorption technique assumes various guises that reflect his diverse musical interests, but tonality is never far from the surface. The Trombone Concerto, written in memory of Leonard Bernstein, quotes from the latter's 'Kaddish' Symphony; his Cello Concerto includes snippets of several composers' music: a chord progression favoured by Panufnik, Schuman's *Orpheus with his Lute* and Monteverdi's *Poppea*.

Rouse has a striking method of working. He neither sketches nor produces short scores, but lets his music gestate mentally until the entire work has taken sufficient shape in his mind for him to write it out in full score. He brings to his work an unusually broad acquaintance with music and ideas of diverse origin. His reverence for music past and present combines with social conscience to produce arresting and emotionally taut scores.

LAURIE SHULMAN

Rouse, Mikel (*b* Poplar Bluff, MO, 26 Jan 1957). American composer and performer. He studied music at the University of Missouri and art at the Kansas City Art Institute. In the late 1970s he formed the rock band Tirez Tirez. He relocated to New York with the band in 1979, where his studies in Schillinger technique and African rhythm resulted in *Quorum* (1984), an intricately sequenced piece for drum machine that inspired his later rhythmic methods. Through the 1980s he performed with the instrumental rock quartet Broken Consort, whose music applied serial and other systematic organizational methods to a vernacular-based music of engaging geometric patterns. *Quick Thrust* (from *A Lincoln Portrait*, 1987), for example, is entirely based on a 12-note row used without transposition, inversion, or retrograde and set in rhythmic counterpoint derived from durations of three, five and eight units.

Rouse's next stage was unveiled in the CD of songs *Living Inside Design* (1993–4). Using a technique he called 'counterpoetry', he overdubbed spoken or sung lyrics with the same material performed in slightly different rhythmic settings. The use of counterpoetry led to his first opera, *Failing Kansas* (1994). The opera, a solo performance by Rouse and tape, employs rhythmic techniques that contradict the metre (for example, five-beat patterns that repeat against an articulated duple metre) and isorhythm. In a second theatre piece, *Dennis Cleveland* (1995), he experimented further with the

operatic form. The work, an opera in the form of a talk show, features characters who rise from the audience to sing and speak in rhythm over a rock-based, taped accompaniment. With his use of intricate isorhythmic structures in a rock vernacular, Rouse is one of the originators of the New York style known as totalism.

WORKS

Rousée, Jean (*fl* Paris, 1534–60). French composer. According to Fétis he was a singer in Henri II's chapel between 1547 and 1559. Six motets and four chansons were published in Parisian anthologies by Attaingnant and Le Roy & Ballard. Four of the motets form a group for the feasts of Christmas, St Stephen, All Saints and St Nicholas. Three- and four-voice versions of the late chansons printed as anonymous by Attaingnant (RISM 1529[4], 1530[4]) may also have been by Rousée.

FRANK DOBBINS

Roussakis, Nicolas (*b* Athens, 10 June 1934; *d* New York, 23 Oct 1994). American composer of Greek birth. At the age of 15, he emigrated to the USA, becoming an American citizen in 1956. He attended Columbia University (BA 1956, MA 1960, DMA 1975), where his teachers included Luening, Beeson, Ussachevsky and Cowell, and also studied with Ben Weber (1958–9), Ralph Shapey (1960–61) and Philipp Jarnach (1961–3). His awards included scholarships to the Darmstadt summer courses (1962–3), where he worked with Berio, Boulez, Ligeti and Stockhausen, and grants from the National Institute of Arts and Letters (1969), the Rockefeller Foundation (1982) and the Alice M. Ditson Fund (1990). He joined the composition department at Rutgers University in 1977, also serving as an administrator for the Group for Contemporary Music, ACA, CRI and the American Composers Orchestra.

Roussakis's style balanced contemporary compositional techniques with traditional forms and procedures. Although his early Sonata for Harpsichord (1967) and the Six Short Pieces for two flutes (1969) embody characteristics of integral serialism, most of his music combined serial ordering with tonal elements. In *Syrtos* (1975) pitch organization derives from the melodic minor scale; in *Trigono* (1986) segments of the 12-note row create a quasi-tonic-dominant polarity, with 3rds and 6ths forming the basis of many harmonies. Roussakis also drew inspiration from his Greek heritage, using the dance-like rhythms of Greek folk music and programmatic descriptions of Greek history, myth and literature in works such as the dramatic tone poem *Ode and Cataclysm* (1975). Later music combined these tendencies. In *Ephemeris* (1979) traditional consonances are superimposed on a network of all-interval sets, while *Fire and Earth and Water and Air* (1983) features sounds based in the overtone series emerging out of aleatory chaos. *The God Abandons Antony* (1987), *Hymn to Apollo* (1989) and *Mi e fa* (1991) place an even greater emphasis on modal melodies, triadic harmonies, folk rhythms and traditional forms.

WORKS

RICHARD CHRISMAN

Rousseau, Jean (*b* Moulins, 1 Oct 1644; *d* Paris, 1 June 1699). French viol player, theorist and composer. He may have received his early musical instruction from Jacque Joly, *maître de musique* at Notre Dame in Moulins. In 1676 he moved to Paris, living at the house of the lute and viol maker Michel Collichon; there he met Dubuisson and Machy. He studied the viol for three years, culminating in a month's study with Sainte-Colombe. His singing treatise *Méthode claire, certaine et facile*, dedicated to Michel Lambert, provides valuable information on ornamentation and the relationship between metre and tempo; its system of natural and transposed modes was one of the first in France to distinguish between major and minor modes (see Tolkoff). The *Méthode* was also published in Amsterdam and references to it in Walther and Mattheson (*Der vollkommene Capellmeister*) attest to its influence outside France.

Rousseau dedicated his *Traité de la viole* (1687) to Sainte-Colombe and in it he defended his master's innovative approach to the position of the left hand – one which facilitated performance in the melodic style ('jeu de mélodie') – refuting point by point the attacks on unharmonized compositions made by Machy in the preface to his *Pièces de violle* (1685). Rousseau followed

this with a pamphlet in 1688 challenging Machy to a musical duel (see Lesure). The *Traité* also includes a discussion of the history of the viol in France which provides valuable information on construction techniques; Rousseau also mentions Thomas Young, Henry Butler and John Price and the influence of the English viol school on French musicians. The discussion of technique and bowing is the most thorough before Loulié, and in the discussion of ornamentation Rousseau draws upon the lute tradition as well as encouraging the adoption of conventions from vocal music.

Nothing of Rousseau's compositions survives except the libretto to a work from 1686 celebrating the revocation of the Edict of Nantes; references to published works in Fétis are most likely spurious.

ROBERT A. GREEN

Rousseau, Jean-Baptiste (*b* Paris, 6 April 1671; *d* Brussels, 16 March 1741). French poet. He wrote the librettos of *Jason, ou La toison d'or* (music by Collasse, 1696) and *Vénus et Adonis* (music by Desmarets, 1697). Soon afterwards he turned to the writing of cantata texts, which was his most important contribution to French music. About 1700 he had become secretary to Hilaire Rouillé Du Condray, a government official allied to the interests of Philippe III. Like the future regent, Du Condray's tastes inclined towards Italian music; this may have spurred Rousseau's interest in writing cantata texts in imitation of those from Italy. Rousseau's own knowledge of music gave him unusual insight into the problems of writing words for music and his 26 published cantata texts were regarded as models of their kind. As well as providing material for the rising school of cantata composers in France Rousseau's texts also initiated a minor poetic form there.

DAVID TUNLEY

Rousseau, Jean-Jacques (*b* Geneva, 28 June 1712; *d* Ermenonville, 2 July 1778). Swiss philosopher, theorist and composer. He studied music with Le Maître in Annecy, and taught himself by reading and annotating Rameau's *Traité d'harmonie*. He also gave music lessons in Neuchâtel, Lausanne and Chambéry ('I was unconsciously learning music as I taught it', *Les confessions*, book 4). His first compositions were two lyric tragedies, *Iphis et Anaxarète* (Chambéry, c1740) and *La découverte du nouveau monde* (Lyons, c1741), but only the librettos from these two works have survived. In 1742 he presented a new figured notation for music to the Académie des Sciences (*Projet concernant de nouveaux signes pour la musique*), and published a *Dissertation sur la musique moderne* on the same subject in 1743. In the same year he became secretary to the comte de Montaigu and discovered Italian music on a visit to Venice.

On his return to Paris he completed the opera *Les muses galantes* (the libretto has survived, as has the music for the opening scene, *Hésiode*, which is in a strongly marked French style). During a rehearsal in the house of La Pouplinière in 1745, Rameau accused him of having copied some of its passages from an Italian composer. In that same year the Duc de Richelieu entrusted him with a revision of *La princesse de Navarre* (on which Voltaire and Rameau had collaborated) with a view to producing a ballet act entitled *Les fêtes de Ramire*, but the task was in the end returned to Rameau. These incidents are recounted in the seventh book of *Les confessions*. Rousseau's first operatic success came in October 1752, with *Le devin du village*, first performed at Fontainebleau before the court and taken up again soon afterwards by the Académie Royale de Musique (March 1753). It is a relatively short work, with only three characters: Colin, Colette and the Soothsayer ('Le devin'), and though based on the Italian intermezzo, it merits the designation opera from the fact that it is entirely sung, with recitative over a continuo bass and songs accompanied by the violin, flute and oboe. It achieved instant success and stayed in the Opéra's repertory for 60 years. The work as a whole embodies Rousseau's ideal of rusticity and simplicity, the theory of which he set out in his article 'Unité de mélodie' in the *Dictionnaire de musique*. Burney adapted it in 1766 under the title *The Cunning Man*, and the youthful Mozart used the libretto, as revised by Favart, for his *Bastien et Bastienne*.

In 1748–9 Diderot entrusted Rousseau with the music articles in the *Encyclopédie* (signed S). They contained criticisms of Rameau's harmonic system which d'Alembert endeavoured to tone down. This became the occasion of a controversy between Rameau (*Erreurs sur la musique dans l'Encyclopédie*, 1755) and the Encylopedists, who complicated the QUERELLE DES BOUFFONS by engaging in theoretical argument. Rousseau subsequently included these articles in his *Dictionnaire de musique*, published in 1768.

The Querelle des Bouffons had erupted in August 1752, and Rousseau's *Lettre sur la musique française* appeared in November 1753. While he saw Italian music, based on melody and the voice, as being closer to the moral, meaningful nature of music, he violently criticized French music as the product of a deliberate perversion that he

had already denounced in his *Discours sur les sciences et les arts* of 1750. The differentiated sound worlds of the French language and French music reveal a process of disintegration, as a result of which, through their articulation, coordination and intellectualization, language and music become divorced and produce cacophony. The fundamental argument in the *Lettre* is both emphasized and disguised by its polemical nature, which is announced at the start of the work and summed up by its famous last sentence: 'I conclude that the French have no music and cannot have any; or that if ever they do have any, so much the worse for them'. In its context, this declaration can be taken to mean that French music has lost the essential properties of primordial music (voice and melody), obscuring and replacing them with supplementary or secondary properties: harmony and complexity. This theory of the 'supplement' (which designates a form of substitution or usurpation that should not be confused with accompaniment) is no less present in Rousseau's ideas on politics and education. It is a coherent system, with an integrated aesthetic theory.

According to Rousseau, music finds its source in primordial poetry or melody. By virtue of its primarily psychic nature, music is tied to language: it deals with meaningful phenomena. This thesis is given full theoretical treatment in the *Essai sur l'origine des langues*, written between 1756 and 1761 (though published only after his death) as a sequel to the *Examen de deux principes avancés par M. Rameau* (1755). Like language, music has followed a process of both degradation and progress: it has been given articulation, substance and an intellectual basis (the process of harmonization). For Rousseau, the error in classical thinking (represented in this case by Rameau) was to cling to this late state of affairs and to think that the science of harmony could elucidate musical phenomena. In fact, music cannot be reduced to a set of vibrations, its meaningful substructure is neither rational nor material and cannot be equated simply with grammar (harmony). Its underlying sense is moral and contingent on the specificity of human nature. Rousseau proposes we return to the innermost core, common to all languages, and postulates a primordial language, a philosophical fiction that functions as an archetype for every meaningful immaterial effect, the basis of which is the 'sign of passion'. The mechanism that indicates and gives outward manifestation to this immateriality is the voice, an inarticulate and accentuated phenomenon. Thus, the basis of linguistic and musical meaning lies in the central concept of vocality. The *Essai* develops a dualism that opposes not only the moral and the material worlds, but also the psychic world of the passions and the rational world of numeracy. The first part (chapters 1 to 11, focussing on languages) contrasts accentuation with articulation; the second (chapters 12 to 19, devoted to music) contrasts melody (representing vocality) with harmony (an artificial, material and rational refinement).

All these analyses are indissolubly linked to a more general aesthetic position that is set out in particular in the *Lettre à d'Alembert sur les spectacles* (1758). This work centres on a critique of the concept of fiction which is aimed principally at Classical French theatre, and, *a fortiori*, at French opera. Classical aesthetic theory is based on the idea that aesthetic fiction is a privileged means of attaining and showing the truth. Rousseau attacks this artifice and the forms of pleasure it produces: theatre takes one away from the truth since it is based on distancing, a form of unconcern. This critique is similarly extended to ethical matters. The relationship to fiction turns the spectator away from the seriousness of real life. Having become too susceptible to what is fictitious, one is no longer stirred by what is real, but becomes accustomed to a vicarious life which embellishes and encourages vices. Rousseau here is going back both to Plato's argument in book x of *The Republic*, and to the criticisms of the 17th-century rigourists (particularly Bossuet in his *Maximes et réflexions sur la comédie*). In contrast to Classical theory, Rousseau's aesthetic is presented as the quest for authenticity, simplicity and celebration. One should replace the model of the corrupted spectacle, whose falsehood and vice separates humanity from itself, with that of celebration which draws hearts together in genuine effusion. This theory is accompanied throughout with ethical and political considerations embodied in the ideal of a simple, rural and frugal life (that of the Swiss 'mountain folk') and is enhanced by references to the legends of Sparta. By means of this fundamental critique of fiction, Rousseau unifies his aesthetic thinking and explicitly relates it to his political ideas.

Rousseau's aesthetic thinking as a whole (of which the literary and narrative version as applied to music, and particularly to opera, is to be found in *La nouvelle Héloïse*, i, 48, and ii, 23) adheres, more or less, to the same structural process as his political and ontological thinking. Transparency of origin is a philosophical invention designed to make intelligible the conjoined process of decline and subsequent development, and to make possible the process of regeneration which, by preserving the gains of the corrupted and cultivated stage, makes it possible not to return to the origin, but to grasp its idea. This movement, which would be for music what the social contract is in the domain of politics, is sketched out differently by Rousseau according to whether it is applied to Italian opera (for which the ideal of an accompanied recitative can be realised) or to French opera which Rousseau proposes to transform into melodrama: an alternation of spoken and purely instrumental passages. This was how he conceived *Pygmalion*, a *scène lyrique* set to music by Horace Coignet in 1770.

Rousseau lived part of his life as a professional copyist, and apart from his operas and his *scène lyrique Pygmalion*, he also composed a symphony, several motets, a few instrumental pieces, three albums of songs (see illustration) and sketched out another stage work, *Daphnis et Chloé*. Of more significance to musicians, however, are his writings on music, and in particular his *Dictionnaire de musique*, a reference work even today. With its 900 entries, it can be seen as the earliest modern dictionary of music by virtue of its being thought out on the lines of the *Encyclopédie*. Its main object was to deal with terms relating to knowledge and technique, not only providing definitions (to which Brossard's succinct *Dictionaire* limited itself) but also, and above all, furnishing explanations and showing the relationships of concepts. His work covers ideas relating to acoustics, music theory, composition, performance, interpretation, the poetics of musical and operatic genres (partly incorporating choreography), general musical aesthetics, the history of music and its geographical variation. Also to be found in it are everyday words that have a meaning specific to these different

Title-page of Rousseau's 'Les consolations des misères de ma vie' (Paris: De Roullede, 1781); engraving by Peter-Paul Benazech

domains, and the names of accessory objects and of musical institutions. It is in addition one of the first works to give significant space to extra-European music. More generally, Rousseau has inverted the classification of the fine arts, substituting for the literary and pictorial model inherited from Aristotle, which flourished in the Classical age, what might be referred to as the musical model. This is based on private, temporal and inner qualities, for which the finality of art is not to express the truth but to convey emotion by avoiding an overabundance of intermediate material or intellectual interference. From this point of view, Rousseau is not only a forerunner of the pre-Romantic aesthetic, but his position was to transform itself as part of the case for modern aesthetics.

WORKS

all printed works published in Paris

STAGE

texts by Rousseau unless otherwise stated

Iphis et Anaxarète (tragédie lyrique), Chambéry, *c*1740; music lost

La découverte du nouveau monde (tragédie lyrique, 3), Lyons, 1741; music lost

Les muses galantes (opéra-ballet, 3), Paris, residence of La Pouplinière, ?1745; music lost; music to later entrée Hésiode (orig. Le tasse) in Musée Chaalis, nr Senlis; Musette en rondo, ed. in *BSIM*, viii/6 (1912), 49, see also *BrookSF*

Les fêtes de Ramire, Versailles, late 1745; rev. of Rameau's La princesse de Navarre (comédie-ballet, 3, Voltaire), music lost

Le devin du village (intermède, 1), Fontainebleau, 18 Oct 1752; (1753), 6 nouveaux airs (1778)

Pygmalion (scène lyrique), Lyons, Hôtel de Ville, 1770, collab. H. Coignet; score, *F-Pcf*; parts, *Pn*

Daphnis et Chloé (pastorale, prol, 4, P. Laujon), unperf.; Act 1, with sketches of prol, Act 2, divertissement (1779); ov. (n.d.)

OTHER VOCAL

Motets, *F-Pn*: Salve regina, 1v, insts, 1752; Ecce sedes hic tonantes, 1v, insts, ed. in *BSIM*, viii/6 (1912), 50; Quam dilecta tabernacula, 1v, bc, 1769; Quomodo sedet sola civitas, 1v, bc, 1772; Principes persecuti sunt

Canzoni da batello: Chansons italiennes, ou Leçons de musique pour les commençants (1753)

Les consolations des misères de ma vie, ou Recueil d'airs, romances et duos (1781)

Recueil de [6] chansons, 1v, 2 vn, bn/va, bc; Airs, 1v, 2 vn, va, b, ded. Countess of Egmont: *GB-Lbl*

Other pieces pubd separately, in *Mercure de France* and in contemporary anthologies

INSTRUMENTAL

Symphonie, Lausanne, 1730, lost

Symphonie à cors de chasse, Concert Spirituel, 23 May 1751, lost, ?extracted from Les muses galantes

Le printemps di Vivaldi, arr. fl solo (n.d.)

Carillon, appx to *Dictionnaire de musique* (Geneva, 1768)

Air de cloches, *F-Pn*, ed. in various edns. of Oeuvres; Airs pour être joués, la troupe marchant, *Pn*; airs, 2 cl, *Pn*, Rousseau Society, Geneva

Sonate, 2 vn, b, formerly in collection of J. Ecorcheville

Pieces in contemporary anthologies

WRITINGS

Only those relating to music are included; most were reprinted in *Ecrits sur la musique*, Oeuvres complètes . . . nouvelle édition, classée par ordre de matières, xix–xxii (Paris, 1788–93) and in numerous subsequent editions of the complete works, in particular see Gagnebin (1995).

P– *published collectively with 'Projet . . . 1742' (Geneva, 1781)*

Projet concernant de nouveaux signes pour la musique . . . à l'Académie des sciences, le 22 août 1742 (Geneva, 1781; Eng. trans., ed. B. Rainbow, 1982)

Dissertation sur la musique moderne (Paris, 1743), P

Lettre à M. Grimm au sujet des remarques ajoutées à sa lettre sur Omphale (Paris, 1752)

Lettre d'un symphoniste de l'Académie royale de musique à ses camarades de l'orchestre, 1753, Théâtre et poésies (Geneva, 1781)

Lettre sur la musique française (Paris, 1753, 2/1753); abridged Eng. trans. in *Source Readings in Music History*, ed. O. Strunk (New York, 1950/*R*)

Lettre à Monsieur l'Abbé Raynal au sujet d'un nouveau mode de musique, inventé par M. Blainville, 1754, Oeuvres . . . nouvelle édition, v (Neuchâtel, 1764), P

Examen de deux principes avancés par M. Rameau, dans sa brochure intitulée: 'Erreurs sur la musique dans l'Encyclopédie', 1755, P

J.J. Rousseau . . . à Mr. d'Alembert . . . sur son article 'Genève' dans . . . l'Encyclopédie et particulièrement sur le projet d'établir un théâtre de comédie en cette ville (Amsterdam, 1758); ed. M. Launay (Paris, 1967)

Lettre à Monsieur Le Nieps . . . le 5 avril 1759, Théâtre et poésies (Geneva, 1781)

Essai sur l'origine des langues, où il est parlé de la mélodie et de l'imitation musicale (Paris, 1753; Geneva, 1754), P

*Extrait d'une lettre . . . à M. *** sur les ouvrages de M. Rameau*, Oeuvres, ii (Neuchâtel, 1764)

Dictionnaire de musique (Paris, 1768/*R*; Eng. trans., 1771, 2/1779/*R*)

Lettre à M. Burney sur la musique, avec fragmens d'observations sur l'Alceste italien de M. le chevalier Gluck, *c*1777, P

Extrait d'une réponse du petit faiseur à son prête-nom, sur un morceau de l'Orphée de M. le chevalier Gluck, *c*1774, P

Letters to Lesage *père*, 1754; Perdriau, 1756; Ballière, 1765; Lalande, 1768; various minor writings in Jansen (1884), appx

CATHERINE KINTZLER

Rousseau, Jean-Marie (*b* Dijon, early 18th century; *d* Lille, 17 Feb 1784). French composer. He was a chorister at Dijon and later choirmaster at Arras, Beauvais and, from 1762 until his death, at Tournai Cathedral. In September 1762 he visited Dijon briefly to enter the priesthood; on his return he was named a beneficed clergyman and chaplain of St Catherine's Chapel at Tournai Cathedral. In 1781, probably because of poor health, he was relieved of some of his duties. He died while travelling to Lille to direct a performance of his last composition, a Requiem for a recently deceased friend; the work was used for his own funeral and enjoyed subsequent success in Douai and Paris.

Rousseau's compositions are almost exclusively sacred, and include 16 masses (of which three are requiem settings; six were published in Brussels, n.d.), three settings of the *Te Deum* and 41 motets, all in the Tournai Cathedral archives; and three cantatas (1776–81), of which only the texts are extant (*B-Gu*). His works have a solid but conservative style of little originality, not far

removed from Charpentier or Lalande, and maintain the traditional alternation of plainsong and polyphony.

Roussel, Albert (Charles Paul Marie) (*b* Tourcoing, 5 April 1869; *d* Royan, 23 Aug 1937). French composer. Though he was touched by the successive waves of impressionism and neo-classicism in French music, he was an independent figure, his music harmonically spiced and rhythmically vigorous.

1. LIFE. Roussel was born into a family of industrialists, highly regarded makers of curtains and carpets. His early childhood was overshadowed by an unusual incidence of bereavements, which may explain the solitary and independent aspects of his personality. He lost first his father, who died of consumption in 1870, next his paternal grandparents, between 1874 and 1876, and then his mother, who succumbed to pulmonary tuberculosis in 1877. He went to live with his maternal grandfather, Charles Roussel-Defontaine, mayor of Tourcoing, who died in his turn in 1879. At the age of ten, Roussel was taken into the care of his maternal aunt, Eugénie, and her husband, Félix Réquillart. He had learnt the rudiments of music from his mother, and in 1880 he had his first lessons with the parish organist, who recognized his natural talent. He attended the Institution Libre du Sacré-Coeur, where his exam results indicated a gifted and diligent student, especially in French composition and mathematics.

1. *Albert Roussel*

When he was 15, his guardians decided to send him to Paris, to pursue his studies at the Collège Stanislas. Jules Stolz, organist of St Ambroise, gave him piano lessons and introduced him to the cardinal works of the repertory. Roussel passed the entrance examination for the Ecole Navale in 1887 and embarked in October of that year on the *Borda*, passing out as a midshipman two years later. He was sent to sea several times, notably to the Near East. He first essayed musical composition in 1892, during a voyage on the *Melpomène*: it was no doubt for a violin-playing fellow-sailor that he wrote his *Fantaisie* for violin and piano, and he went on to set several excerpts from an Indian legend. In 1893, by then a lieutenant, he set sail on the *Styx* for Cochin-China. On his return to France in 1894 he took three months' leave, which he extended and passed in Roubaix, where he studied harmony with Julien Koszul. Koszul urged him to settle in Paris and recommended him to the celebrated organist Eugène Gigout.

At 25 Roussel decided to become a musician and sent a letter of resignation from the navy, dated 14 June 1894. He settled in Paris that October and began to study music. Four years later he entered the Schola Cantorum, where he studied under d'Indy. In 1902 d'Indy entrusted him with the counterpoint class, which he took until June 1914; his pupils included Varèse, Satie, Le Flem, Raugel and Roland-Manuel. Later, during the 1920s, he was to be the mentor of composers such as Martinů, Conrad Beck and Jean Cras.

He became known to a limited public thanks to Cortot, who conducted his first orchestral work, *Résurrection* (1903), at one of the concerts of the Société Nationale. Cortot's interest in Roussel's music led him to feature *Soir d'été* (1904) at one of the 'lectures' of the Société des Concerts Cortot. *Soir d'été* became the third movement of the First Symphony, the *Poème de la forêt* (1904–6), which was first performed in 1908, in Brussels, under Sylvain Dupuis.

It was also in 1908 that Roussel married Blanche Preisach (1880–1962), a Parisian of Alsatian descent, and composed music for Jean-Aubry's *Marchand de sable qui passe*. Jean-Aubry had this refined and delicate score performed at the Cercle de l'Art Moderne in Le Havre, of which he was the founder. In September 1909 the Roussels set sail on a three-month voyage to the Indies and Cambodia, an experience which inspired two of the composer's major works: *Evocations* (1910–11) and *Padmâvatî* (1913–18).

Following the resounding success of *Evocations*, Jacques Rouché, then director of the Théâtre des Arts, asked Roussel to write the ballet score *Le festin de l'araignée* (1913). This was so successful that Rouché, newly appointed director of the Opéra, next commissioned an opera from Roussel to inaugurate his term of office there. Recalling a Hindu legend he had heard during his voyage to India, Roussel began to compose *Padmâvatî* to a libretto by Louis Laloy.

But war interrupted the work. Though he had been removed from the reserve list in 1902 for health reasons, Roussel took steps to join the army as a lieutenant in the artillery. From 1915 he served as a transport officer in Champagne and the Somme until Verdun. He was finally

2. Design by Valdo–Barbey for the costume of Kali in the original production of Roussel's 'Padmâvatî'

invalided out in February 1918. In the summer of 1919 he moved to Cap Brun, near Toulom, where he began his Second Symphony. Illness forced him to break off work and go to convalesce in the mountains near Grenoble early in 1920. There he wrote his symphonic poem *Pour une fête de printemps*, which he dedicated to his teacher Gigout.

In 1920 Roussel and his wife bought a magnificent property at Varengeville, not far from the sea, near Dieppe. Here Roussel finished the Second Symphony and composed most of his remaining works. The Second Symphony was coolly received at its première on 4 March 1922, but when Koussevitzky conducted it the following year the public was more responsive. The première of *Padmâvatî*, for which Roussel had been hoping since the end of the war, at last took place in 1923, to critical acclaim.

The war years had marked a caesura in Roussel's work, and he had the chance to reflect. The near failure of the Second Symphony prompted him to take a new direction and abandon the outdated aesthetics that had held him in thrall. From this time forward he aspired to compose a purer music: less cluttered, cleansed, more personal. *La naissance de la lyre* was the first product of this resolve, exhibiting a new simplicity and a serenity in which music, dance, spoken dialogue, singing and choral writing all blend.

His reputation was spreading outside France: his music was played in numerous European and North American venues, and he received commissions from foreign performers, patrons and publishers. In Paris, festivals of his works were organized by the Société Musicale Indépendante, in 1925 and 1929; on the latter occasion his 60th birthday was marked by four concerts of orchestral, vocal and chamber music. This was the highpoint of his career. In 1930 he and his wife went to Boston and Chicago to hear the Third Symphony, written for the 50th anniversary of the Boston SO and conducted by Koussevitzky, and the Trio op.40, an Elizabeth Sprague Coolidge commission. The journey was a triumphant success and the American public received him warmly.

In 1931 the ballet *Bacchus et Ariane* was performed at the Paris Opéra, choreographed by Serge Lifar. Roussel's theatrical and symphonic qualities had equal scope in this exceptional score. The operetta *Le testament de la tante Caroline* (1932–3) reveals the poker-faced humour that is also present in several of the chamber works. Roussel had the pleasure of seeing *Le testament* presented at the Opéra-Comique in Paris in March 1937, after its première in Olomouc in November 1936, in a Czech translation by his pupil Julia Reisserova.

In February 1934 he had suffered pneumonia, complicated by jaundice. He was confined to bed until the summer and returned to work only slowly, in his house in Varengeville, where he wrote his Sinfonietta for Jane Evrard's string orchestra. At the same time he composed his Fourth Symphony, which received a breathtaking performance under the baton of Albert Wolff. Hermann Scherchen commissioned the ballet score *Aeneas* for a concert given on 31 July 1935 at the Palais des Beaux-Arts in Brussels. The Belgian press was unanimous in its praise for this very personal work.

In the desire to build on this success, Roussel in April 1936 composed his *Rapsodie flamande* on five themes from Ernest Closson's collection *Chansons populaires belges*. Then, just after finishing his Cello Concertino, he was laid low by an attack of angina, on 27 August. After a long convalescence in Nice he resumed work on the preparations for the musical section of the Paris Exhibition of 1937 and the ISCM Festival, of which he was president. Back in Varengeville, he composed his Trio op.58. He fell ill again and regretfully left his much-loved home, where the climate was too severe for him, and moved to Royan. Though very tired, he began a wind trio, but did not finish it. He suffered a heart attack on 13 August 1937 and died ten days later. He was buried, in accordance with his wishes, in the little cemetery of Varengeville, overlooking the sea.

2. WORKS. Roussel's career coincided with two distinct historical periods, the first stretching from the late 19th century to the outbreak of World War I, the second ending as World War II approached. To some extent his music reflects the predominant styles of French music in those years. It is certainly stamped by the lateness of his decision to dedicate himself to composition. Diverse influences are evident in the works of his early manner, but he gradually shed them work by work, until he arrived at a unique personal language in which he was to have no followers. His career was one of evolution, not revolution, and though traces of various aesthetic schools can be found in his music, the distinctive, representative signs of a Rousselian style shine through.

The traditional forms, cyclic principle and programmatic content of the earliest works (the Piano Trio, Violin Sonata and First Symphony) testify to the influence of the Schola. The composer's personality begins to reveal itself in chamber works and the eight Régnier songs. The Divertissement for wind quintet and piano (1906) exhibits several elements of his future style: sprightly rhythms and

dissonance-enriched harmonies. The *Deux poèmes chinois* op.12 presage his future oriental interests, while the delicate incidental music for *Le marchand de sable qui passe* reveals a poet of sensations. Roussel's impressionism is not that of Debussy or Ravel, for his music transmutes sensations into more abstract images.

If *Rustiques* (1904–6) presents a sharp contrast to its predecessor among his major piano works in respect of harmonic language, counterpoint and rhythmic ingeniousness, the Suite op.14, composed five years later, testifies to a profound change. While rhythm becomes more stable, the harmonic writing ranges wider, through the use of the tritone and certain destabilizing intervals, notably ones originating in Indian modes, and through Roussel's liking for uncommon harmonic combinations and independent counterpoint. Although the Suite contains Roussel's first experiments with Indian modality, the full depth of this influence emerged only in the later *Evocations*. A broad panorama in three movements, with chorus and soloists, transporting the listener to India, this symphonic poem is in its dramatic power, orchestral colour, exotic influences and structure one of the great successes of French music in the period immediately before World War I. A renewal of interest in the piano led Roussel to write the Sonatine, which is distinguished by its formal elegance and the crystallization of previous experiments with rhythm, harmony, counterpoint and a more homogenous and coherent pianism. *Le festin de l'araignée* marks the conclusion of Roussel's first period. This first ballet score has a seductive lightness, spontaneity, irony and refinement of style and orchestration. It is realistic rather than impressionistic, depicting the ferocity of the insect world meticulously but not excessively so, and it exhibits characteristically Rousselian rhythmic motives.

Padmâvatî represents the culmination of Roussel's fascination with India, in its subject matter – the legend of the Queen of Chitor – and in its masterful integration of an Indian modal language into the composer's harmonic style. Dark, brooding orchestral colours, emotionally effective choruses and danced numbers, and poignant solo writing all evoke the majesty of Hindu temples and the tragic destiny of the characters.

Roussel reached a turning-point as the 1920s dawned. He looked for a style and new techniques that would enable him to organize his musical ideas, and *Pour une fête de printemps* and the Second Symphony are the witnesses to this process. More chromaticism, the use of bitonality in more ample forms and a more complex harmonic language in the symphony are the dominant characteristics of this period of transition.

The mature works which begin with the orchestral Suite in F include several compositions for a variety of ensembles, but the flute occupies a privileged position. Roussel pays his dues to contemporary taste in borrowing musical forms from the 18th century and rediscovering the spirit of concision typical of that epoch in the *Concert* for small orchestra, the Piano Concerto, the Cello Concertino, the *Petite suite*, the Sinfonietta, the String Quartet and the Third and Fourth symphonies, but it is the grandeur of his contrapuntal and linear writing that makes the greatest impression. The melodies, now of an unprecedented amplitude and often using large intervals, are closely interwoven so that they generate harmonic amalgamations of astonishing novelty. The orchestration, whether vivid and richly coloured or slender and pared down, always serves the cleanly shaped themes. There is no denying Roussel's rhythmic ingenuity, with its predilection for the anapaest and for irregular subdivisions of the beat. He may seem reserved, but he allows his passionate nature to express itself without restraint in *Bacchus et Ariane*, a dazzling, sumptuous score. The imposing *Psalm lxxx* and *Aeneas* – choral symphonies in their way, but stripped of excess – move the listener by their simplicity and interiority. An extreme refinement informs the last songs and the String Trio.

In the music Roussel composed after 1925 he achieved his ideal of 'a music willed and realized for its own sake'. An eclectic, he forged a personal, unique style in a modern idiom resting on the foundations of traditional music. Never having wished for disciples, he remained independent and unique.

WORKS

STAGE

op.	
13	Le marchand de sable qui passe (incid music, 1, G. Jean-Aubry), 1908; cond. Roussel, Le Havre, 16 Dec 1908
17	Le festin de l'araignée (ballet-pantomime, 1, G. de Voisins after H. Fabre: *Souvenirs entomologiques*), 1912–13; cond. G. Grovlez, Paris, Arts, 3 April 1913; extracts arr. as Fragments symphoniques, 1913
18	Padmâvatî (opéra-ballet, 2, L. Laloy), 1913–18; cond. P. Gaubert, Paris, Opéra, 1 June 1923
24	La naissance de la lyre (conte lyrique, 1, T. Reinach, after Sophocles), 1922–4; cond. P. Gaubert, Paris, Opéra, 1 July 1925
—	Sarabande [for L'éventail de Jeanne], ballet, 1927; cond. Désormière, Paris, 16 June 1927
43	Bacchus et Ariane (ballet, 2, A. Hermant), 1930; cond. P. Gaubert, Paris, Opéra, 22 May 1931; extracts arr. as 2 orch suites; no.1, Paris SO, cond. Münch, Paris, Salle Pleyel, 2 April 1933; no.2, Paris SO, cond. Monteux, Paris, Salle Pleyel, 2 Feb 1934
—	Le testament de la tante Caroline (opéra-bouffe, 3, Nino [M. Verber]), 1932–3; cond. A. Heller, Olomouc, 14 Nov 1936; in Fr., cond. R. Désormière, Paris, OC (Favart), 11 March 1937
54	Aeneas (ballet, 1, J. Weterings), chorus, orch, 1935; cond. Scherchen, Brussels, Palais des Beaux-Arts, 31 July 1935
—	Prelude to Act 2 of Le quatorze juillet (incid music, Rolland), 1936; cond. Désormière, Paris, Alhambra, 14 July 1936
59	Elpénor (radio score, Weterings), fl, str qt (1947)

ORCHESTRAL

op.	
—	Marche nuptiale, 1893, destroyed
4	Résurrection, sym. prelude after Tolstoy, 1903, cond. A. Cortot, Paris, Nouveau Théâtre, 17 May 1904

NICOLE LABELLE

Roussel, François [Rosselli, Francesco] (*b c*1510; *d* after 1577). ?French composer. As his madrigals were published under various italianized forms of his name (Rosselli, Rossello, Roscelli, etc) historians have generally concluded that he was Italian, but in a document cited in *I-Rslf* he is referred to as 'Franciscus Roussel gallus'. All we know of his activities outside Italy is that before 1568 he was a protégé of the seneschal Guillaume de Gadagne in Lyons. Two lists of the *famiglia* of Cardinal Alessandro Farnese (unpublished; discovered by Pierre Hurtubise) show Roussel among the 11 musicians employed by the cardinal in 1544 and as a member of his household in 1563. This relationship may help to explain certain items in the composer's biography, in particular his nomination by the cardinal to the position of *magister pueorum* of the Cappella Giulia in 1548 and his appointment as *maestro di cappella* of S Lorenzo in Damaso in 1564. As Roussel may have been in Farnese's service continually from 1544 to 1563, his whereabouts in the years 1550–1563 might be found in the cardinal's itinerary for those years. He was employed at S Luigi dei Francesi from 1566 to 1571 and at S Giovanni in Laterano in the years 1572–5.

Roussel's secular music is varied, though not especially individual. He was an early master of the *note nere* style in the 1540s, and these works are characterized by complex rhythms, which he also adopted in many chansons. Some of his mature works seem to show the influence of Rore in their greater use of dissonance and chromatic colour for expressive purposes. Roussel's sacred output is relatively small. Aside from some obsolete contrapuntal devices, his motets and masses are in the style of Arcadelt and his generation. Loys Bourgeois and Palestrina were among those who expressed admiration for his music, and some of his masses were sent to the ducal court at Munich along with works by Palestrina in an exchange arranged by Cardinal Borromeo in 1561–2. His best-known motet is *Adoramus te Christe*, which in a version with different lower voices was incorrectly attributed to Palestrina by some 19th-century scholars; this version was probably composed later than the 16th century.

GREER GARDEN/RICHARD SHERR/R

Roussel, Louise. *See* LECLAIR, LOUISE ROUSSEL.

Rousselière, Charles (*b* Saint-Nazaire, 17 Jan 1875; *d* Joué-lès-Tours, 11 May 1950). French tenor. Originally a blacksmith by trade, he studied with Albert Vaguet at the Paris Conservatoire and made his début at the Opéra as Samson in 1900. The following year he sang in the première of Saint-Saëns' *Les barbares*, and he remained with the company until 1905. Until 1919 he was a favourite at Monte Carlo, where he appeared first in *La damnation de Faust*; premières there included Mascagni's *Amica*, Saint-Saëns' *L'ancêtre* and Fauré's *Pénélope*. His début at the Metropolitan in *Roméo et Juliette* in 1906 coincided with that of Geraldine Farrar, who received more attention; his dramatic skill was appreciated but the power of his voice, sometimes strident, suggested that he should turn to more heroic roles. This he did on his return to France, adding Otello, Lohengrin, Siegfried and Parsifal to his repertory. He also appeared in Berlin, Buenos Aires and Milan, and in his later years sang mostly at the Opéra-Comique where in 1913 he created the title role in Charpentier's *Julien*. His varied repertory is well represented in recordings made between 1903 and 1926: his voice is strong and clearly defined, his style authoritative in declamation and well mannered in more lyrical music.

J.B. STEANE

Rousselot, Scipion (*b* c1800; *d* ?Paris, after 1857). French cellist and composer. He studied the cello with Nicolas Baudiot at the Paris Conservatoire, winning a *premier prix* in 1823, and went on to receive lessons in harmony and composition from Reicha. His symphony was played in a Conservatoire concert in 1834 and according to Pougin (*FétisBS*) was well received. During the 1830s he performed in London at the Philharmonic Society and in other concerts, played at the Société Alard-Chevillard in Paris (1838), and had some of his chamber music performed in both cities. By 1845 he had settled in England, where he became a frequent performer in London chamber music concerts. He was the regular cellist at the Beethoven Quartett Society, 1845–52, and in 1846 edited Beethoven's string quartets for a new set of parts published by Robert Cocks and Co., using Thomas Alsager's corrected copies. He was responsible for the management of the society from 1847 to 1852. From about 1850 he and Jean-Baptiste Arban were in business at 66 Conduit Street as military instrument manufacturers and music publishers; the partnership was disbanded in about 1852 and Rousselot continued trading as an instrument dealer until 1857.

Rousselot's published compositions mainly comprise chamber works. His septet, given at the Beethoven Quartett Society in 1847, was favourably reviewed in several London papers, the *Daily News* (13 July 1847) commenting on the 'spirit of Beethoven' in the bold and dramatic scherzo. The reasons for Rousselot's eventual return to Paris are unclear, though a lack of financial success in London seems to have been a factor. His brother Joseph-François Rousselot (1803–80) was a horn player; he performed in orchestral and chamber concerts in Paris, and was a founder-member of the Société de Musique Classique in 1847.

CHRISTINA BASHFORD

Rousset, Christophe (*b* Montfavet, nr Avignon, 12 April 1961). French harpsichordist and conductor. He studied at the Schola Cantorum in Paris under Huguette Dreyfus (1976), then (1980–83) at the conservatory in The Hague under Bob van Asperen (harpsichord), the Kuijken brothers and Lucy van Dael (chamber music). Meanwhile he studied interpretation with Gustav Leonhardt. In 1983 he won first prize at the Bruges International Harpsichord Competition, and from 1986 to 1991 was harpsichordist with Les Arts Florissants, while appearing as a soloist at major French music festivals. In 1991 he founded the vocal and instrumental ensemble Les Talens Lyriques, of which he is artistic director. Since then he has divided his career between that of harpsichordist (appearing with such groups as La Petite Bande, Musica Antiqua Köln and the Academy of Ancient Music) and director. Rousset's playing is characterized by technical virtuosity, and a fastidious attention to stylistic detail which may also be discerned in the performances of Les Talens Lyriques. Among his most successful recordings as a soloist are the complete harpsichord pieces of Rameau, for which he won a *Gramophone* Award (1992), the complete harpsichord pieces of François Couperin, for which he won the Cannes Classical Award, and the six keyboard partitas of Bach. With Les Talens Lyriques he has performed Handel's *Admeto* (in Australia and France, 1998) and recorded *Scipione*, *Riccardo Primo*, Mondonville's *Les fêtes de Paphos*, Jommelli's *Armida abbandonata* and Mozart's *Mitridate*. Rousset began teaching at the Paris Conservatoire in 1991.

NICHOLAS ANDERSON

Roussier, Pierre-Joseph (*b* Marseilles, 1716/17; *d* Ecouis, Normandy, 18 Aug 1792). French theorist. He was a canon in Ecouis, but apparently spent many years in Lyons and was a frequent visitor to Paris. As a proponent of Rameau's theories, his goal was to reduce fundamental bass rules to a rigorous system that avoided speculative propositions. His *Traité des accords* is a compendium of chords and laws: thoroughbass chords are methodically described, related to three basic fundamental chords, and then labelled by a letter-plus-number notational system that indicates a chord's root and hierarchy in the scale. Roussier diverged from Rameau on the issue of *double emploi*. He insisted that a subdominant chord with added 6th was distinctly different from a minor 7th chord on the second scale degree. He extended Rameau's principles of inversion, supposition and substitution to invent new chords and to relate augmented 6th chords to a dominant function. He also advocated Pythagorean tuning.

CYNTHIA M. GESSELE

Routh, Francis (John) (*b* Kidderminster, 5 Jan 1927). English composer and writer on music. He read classics at King's College, Cambridge (1948–51), and studied at the Royal Academy of Music (1951–3). In 1954 he began to study privately with Mátyás Seiber; the following year he produced his op.1., *Balulalow*. The Yeats song cycle *A Woman Young and Old* (1962) established him as a composer. By this time he had evolved a style which, unusually, combines orderly Stravinskian neo-classicism with certain English traits. His music can be characterized by energy and rhythmic drive, as in the Piano Concerto of 1976, or by more expressive and haunting qualities, as in the concert aria *Spring Night* (1971) and in many songs. His organ music is especially notable in treating the organ as a virtuoso solo instrument, combining Romantic and Classical traits. The two major cycles, *A Sacred Tetralogy* (opp.3, 15, 20 and 29) and *Four Marian Antiphons* are inspired concert works. His musical style before the Oboe Quartet (1977) is in a freely chromatic and neo-classical style; since then it has become more intense, couched in a very personal modal idiom.

In 1963 he founded the Redcliffe Concerts of British Music, which have given first performances of works by British composers and revived earlier English music.

WORKS

INSTRUMENTAL

Orch: Vn Conc., op.7, 1965; Dance Suite, 1974 [arr. of op.13]; Dialogue, op.16, vn, orch, 1968; Double Conc., op.19, vn, vc, orch, 1970; Sym., op.26, 1973; Vc Conc., op.27, 1973; Cupid and Death (after M. Locke), suite, 1974; Pf Conc., op.32, 1976; Scenes for orch 1, op.36, 1982; Ob Conc., op.46, 1984; Poème fantastique, op.48, pf, orch, 1988; Romance, op.51, vc, str, 1989 [also version for vn and str, 1989]; Romanian Dance, 1991 [arr. of pf duet]; Suite, op.59, str, 1992; Capriccio, op.62, 1995; Scenes for orch 2, op.65, 1996

DAVID C.F. WRIGHT

Routledge, Patricia (*b* Birkenhead, 17 Feb 1929). English mezzo-soprano. She studied singing with Elizabeth Sleigh in Birkenhead and later with Walther Gruner of the GSM. After training at the Liverpool Playhouse and Bristol Old Vic Theatre School she has regularly appeared in musicals, although remains best known as a straight actress. She took the lead in the first London production of Besoyan's spoof operetta *Little Mary Sunshine* and her performance in the Noël Coward revue *Cowardy Custard* brought her great acclaim first in London and then on Broadway. She created the lead female roles in Arlen and Styne's *Darling of the Day* (1968), for which she gained a Tony award, and in Lerner and Bernstein's *1600 Pennsylvania Avenue* (1976) on Broadway. With a strong voice of rich tone and a wide range, she has also appeared in operetta, making her début in a revival of *La Grande-Duchesse de Gérolstein* (Camden Festival, 1978), and played Ruth in *The Pirates of Penzance* in New York (1980). She played Nettie Fowler in the Royal National Theatre's *Carousel* (1992) and her portrayal of the Old Woman in Bernstein's *Candide* for the London Old Vic (1988) won her an Olivier award. She was made an OBE in 1993.

□

Routley, Erik (Reginald) (*b* Brighton, 31 Oct 1917; *d* Nashville, TN, 8 Oct 1982). English writer on church music. He read classics at Magdalen College, Oxford (1936–40, BA 1940), and theology at Mansfield College, Oxford (1940–43), and in 1943 became a minister in the

Congregational Church of England and Wales. He took the Oxford BD in 1946 with a thesis on church music and theology (published as *The Church and Music*) and in 1948 joined the staff of Mansfield College as director of music; he took the Oxford DPhil in 1952 with a dissertation on the music of Christian hymnody. He served as a minister in Edinburgh (1959) and Newcastle upon Tyne (1967) before becoming professor of church music at Westminster Choir College, Princeton, New Jersey (1975).

In addition to his pastoral work and writing Routley was active as an organist. He was the first president of the Guild of Congregational Organists (1951–9, re-elected 1970) and in 1965 was made a Fellow of the Royal School of Church Music. His work on the history of church music, particularly the music of nonconformist movements, broke much new ground, and as secretary to the editorial committee of *Congregational Praise* (1944–51) he contributed greatly to the value of that hymnbook. In 1961 he edited the *University Carol Book*, and in 1964 became editor of the series Studies in Church Music, in which his book on the Wesleys appeared. His compositions are chiefly for the church.

DAVID SCOTT/R

Rouvier, Jacques (*b* Marseilles, 18 Jan 1947). French pianist. He studied at the Paris Conservatoire, where he received a *premier prix* in the class of Aline van Barentzen in 1965 and then pursued his studies in the *cycle de perfectionnement* with Perlemuter and Pierre Sancan. He also received a *premier prix* in chamber music in the class of Jean Hubeau in 1967. He was successful at a number of international competitions, winning first prize at Vercelli in 1967, second prize at the Maria Canals Competition in 1967 and third prize at the Marguerite Long-Jacques Thibaud Competition in 1971. In 1970 he founded a trio with the violinist Jean-Jacques Kantorow and the cellist Philippe Muller which has performed throughout Europe and recorded trios and sonatas by Debussy, Fauré, Lekeu, Ravel, Saint-Saëns and Schubert. Rouvier's solo recordings include poised and elegant accounts of the complete piano works of Debussy and Ravel. He was appointed to the Paris Conservatoire in 1979 and has also conducted masterclasses in Canada and at the Maurice Ravel Summer Academy in Saint-Jean-de-Luz.

CHARLES TIMBRELL

Rouwijzer [Rouwizer, Rouwitzer, Rouweyzer], **François Léonard** (*b* Maastricht, 2 July 1737; *d* Maastricht, 9 Dec 1827). Dutch composer and violinist. He played first violin at the Maastricht theatre and, according to the archives of St Servatius, Maastricht, was a violinist at that church from 1758. About 1780 he composed an opera, *Laure et Pétrarque* for the Maastricht theatre. He played in the orchestra of the Liège municipal theatre for four years, returning to Maastricht in 1794. When the chapter of St Servatius was suppressed by the French authorities in 1797 Rouwijzer applied, in vain, to obtain a pension; he later died in poverty. His music is mainly Classical in style, and closer to German than to French music. Some of his works, however, already display Romantic traits.

WORKS

all MSS; in B-Lc Fonds Terry T293 unless otherwise stated

Stage: Laure et Pétrarque (op, F. d'Eglantine), Maastricht, 17 Feb 1780, music lost

Sacred (most for 4vv, insts): Mass, G, 1776 (inc.); TeD, D, 1794; 3 Alma redemptoris mater; Da pacem Domine; Dies irae (inc.); 3 Genitori genitoque; Homo quidam; Memento Domine David; 8 pss, canticles, Maastricht, municipal record office, Koorbibliothek Onze Lieve Vrouwe-kerk; Regina coeli; Salve regina; Super flumina; 11 Tantum ergo (some inc.), Maastricht, municipal record office, Koorbibliothek Onze Lieve Vrouwe-kerk

HANS VAN DIJK

Roux, Michel (*b* Angoulême, 1 Sept 1924). French baritone. He studied at Bordeaux and Paris, and in 1948 made his début at the Opéra-Comique in *Lakmé*, becoming a company principal there and at the Opéra until 1955. His début at La Scala was in 1953 as Golaud, a role with which he became closely associated and which he recorded that year under Fournet. He sang at leading theatres in France and Italy, and in 1956 made his British début as Count Almaviva at Glyndebourne, where he returned in most years up to 1970, singing Mozart, Debussy and Rossini roles including Raimbaud (*Le comte Ory*), which he recorded with the Glyndebourne company under Gui (1957). His American début was at the Chicago Lyric Opera in 1959 as Athanaël (*Thaïs*). Other engagements took him to the Vienna Staatsoper and Deutsche Oper, Berlin, mainly in French and Italian roles, which he sang with intelligent style and often vivid stage character; he later taught in Paris.

NOËL GOODWIN

Rovelli, Pietro (*b* Parma, 6 Feb 1793; *d* Bergamo, 8 Sept 1838). Italian violinist and composer. His father, Alessandro Rovelli, was a conductor at the court of Weimar, and his uncle, the violinist Giuseppe Rovelli (*b* Bergamo, 1753; *d* Parma, 12 Nov 1806), was from 1782 a *virtuoso da camera* at the court of Parma. He studied the violin first with his grandfather, Giovanni Battista Rovelli (*b* Bergamo, 1740; *d* Bergamo), first violin at S Maria Maggiore in Bergamo, then in Paris with Kreutzer. He led an intensely active life as a virtuoso. He went with his

father to Weimar in 1810, but later resumed his studies with Kreutzer. From 1815 he was first violin at the Munich court, with the titles *musicista della reale camera bavarese* and *primo virtuoso*. In 1819 he moved to Bergamo, where he taught at the Istituto Musicale, conducted at the Teatro Riccardi and was *maestro di cappella* at S Maria Maggiore, occupying the post which had been held by his grandfather. Among his numerous pupils were Bernhard Molique and Thomas Täglichsbeck. About 1820 he married the pianist Micheline Förster, daughter of Emanuel Aloys Förster.

Rovelli's playing has been described (in the *AMZ*) as 'simple, expressive, graceful, noble, in a word, classic'. The formal conception of his compositions derives directly from virtuoso intentions: sectional structure, with each section displaying a different violin technique and a different expressive character. This is especially true of his works in the popular form of the variation and potpourri. In his quartets the first violin parts are pre-eminent. His 12 caprices for solo violin op.3 were widely used as teaching pieces and were followed by another set of six, op.5.

GUIDO SALVETTI

Rovenský, Václav Karel Holan. *See* HOLAN ROVENSKÝ, VÁCLAV KAREL.

Rovescio, al. *See* AL ROVESCIO.

Rovetta, Giovanni (*b* probably Venice or the Veneto, 1595–7; *d* Venice, 23 Oct 1668). Italian instrumentalist, composer and singer. Caffi's assertion that Rovetta was a choirboy at S Marco, Venice, may be correct, but remains unconfirmed by independent documentation. Rovetta's father, Giacomo, was associated with the *cappella* of S Marco as a violinist between 1614 and 1641; the first documentary evidence of Giovanni's career also dates from 1614, when, on 7 December, he was among several instrumentalists connected with the *cappella* who were admitted to the permanent staff. He worked at S Marco for the rest of his life. In 1617 he competed unsuccessfully for the post of *capo dei concerti* there and on 2 December 1623 he was appointed a bass singer in the choir. On 22 November 1627 he succeeded Alessandro Grandi (i) as assistant *maestro di cappella* to Monteverdi, after whose death became full *maestro* on 21 February 1644, remaining in this post until his own death. He was also active elsewhere in Venice. In 1632 he was in charge of the musicians who sang at the installation of Cardinal Cornaro as Patriarch of Venice. In 1635 he acted as *maestro di musica* at the Ospedale dei Derelitti, and from 1639 served in a similar capacity at the Ospedale dei Mendicanti. In 1638 he organized music for Pentecost at the Chiesa dello Spirito Santo and supervised the music performed in S Giorgio Maggiore to celebrate the birth of Louis XIV of France; the latter event is also commemorated in his *Messa e Salmi* of 1639. Two Vespers services at which Rovetta's music was used were described in some detail by the German composer Paul Hainlein in letters of 11 October 1647 (describing Vespers at SS Giovanni e Paolo) and 13 December 1647 (Vespers at S Francesco della Vigna) (for English translations see Stevens). He was also a priest, who served first at S Fantino and later in the Congregazione di S Silvestro.

Along with Grandi, Rovetta was one of the most talented composers of the second rank to exploit the concertato style of northern Italy. Like Grandi he added to his large sacred output some volumes of continuo madrigals, but he wrote only a few monodies. His motets, of which there are four volumes as well as a number in his op.1 and in anthologies, are nearly all for the small-scale concertato textures of two to four voices and organ frequently found in the 1630s and 40s. He normally reserved larger forces, and parts for violins and occasionally lower strings, for masses and psalms, which are either ceremonial in nature (e.g. op.4) or somewhat more intimate (op.7), no doubt to be chosen in accordance with the liturgical occasion; his op.1 combines the two types, some pieces having violins, others not. Several of his motets were republished in Antwerp and two concertato psalms (one each from op.4 and op.7) were reprinted in anthologies. His psalms for double choir, opp.8 and 12, contain works for major feasts of the Roman Rite and also for the special liturgy of S Marco – the latter is marked 'all'uso di Venetia' – and are written in what is in effect the *stile antico*; this style is found too in a number of manuscript works (in *I-Vnm* and *D-Mbs*), including a Passion setting with the turba part in simple homophony.

Rovetta worked in the shadow of his superior Monteverdi, whose pupil he probably was, and this inevitably shows in his style, but sometimes a more distinctive voice appears. The *Salve regina* of op.1 is as fine a tenor duet as any written in the mid-1620s, with its wayward modulations, declamatory dialogue, brilliant counterpoint and striking changes of mood; 21 years later, in op.10, he published an equally fine setting of this text in which a solo alto is richly accompanied by five-part strings. Solo melody plays a larger part in Rovetta's small-scale motets than in earlier ones by other composers, as also does triple time, in which his music tended to become like the arioso of contemporary opera and sometimes includes quite brilliant melismas. He was also interested in structural coherence, even in small motets, as can be seen in his refrain forms with carefully defined sections, e.g. *ABACD*, *ABCBD* or *ABACAD*.

Of Rovetta's three masses, the ceremonial one of op.4 is the most impressive. It lacks Sanctus and Agnus Dei (a Venetian practice inspired by liturgical propriety); the Kyrie, Gloria and Credo are scored for five, six and seven voices respectively, with violins, the longer movements being tightly knit yet varied, with sections for soloists in triple time or in *stile antico* and with dramatic tuttis. Like Monteverdi, Rovetta in his psalm settings gradually introduced formal designs to give overall unity. Those of 1626 have no organization, consisting rather of a succession of distinct ideas, adroitly worked out in counterpoint, with some dramatic word-painting. By 1639 (op.4) various subtle rondo, ternary and chaconne forms had appeared (cf Monteverdi's *Selva morale*, 1640). The same devices are present in op.7, which contains a psalm in the then unusual key of A major. It is particularly in such smaller pieces that Rovetta demonstrates a charm, in both vocal melodies and violin writing, independent of Monteverdi's influence.

Rovetta's first book of madrigals resembles the structure of Monteverdi's seventh book: it opens with a large-scale six-voice madrigal with violins, continues with a series of

madrigals for two, three and four voices, and concludes with two strophic pieces, a lively dialogue setting, *La gelosia placata* (ed. in Whenham, 1982), and a solo lament, *Le lagrime d'Erminia*. His second book of madrigals contains much of his finest music; his third book, collected for publication by his nephew, contains rather shorter settings. One of the elements which distinguishes Rovetta's madrigals from Monteverdi's is the lyrical impulse that underlies much of his writing: he uses passages of aria-like writing in both duple and triple metre to build sometimes quite extended musical structures in his madrigalian settings. Rovetta's only known opera, *Ercole in Lidia*, is lost, but its first performance was attended by John Evelyn, who described the event in his diary. It was originally intended that Rovetta should contribute to a second opera, *Argiope* (1649), but the published libretto makes it clear that he withdrew from the project. He also included some lively instrumental pieces in his op.1.

WORKS

published in Venice except some anthologies, unless otherwise stated

SACRED

Salmi concertati, 5–6vv, et altri con violini, con motetti, 2–3vv, et alcune canzoni per sonar, 3–4vv, bc, op.1 (1626)

Motetti concertati, 2–5vv, con le Litanie della madonna, et una messa concertata a voci pari, op.3 (1635); duets repr. as Bicinia sacra (Antwerp, 1648); remainder repr. as Gemma musicalis (Antwerp, 1649)

Messa e salmi concertati, 5–8vv, 2 vn, op.4 (1639)

Motetti concertati, 2–3vv, con le Letanie della madonna, 4vv, op.5 (1639, 2/(Antwerp) 1640)

JEROME ROCHE/JOHN WHENHAM

Rovetta [Rovettino], **Giovanni Battista.** *See* VOLPE, GIOVANNI BATTISTA.

Rovigo, Francesco [Franceschino] (*b* 1541/42; *d* Mantua, 7 Oct 1597). Italian organist and composer. He was sent to Venice in 1570 to study with Merulo and others. In 1573, his hymns, now lost, were sung in the ducal chapel of S Barbara in Mantua; this is the first record of him as a composer. His name first appears on the salary lists of the Mantuan court in 1577, and on 1 May 1582 he was appointed court chapel organist to Archduke Carl II in Graz, where his duties included the musical education of the archduke's children. His monthly salary of 25 florins was a primary reason for his remaining at Graz, in spite of efforts to recall him to Mantua. He was evidently appreciated, since Wilhelm V of Bavaria attempted unsuccessfully to obtain his transfer to his own court. After the archduke's death in 1590, Rovigo returned to Mantua to serve as organist in S Barbara, and in 1591 he was commissioned, together with Wert, to compose music for a projected performance of Guarini's *Il pastor fido*.

Most of Rovigo's music is liturgical. His secular vocal music was evidently popular, for his madrigals were included in several famous anthologies. His *Missa dominicalis* was published together with other masses on the same Mantuan chants by Palestrina, Wert, Gastoldi, Contino and Alessandro Striggio (i). Zacconi praised him as a composer and organist, and Monteverdi referred to him twice in his letters, once indicating Rovigo's favoured position at court (28 November 1601), and later (2 December 1608) naming him as a highly paid musician.

WORKS

SACRED VOCAL

Missa dominicalis, 5vv, 1592^1, ed. in DTÖ, xc (1954) and in S. Cisilino, *Sei missae dominicales* (Padua, 1981)

Rowaldt, Johann Jacob (*b* 25 Aug 1718; *d* Marienburg [now Malbork, Poland], 14 Oct 1775). German composer and organist. At the age of 20 he began to work as an instrumentalist and organist at Marienburg and was later appointed organist at the Georgenkirche there, a post which he held until his death. He was known chiefly for a complete cycle of church cantatas for the liturgical year with texts by S.E. Fromm (1714–66), minister at the Georgenkirche. Rowaldt published the words as *Geistliche Cantaten auf die Evangelia aller Sonntage und der vornehmsten Feste des ganzen Jahres gerichtet* (Danzig, 1743). As he stressed in the preface, the recitatives consisted of unrhymed verse, which was highly unusual at the time but was later advocated by J.A. Hiller in his *Beyträge zur wahren Kirchenmusik* (Leipzig, 2/1791). Riemann commended the cantatas for their beautiful arias with orchestral accompaniment and obbligato instruments; the manuscripts were in the library of the Georgenkirche, but appear now to be lost, as also is an aria (dated 1745) for Communion on Good Friday.

DOROTHEA SCHRÖDER

Rowe, Walter (*b* England, 1584 or 1585; *d* Berlin, April or May 1671). English composer and viol player, active in Germany. From his burial record (Berlin Domkirche, 3 May 1671; see Sachs), in which his age was given as 86, his approximate year of birth can be established. His English origins remain obscure, unless he is the Walter Rew – a common alternative English spelling of the surname – baptised at St Botolph without Aldgate, London, on 2 September 1582, whose father bore the same forename, Walter. Moser's suggestion that he was a pupil of Alfonso Ferrabosco (ii) appears to be without foundation, yet it is likely that Rowe had attained a high standard as a solo performer on the viol before leaving England. (There is similarly no evidence for Meyer's assertion that Rowe fled England as a political or religious refugee.) On 24 June 1614 he was appointed as viol player in the *Kapelle* of the Elector of Brandenburg, Johann Sigismund. In August of the same year he was in Hamburg, where he entered a courante in tablature for solo viol into the album of a visiting nobleman, David von Mandelsloh (formerly in *D-LÜh*, surviving in edition by W.L. von Lütgendorff, Hamburg, 1893, also transcribed in Stiehl). Rowe dedicates the piece to 'meinen günstigenn guttern freunde und Juncker david Vonn mandelslaw', which suggests that the acquaintance was more than a passing one; possibly Rowe had been in Mandelsloh's service at some earlier time. Whether Rowe was already married at the time he entered Brandenburg service is not clear; his wife Marie (bur. 2 Jan 1618) gave birth to their last child, a daughter, in December 1616.

Rowe's high reputation on his appointment is evidenced by the high salary of 400 thalers at which he was appointed. By 1622 this had increased to 900 thalers, but owing to the economic crisis brought on by the Thirty Years War, his official salary was reduced to 300 thalers by 1647. He had also been heavily involved with teaching the viol for some years. During the 1620s a number of pupils from outside Brandenburg began to come to study with Rowe at the expense of their employers, including Michael Rode from Güstrow (1626), S.T. Staden from the city of Nuremberg (1627), and Alexander Leverentz from Copenhagen (1633). Later this may have become a principal means of supplementing his otherwise reduced income. Most of his later German pupils (from the early 1640s onwards), including Zacharias Madra, Johann Gohl, Matthaüs Strebelow, Johann Peter Gärtner, Georg Püsternick and Frans Bärenfänger, were trained, usually at the Elector's expense, as viol players for the *Kapelle*. Rowe was also music master to the Electoral Princesses Louise Charlotte (1617–76; from 1645 Duchess of Courland), and Hedwig Sophia (1623–83; from 1649 Duchess of Hesse-Cassel). A music-book compiled for the former from 1632 (*RUS-SPan* MS Q203) contains explanatory diagrams, vocal exercises and a number of songs in Rowe's hand, including four of his own as well as examples by Campion ('Though you are young', with an embellished version, presumably by Rowe), Heinrich Albert, Hammerschmidt, Schein and others. Albert's *Arien* of 1645 are dedicated to Rowe.

Rowe's principal fame was as a performer on the solo viol, played in the chordal 'lyra' style (often called 'viola bastarda' in Germany) which had been developed in his native country; he must also have been an experienced ensemble player. An inventory drawn up by him in 1667 for the 'Great' Elector, Friedrich Wilhelm, lists two chests ('Stimwerck') of viols owned by the court.

He was also a pioneer solo performer on the modified viol called the baryton, and he seems to have played a special form of the instrument with an extra 'rank' of chromatically-tuned strings on the instrument's belly (which were plucked by the player's right-hand fingers in alternation to normal bowing) as well as the longer 'bass' strings behind the neck (which were plucked by the player's left thumb in self-accompaniment). In 1641 the Cornishman Peter Mundy met Rowe in Königsberg and described his baryton, finding it 'a very costly faire Instrumentt, and sweet solemne Musicke'. Rowe's reputation on this instrument reached beyond Germany; shortly before Elector Friedrich Wilhelm ('der Grosse') married the daughter of the *Stadhouder* of the United Provinces at The Hague in 1646, the latter's secretary, Constantijn Huygens, discussed the Elector's musicians in a letter to Mersenne, mentioning a player of the viol said to perform wonders 'on a viol fitted with brass strings behind the neck and elsewhere'.

Just three pieces for such a baryton survive, without composer's name, in a single source, a tablature manuscript at Kassel (*D-Kl* 2° MS Mus.61[L1];) copied *c*1653–72 probably from an earlier exemplar. Rowe's pupil, Princess Hedwig Sophia, married the Landgrave of Hessen-Cassel in 1649, and the likelihood of these pieces being compositions by Rowe is increased by the presence of two others in the same manuscript signed 'W: R:' for the normal two-ranked baryton (one being an arrangement of a well-known allemande variously attributed to the French lutenists Pinel and Vincent).

Rowe's son, also Walter (*b* ?Berlin, before 1616; bur. Berlin, 29 Aug 1672) was in Brandenburg service as a viol player (appointed 4 October 1638 at a salary of 150 thalers); it seems likely that he spent some time at the court of Mecklenburg-Güstrow around 1657.

TIM CRAWFORD

Rowicki, Witold (*b* Taganrog, 26 Feb 1914; *d* Washington DC, 1 Oct 1989). Polish conductor, violinist and composer. He studied the violin under Malawski and composition under Piotrowski and Wallek-Walewski at the Kraków Conservatory, graduating in 1938 with a diploma in violin playing. He continued further private training in composition and conducting, having made his conducting début in 1933 while still a student; but the early part of his career was as a violinist and violin teacher at Kraków. After the war he became a conductor and music organizer, and was a key figure in rebuilding Polish musical life by forming the Polish RSO in Katowice in 1945, and re-forming the National PO in Warsaw in 1950. He trained both orchestras to a high level of proficiency, and established the high reputation of the National PO, which he conducted on international tours and of which he became artistic director and chief conductor. He did much to bring about the rebuilding of Warsaw's Philharmonic concert hall, and inaugurated the new hall in 1955. Rowicki served as music director of the Kraków PO from 1957 to 1959, and from 1965 to 1970 was artistic director of the Wielki Theatre in Warsaw. His last major post was that of conductor of the Bamberg SO (1983–5). He also toured widely as a guest conductor and enjoyed a reputation for musicianly elegance and polished style in performance; his experience as a player gave him a spontaneous rapport with orchestras. He had a wide repertory, including the standard repertory in which he was invariably well received. (He recorded a notable cycle of Dvořák symphonies in the 1960s.) However, he had a special commitment to the new music of his own country. Szymanowski fared particularly well in his hands, as did Lutosławski, who dedicated his 1954 Concerto for Orchestra to him. In 1961 he gave the première of that composer's *Jeux venitiens*. On three occasions Rowicki won the state prize for his services to Polish musical life. He was also the composer of much symphonic and chamber music, and of songs with mainly nationalist associations.

CHARLES BARBER

Rowlard (*fl* *c*1400). English composer. No convincing biographical identifications have been proposed. His name is attached to a three-part Gloria in the Old Hall Manuscript (ed. in CMM, xlvi, 1969–73, no.29) which also appears in the Fountains Manuscript (*GB-Lbl* Add.40011B). It has a fast-moving texted upper part and two textless supporting parts. It may have formed a pair with a setting of which the tenor and contratenor survive in a fragment in Stratford (*STb* Willoughby de Broke 1744, larger leaf) whose verso contains a Credo by 'Picart' (*see* PICARD). The Stratford and Old Hall compositions share the same sequence of time signatures, nearly identical ranges and general stylistic affinity.

For bibliography *see* OLD HALL MANUSCRIPT.

MARGARET BENT

Rowley, Alec (*b* London, 13 March 1892; *d* Weybridge, 12 Jan 1958). English composer, organist and pianist. In 1908 he entered the RAM and studied composition with Corder, organ with H.W. Richards and piano with Edward Morton; he won the Gooch and Smart scholarships and the Mortimer and Prescott prizes for composition. He became an FRCO in 1914, winning the Lafontaine Prize. He was organist at St John's, Richmond (1912–21), and St Alban's, Teddington (1921–32). In 1919 he was appointed professor at Trinity College of

Music. His mime ballet, *The Princess who Lost a Tune*, was awarded publication by the Carnegie Trust in 1926 and the music was broadcast in 1928 and 1930. In 1934 he was elected a FRAM.

He was a many-faceted musician, who made a valuable contribution to music education through his dedicated teaching. Although many of his compositions are miniatures, he also achieved recognition with several large-scale works performed at Promenade Concerts and the Cheltenham Festival. As a performer, he was well known for the series of piano duet broadcasts he made with Edgar Moy (1933–43). He was musical adviser and reader to six publishing houses. In 1958 the Alec Rowley Memorial Prize, donated by Sir Harold Kenyon, was established at Trinity College of Music; the Alec Rowley Pianoforte Recital Prize, given by Professor Alfred Kitchin, was established in 1970; and an Alec Rowley Music Performance Scholarship is being established by Beryl Kington at the University of East Anglia.

BERYL KINGTON

Rowsome, Leo (*b* Dublin, 5 April 1903; *d* Riverstown, Co. Sligo, 20 Sept 1970). Irish uilleann piper and pipe maker. Descended from a line of Wexford uilleann pipers and pipe makers, Rowsome epitomized the instrument nationally during a period of decline, and was influential in ensuring its survival and rise to present popularity. He had early successes in competitions of the Gaelic League, and regular appearances in London concerts of the League led to the making of many 78 r.p.m. recordings there from 1925. He also played on early Irish radio from 1926, and on early BBC television, and all his life performed widely throughout Ireland. As a teacher in the Dublin College of Music for 50 years, and as a member of clubs such as the Dublin Pipers Club and Na Píobairí Uilleann (the Society of Uilleann Pipers), he passed on pipe music, techniques and lore to generations of younger pipers, orally and in manuscript. In 1936 his *Tutor for the Uileann Pipes* was published in Dublin. As a maker of uilleann pipes and reeds, and a repairer, Rowsome supplied pipers world-wide for decades.

NICHOLAS CAROLAN

Roxburgh, Edwin (*b* Liverpool, 6 Nov 1937). English composer, teacher, oboist and conductor. He studied at the RCM (1957–60) with Howells (composition) and Macdonagh (oboe). Further composition studies abroad followed with Boulanger and Dallapiccola before he completed his music education at St John's College, Cambridge (1961–3). He was principal oboe of Sadler's Wells Opera (1964–7), and then gained prominence as a soloist, particularly of contemporary repertory, giving many notable premières including the first British performance of Berio's *Sequenza VII*. With Leon Goossens he was co-author of *The Oboe* (1977). Since 1968 he has taught composition at the RCM, where he established and became director of its department of 20th-century performance studies in 1971. As a conductor he has been particularly associated with the 20th Century Ensemble of London, which he founded in 1969. He was awarded the Cobbett Medal for services to chamber music in 1970.

A sustained interest in colour and texture is evident in Roxburgh's music, generally also in combination with rigorous pitch organization, as in his BBC Proms commission *Montage* (1977), which also incorporates unconventional conducting techniques to achieve the work's kaleidoscopic nature. The mosaic, single-movement form of *Montage* characterizes many of Roxburgh's subsequent pieces, for example, the Clarinet Concerto (1996), which is a complex structure of varied statements and episodes in which the elements derive from small organic fragments. In the large-scale oratorio *The Rock* (1979), the choral vocabulary includes speech and notes of approximate pitch which are exploited to brilliant sonorous effect.

Roxburgh's contribution to the woodwind repertory is significant; here he has frequently explored the compositional possibilities of multiphonics, as in *Voyager* (1989). He has also employed electronics, with a solo oboe in *At the Still Point of the Turning World* (1978), as well as in the orchestral tone poem *Saturn* (1982). Other representative works include the Sinfonia concertante (1990) and the characterful and witty entertainment *How Pleasant to Know Mr Lear* (1971).

ANDREW BURN

Roxis, Annibal de. *See* ROSSI, ANNIBALE DEI.

Roxy Music. English rock group. Its original members were Bryan Ferry (*b* Washington, Co. Durham, 26 Sept 1945; vocals and keyboard), BRIAN ENO (*b* Woodbridge, 15 May 1948; sound synthesis), Phil Manzanera (Philip Targett Adams; *b* London, 31 Jan 1951; electric guitar), Andy Mackay (*b* England, 23 July 1946; saxophone and woodwind) and Paul Thompson (*b* Jarrow, Co. Durham, 13 May 1951; drums). The band also used a number of bass guitarists, and Richard Jobson (violin) replaced Eno in 1973. Their first album, *Roxy Music* (Isl., 1972), was perhaps the most impressive début album of the 1970s: Ferry's poised and artful lyrics, sung with his mannered and contrived vibrato, were set against a remarkable backdrop comprising rock and ballad styles, and futuristic synthesizer-based music. Along with David Bowie, the group defined 'cool' at this time: Ferry's lounge-lizard air of sophistication and his penchant for ransacking salient themes of popular culture, for both the music and its packaging, made him one of the most important rock icons of the day. The band produced a succession of intelligent singles, such as *Virginia Plain* (1972), *Pyjamarama* (1973) and the disco-influenced *Love is the Drug* (1975), while album tracks such as *In Every Dream Home a Heartache* (from *For your Pleasure*, Isl., 1973) and *Mother of Pearl* (from *Stranded*, Isl., 1973) commented brilliantly on the artificiality of 1970s popular culture. They were also excellent melodists: *A Song for Europe* (1973) is a grandiloquent homage to chanson, while *Street Life* (1973) and *All I want is you* (1974) are energized rock numbers.

After Eno left, the band turned towards the pop mainstream, but there was initially no dip in quality. Ferry's solo career also flourished with *These Foolish Things* (Isl., 1973), a collection of cover versions. The band split in 1976, but Ferry's subsequent work was undistinguished, and Roxy Music re-formed for three fine pop albums, *Manifesto* (Pol., 1979; including their hit single *Dance Away*), *Flesh and Blood* (Pol., 1980) and the wistful, intricate *Avalon* (EG, 1982). Roxy Music disbanded for the second time in 1983, and later recordings by Ferry, including *Boys And Girls* (EG, 1985) and *Mamouna* (Virgin, 1994), have sounded somewhat contrived and overly ornate, content merely to rework *Avalon's* ambient-sounding sophisticated pop.

DAVID BUCKLEY

Roy [Le Roy, Le Roi, Roi, Lo Roi, Lo Roy], **Bartolomeo** (*b* Burgundy, *c*1530; *d* Naples, 2 Feb 1599). French composer and violinist, active in Italy. In 1570 he succeeded Annibale Zoilo as *maestro di cappella* of S Giovanni in Laterano, Rome, a position he held until 1572. His name appears again in the Roman archives of 1574, but his post is not specified. In September 1579 he succeeded Monte as *maestro di cappella* of the Collegio Inglese, Rome, a post he apparently left in July 1581 to enter the service of Don Fabrizio Gesualdo as a member of the Camerata at Gesualdo. He was appointed *maestro di cappella* to the viceroy of Naples in 1583 and presumably remained there until his death; he introduced the use of woodwind and string instruments into the liturgy there. Roy seems to have enjoyed considerable esteem as a musician and composer in his later years; his music appeared in numerous anthologies and the *Missa 'Panis quem ego dabo'* was published with Palestrina's *Missa 'Confitebor tibi'* in 1585. Like Palestrina and other Roman composers, he was a member of the Compagnia dei Musici di Roma, the first confraternity in the city open only to professional musicians. He taught Francesco Soriano, and his recommendation secured for Giovanni de Macque the position of first organist at the Annunziata, Naples.

WILLIAM JOHN SUMMERS

Roy, Harry (*b* London, 12 Jan 1900; *d* London, 1 Feb 1971). English bandleader, clarinettist, singer and composer. From 1919 he organized dance bands with his brother Syd, including Syd Roy's Lyricals; they performed in London at Oddenino's, Rector's, the Hammersmith Palais and the Café de Paris, and at Rector's in Paris. In 1928 the brothers toured South Africa and Australia (1929), then returned to England to play in variety theatres before touring Germany. In 1931 Harry formed his own band and, after touring (1933), held residencies at the Café Anglais and the Mayfair Hotel in London. He continued to tour extensively in theatres until 1939 and throughout World War II but after 1945 never regained his former status in London's clubland. Roy was essentially a show-band leader, an energetic front man, a light, sometimes comic, singer, and a clarinettist in the style of Ted Lewis. Although hardly a jazz musician himself he employed as sidemen a number of players who later became prominent in jazz. His signature tune, *Bugle Call Rag* (1933), set the style for his own compositions such as *Hurricane Harry* (1933) and *The Roy Rag* (1934). Another composition, *Sarawaki* (1938), was dedicated to his first wife Elizabeth Brooke (known as Princess Pearl), the daughter of the Rajah of Sarawak.

KEN RATTENBURY/ALYN SHIPTON

Roy, Pierre-Charles (*b* Paris, 1683; *d* Paris, 23 Oct 1764). French librettist. At some point between 1701 and 1703 he obtained a position as 'conseiller' at the Chatelet, but he rarely practised this profession and turned to writing instead. His first opera libretto, *Philomèle*, was first performed at the Paris Opéra on 20 October 1705, with music by Lacoste. Between this date and 1718 he provided texts for seven *tragédies en musique*, including some of the best of the century: *Bradamante* (Lacoste, 1707); *Callirhoë* (A.C. Destouches, 1712); *Ariane* (Mouret, 1717); and *Sémiramis* (Destouches, 1718).

Apart from the story of Theseus and Ariadne, Roy generally eschewed mythological subjects, drawing instead on Euripides (*Créüse l'Athénienne*, Lacoste, 1712), Ovid (*Philomèle*), Ariosto (*Bradamante*) and Pausanias (*Callirhoë*; *Hippodamie*, Campra, 1708); the tragic tale of the Queen of Babylon forms the subject of *Sémiramis*. His tragedies are less *galant*, less sentimental and more tragic than Philippe Quinault's; they are generally well constructed and have more dramatic force than Danchet's. Some exploit the darker side of the human psyche with an emphasis on abnormal behaviour (e.g. incest in *Philomèe* and *Sémiramis*). Divertissements are often skilfully linked to the dramatic action and contain original verse structures that mix three-, four- and five-syllable lines.

In the prefaces to his librettos Roy revealed a thorough knowledge of classical literature and history, and justified the alterations made to conform with the dramatic conventions of the French lyric stage. The dramatic integrity of some of his tragic librettos would have ideally suited Rameau, but in the battle between Lullistes and Ramistes, Roy sided with conservatives, mounting satirical attacks against La Pouplinière (Rameau's protector) and, in 1749, against (S.)-L. de Cahusac (Rameau's librettist for *Naïs* and *Zoroastre*); Rameau himself was the target of a vituperative allegory.

By 1729 Roy had won prizes from the Académie des Jeux Floreaux and the Académie Française and was elected to the Académie des Inscriptions et Belles Lettres. After his attempts to become a member of the Académie Française were repeatedly rejected, he turned to writing clandestine satires and epigrams savagely attacking the academy. The end result of Roy's vitriolic attacks was to harden opposition against any further consideration of his election to the academy. But he did not lack support from the aristocracy. The Duchess of Maine invited him to write for the Grandes Nuits de Sceaux in 1714 and 1715; the Duke of Luynes hailed him as 'the most famous of our lyric poets'; he was appointed a Chevalier of the Order of St Michel (1742), the first man of letters to be so honoured; and Mme de Pompadour had his works performed at her Théâtre des Petits Cabinets.

Roy never returned to *tragédie en musique* after 1718. Instead he provided librettos for several ballets that were performed at the Paris Opéra. The first version of *Les élémens* (Destouches and M.-R. de Lalande, 1721) is a synthesis between court ballet and opera; the prologue and four entrées ('L'air', 'L'eau', 'Le feu', 'La terre') draw on Ovid's *Metamorphoses* and Virgil's *Eclogues* and *Aeneid*. Roy's verses were much admired: Sabatier wrote: 'Everyone knows the opening of the prologue by heart. Never did the lyric muse deploy verses of such majesty, richness, harmony' (*Les trois siècles*, 1772). Roy introduced comedy into his *ballet-héroïque Les stratagèmes de l'Amour* (written in 1726 to celebrate the marriage of Louis XV), in spite of the controversy engendered by the comic entrées in earlier *opéra-ballets* (*Les fêtes vénitiennes*, 1710, and *Les fêtes de Thalie*, 1714). In his *Avertissement* he defended his audacity as being within the bounds of good taste: 'The Public has decided that if this stage admits the Comic, it may only be a noble Comedy and must bear the character of Antiquity'.

Roy's polemical 'Lettre sur l'Opéra' (1749), reflecting his conservative point of view, contains his oft-quoted definition of *opéra-ballet*: 'This kind of Drama that assembles three or four [plots] in the same cadre, each dealt with in a single act . . . pleases by its variety and sympathizes with French impatience'.

JAMES R. ANTHONY

Royal, Ted [Dewar, Ted Royal] (*b* Skedee, OK, 6 Sept 1904; *d* ?Houston, 27 March 1981). American arranger. He attended the University of Kansas and, in the late 1920s, studied the clarinet, theory and counterpoint in Houston. His commercial work began in 1934 with arrangements for the bandleader Wayne King; in succeeding years he also wrote for Paul Whiteman, Jimmy Dorsey and Harry James. Royal played the clarinet and the

saxophone with several dance bands in Chicago and studied (1939–42) with Joseph Schillinger in New York, during which period he also arranged for radio. Remembered principally as a theatre orchestrator, Royal was working on Broadway by 1939. His big-band background led to arranging for dozens of lively, fun-loving shows of the following two decades, including *Dubarry Was a Lady* (1939), *Panama Hattie* (1940), *Mexican Hayride* and *On the Town* (1944), *Where's Charley* (1948), *Guys and Dolls* (1950), *Paint Your Wagon* (1951) and *Mr. Wonderful* (1956). Excepting *Bloomer Girl* (1944) and *Brigadoon* (1947), Royal contributed less often to operetta-flavoured productions, and took no part in preparing the many orchestral 'symphonic-picture' Broadway medleys published in the 1940s and 50s, principally by Chappell.

Royal began arranging for television in the early 1950s and also contributed to a few feature films. He was only occasionally active as a composer, producing some concert-band works that received limited circulation. Royal proudly asserted, however, that 'arranging and orchestrating for musical shows have become a highly specialized routine, and the men who do these jobs are among the best musicians of our time'.

Royal Military School of Music. London conservatory founded in 1857 and known as the Military School of Music until 1865. *See* LONDON (i), §VIII, 3(ii).

Royal Musical Association. A society founded in London in 1874, as the Musical Association, 'for the investigation and discussion of subjects connected with the art, science and history of music'. After private canvassing of opinion by John Stainer, 22 leading musicians were invited to a preliminary meeting, including William Pole, Sedley Taylor, Grove, Macfarren, Hullah and William Chappell. An inaugural general meeting took place on 29 May in the board room of the South Kensington Museum. In July, Charles Salaman became secretary and in August Frederick Arthur Gore Ouseley was elected president. Of the 70 or more members enrolled by mid-1874, 17 had been involved 22 years earlier with the MUSICAL INSTITUTE OF LONDON, whose activities were similar to those of the association.

The first season began on 2 November 1874 with a paper read at the Beethoven Rooms in Harley Street, where the association continued to meet until 1891. London meetings have generally been held at one of the Royal Colleges of music or at King's College, London. Papers read to the association in its early years tended towards the acoustical and theoretical aspects of music, but by the 1890s more attention was paid to history and criticism. (The change can be seen in the *Classified List of Contents* to vols.i-xc of the *Proceedings*, compiled by Alan Smith, and published in 1966: it supersedes the *Index to Papers 1874 to 1941* published in 1948.) In 1987 the *Proceedings* were succeeded by the *Journal of the Royal Musical Association*, published biennially. As early as 1886 the association resolved to invite distinguished foreign scholars to become honorary members. From 1899 to 1914 it represented the International Musical Society in Britain.

For many years, meetings were held for the reading and discussion of one paper offered by the author. In 1965, on the initiative of the president, Anthony Lewis, the first weekend conference was held in London. These conferences became annual events, and with the rapid development of music departments in British universities, the annual conference is now often held outside London. During the 1980s single-paper meetings were abandoned in favour of focused study-days, in London or elsewhere. From the 1970s, Northern (predominantly Scottish), Midlands, and North Midlands chapters have been established (not all have continued beyond the 1990s). The Irish chapter meets annually, alternately in Northern Ireland and the Republic of Ireland. A Research Students' Conference is held annually. The Association has taken a lead in collaborating with other British societies and

groups to mount large triennial conferences, and in 1997 it hosted the International Musicological Society congress at the Royal College of Music and Imperial College.

In 1904 the association was incorporated under the Companies' Acts, defining the legal position and responsibilities of the council. Membership then stood at about 220, a figure which remained constant for the next 40 years or so. In 1944 the status of the association was enhanced when the president, E.H. Fellowes, received a command from the king that it should 'henceforth be known as the Royal Musical Association'. Fellowes also initiated an effective drive for increased membership, so that by the mid 1950s it reached over 300. Several factors led to further growth: the expansion of music departments in British universities; the creation of a new category of student membership, and the increase in institutional and, from 1999, departmental membership. By the mid-1970s the total had risen to nearly 800; after some falling off, associated with the foundation of parallel organisations such as the Society for Music Analysis and with Independent 'period' conferences, membership returned in the late 1990s to a similar figure.

From its inception, the association published its proceedings annually. Until the 83rd session (1956–7) *Proceedings of the Royal Musical Association* included, besides the texts of papers, a transcript or summary of subsequent discussions. *Proceedings* was eventually unable to accommodate all papers read to the Association, and in 1987, after 111 years, it was superseded by the *Journal of the Royal Musical Association*, a refereed periodical published bi-annually. In rewriting its Memorandum of agreement in 1948, the association proposed the publication of 'an authoritative national collection of the classics of British music'. With financial support from the Arts Council of Great Britain, the first volume of *Musica Britannica* was published in 1951. Originally only ten volumes were expected; by 2000, 75 had been published. In 1976, *Musica Britannica* was reconstituted as an independent charitable trust.

The *Royal Musical Association Research Chronicle* first appeared in 1961 and is published annually. It contains mostly (in the words of its first editor, Thurston Dart) 'musicological raw material – lists, indexes, catalogues, calendars, extracts from newspapers, new fragments of biographical information, and so on'. It was originally issued with support from the Fellowes Memorial Fund and the Vaughan Williams Trust, and subsequently received support from the British Academy. The RMA established a series of monographs thanks to the generous bequest of royalties from the estate of Thurston Dart. The most recent major benefaction to the Association has established, from 1999, the Peter Le Huray memorial lectures.

A special publication marked the Beethoven bicentenary in 1970, when the RMA co-operated with the trustees of the British Museum to publish a facsimile of the 'Kafka' sketchbook. To mark its own centenary, the RMA published an enlarged volume of its *Proceedings* including papers read at a conference on 8–9 November 1974, and, in co-operation with the Scolar Press, a facsimile of the 'Tenbury' score of Handel's *Messiah*, a manuscript in the hand of J.C. Smith the elder, containing numerous markings and several recomposed versions by the composer. In 1991 the Mozart bicentenary was marked by an international conference on London's South Bank and was followed by a publication of papers by Oxford University Press, edited by the president, Stanley Sadie.

Royal Society for the History of Netherlands Music. *See* KONINKLIJKE VERENIGING VOOR NEDERLANDSE MUZIEKGESCHIEDENIS.

Royal Society of Musicians of Great Britain. British society for the maintenance of aged and infirm musicians, their widows and orphans. It was founded in 1738, as the Society of Musicians, by three celebrated musicians: the violinist Festing, the flautist Weidemann and the bassoonist Vincent. Members included Arne, Boyce, Carey, Greene, Handel and Pepusch. In 1739, with 226 members, the society drew up a Deed of Trust enrolled in the Chancery Court, which laid down rules for membership and for the distribution of funds. Money was raised by concerts, notably of Handel's works: *Alexander's Feast* (1739) was followed by *Acis and Galatea* (1740), *Parnasso in festa* (1741) and the first London performance of *Messiah* (23 March 1743). Handel left £1000 to the society, and the Handel Commemoration of 1784 (*see* LONDON, §V, 3) raised £6000. In 1790 a royal charter was granted by George III, giving the society its present title, and its management was entrusted to elected governors and a 'court of assistants' (which included Burney). In 1792 Haydn wrote a march for the society's festival, as did Weber for the 1826 dinner. In 1824 the young Liszt played to the society, and Mendelssohn did so in 1829. Notable members in the 19th century included Cipriani Potter, Vincent Novello, Ebenezer Prout, Henry Bishop and William Sterndale Bennett. Women members were admitted from 1866, when the society united with the Royal Society of Female Musicians (founded 1839). In 1909 a Samaritan Fund was set up to aid non-members. After the society received its second royal charter in 1987, its laws were amended to make its assistance available to all musicians established in Britain.

□

Royan Festival. Annual festival, formally called Festival International d'Art Contemporain, held from 1964 to 1977 in Royan, a seaside resort in the Charente-Maritime département of France. The festival, which took place during the week before Easter, was devoted chiefly to contemporary music (the first French festival to have this focus), but also included theatre, dance, cinema and the visual arts. From 1967 to 1971 a piano competition, the Concours Olivier Messiaen, was part of the festival. A flute competition took its place in 1972; the contest then moved to the Rencontres d'Art Contemporain at La Rochelle.

Programmes at Royan reflected the avant-garde concerns of the 1960s, with homages to the Second Viennese School, particularly Webern, and to Messiaen. Xenakis's *Terretektôrh* (1966), *Nuits* (1968), *Nomos gamma* (1969) and *Synaphaï* (1971) had their premières at Royan, and new works by Boulez, Berio, Ligeti, Stockhausen and Penderecki were performed. The programmes focussed on Poland in 1966, Japan in 1967, Italy in 1969 (with the European première of the first version of Berio's Sinfonia), and eastern Europe in 1971 (with French premières of Sofiya Gubaydulina's music). In 1977 Górecki's Third Symphony had its première there.

The festival was founded by Bernard Gachet. Claude Samuel was artistic director from 1965 to 1972, with a Comité d'Honneur (Messiaen, Auric, Maurice Le Roux and Philippot); the Belgian musicologist Harry Halbreich succeeded Samuel. The festival was supported by French radio, with broadcasts and appearances by its orchestras. An account of the festival's history is given in F. Franch: *Le Festival de Royan* (thesis, Le Mirail, U. of Toulouse, 1993).

CLAUDE SAMUEL

Royer, Joseph-Nicolas-Pancrace (*b* Turin, *c*1705; *d* Paris, 11 Jan 1755). French composer, harpsichordist, organist and administrator. His father was sent by Louis XIV to be the intendant of gardens and fountains at the court of Savoy; the family returned to Paris when Royer was still an infant, although he did not become naturalized until July 1751, less than four years before his death. For 25 years he was a central figure in Parisian musical life, with responsibilities at court, the Opéra and the Concert Spirituel. He acquired a great reputation for playing the harpsichord and organ (Laugier) and as a composer, was a brilliant and influential contemporary of Rameau through much of the latter's career. His first operatic essay was to contribute music to an *opéra comique* at the 1725 Foire St Laurent (*Le fâcheux veuvage*). His first term as *maître de musique* at the Paris Opéra (1730–33) saw the premières of his own *Pyrrhus*, with sets by Giovanni Niccolò Servandoni (1730), and Rameau's *Hippolyte et Aricie* (1733). Important court appointments included *maître de musique des enfants de France*, jointly held with J.-B. Matho, and *maître de musique de la chambre du roi*. At the Opéra his principal successes were *Zaïde, reine de Grenade* (1739) and *Le pouvoir de l'Amour* (1743). In 1744 he began work on Voltaire's libretto *Pandore*, destined for the dauphin's wedding in 1745 but set aside in favour of a revival of *Zaïde*. The Duke of Luynes recounted the circumstances of the composition of the ode *La fortune* in 1746. The dauphin, just turned 17 but already possessing a good baritone voice as well as considerable talent, suggested to Royer that he should set the text of J.-B. Rousseau. Although the verses were described as 'not being made to be sung', Royer turned out a 45-minute divertissement, which the prince sang in his sisters' apartments, surprising the courtiers, since he had only just begun music lessons. The work was repeated at court and at the Concert Spirituel by the much-admired baritone Benoit.

From 1748 until his death, Royer's energies were mainly directed to the enhancement of standards and repertory of the Concert Spirituel; included were his own revision of Gilles' *Messe de Requiem* (1750), the revival of Rameau's *In convertendo* (1751) and the first French performances of Pergolesi's *Stabat mater* (April 1753). He also introduced symphonies by composers such as C.H. Graun, Hasse, Jommelli and J.W.A. Stamitz. In 1753 he returned to the Paris Opéra as *inspecteur-général*. He had resumed work on *Prométhée et Pandore* in 1752 (without consulting Voltaire) and by late 1754 was revising it for performances planned for winter 1756; Voltaire accused Royer of having 'sacrificed me to his semiquavers' and was only placated by the composer's sudden death in January 1755: 'God wishes to have his soul and his music'. At the same time, the Duke of Luynes paid tribute to a 'very knowledgeable man, with an exceptional taste for melody'. Others spoke of him as being 'an agreeable character and most polite'. An elaborate memorial service, given by the musicians of the royal chapel and the Paris Opéra a year after Royer's death, was directed by Mondonville, and included the latter's *De profundis* and Royer's arrangement of Gilles' Requiem.

Royer's *Zaïde* was performed in association with the royal weddings of 1739, 1745 and 1770 and remained in the Opéra repertory throughout this period. Its well-paced narrative produced a tautly-constructed and variegated response from the composer. At dramatic moments, the music in both prologue and drama is distinguished by his fondness for repeated semiquaver chords and *tirades* in the orchestra. In the celebrated hunting scene of Act 2 – 'the masterpiece of music in this genre' (according to *Affiches* of Lyons, 1765) his use of horns in F antedates Rameau's by six years, while his writing for voices, often virtuoso in its demands, includes both recitative and air in the frequent monologues by the principal characters. Royer also demonstrates skilful integration of the divertissement into the plot; the jubilant crowd choruses were much admired by contemporaries. The premières of *Zaïde* and Rameau's *Les fêtes d'Hébé*, which immediately preceded the former, were also notable for the inclusion of pantomime by the dancers Barbara Campanini (Barbarina, Barberina), and Antonio Rinaldi (Ribaldini, Fossano, Fossan), an innovation for Parisian opera.

The one surviving book of Royer's virtuoso *Pièces de clavecin* (1746) includes vivid transcriptions of movements from *Zaïde* and *Le pouvoir de l'amour*; his transcription of 'La Chasse' from *Zaïde* also survives in manuscript. Excerpts from both operas were in the repertory of the Esterházy court ensemble by 1759.

WORKS

STAGE

Pyrrhus (tragédie, prol, 5, J. Fermelhuis), Paris, Opéra, 26 Oct 1730 (Paris, 1730), *F-Po*

Zaïde, reine de Grenade (ballet-héroïque, prol, 3, Abbé de La Marre), Paris, Opéra, 3 Sept 1739 (Paris, 1739, 2/1745) [copy in *F-Po* incl. substantial autograph revs. made before the première; 2 other corrected copies in *V*]; with added divertissement Momus Amoureux, Paris, Opéra, 27 Oct 1739; rev. without prol, Versailles, 10 March 1745; with extended prol, Paris, 13 May 1745; see also *Air italiens de la 2ème pantomime dansée par Mr Ribaldini et Mlle Barbarini dans l'opéra de Zaïde* (Paris, n.d.), *F-Pc, Pn, Po*

Le pouvoir de l'amour (ballet héroïque, prol, 3, C.-H. Le Febvre de Saint-Marc), Paris, Opéra, 23 April 1743 (Paris, 1743), 2 corrected copies in *V*

Prométhée et Pandore (tragédie, 5, Voltaire), begun 1744, rehearsed at house of Marchioness of Villeroy, 5 Oct 1752 and 1754, music lost

LIONEL SAWKINS (with DAVID FULLER)

Roy Henry (*fl c*1410). English ruler and composer. Two works by him are included in the Old Hall manuscript. Identifications with various English monarchs of this name have been suggested since the rediscovery of the manuscript. Barclay Squire, rejecting Henry VIII and Henry VII, settled for Henry VI (reigned 1422–61, 1470–71), using the dates of Damett's and Sturgeon's Windsor canonries during this reign as supporting evidence. He did not consider Henry V (reigned 1413–22), for whom Lederer first put up a case, though mainly for misguided reasons. When John Harvey's researches linked the same composers with the Royal Household Chapel of Henry V, Bukofzer argued in favour of Roy Henry being this monarch. His reasons, too, were unsound, as they failed to separate the original compilation from the later additions to Old Hall.

The composers with royal associations occur only among the latter and could not, as Bukofzer supposed, following Barclay Squire, have 'directly participated in or supervised the compilation of the MS'. Harrison superimposed a correct separation of the layers on to Bukofzer's framework, arguing that, since the second-layer composers can be associated with Henry V's chapel from the beginning of his reign, and that since the second layer is later than the first, the latter must belong to the previous reign. Roy Henry, he claimed, was Henry IV (reigned 1399–1413), an identification more consistent with the date of the musical style as we now understand it. This is undoubtedly true of the music itself, but not of the composer's identity; Harrison reverted to a confusion which Bukofzer avoided, between the date of composition and the date of compilation.

The evidence of literary and archival sources is inconclusive. There is some testimony to youthful activity on musical instruments for both kings. Early biographies of Henry V tell us that he 'delighted in songs and metres', and 'was in his youth a diligent follower of idle practices, much given to instruments of music, and fired with the torches of Venus herself'. The Old Hall composer need not have been 'roy' (king) when he wrote the music, but only when the scribe made his attribution. A date during the latter part of Henry IV's reign is consistent with the musical style, years during which the king was declining. One reference to Henry IV does seem to imply specific musical aptitude ('in musica micans'), though taken in the context of a long laudatory catalogue it may be no more than conventional praise. The possibility can still not be discounted that Roy Henry might after all not have been a king.

His Gloria and Sanctus (both ed. in CMM, xlvi, 1969–73, nos.16 and 94) stand at the heads of their respective sections in the manuscript, and were not later additions, as has been suggested. The Sanctus, written in score, is severely archaic, but its mensuration changes betray an origin later than that of the most old-fashioned descant pieces. The Gloria, likewise in three parts but written out in choirbook format, is characterized by a well-poised and moderately florid melodic line with two slower-moving lower parts which frequently cross. It opens in major prolation with semiminims, later changing to duple time. The tessitura is low, as is often the case with pieces having partial signatures of one, two and two flats respectively. No certain plainchant identification has been made for either piece; Dom Anselm Hughes's ingenious claim that both movements are based on the relevant chants from Vatican Mass IX has not won general acceptance.

The marking 'henrici quinti' on a four-part *Alleluia, Virga Jesse* discovered by Brian Trowell in the Worcestershire Record Office (b705:4 BA 54) is not a composer attribution, but pertains to the archival document. The fragmentary younger cousin of the Old Hall Manuscript (see Bent, 1984, 1996) now includes in pride of place at the head of its Gloria section, corresponding to the position of Roy Henry's Gloria in Old Hall, a canonic Gloria by Dunstaple.

MARGARET BENT

Royllart, Philippus (*fl* late 14th century). French composer. The only work attributed to him is the influential isorhythmic motet *Rex Karole/Letitie pacis* in honour of King Charles V (ed. in Günther and in PMFC, v, 1968), which may have been composed for the peace negotiations of 1375–6 in Bruges (see Günther, xxix–xxxiii). However, the ascription appears only in the lost manuscript *F-Sm* 222 C 22, which has many doubtful attributions. The work has only three voices in this manuscript, whereas in the main source, *F-CH* 564, it has four, though even so only with a solus tenor rather than the original tenor. The possibility has also been suggested that Rowlard, the composer of a three-voice Gloria in the Old Hall manuscript which also appears in *GB-Lbl* Add.40011B, is identical with Royllart. This seems doubtful, as does the ascription to one John Rowland mentioned in the Windsor archives in 1454.

GILBERT REANEY

Roynci, Luigi. *See* ROINCE, LUIGI.

Royzman, Leonid (Isaakovich) (*b* Kiev, 4 Jan 1916). Ukrainian organist, pianist, teacher and musicologist. At the Moscow Conservatory he graduated from Goldenweiser's piano class in 1938 and from Goedicke's organ class in 1941, then took a postgraduate course under their supervision, 1941–6. He joined the staff of the conservatory in 1942 and was made a professor in 1963. Royzman gave recitals in the USSR and in Czechoslovakia, Hungary, Yugoslavia and East Germany. He combined a commanding technique, a sense of proportion and an expressive style with clarity of interpretation. His repertory ranged from Bach and Mendelssohn to Hindemith, Britten, Dupré, Gedike and Shostakovich. From 1958 to 1969 he was president of the standing committee on organ construction for the Ministry of Culture of the USSR. Under his supervision large organs were built and others restored in many Russian towns. Royzman published editions of keyboard music by J.S. Bach, Handel and Haydn and of over 500 piano pieces for children by Russian composers, and the anthology *Sovetskaya organnaya muzïka* (Moscow, 1972). (For list of writings and bibliography see *Grove6*.)

I.M. YAMPOL'SKY/R

Rozanov, Sergey (Vasil'yevich) (*b* Ryazan, 23 June/5 July 1870; *d* Moscow, 31 Aug 1937). Russian clarinettist and teacher. He studied in F.K. Zimmermann's class at the Moscow Conservatory (1886–90), played in various Moscow opera house orchestras (1891–4) and then with the Bol'shoy (1894–1929, first clarinet from 1897). He also performed as a soloist in symphony and chamber concerts. He was an active organizer of the Persimfans Orchestra, the first orchestra without a conductor, and taught at the Moscow Conservatory, 1916–37. An outstanding virtuoso, he had a tone of rare beauty and warmth. In 1905 he modified the construction of the clarinet to facilitate trilling from *b* to *c♯'* and to improve intonation on certain notes. He wrote *Osnovï metodiki prepodavaniya na dukhovïkh instrumentakh* ('The principles of teaching wind instruments', Moscow, 1955); *Shkolï igrï na klarnete* ('Schools of clarinet playing', Moscow, 1947, 7/1968); *Uprazhnenii dlya razvitiya tekhniki na klarnete* ('Exercises for the development of clarinet technique', Moscow, 1928, 2/1951). He also transcribed for the clarinet many works by Russian and west European composers.

I.M. YAMPOL'SKY

Roze, Abbé **(L.) Nicolas** (*b* Bourg-Neuf, 17 Jan 1745; *d* Saint Mandé, nr Paris, 30 Sept 1819). French composer. At the age of seven he was admitted as a chorister to the collegiate church at Beaune. Shortly thereafter he began composition lessons with Jean-Marie Rousseau in Dijon and by the age of ten had made sufficient progress for a motet of his to be performed with full orchestra in the Beaune church. A year later he was appointed successor to a certain Richer in the Pages of the King's Music, but he chose to complete his studies at the Collège de Beaune and the seminary of Autun; he composed several pieces for the seminary diocese.

After leaving the seminary Roze became music master at the Beaune church, on 5 February 1768; in 1769 he composed a mass with full orchestra, which he took to Paris to show Dauvergne, superintendent of the King's Music. Dauvergne then engaged him to compose a motet for the Concert Spirituel. From 1770 to 1775 he was music master to the cathedral of St Maurice in Angers, and then returned to Paris as music master at the church of the Sts Innocents, where the *sous-maître* Le Sueur was one of his pupils. He held that position until 1 November 1779, after which he devoted himself to teaching harmony and accompaniment. Laborde published a summary of Roze's unpublished *Système d'harmonie* in his *Essai sur la musique*.

Roze wrote several motets for the Concert Spirituel between 1775 and 1779, but apparently wrote no more important compositions until 1802 when a mass with full orchestra was performed at the church of St Gervais. He also wrote in 1802 a *Te Deum* and a motet for the coronation of Napoleon. The motet finale, *Vivat Rex*, was a popular ceremonial piece in the early years of the 19th century. On Langlé's death in 1807 Roze was appointed librarian to the Paris Conservatoire, a position he held until his death. He was responsible for the reorganization of the cataloguing system, and for many acquisitions, including all his own manuscripts.

WORKS

MSS in F-Pc

Sacred: many motets, incl. Confitebor, 1775, Benedicam Dominum, 1776, De profundis, 1778, Magnus Dominus, 1779, Laudate pueri, ?1775–9 (Paris, n.d.); Messe [for St Gervais], 1802; TeD, 1802; 3 lits; several masses and mass frags., 1775–1817

Other vocal: Hymne à Apollon, 1784; Hymne aux martirs de la liberté, 1793; Vivat in aeternum–Vivat Rex, motet (Paris, 1802); many ariettas and romances, some pubd

Inst: [2] Symphonie[s] à 4, 1770; Symphonie à 8, op.2 (Paris, 1770s), lost; Quartetto (?1769)

Pedagogical: Méthode de plain-chant (Paris, n.d.); Méthode de serpent (Paris, 1814), collab. Gossec, Ozi and Rogat

LAURIE SHULMAN

Rozhdestvensky, Gennady (Nikolayevich) (*b* Moscow, 4 May 1931). Russian conductor. Son of Nikolay Anosov (conductor and professor at the Moscow Conservatory) and the singer Natal′ya Rozhdestvenskaya, he received his musical education at the Moscow Conservatory, where he studied conducting with his father and took piano lessons with Lev Oborin. While still a student at the conservatory he made his début at the age of 20 in a performance of Tchaikovsky's *Nutcracker*at the Bol′shoy Theatre. When he graduated he was already well known as a conductor both in the USSR and abroad, having twice conducted the student orchestra in prize-winning performances at international music competitions in Berlin and Bucharest. From 1951 to 1961 he was conductor and from 1964 to 1970 principal conductor at the Bol′shoy, where he conducted the Russian première of Britten's *A Midsummer Night's Dream* (1965) and the Bol′shoy première of Prokofiev's *War and Peace* (1959). From 1961 to 1974 he was permanent principal conductor and artistic director of the Symphony Orchestra of All-Union Radio and Television, and in 1972 became the founder conductor of the Chamber Opera Theatre in Moscow, with whom he has toured extensively. In 1974 he was appointed artistic director of the Stockholm PO, a post he held until 1977. He made his London concert début in 1956 and his Covent Garden début, with *Boris Godunov*, in 1970, returning there with the same work in 1991. From 1978 to 1981 he was chief conductor of the BBC SO, and from 1981 to 1983 he was music director of the Vienna SO. In 1982 he founded the State SO of the Ministry of Culture in Moscow, of which he was music director. He was made People's Artist of the RSFSR in 1966, and was awarded the Lenin Prize in 1970.

Rozhdestvensky is a versatile conductor, a highly cultured musician with a supple stick technique and brilliant executant skill. His performing style combines logic, intuition and spontaneity. A fine performer of the classics, Rozhdestvensky is also one of the most interesting interpreters of contemporary Russian and foreign music. He renewed interest in such forgotten works as the second, third and fourth symphonies of Prokofiev, as well as a number of works by Hindemith, Berg, Schoenberg and Martinů, Stravinsky's opera *Mavra*, Prokofiev's *The Gambler* and Poulenc's *La voix humaine*. He is a tireless champion of works by the younger generation of Russian composers, including the orchestral compositions of Shchedrin and works by Mirzoian, Kancheli, Organesian, Skoryk, Slonimsky and others; in 1991 he conducted the première of Smirnov's *Jacob's Ladder* at the Queen Elizabeth Hall, London. In 1969 he married the pianist Viktoriya Postnikova.

Gennady Rozhdestvensky

Roziers, André. *See* ROSIERS, ANDRÉ.

Rozkošný, Josef Richard (*b* Prague, 21 Sept 1833; *d* Prague, 3 June 1913). Czech composer and pianist. In Prague he studied the piano with Josef Jiránek and composition with J.B. Kittl, the director of the conservatory. After his début at the age of 17, he made a concert tour of Bohemia and Moravia and in 1855 gave recitals in a number of European cities, but he eventually chose a career in banking. A cultivated intellectual who had studied philosophy and painting, he became an important figure in the cultural and social life of Prague, as choirmaster of the Lukeš Choral Society in Prague-Smíchov (1869–75) and as chairman (1871–3, 1881–9) of the musical section of the Umělecká Beseda (Artistic Society), one of the leading Czech cultural institutions. In recognition of his services to music he was appointed a member of the Czech Academy of Sciences and Arts in 1897, despite his role as head of the conservative magazine *Hudební listy* in a campaign of attacks against Smetana in 1873. Rozkošný maintained a neutral position even though Smetana favoured his operas at the Provisional Theatre and, as conductor, contributed to the remarkable success of his *Svatojanské proudy* ('The Rapids of St John').

In his musical style, too, Rozkošný was greatly indebted to Smetana, whose influence was already apparent in his comic opera *Mikuláš* (1869), to a Czech text by Karel Sabina, Smetana's librettist, though he could not match the older composer's sense of dramatic effect or his originality. A similar lack of artistic independence is found in Rozkošný's other operas, most of which were staged at the Provisional Theatre or at the National Theatre without notable success. An exception was *The Rapids of St John* (1871) which was given 34 repeat performances at the two Prague theatres, largely owing to its inclusion of fairy tale motifs and scenes of hunting and nature, much favoured at the time; however, it was soon overshadowed by Dvořák's *Kate and the Devil* and *Rusalka*. The one-act *Stoja* (1894), which held the stage of the National Theatre for nine performances, was the first Czech opera in the style of *verismo*, but Rozkošný's inability to free himself from foreign influence (in this case Mascagni) caused his works to fall into obscurity after the appearance of such Czech realistic operas as Kovařovic's *The Dog Heads* (1898) and Foerster's *Eva* (1899). A number of Rozkošný's songs and choruses on Czech texts, poetic piano pieces and chamber works were published during his lifetime, but these too have fallen into oblivion. His only work still occasionally performed is the overture to *The Rapids of St John*, which recalls Smetana's *Vltava* in its vividly descriptive tone-painting.

WORKS

printed works published in Prague unless otherwise stated

STAGE

unless otherwise stated, all operas and all first performed in Prague

Ave Maria (1), private perf., 1856
Mikuláš [Nicholas] (comic op, 2, K. Sabina), 1869, Provisional, 5 Dec 1870; ov., arr. by B. Simák and E. Wetzler for pf 4 hands (n.d.)
Svatojanské proudy (Vltavská víla) [The Rapids of St John (The Vltava Nymph)] (romantic op, 4, E. Rüffer), 1869, Provisional, 3 Oct 1871, vs (1882)
Záviš z Falkenštejna [Záviš of Falkenstein] (4, J. Böhm), 1871–7, Provisional, 14 Oct 1877
Mladí pytláci [The Young Poachers] (Böhm), Měštanská Beseda, May 1877
Alchymista [The Alchemist] (Böhm), unperf.
Popelka [Cinderella] (3, O. Hostinský), 1880–82, National, 31 May 1885; excerpts (n.d.)
Krakonoš (3, J. Borecký), National, 18 Oct 1889; excerpts, arr. pf (n.d.)
Stoja (1, O. Kučera, after J.O. Konrád), National, 6 June 1894; excerpts, arr. pf (n.d.)
Satanella (3, K. Kádner, after J. Vrchlický), National, 5 Oct 1898; excerpts, arr. pf (n.d.)
Černé jezero [The Black Lake], orig. title, Šumavská víla [The Šumava Nymph] (romantic-comic op, 3, Kádner, after A. Heyduk), National, 6 Jan 1906

JIŘÍ VYSLOUŽIL

Rózmann, Ákos (*b* Budapest, 16 July 1939). Hungarian composer, active in Sweden. He studied composition and organ at the Liszt Academy in Budapest, and composition with Lidholm at the Royal College of Music in Stockholm. He settled in Sweden, where since 1978 he has been organist at the Catholic Cathedral in Stockholm, and where he has become a leading figure in the field of electro-acoustic composition. *Impulsioni I–III* launched a career which is characterized by numerous large-scale works. For instance, *Bilder inför drömmarna och döden*, *Rytmer och melodier*, *Triptykon* and *Tolv stationer* are all long enough to last an entire concert programme.

Rózmann works on the conviction that vocal and instrumental music have played out their role for composers today, and that electro-acoustic music permits acoustic development and release from the strain of historical models. However, he often introduces vocal instrumental sounds, particularly the organ or zither, Gregorian chant or the singing of Buddhist monks. The processes in which these materials are arranged are highly imaginative and virtuoso in construction. The works are rooted in the battle between light and dark, good and evil. The person is both victim and hero, torn between destructive and creative forces. Christian elements are represented by the Catholic Mass, but Eastern thinking is also reflected, not least by the Tibetan Book of the Dead.

WORKS

HANS-GUNNAR PETERSON

Rózsa, Miklós (*b* Budapest, 18 April 1907; *d* Los Angeles, 27 July 1995). American composer of Hungarian birth. Raised in Budapest and on his father's rural estate in nearby Tomasi, he was exposed to Hungarian peasant music and folk traditions from an early age. He studied the piano with his mother, a classmate of Bartók at the Budapest Academy, and the violin and viola with his uncle, Lajos Berkovits, a musician with the Royal Hungarian Opera. By the age of seven, Rózsa was composing his own works. Later, as a student at the Realgymnasium, he championed the work of Bartók and Kodály, keeping his own notebook of collected folktunes.

In 1926, Rózsa left Budapest to enroll at the Leipzig Conservatory, where he studied composition with Grabner and musicology with Kroyer. By 1929 his chamber works, published by Breitkopf & Härtel, were being promoted and performed throughout Europe. In 1931 he moved to Paris where he completed his *Theme, Variations and Finale* (1933, rev. 1943 and 1966), a work that soon gained international recognition. (It was on the programme the night Bernstein made his conducting début with the New York PO in 1943.) In recognition of his musical achievements, Rózsa was awarded the Franz Joseph Prize from the municipality of Budapest in 1937 and 1938.

Rózsa was introduced to the genre of film music through his friend Arthur Honegger. From 1935 to 1939 he frequently shuttled between Paris and London, where he composed for London Films under the Hungarian-born producer Alexander Korda. In 1940 he accompanied Korda to Hollywood to complete the score of *The Thief of Baghdad*, and was soon in great demand as a freelance film composer and conductor. As a staff member at MGM (1948–62), he became one of the most highly regarded composers in the industry, writing music for over 100 films. From 1945 to 1965 he also taught film music at the University of Southern California.

Most of Rózsa's film scores employ leitmotifs that accompany and represent specific characters or events on the screen. His angular melodies and contrapuntal textures helped to define the 1940s genre of *film noir*. Scores for epic and period films in the 1950s distinguished themselves by the accuracy of their well-researched historical detail. Rózsa won Academy Awards for the soundtracks of *Spellbound* (1945), *A Double Life* (1948) and *Ben-Hur* (1959), and a César award for the score for *Providence* (1977).

The essence of Rózsa's musical style springs from his early experiences with Magyar peasants; his harmonic and melodic constructions characteristically derive from the pentatonic and modal qualities of Hungarian folk music. His works are also infused with the vitality of Hungarian dance rhythms and the sentimental lyricism of the gypsy tradition. Rózsa does not quote folk melodies in his compositions, however. Instead, in works such as *North Hungarian Peasant Songs and Dances* (1929), *Three Hungarian Sketches* (1958) and *Notturno ungherese* (1964) he invents his own folk-like material. His skill at manipulating traditional forms is particularly evident in the Concerto for Strings (1943, rev. 1957) and the Piano Sonata (1948). Also noteworthy are his virtuosic concertos for the violin (1953), piano (1966), cello (1968) and viola (1979).

STEVEN D. WESCOTT

Rózsavölgyi [Rosenthal], **Márk** (*b* Balassagyarmat, 1789; *d* Pest, 23 Jan 1848). Hungarian composer and violinist. The son of a poor Jewish tradesman named Rosenthal, he began studying the violin at the age of eight. After a time in Nyitra (now Nitra, Slovakia) and Pozsony (now Bratislava) he went to Prague, where he studied both music and calligraphy. In 1808 he moved to Pest, first working as a bookkeeper for a wholesaler. In the same year he gave a violin recital there, playing works by Kreutzer and compositions of his own in the Hungarian style; after this concert he decided to devote himself exclusively to music. In 1809 he joined the second Hungarian theatrical company in Pest as a violinist, later becoming its musical director; on 12 April 1812 this company performed the play *Angyal Bandi* with his music. He lived in Baja from 1813 to 1819, when a fire destroyed all his possessions, including his manuscripts. From 1819 to 1821 he worked as a violinist in the theatre of Temesvár (now Timişoara, Romania). Between 1821 and 1833 he once again lived in Baja, where he led his own orchestra during Carnival. On 13 May 1824 he took part in a meeting of the music society of the County Veszprém in Balatonalmádi; the society's notary, Gábor Sebestyén, gave him the artistic name Rózsavölgyi (officially approved in 1846). Between 1824 and 1831, 18 *verbunkos* by Rózsavölgyi appeared in the society's publication *Magyar nóták Veszprém vármegyéből* ('Hungarian Tunes from County Veszprém'). In 1827 he composed the music to the play *Illés sapkája* ('Elijah's Cap') in Baja. In 1830 he played before Prince Ferdinand d'Este in Baja. From 1833 until his death he lived in Pest, where he was appointed principal violin at the newly opened Hungarian Theatre in 1837; for its opening performance on 22 August 1837 he composed the orchestral work *Nemzeti örömhangok* ('National Sounds of Jubilation'). Ferenc Erkel released him from the service of the theatre on 15 February 1838. On 16 April 1839 his three-act comic opera, *Visegrádi kincskeresők* ('The Treasure Hunters of Visegrád'), was given its first performance in Pest, though without success. In the 1840s Rózsavölgyi founded his own band, with which he played before Liszt in the Pest National Circle on 6 May 1846 (Liszt used themes by Rózsavölgyi in his Hungarian Rhapsodies nos.8 and 12). His playing deteriorated in the mid-1840s; a concert tour in October 1846 was discontinued because of ill-health.

Rózsavölgyi was celebrated as the last important master of the *verbunkos* and the first of the more modern Hungarian dance, the *csárdás*, which became the most popular genre of 19th-century Hungarian music. From the second half of the 1830s he dedicated a *csárdás* to every great political, social or private occasion. His name is also associated with the creation of the Hungarian drawing-room and social dance as well as the cyclical, repetitive dance form. Sándor Petőfi, the most important contemporary poet in Hungary, defended him publicly against attacks in the press. Similarly, Ferenc Erkel thanked him publicly for the dedication of his *csárdás* *Halljuk* ('Hear, hear!'). In the poem which Petőfi wrote on the occasion of his death Rózsavölgyi was referred to as a 'rouser of national consciousness'.

In 1844 the Pest National Circle decided to publish the collected works of Rózsavölgyi, but the undertaking was never completed. His autobiography (in *H-Br*) and many of his works (*Bn*) survive in manuscript.

Rózsavölgyi's son Gyula (1822–61) founded the publishing firm RÓZSAVÖLGYI ÉS TÁRSA in 1850.

WORKS

(selective list)

including works only in contemporary printed editions

for piano and published in Pest, unless otherwise stated

Edition: *Nemzeti zenetár: Rózsavölgyi Márk összes zeneművei* [National music collection: complete music works of M. Rózsavölgyi], pf, vols. i–vi (Pest, 1844–7) [inc.]

6 magyar nóták [6 Hungarian Tunes], 2 vn, vc (1811); Dietai magyar nóta [Hungarian Tune for the Diet] (1826); Eredeti magyar nóták [Original Hungarian Tunes] (1826, 1830); 6 bácskai magyar nóták [6 Hungarian Tunes from the Bácska] (1826); 4 magyar nóták [4 Hungarian Tunes], 1/2 vn (1828); 6 eredeti magyar nóták [6 Original Hungarian Tunes] (1831); 2 parádi magyar nóták [2 Hungarian Parade Tunes] (1831); Nemzeti nóták [National Tunes], 3 vols. (1833–4); Magyar nóták [Hugarian Tunes] (1835); Emlékhangok [Sounds of Remembrance], pf/vn (1836); Nemzeti örömhangok a Pesti magyar színház megnyitása emlékére [National Sounds of Jubilation in Remembrance of the Opening of the Hungarian Theatre, Pest] (1837)

2 magyar nóta [2 Hungarian Tunes] (1840); Első magyar társas táncz [First Hungarian Round Dance] (1842); Keleti reményhangok [Eastern Sounds of Hope] (1842); Virradó [Daybreak] (1842); Kisded-ápoló körmagyar [Children Nursing, Hungarian Round Dance] (1842); Kesergő [Lament] (1843); Köri körmagyar [Hungarian Round Dance for the National Circle] (1843); Remény és Szerelem [Hope and Love] (1843); Kedvenc [Favourite] (1843); Országgyűlési körtánc [Parliamentary Round Dance] (1843); Emlék [Souvenir] (1843); Emlék Nógrádra [Souvenir of Nógrád] (1844); Honfi szerelme [Patriotism] (1844); Névnapi magyar [Hungarian Nameday Dance] (1844); Kedély [Spirit] (1844); Honderü [Gaiety of the Fatherland] (1844)

Iparvédő [Industry-Protecting] (1844); Beszállásozás [Quartering] (1845); Ugrós [Jumping Dance] (1845); Koszorú magyar társas tánc [Wreath, Hungarian Round Dance] (1845); Társalgó magyar társas tánc [Conversation, Hungarian Round Dance] (1845);

Ünneplő [Celebrating] (1846); Vig szeszély, csárdás [Jolly Caprice-Csárdás] (1846); Serkentő [Stimulating-Csárdás] (1846); Sarolta csárdás [Charlotte-Csárdás] (1846); Új évi ajándék [New Year's Present] (1846); Üdvözlő [Greeting] (1846); Vigadó [Rejoicing] (1846); Ellenzéki kör-magyar [Oppositionist Hungarian Round Dance] (1847); Hazai hangok [Home Sounds] (1847); Honleányi hangok [Patriotic Women's Sounds] (1847); Halljuk [Hear, hear!] (1847); Honfihűség [Patriotic Fidelity] (1847); Név napi hangok [Nameday Sounds] (1847)

Rózsavölgyi Márk hátrahagyott magyarjai [M. Rózsavölgyi's Posthumous Hungarian Tunes], pf, ed. E. Bartay (1860)

FERENC BÓNIS

Rózsavölgyi és Társa. Hungarian firm of publishers. It was founded in Pest in 1850 by Gyula Rózsavölgyi (1822–61, son of Márk Rózsavölgyi) and Norbert Grinzweil (1823–90), and immediately established links with music publishers in Austria, France, Germany and England. Through the founders' excellent work the firm prospered and by the end of the century had become the largest music publisher in Hungary, having taken over smaller firms including József Wagner (1858) and Treichlinger (1874), and later incorporating Rozsnyai (1936). After Rózsavölgyi's death, Grinzweil went into partnership with his brother-in-law János Nepomuk Dunkl, but the firm continued operating under its former name, except in 1862–6 when the branch in Vienna was known as J.N. Dunkl. From 1908 the owners were Gusztáv Bárczi, Victor Alberti and Béla Ángyán. The company issued works by leading contemporary composers including Erkel, Liszt, Mosonyi and Robert Volkmann, and at the turn of the century works by Bartók, Kodály, Dohnányi, Nikolaus Weiner, Lajtha and others. (It should be noted that the three old Hungarian dances by 'Liszt' in the collection of 1852–4, *30 eredeti magyar zenedarab*, were by János Liszt, a doctor and amateur musician.) From 1873 Rózsavölgyi also promoted concerts ('Evenings of new music', 'Concerts populaires'); its music lending library contained some 100,000 items. From 1883 the firm held a royal appointment and from 1894 it published the periodicals *Zeneirodalmi szemle* ('Music literature review') and *Művészeti lapok* ('Art journals'). Its publishing activities expanded in the 1930s to include books on music.

The firm always gave plate numbers to its publications; until Rózsavölgyi's death the number was preceded by a combination containing his initial (R. et C., R. et Co., R. és T.Sz. etc.), thereafter, to 1869, Grinzweil's initials were sporadically used (G.N., N.G., G.No.N., N.G.Sz. etc.). From 1870 to 1885 there were no initials, and from 1885 R. et C. appeared again. Unfortunately the numerical sequence does not indicate the chronological order of publication; from the beginning, the firm reused old plates without changing the numbers, so that it is not uncommon to find the same number on two completely different editions. The plate numbers of incorporated firms were retained, although on the cover the former publisher's name was replaced. At one time agency publications were separately indicated (C.1. etc.). Rózsavölgyi is now the biggest Hungarian music retailer; since nationalization (1949) the publishing activities of the firm have been continued by its legal successor Editio Musica Budapest (renamed Editio Musica Budapest Zeneműkiadó KFT in 1993).

ILONA MONA

Rozsnyai. Hungarian music and book publishers. It was founded in Budapest by Károly Rozsnyai in 1889 and later run by Róbert Rozsnyai. Its publications were primarily pedagogical and are still of value, having been written by teachers at the then National Hungarian Royal Academy of Music including József Bloch (violin), Kálmán Chován and Árpád Szendy (piano) and Albert Siklós (singing and composition). Bartók's editions of *Das wohltemperirte Clavier* and the works of Mozart, Scarlatti and Couperin were also published by Rozsnyai, as well as Bartók's own works including the 14 Bagatelles, the two Elegies for piano and the *Gyermekeknek* ('For children') cycle for violin and piano (with Tivadar Országh). In 1936 the firm was taken over by Rózsavölgyi és Társa.

ILONA MONA

Różycki, Aleksandr (*b* Zhitomir [now in the Ukraine], 26 Feb 1845; *d* Warsaw, 15 Oct 1914). Polish teacher, pianist and composer. He studied with Karol Studziński and Rudolf Strobl at the Warsaw Institute of Music. Active mainly as a teacher, he was professor of piano at the institute from 1884 and also at the Aleksandryjsko-Maryjski Ladies' College in Warsaw; his pupils included Artur Rubinstein. He wrote numerous teaching manuals, among them two for the piano: *ABC Nowa szkola na fortepian* (Warsaw, 1897) and *Szkola techniki fortepianowej w dwóch częściach* ('Manual of piano technique, in two parts', Warsaw, n.d.). He also composed studies and exercises, which for some decades were basic material for piano teachers, solo and choral songs and several piano miniatures which achieved some popularity.

ZOFIA CHECHLIŃSKA

Różycki [Rozycki, Rożycki, Rositsky, Ruziski], **Jacek** [Hyacinthus, ?Sebastian] (*b* ? at or nr Łęczyca; *d* after 1696). Polish composer. He was probably the son of Stanisław Różycki, an impoverished nobleman of Doliwa ancestry from the Łęczyca district. He appears to have entered the royal chapel at Warsaw in the mid-1640s (a council resolution of 1676 stated that he had given 'some thirty years' service' there). He probably entered as chorister, but he may well not have been a pupil of the choirmasters Marco Scacchi and Bartłomiej Pękiel, as has been suggested, since the payroll reveals that the boys of the chapel were under the care of other musicians (e.g. Piotr Elert). He may, however, have studied with Pękiel when he was older. In time he himself became choirmaster and indeed may have succeeded Pękiel. The exact date of his appointment is not known, and it should be added that sources of 1670, during his period of office, mention another choirmaster, Fabian Redzius [?Reggius]. There is also a reference, however, to Różycki's being choirmaster to four successive rulers; the first of these, Jan Casimir, ceased to rule in 1668, and the last, August II, succeeded in 1697. August, who was the Elector of Saxony, reformed the Warsaw chapel in 1697, amalgamating it with the Kapelle at Dresden; Różycki was named Kapellmeister jointly with J.C. Schmidt.

Różycki composed some masterly motets and concertos using the Italianate concertato technique conspicuous in Polish Baroque music; he also followed traditional models of sacred vocal polyphony. In a number of these works he included quotations from Polish folksongs and can thus be seen as a successor to Marcin Mielczewski. His other music comprises simple hymns for four voices, in which he renounced imitative polyphony in favour of homophonic writing in clearcut phrases and emphasizing the melody of the highest voice; these pieces are thus similar to Protestant chorales and exceptional in Polish music of the period. Although none of Różycki's music was published, it seems to have become popular; for example, Diletsky referred to him and quoted from his works in his treatise *Musikїskaya grammatika* (1680), and about 1700 Charśnicki based his *Aeterna Christi munera* on Różycki's hymn of that name.

WORKS

Mag, 4vv, chorus 4vv/cornetto and 3 trbn, 2 vn, violetta, va, b viol (ad lib), 2 cornettini (ad lib), bombard/bn (ad lib), db (ad lib), bc (org), *PL-GD*; ed. in WDMP, liv (1964)

Confitebor, 4vv, 2 vn, bc (org); ed. in WDMP, lx (1966)

Dixit Dominus, 4vv, chorus 4vv, 2 vn, 2 va, cornetto, 2 cornettini (ad lib), b viol (ad lib), bombard/bn (ad lib), bc (org), *GD*

Exsultemus omnes, 3vv, bc (org), *Kj*; ed. in WDMP, xliv (1961, 2/1966)

MIROSŁAW PERZ

Różycki, Ludomir (*b* Warsaw, 6 Nov 1884; *d* Katowice, 1 Jan 1953). Polish composer, son of ALEKSANDER RÓŻYCKI. He studied with Aleksander Michałowski (piano), Gustaw Roguski and Michał Biernacki (theory and harmony), and Noskowski (composition) at the Warsaw [Music Institute] (now the Warsaw Conservatory) and graduated with the gold prize in 1904; from then until 1907 he studied with Humperdinck at the Akademie der Künste, Berlin. Together with Grzegorz Fitelberg, Szymanowski and Szeluto, Różycki founded in 1905 the Young Polish Composers' Publishing Company, an association that came to be referred to as YOUNG POLAND. In 1908 Różycki accepted the position of conductor at the Lwów Opera, and until 1912 taught the advanced piano class at the Conservatory of the Galician Music Society in Lwów. From 1912 to 1918 he stayed in Paris, then Berlin before settling in Warsaw in 1919; until 1920 he was conductor of the opera at the Wielki Theatre, and thereafter devoted himself to composition. He was a founder member (1926) and first president of the Union of Polish Composers, and a professor at the Warsaw Music Academy in 1930–31 (during Szymanowski's tenure as rector). He received the State Music Award for his opera *Eros i Psyche* in 1930 and the gold medal at the Paris World Exhibition in 1939 for his ballet *Apollo i dziewczyna* ('Apollo and the Maiden'). In 1945 he settled in Katowice where he assumed responsibility for the composition class at the State Higher School for Music (now the Katowice Academy). He devoted a lot of time to reconstructing those of his works that had been destroyed by fire during World War II.

The most significant works of Różycki's youth are his symphonic poems and songs. Displaying a vivid

imagination and technical proficiency, their aesthetics are those of the late Romantic period, particularly his songs which show the influence of Richard Strauss and Wolf. After 1911 he turned primarily to writing opera, and it is at this stage that he ceases to search for an authentic and original compositional style. Building on the Italian *verismo* operatic tradition, he incorporates elements of the late Romantic symphonic style and Impressionist aesthetics but in a conventional rather than innovative way. Stylistically and technically, the music of Różycki belongs to the 19th century, and lacks individuality. It does display, however, a secure compositional technique; the melodic lines are clearly defined and the music is energized by its range of orchestral colour and dramatic confidence. His most important works are the symphonic poems *Stańczyk* (1903) and *Anhelli* (1909), the operas *Eros i Psyche* (1914–16) and *Beatrix Cenci* (1916–26), and the ever-popular ballet (both in Poland and abroad) *Pan Twardowski* (1921).

WORKS
(*selective list*)

STAGE

Bolesław Śmiały [Bolesław the Brave] (music drama, 3, A. Bandrowski, after S. Wyspiański), op.20, 1906–8, Lemberg, 11 Feb 1909, rev. 1948
Meduza (fantasy op, 3, C. Jellenta), op.27, 1908–11, Warsaw, 26 Oct 1912, rev. 1952
Eros i Psyche (fantasy op, 5, J. Żuławski), op.40, 1914–16, Wrocław, 10 March 1917
Casanova (comic op, 3, J. Krzewiński), op.47, 1921–2, Warsaw, 8 June 1923, reorchd 1948
Beatrix Cenci (tragic op, 4, S. Różycka, after J. Słowacki and R. Shelley), 1916–26, Warsaw, 30 Jan 1927
Młyn diabelski [The Devil's Mill] (satirical op, 6 scenes, Krzewiński), 1928–30, Poznań, 1931
Lili chce śpiewać [Lili Wants to Sing] (operetta, 3, Krzewiński and Różycka), 1932, Poznań, 1933
Pani Walewska (Mała hrabina) [Madam Walewska/Little Countess] (historic op, 3, Krzewiński and Różycka, after W. Gąsiorowski), 1933–40, inc.
Ballets: Pan Twardowski (9 scenes, Różycka, after J.I. Kraszewski), op.45, 1921; Apollo i dziewczyna [Apollo and the Maiden] (5 scenes, Różycka, after S. Karpiński), 1937
Incid music

ORCHESTRAL

Stańczyk, sym. scherzo, op.1, 1903; Ballada, op.18, pf, orch, 1904; Bolesław Śmiały [Bolesław the Brave], sym. poem, op.8, 1906; Anhelli, sym. poem, op.22, 1909; Król Kofetua [King Kofetua], sym. poem, op.24, 1910; Mona Lisa Gioconda, sym. poem, op.29, 1911; Pf Conc. no.1, op.43, 1917–18; Suita taneczna w 4 częściach [Dance Suite in 4 Movts], 1931–2; Pietà (Na zgliszczach Warszawy) [Pietà/On the Ruins of Warsaw], dramatic fragment, 1940–43, rev. 1948; Pf Conc. no.2, 1942; Vn Conc., op.70, 1944; Polonez uroczysty [Solemn Polonaise], 1945–6; Warszawa wyzwolona [Liberated Warsaw], sym. poem, 1950

VOCAL

Choral: Kantata na 250 jubileusz Uniwersytetu Lwowskiego [A Cantata for the 250th Anniversary of Lwów University] (J. Kasprowicz), chorus, orch, 1912; 3 pieśni [3 Songs] (Polish verse), op.48, 1924
Solo vocal-orch: Narzeczona z Koryntu [The Fiancée from Corinth] (J.W. von Goethe), spkr, orch, 1918; Dzwony [Bells] (S. Różycka), Mez/Bar, orch, 1944
Songs: 8 Dichtungen von Miciński, op.9, 1905–06; 4 Lieder (C. Jellenta), op.12, 1906; 6 Lieder (H. Ibsen, H. Heine, F. Nietzsche), op.14, 1906; 6 pieśni (T. Miciński), op.16, 1906; 3 pieśni (Polish verse), op.19, 1906; 3 Lieder (C. Norwid), op.23, *c*1909; Z erotyków [From Eroses], op.51, 1923

CHAMBER AND SOLO INSTRUMENTAL

Chbr: 2 mélodies, op.5, vn/vc, pf, 1904, 1909; 2 nocturnes, op.30, vn/vc, pf, 1904; Sonat, d, op.10, vc, pf, 1906; Pf Qnt, c, op.35, 1913; Rapsodia, op.33, pf trio, 1913; Str Qt, d, op.49, 1916
Pf: 4 impromptus, op.6, 1904; Im Spiel der Wellen, after A. Böcklin, op.4, 1904; 5 préludes, op.2, 1904; 2 préludes et 2 nocturnes, op.3, 1904; Serenada i Nokturn, op.1, 1904; 3 morceaux: Légende, Mélancolie, Poème, op.15, 1904–5; Fantazja, op.11, 1905; Contes d'une horloge, 2 vols., op.26, 1905; Balladyna, op.25, 1909; Laguna, op.36, 1913; Air, mirage, un rêve, op.28, 1915; 4 intermezzi, op.42, 1915; 9 Skizzen, 2 vols., op.39, 1915; Tańce polskie, 3 vols., op.37, 1915; Fantaisiestücke, op.46, 1919; Italie, 2 vols., op.50, 1923; 6 morceaux caractéristiques, op.58, 1924; 4 utwory, op.52, 1924

TERESA CHYLIŃSKA

Ruan. Chinese plucked lute. *See* YUEQIN.

Ruano, Cándido José (*b* El Viso, bap. 14 June 1760; *d* Toledo, 17 March 1803). Spanish composer. His earliest musical training was as a choirboy at Toledo Cathedral. He was *maestro de capilla* at Avila Cathedral from 1782 until 14 December 1792, when he was appointed to the same post at Toledo Cathedral, where he remained until his death. His music, extant in Montserrat and the cathedrals of Toledo, Astorga and especially Avila, exemplifies the change which occurred in Spanish sacred music during the latter decades of the 18th century: it displays an austerity reminiscent of 16th-century Spanish polyphonists, but uses a far wider harmonic vocabulary and a large number of instruments. Like other composers of his time, Ruano gradually abandoned the setting of Spanish texts in favour of Latin liturgical ones.

Ruban. *See* FINGERBOARD (ii).

Rubando. Term used in the late 19th century as a synonym for RUBATO.

Rubato [tempo rubato] (It.: 'robbed or stolen time'). The expressive alteration of rhythm or tempo. In an earlier type the melody is altered while the accompaniment maintains strict time. A later type involves rhythmic flexibility of the entire musical substance. Both originated as a part of unnotated performing practice, but were later sometimes indicated in scores. Some modern writers refer to the earlier and later types as melodic and structural, borrowed and stolen, contrametric and agogic, or bound and free.

1. The earlier rubato. 2. The later rubato.

1. The earlier rubato. In 1723 Tosi referred to *rubamento di tempo* in Italian arias of the late 17th century. Galliard explained the technique in his translation of 1743: 'When the bass goes an exactly regular pace, the other part retards or anticipates in a singular manner, for the sake of expression, but after that returns to its exactness, to be guided by the bass'. Ex.1, one of Roger

Ex.1 North: 'Breaking and yet keeping time' (*GB-Lbl* Add.32532, f.7*v* [*c*1695])

North's illustrations of Tosi's 'breaking and yet keeping of time' shows the following features: (1) the *a* steals time from the *b*s on either side and thus increases its length; (2) while this is happening the bass keeps strict time; (3) the steady bass imposes compensation, so that the total time stolen from the opening and closing notes (a crotchet in each case) exactly equals the time acquired by the *a* (a minim); (4) the appearance of *a* is anticipated, whereas the following *b* and *c′* are both delayed; (5) although delayed, the second *b* loses none of its value – it is simply shifted later in time; (6) the second, third and fourth notes of the melody do not sound simultaneously with the bass notes with which they are vertically aligned; (7) the dissonance of a 9th occurs when *a* is heard with the *G* in the bass and when *b* is heard with *A*; and (8) the *a* could have been anticipated without delaying any of the other notes, for no balance is required between these two effects which are both determined by the starting-point rather than the length of a note.

In 1752 Quantz used the expression *tempo rubato* and demonstrated anticipation and delay separately (ex.2). Vocal rubato was subsequently described by writers in Germany such as Agricola (1757), Marpurg (1763), Hiller (1774, 1780) and Lasser (1798), as well as by Domenico Corri (1810), Bacon (1824) and Nathan (1836) in London, and, with special thoroughness and numerous musical examples, by García (1847) in Paris. According to the latter, the *temps d'arrêt* or *prolongation* (the lengthening of *a* in ex.1) 'is the first element of tempo rubato'. Famous singers known to have used the device include Antonio Pasi, Cuzzoni and Santa Scarabelli Stella (wife of Lotti) in the Baroque period and Pasta, Sontag, Cinti-Damoreau and Malibran during the first half of the 19th century.

Descriptions of violin rubato appear in books by Leopold Mozart (1756), Spohr (1832) and Baillot (1834), and it was part of the performing style of artists such as Franz Benda and Paganini. Baillot urged the performer to use 'the syncopation called *temps dérobé* or *troublé*, *tempo rubato* or *disturbato*' only when the intensity of expression 'forces him to lose all sense of pulse and to be delivered by this means from the trouble that besets him'. This sort of metrical dissolution is illustrated by ex.3 from a manuscript copy of sonatas composed, probably during the 1760s, by Benda: the stepwise descent from g″ to a′ which begins at the end of the opening bar was shifted in performance to bar 2, and the ascent at the end of bar 2

Ex.2 Quantz: *Eine Art vom Tempo rubato* (1752)

was moved to bar 3. This effect was emphasized by the long slur and the continuous beam, and the seven notes in bar 2 of the performed version created conspicuous displacement against the crotchets in the bass.

While the singer and the violinist conceived of rubato as the alteration of note values in a melody, the keyboard performer tended to think more about the displacement between the accompaniment, usually played by the left hand, and the melody, played by the right. In keyboard rubato, as W.A. Mozart explained, 'the left hand should go on playing in strict time'. Clementi, Dussek, Thalberg and Field employed the technique; Marpurg (1755, 1756), E.W. Wolf (1785), Türk (1789, 2/1802) and Herz (*c*1837) described it. From about 1770 to 1840 'rubato' occasionally referred also to syncopation caused by unusual groups of notes (C.P.E. Bach), to unexpected melodic or dynamic accentuation on weak beats, or to the setting of short syllables on long notes.

Vocal and violin rubato remained, for the most part, an unnotated part of performance. The word 'rubato', however, started to appear in keyboard scores with Chopin, who marked it in 14 different works written between 1828 and 1835. He usually wrote the single word *rubato*, but sometimes *poco rubato*, *sempre rubato* or *languido e rubato*, employing such terms to establish a mood, articulate the repetition of a unit of music, or intensify an expressive effect such as the high point of a phrase or an unusual non-harmonic note. Ex.4 shows an

Ex.3 Benda: Violin Sonata (*D-Bsb* Mus. MS 1315/15)

unpublished rubato in a manuscript version of his Waltz in A♭ major. Played without rubato, the dissonance on

Ex.4 Chopin: Waltz op.34 no.1 (lost MS from 1835)

the second beat of bar 2 is startling. But if the accompaniment keeps strict time and the note values in the right hand are slightly altered (by including perhaps an anticipation of the notes on the second beat), the dissonances are softened and the melody flows more smoothly. Chopin's rubatos are brief and may involve anticipation or delay, as determined by the performer. The manner of execution depends upon the motivation provided by the sense of the music before and after the rubato. This sort of keyboard rubato also appears in the scores of some of Chopin's contemporaries such as Károly Filtsch (his pupil), Clara Schumann, Pauline Viardot and Gottschalk, and perhaps in the earlier works of Liszt.

The earlier type of rubato is associated with the aria, sonata, concerto and character piece, but not with the rhythmically free styles of the recitative, the cadenza, or preludial forms such as the prelude, toccata or fantasia. It requires an accompaniment that can conspicuously project the sound of strict time: the *basso continuo* of the Baroque, the Alberti bass figurations of the Classical period, or the waltz-like patterns in ex.4 and in many aria accompaniments in 19th-century French and Italian opera. During the later years of the 19th century the earlier meaning of rubato gradually disappeared, although isolated elements of the technique lingered on in the controversial concept of 'compensation' (meaning then that retard and acceleration should be exactly equal within a bar, phrase or piece) and in the pianists' custom of arpeggiating chords or 'breaking hands'. During the 1930s, however, the earlier rubato was reborn in American popular music, with vocal or instrumental soloists sometimes placing notes 'behind' or 'ahead of' the strict beat of the rhythm section. This combination of strict and free rhythm influenced composers such as Copland and Carter.

2. THE LATER RUBATO. The later type of rubato was described by Kalkbrenner in 1789. For Busby in 1801 rubato was 'time alternately accelerated and retarded for the purpose of enforcing the expression'. Türk listed the later type of rubato in 1802 as one of the 'extraordinary means' by which 'the expression may be improved', but added that 'one usually intends to indicate thereby only the hesitation or pausing (not the hastening)'. The later rubato occurred at first in keyboard music. It served the same structural and expressive purposes as the earlier type and similarly appeared in the strict forms rather than the free and for passages of very brief duration (P.A. Corri in 1810 suggested 'a bar or two or a few notes'). Eventually, however, Hummel (1828), Czerny (1839) and others complained of its excessive use.

Liszt's 'rubato' referred neither to the rhythmic flexibility of gypsy music, nor to the retards and accelerations marked in a score, added by a performer, or indicated by expressions such as *a piacere*, *ad libitum* or *senza tempo*. His 'deceptive' or 'seductive' rubato, according to his student Carl Lachmund, was 'like a sudden light suspension of the rhythm on this or that significant note'. It usually occurred in music that was soft and *dolce*, often in ritenuto passages or those calling for portato touch, and sometimes in the company of notated syncopation, arpeggiation in one hand or both, accent or tenuto signs, or a juxtaposition of different metrical patterns. His concept of rubato seemed to broaden, however, when he wrote *sempre rubato* for an entire melody or included the word in the tempo marking for an entire section, or when he used it in orchestral scores.

During the later Romantic period there was a gradual increase in the use of tempo fluctuation for subjective expressive purposes. Rhythm became the principal element in expressive performance, and many books on piano playing included lists of places to hasten or retard. The word rubato now often encompassed not only momentary and 'capricious' tempo changing on one or a few notes, but also the expressive shaping of phrases, and sometimes even the 'tempo modification' of Wagner applied to entire movements. The word, occasionally in the form *rubando*, appeared in the orchestral and vocal scores of composers such as Tchaikovsky, Mascagni and Puccini.

Debussy often marked rubato for brief passages. His own recordings reveal an intensity of touch rather than noticeable tempo change in such places, an effect described by Marguerite Long as 'delicate' and 'confined by a rigorous precision'. Bartók distinguished in his notations of folk melodies between *parlando-rubato* and *tempo giusto*, and in his own works also used *non rubato*. Stravinsky sometimes attempted to notate rubato. At some passages marked rubato his recordings show heavily articulated *ritenuto* or seem more concerned with articulation than with tempo. After the mid-20th century Lukas Foss and Elliott Carter used rubato as an important element in the contrast of different musical forces. Rubato has been employed in more conventional ways in the music of neo-Romantic composers.

At the end of the century psychologists were investigating both types of rubato, and other researchers had begun to study their use in early vocal and instrumental recordings. There are still so many different meanings for the word, however, that it might be wise for a modern composer to write 'hesitant' or 'reluctant', for example, for a capricious rubato on a few notes, or '*espressivo*' for the expressive but more placid shaping of a phrase.

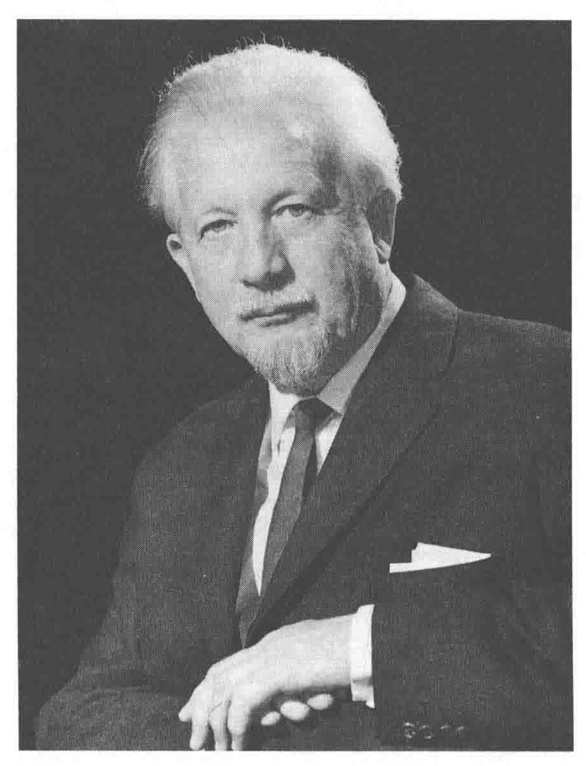
RICHARD HUDSON

Rubbert, Johann Martin. *See* RUBERT, JOHANN MARTIN.

Rubbra, (Charles) Edmund (*b* Northampton, 23 May 1901; *d* Gerrards Cross, 14 Feb 1986). English composer, critic, pianist and teacher.



1. LIFE. Born into a poor working-class family, Rubbra was fortunate in having music-loving parents. His mother's pure soprano voice was prominent in her church choir, and she was in demand locally as a soloist. He began piano lessons at eight, transferring later to a teacher who added instruction in harmony and counterpoint. In his uncle's music shop he discovered the music of Cyril Scott and Debussy. Leaving school at 14 to help his family financially, he worked as an office boy, then a railway clerk. At 17 he organized an all-Scott concert in Northampton, prompting the composer to accept him as a private pupil. In 1920 he won a composition scholarship to Reading University for study with Holst, and also piano with Evlyn Howard-Jones. In 1921 Rubbra won an open scholarship to the Royal College of Music where his teachers were, Holst, Howard-Jones (privately) and R.O. Morris in counterpoint; Vaughan Williams was used as a substitute during Holst's absences. Of Rubbra's

earliest compositions, some of his songs were published during his RCM days. One, *Rosa Mundi*, pleased Holst enormously.

Leaving the RCM in 1925, Rubbra supported himself by teaching privately, playing for ballet dancers, and both composing and playing for a travelling theatrical company. His reputation as a sensitively astute critic and journalist was established in the 1930s with contributions to the *Monthly Musical Record* and *The Listener*. In the early 1930s he left London permanently, and moved to a remote cottage in the Chilterns where the majority of his music was composed.

In 1941 Rubbra was conscripted into the army and instructed to form a piano trio that would appear at camps throughout Britain. Later known as the Rubbra-Gruenberg-Pleeth Trio, it performed locally and internationally until its disbandment in the 1950s. From 1947 to 1968 Rubbra was senior lecturer at Worcester College, Oxford, and from 1961 to 1974 professor of composition at the Guildhall School of Music and Drama. Honours came in 1938 with the Collard Fellowship, followed in 1955 by the Cobbett Medal for 'Services to Chamber Music'. Three universities conferred honorary doctorates on him (Durham, 1949; Leicester, 1959; Reading, 1978). In 1960 he was made a CBE. He was a fellow of Worcester College (1963) and the GSM, and a member of the Royal Academy of Music.

2. WORKS. Rubbra was a prolific composer of 164 opus numbers. Best known for his 11 symphonies, these, together with his solid achievements in almost every other genre except opera and ballet, reveal a keen and imaginative mind, placing him in the front rank of 20th-century English composers. In his major works two fundamental processes are present: the expansion of materials generated from small cells, and the sounding of a complete theme of a defined length. Contrapuntal treatment in an essentially diatonic framework is common to both, and the first procedure is employed more often. Large-scale structures are governed not by harmony but by counterpoint, and the emphasis is on textural growth. 'I never know where a piece is going to go next . . . When I begin, my only concern is with fixing a starting point that I can be sure of . . . My imagination discovers the architecture for me' (Schafer); in this *modus operandi*, discovery and an almost improvisatory spontaneity are implicit, balanced by disciplined musical reasoning.

Edmund Rubbra

Rubbra viewed his first four symphonies as 'different facets of one thought' (Rubbra, 1949). Although each is a distinct entity, they are 'reactions to each other'. The First Symphony contains prototypes of the two processes: the scherzo, formed from a theme contrapuntally manipulated – a tour de force repeated in the scherzo of the Fifth Symphony – and the slow final movement derived from a melodic cell. The Second Symphony is more austere, but the tensions are more firmly controlled and exciting for the restraints imposed. No.3 is more relaxed and lyrical with less emphasis on counterpoint; and this 'reaction' continues in no.4 where the texture is more harmonically concentrated. The Fifth Symphony marks a new phase, for Rubbra began it with 'no reference to the other four' (Rubbra, 1949). The designated key (B♭) is a reference point, not a structural component, and the derivation of materials from intervallic cells is as disciplined as before. The notes E–F–A–B at the head of the Sixth Symphony indicate 'the interval sources of the music, each movement beginning with a selection from these (except the last movement, which uses all of them thematically)' (Rubbra, 1954). One passage of the slow movement suggests organum and discant, used explicitly in some of the choral works. The Seventh Symphony is notable for its incisive scherzo, and the passacaglia of its last movement. The Eighth Symphony ushered in the final phase of Rubbra's symphonic thought: an awareness of 'the dramatic value of intervals as such' (Rubbra, 1970). Composed directly into full score unlike its predecessors, instrumental colours are given a formative role in the music's unfolding. The choral Symphony no.9 ('Sinfonia sacra') shares symphonic procedures with an oratorio-like setting of the Resurrection text. The two final symphonies are one-movement, highly-compressed works in terms of treatment and duration.

Of his other instrumental music, the concertos for piano, violin and viola, *Sinfonia Concertante* op.38 for piano and orchestra and *Improvisation* op.89 for violin and orchestra, are solidly-written works emphasizing long, lyrical lines interspersed with stretches of cumulative tension. Their virtuoso passages, intimately related to the inherent content of the music, are never ostentatious. Rubbra's affinity for chamber music dates from his unpublished First Violin Sonata and extends to the Duo for english horn and piano op.156 (1980). Among the four string quartets the second may be the finest with its first movement cellular growth, the madrigalian cross-rhythms of its *Scherzo polimetrico*, and the serene *Cavatina*. Also notable are the First Piano Trio op.68 and sonatas for violin, cello and oboe. An unusual category comprises eight pieces for recorder(s) with varied accompaniments, the largest of which is the Sonatina. Most of the solo instrumental music is for piano: outstanding are the Eight Preludes op.131, and the *Fantasy Fugue* op.161,

a transcription of which forms the second half of the *Sinfonietta* op.163 for large string orchestra, Rubbra's final work.

The extent of Rubbra's choral music is greater than its 59 opuses indicate, for 13 contain from two to nine separate pieces. Most of the texts are religious and philosophical in accordance with his natural inclinations, which had been reinforced by the Eastern thought and mysticism of Scott, Holst and R.O. Morris. In 1948, Rubbra became a Roman Catholic, celebrating the occasion with the *a cappella Missa in honorem Sancti Dominici*, the second of his five masses, which contrasts the block harmonies of organum with Renaissance contrapuntal techniques. Other noteworthy unaccompanied works are the early Five Motets op.37 (1934) to texts by the English metaphysical poets, the *Nine Tenebrae Motets* op.72 (1951–61), and the *Lauda Sion* op.110 (1960), while representative accompanied works include *The Dark Night of the Soul*, *The Morning Watch* op.55 (Vaughan) and *Song of the Soul* op.41/1 (St. John of the Cross), and *Inscape* op.122 (Hopkins). Scattered among these are many short anthems, some commissioned for special occasions. Among the solo songs are two sets of string-accompanied Spenser sonnets, and *The Jade Mountain* (1962), a cycle of Chinese poems for high voice and harp.

Avoiding most contemporary styles Rubbra followed his own path, especially in his treatment of the symphony. Harmony was also an important factor, and as the product of contrapuntal interaction some of the resulting dissonances show that he was, too, a composer of the 20th century. Further traits are the shifts from polyphony to homophony within a single movement, homophonic slow movements, and striking enharmonic transitions and modulations. Aspects from the past such as organum and modality served him well, and are always used with taste. Energizing everything, however, is Rubbra's fine, intuitive melodic sense. Rubbra's output reveals a unity on two levels: the musical, which is readily demonstrable; and the less easily perceived religious/philosophical, which overrides the musical and encompasses almost everything he wrote. It is universal rather than sectarian, an instinctive blend of the most spiritual and mystical elements of Buddhism and Catholicism. It led to a music that overflows with optimism and a sense of well-being, though the, at times, dramatic and conflictual aspects attest to the hard-won nature of that ultimate peace and assurance.

WORKS

STAGE

op.

27 The Searcher (incid music, V. Pilcher), pf, fl, vn, db, timp, 1920s
36 The Shadow (Bee-Bee-Bei), (op, 1, T. Sturge Moore), 1933, unpubd
48 Prism (ballet), orch, 1938, unpubd
64 The Buddha (incid music, C. Bax), fl, ob, vn, va, vc, 1947

Other incid music: The Dynasts (T. Hardy), Hagoromo (Japanese noh play, trans. E. Pound), Mahomed and the Spider (anon.), Volphone (B. Jonson), all 1920s–30s; Macbeth (W. Shakespeare), 1946

ORCHESTRAL

op.

9 Double Fugue, 1920s, unpubd
25 Triple Fugue, 1920s, unpubd
40 S. Rachmaninoff: Prelude, g, op.23 no.5, orchd., 1930s
30 Piano Concerto, 1931–2, unpubd
39 Rhapsody, vn, orch, 1934, unpubd
38 Sinfonia concertante, pf, orch, 1934–6
44 Symphony no.1, 1935–7
45 Symphony no.2, 1937, rev. 1950
47 Brahms: Variation and Fugue on Theme of Handel, B, orch, 1938
49 Symphony no.3, 1939
50 Improvisations on Virginal Pieces by Giles Farnaby, 1939
53 Symphony no.4, 1941
56 A Tribute, 1942 [for Vaughan Williams's 70th birthday]
57 Soliloquy, vc, orch, 1943–4
62 Festival Overture, 1947
63 Symphony no.5, B♭, 1947–8
75 Viola Concerto, A, 1952
80 Symphony no.6, 1953–4
85 Piano Concerto, G, 1956
88 Symphony no.7, C, 1957
89 Improvisation, vn, orch, 1956
101 Variations on 'The Shining River', brass band, 1958
103 Violin Concerto, 1959
132 Symphony no.8, 1966–8
140 Symphony no.9 'Sinfonia Sacra': see CHORAL
142 Fanfare for Europe, 6 tpt, 1972
145 Symphony no.10 'Sinfonia da Camera', 1974
149 Resurgam, ov., 1975
153 Symphony no.11, 1977–9
158 Canzona for St. Cecilia, orch brass, 1981
163 Sinfonietta, large str orch, 1984–5

CHAMBER AND SOLO INSTRUMENTAL

11 Sonata no.1, vn, pf, 1925, unpubd
29 4 Easy Pieces, vn, pf, 1926
16 Phantasy, 2 vn, pf, 1927
19 Introduction and Fugue, pf, 1928, arr. 2 pf, 1928
24 Lyric Movement, str qt, pf, 1929
31 Sonata no.2, vn, pf, 1932

RALPH SCOTT GROVER

Rubeba. *See* REBEC.

Rubens, Paul A(lfred) (*b* Bayswater, London, 29 April 1875; *d* Falmouth, 5 Feb 1917). English composer. By the age of ten he had written the music to a comic opera with text by Nigel Playfair, whom he then helped to form a dramatic society at Oxford and for whose production of *Alice in Wonderland* he wrote the score; he was also a member of the University Dramatic Society. At Oxford too he organized an orchestra to give smoking concerts, at which he conducted his own pieces and sang his own comic songs, and it was while he was still at Oxford that a song *The Little Chinchilla* was accepted by George Edwardes in 1895 for interpolation into *The Shop Girl*. Rubens entered the Inner Temple as a student, but he soon abandoned law for the theatre. He contributed some songs to Leslie Stuart's musical comedy *Florodora* (1899) and others, and he composed part of the incidental music for Tree's production of *Twelfth Night* (1901). Rubens eventually moved on to composing complete musical comedy scores, of which *Miss Hook of Holland* (1907) was particularly successful and performed around Europe. Rubens wrote broad, striking melodies, rivalling Monckton as the most talented of Edwardian musical comedy composers. Though he required the assistance of orchestrators such as I.A. de Orellana to finish his scores, the results combined a real vein of tenderness with a flair for dramatic situations. His most successful detached song, *I Love the Moon* (1912), was dedicated to Phyllis Dare, the leading lady in many of his shows and to whom he was engaged.

WORKS
(*selective list*)

MUSICAL COMEDIES

dates those of first London performance unless otherwise stated

Three Little Maids (3, Rubens, P. Greenbank), Apollo, 20 May 1902, collab. H. Talbot; Lady Madcap (2, Rubens, N. Newnham Davies, Greenbank), Prince of Wales's, 17 Nov 1904; The Blue Moon (2, H. Ellis, Greenbank, Rubens), Lyric, 28 Aug 1905, collab. Talbot; Mr Popple (of Ippleton), Apollo, 17 March 1905; The Dairymaids (2, A.M. Thompson, R. Courtneidge, Rubens, A. Wimperis), Apollo, 14 April 1906, collab. F.E. Tours; Miss Hook of Holland (2, Rubens, A. Hurgon), Prince of Wales's, 31 Jan 1907; My Mimosa Maid (2, Rubens, Hurgon), Prince of Wales's, 21 April 1908; Dear Little Denmark (2, Rubens), Prince of Wales's, 1 Sept 1909

The Balkan Princess (3, F. Lonsdale, F. Curzon, Rubens, Wimperis), Prince of Wales's, 19 Feb 1910; The Sunshine Girl (2, Rubens, C. Raleigh, Wimperis), Gaiety, 24 Feb 1912; The Girl from Utah (2, J.T. Tanner, Rubens, A. Ross, Greenbank), Adelphi, 18 Oct 1913, collab. S. Jones; After the Girl (2, Greenbank, Rubens), Gaiety, 7 Feb 1914; To-Night's the Night (2, F. Thompson, Rubens, Greenbank), New York, Shubert, 24 Dec 1914; Betty (3, Lonsdale, G. Unger, Ross, Rubens), Daly's, 24 April 1915; Tina (3, Rubens, H. Graham, Greenbank), Adelphi, 2 Nov 1915, collab. H. Wood; The Happy Day (2, S. Hicks, Ross, Rubens), Daly's, 13 May 1916, collab. Jones

ANDREW LAMB

Rubert [Rubbert], **Johann Martin** (*b* Nuremberg, 1614; *d* Stralsund, 1680). German composer and organist. He was educated at Nuremberg and went on to study singing, the organ and composition in Leipzig and Hamburg, where he remained for a considerable time, officiating at the positive organ at the orphanage and belonging to the circle around the poet Johann Rist. His *Friedens-Freude* (1645) includes a reference to his having been court organist at Passenberg, Vogtland. In February 1646 he was invited to Stralsund to compete for the post of organist of the Nikolaikirche, and he was duly appointed on 14 March. He remained in Stralsund until his death and became the focus of informal music-making; the title-page of his *Musicalischer Arien* shows nine musicians (both singers and players) round a table, with the

superscription 'Musica noster amor' – surely a reference to a local collegium musicum. He was highly esteemed in his time both as a composer and as a performer.

The influence of Rist can be seen in Rubert's first two publications, the *Friedens-Freude* and the *Arien*. The latter contains 20 secular arias for two and three voices with instruments – usually two violins – and continuo. The instrumental duets play an important part, providing introductory sinfonias that are repeated as interludes between the verses, resulting in a kind of extended rondo form; in general Rubert shows a strong sense of form. Dynamic and tempo indications are frequent, and there are some dance sections, e.g. courante and 'sorobont'. The *Musicalische Seelen Erquickung* (which includes a tribute from Rist) contains 12 sacred concertos in six to ten parts, including instruments. Planned on a more extensive scale than his earlier music, these settings of mainly biblical texts again show formal unity in the treatment of the motivic material, and the vocal and instrumental textures are very varied, those for two or three voices being the commonest; however, neither the instrumental nor the vocal writing is in a consistently distinctive style. There are some comparatively audacious harmonic progressions and modulations.

Ruberti, Costantino. *See* ROBERTO, COSTANTINO.

Rubeus, Petrus [Rosso, Pietro] (*b* Treviso, *c*1393; *d* Treviso, 1449). Italian composer. The son of Jacobus Rubeus of Pordenone, he was first mentioned at Treviso Cathedral in 1414, and was active there continuously from March 1417 to May 1446, when he was excused on account of ill-health; his will is dated 26 February 1449. The documents give his name as both Petrus Rubeus and Pietro Rosso. Rubeus became a priest by 1418, suggesting a date of birth around 1393. He received a canonicate in 1420, adding further canonicates at Asolo and Montebelluna in 1436, and acted as *scolasticus* (master of the choirboys) at Treviso in 1424–5 and 1437–9. He is probably not identifiable with the Petrus Rubeus in the theoretical treatise of Georgius Anselmi of Parma, who is characterized as a secular, not ecclesiastical, lord. The two motets and two ballatas reveal a composer of modest abilities working in the typical north Italian idioms of the 1410s and 20s. He is not to be confused with Rosso de Chollegrana.

ROBERT NOSOW

Rubiconi, Grisostomo (*b* ?Rimini, 1576; *fl* 1599–1611). Italian composer and organist. He was a monk of the Olivetan order. In 1599 he was organist at S Pietro, Gubbio, where he remained until 1609 when he was replaced by Girolamo Diruta. Banchieri mentioned Rubiconi in connection with an organ at Gubbio built by Vincenzo Quemar. In 1611 Rubiconi was appointed organist at S Benedetto Novello, Padua. His *Primo libro de madrigali a cinque voci* (Venice, 1599, incomplete) shuns chromatic passages, harmonic experiments and representational devices, but this economy of means does not preclude effective expression. The *Concerti ecclesiastici alla moderna dove si contengono messa, salmi per vespere e compieta e Magnificat* op.2 (Venice, 1611, incomplete) for three to eight voices and continuo show a greater tendency towards homophony; the term 'alla moderna', as Dürr remarked, refers to the homophonic nature of the work, the use of basso continuo and the notation.

PIER PAOLO SCATTOLIN

Rubin, Anna (Ita) (*b* Akron, OH, 5 Sept 1946). American composer. She studied sociology at Pomona College in Claremont, California (BA 1968), and music at the California Institute of the Arts (BFA 1975, MFA 1981); she completed an MA in composition at Princeton University in 1996. Her teachers included Pauline Oliveros, Mel Powell, Leonard Stein and Morton Subotnick; she also studied with Ton de Leeuw in the Netherlands. She has received fellowships and held residencies in the USA and elsewhere (Brahmshaus, Baden-Baden), and has received commissions from the New York State Council on the Arts and for radio. Her work for soprano and ten instruments, *Die Nacht: Lament for Malcolm X*, won an award from the Gaudeamus Foundation in 1983. Rubin's compositions are lyrical, dramatic and heterophonic in style, and her electro-acoustic pieces are often inspired by vocal models. Both her instrumental and her electronic works have been performed throughout North and South America, Mexico and Europe. An accomplished pianist, she has taught and studied in New York.

ELIZABETH HINKLE-TURNER

Rubin, Marcel (*b* Vienna, 7 July 1905; *d* Vienna, 12 May 1995). Austrian composer and music critic. He studied at the Vienna Music Academy with Franz Schmidt (theory), among others, and privately with Milhaud in Paris (1925–31). He also completed the doctorate in law (1933) at the University of Vienna. After emigrating to France in 1938, he moved to Mexico City (1942), where he was a répétiteur at the opera house, as well as an active piano accompanist and conductor of his own works. On his return to Austria in 1947, he worked as a music critic for *Die Volksstimme* and composed music for the theatre; he served as president of the Gesellschaft der Autoren, Komponisten und Musikverleger Österreichs from 1975 to 1984. His awards include the Austrian Decoration for Science and Art, the Austrian State Music Prize, the city of Vienna's Grand Music Prize and an honorary membership in the Musikfreunde.

Rubin's musical language shows the influence of 'Les Six'. In his works tonality and harmony are explored to their limits, and melody retains its importance despite a strong rhythmic emphasis; orchestration is given equal attention to these traditional pillars of musical composition. Other characteristic features include textures made up of multiple voices and clear formal structures. In his later works, Rubin's musical discourse was increasingly placed in the service of humanitarian and spiritual ideas; as a consequence, his musical language gained intensity and scope.

HARTMUT KRONES

Rubin, Vladimir Il'ich (*b* Moscow, 5 Aug 1924). Russian composer. He studied with Goldenweiser (piano) and Peyko (composition) at the Moscow Conservatory, graduating in 1949. He then taught at the Gnesin Institute before turning to full-time composition in 1952. He won the Glinka Prize in 1972, was honoured as a People's Artist of Russia in 1995; he has also won awards at competitions in Berlin, Budapest, Helsinki and Warsaw for his choral works. The bulk of his output is vocal, and in his writing he has been influenced by the 19th-century nationalist traditions – the tragic writing of Musorgsky, the epos of Borodin and the fantastic fairy-tale world of Rimsky-Korsakov in particular. His views on eternity, the fate of Russian history as well as moral and aesthetical issues are reflected in works such as the opera *Yul'skoye voskreseniye* ('A Sunday in July') and the oratorio *Pesni vetroviye* ('Songs of the Wind'), while his interest in Russian literature, folk art, and in the renewal of Russian traditions is evident in the comic opera *Tri tolstyaka* ('Three Fat Men'). He is credited with the invention of an original type of poetic theatre; the most notable example of this is *Krïlatïy vsadnik* ('The Winged Horseman') which abounds in symbolism, metaphor and parable. Rubin constructs librettos in verse form from a number of sources, juxtaposing scenes, images, the real and the

fantastic, past and present; his stage works combine symmetrical concentration with stasis and formal symphonic development in a manner which recalls the works of Shostakovich.

Rubinet. *See* ROBINET.

Rubini, Giacomo. *See* LAURI-VOLPI, GIACOMO.

Rubini, Giovanni Battista (*b* Romano, nr Bergamo, 7 April 1794; *d* Romano, 3 March 1854). Italian tenor. The son of a horn player, at the age of eight he sang *Salve regina* in a local monastery so beautifully that his father decided to give him a musical education. After four years' training he was able to sing a female role in an opera in Romano. Thereafter he was engaged at the Teatro Riccardi in Bergamo as violinist and chorister. Wishing to devote himself entirely to singing, he left Bergamo in 1813 and spent the next year in Piedmont as chorister in a touring company. He sang Lindoro in *L'italiana in Algeri* at the Teatro S Moisè, Venice, in 1815, and he attracted the attention of Domenico Barbaia, who offered him a long-term contract at the S Carlo. Rubini's Neapolitan début was in 1815 at the Teatro dei Fiorentini, again as Lindoro. He spent ten years in Naples, performing mostly at the smaller houses where comedy prevailed and benefiting from the tuition of Nozzari, a leading tenor at the S Carlo. He appeared in Rome in 1818. In 1824–5 he first sang in Vienna; world fame was in sight, with engagements in Italy and, for the first time, Paris, where he starred in *La Cenerentola*, *Otello* and *La donna del lago*. But it was in the new Romantic style of Bellini and Donizetti that he came into his own: he proved a vital influence on Bellini, creating the tenor leads in *Bianca e Gernando* (1826, Naples), *Il pirata* (1827, Milan), *La sonnambula* (1831, Milan) and *I puritani* (1835, Paris). During the composition of *Il pirata* he lodged with the composer, trying out each piece as it was written. Likewise, Bellini refused to commit to paper a note of Arturo's music in *I puritani* until Rubini was available to be consulted. The Donizetti premières in which Rubini was involved include, in Naples, *La lettera anonima* (1822), *Elvida* (1826), *Gianni di Calais* (1828), *Il paria* (1829) and *Il giovedì grasso* (1829) and, more importantly, *Anna Bolena* (1830, Milan) and *Marino Faliero* (1835, Paris).

Rubini first appeared in London in 1831. From then until 1843 he divided each year between Her Majesty's Theatre in the Haymarket, where his parts included Don Giovanni and, on occasion, Don Ottavio, and the Théâtre Italien in Paris; there from 1839 he yielded his place in the leading quartet to the young Mario. He remained no less in demand in concert halls and at provincial festivals (he had sung the tenor of Haydn's *Creation* as early as 1821 in Naples). He visited St Petersburg in 1843 and was invited by the tsar to become 'Director of Singing for the Empire'; he returned with Tamburini and others to give a season of Italian opera, 1843–4. But in 1845 he retired permanently to his villa in Romano, now a Rubini museum. In the course of his career he published a set of

2. *Giovanni Battista Rubini as Arturo in Bellini's 'I puritani': lithograph by R.J. Lane after A.E. Chalon*

six ariettas under the title *L'addio* and a singing manual, *12 lezioni di canto per tenore o soprano*.

During Rubini's career the tenor, traditionally the young hero of *opera buffa*, was assuming the same role in the serious genre. In the new Romantic opera of the 1830s Rubini had at his disposal an intensity of expression that far outshone the cool heroics of the castratos and their female successors. His phenomenally high range, which induced Bellini to include a high F for him in the third act of *I puritani*, must be understood in the context of the convention of his day, when no tenor was expected to sing any note higher than *a'* with full chest resonance. The upper fifth of Rubini's range was in the less expressive falsetto register. In order to avoid ugly changes of timbre and to gather strength for high notes, he had not only to exaggerate differences between loud and soft, but to sing whole numbers in a whispering *pianissimo* instead of allowing his voice to expand naturally and easily. He is also credited with introducing Romantic mannerisms such as the 'sob'. He was neither good-looking nor a good actor; his strength lay in the beauty of his tone and the natural artistry of his phrasing.

JULIAN BUDDEN

Rubini, Nicolò (*b* Crevalcore, nr Bologna, 21 Oct 1584; *d* Modena, 17 Jan 1625). Italian composer and cornettist. As a boy he moved with his parents to Modena, where he became a pupil of Orazio Vecchi. From 1607 he was a cornettist at S Agostino. In 1616 he moved to the Este court chapel as a chaplain and *maestro di musica*. He died at the hands of a murderer. He was admired in his day as a cornettist – he was known as 'Il Cavaliere del Cornetto' and 'Rubini del Cornetto' – and as a composer, especially for his secular music, which accounts for most of his output and is predominantly lighthearted and simple, with lively, varied rhythms.

NIGEL FORTUNE

Rubino, Bonaventura (*b* Montécchio di Darfo, nr Brescia; *d* Palermo, 1668). Italian composer. A minorite Franciscan friar, he was *maestro di cappella* of Palermo Cathedral from 1643 to 1665 and a member of the academy of the 'Accesi'. He evidently took an active part in the musical and religious life of the city, most notably composing the psalms for and performing in the solemn vespers celebrating the feast of the *Stellario* at the basilica of S Francesco d'Assisi in August 1644.

His seven printed collections contain all the compositions necessary to form the mass and the Office, excluding hymns and instrumental sonatas. There are eight masses (including a Requiem), about 70 pieces for the Office (invitatories, psalms and *Magnificat* settings) and 47 motets. All are scored for organ basso continuo; the forces range from double choir, with soloists in both choirs or with the first choir concertato and the second ripieno, to small groups of solo voices. The music is often enriched by the presence of a pair of violins, for which the 'sinfonias' incorporated into many vocal pieces were specially written. His style is derived from Monteverdi's *Selva morale e spirituale*, to which Rubino refers in the preface to his first work. With strong and clearcut harmonic articulation, homorhythmic blocks alternate with ingenious fugues. The music has a very effective rapport with the text, and the occasional chromaticisms are intense and expressive. The frequent use of secular bass ostinatos such as the chaconne or the passacaglia is particularly characteristic, and sometimes an entire piece is constructed on an ostinato (e.g. the *Lauda Ierusalem* from the 1655 collection, based on the *bergamasca*). The result is a highly personal, idiomatic style.

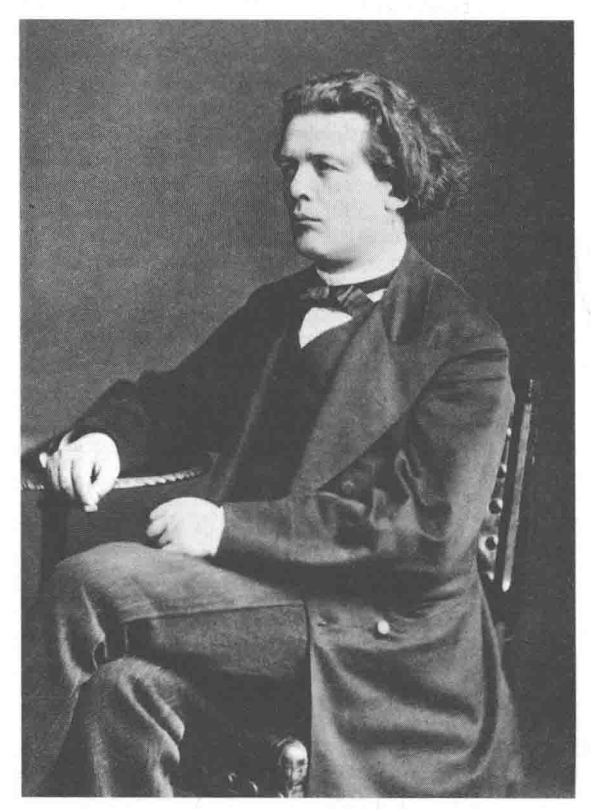
PAOLO EMILIO CARAPEZZA, GIUSEPPE COLLISANI



Rubinstein [Rubinshteyn], **Anton Grigor′yevich** (*b* Vikhvatintsï, Ukraine [Podoliya], 16/28 Nov 1829; *d* Peterhof [now Petrodvorets], 8/20 Nov 1894). Russian pianist, composer, conductor and teacher, brother of NIKOLAY RUBINSTEIN. He was one of the greatest pianists of the 19th century; his playing was compared with Liszt's, to the disadvantage of neither. He was also an influential, if controversial, figure in Russian musical circles, and an exceptionally prolific composer.

1. Life. 2. Works. 3. Publication history.

1. LIFE. After early piano lessons from his mother, at the age of seven Rubinstein went to a piano teacher named A.I. Villoing. He gave his first public concert in 1839 and between 1840 and 1843 Villoing took him on an extended tour of Europe. Child virtuosos were at that time fashionable; he gave concerts in Paris, where he met Chopin and Liszt, the Netherlands, where he had what was to prove a fruitful meeting with members of the Russian imperial family, and London, where he was received by Queen Victoria. They then travelled by way of Norway and Sweden to Germany, visiting Prussia, Saxony and Austria as well as many of the smaller German sovereignties. After a short stay in Russia, the Rubinsteins settled in Berlin and remained there between 1844 and 1846. Anton received counterpoint and harmony lessons from Siegfried Dehn, whose teaching had been valuable for Glinka some years earlier; he also saw much of Mendelssohn and Meyerbeer who, like the Rubinsteins, were of Jewish extraction. His father died in 1846, and the family returned to Russia, but Anton spent the next two years in Vienna in great poverty, eking out a living by giving piano lessons. On his return to Russia in winter 1848–9, the Grand Duchess Yelena Pavlovna, sister-in-law of Nicholas I and formerly the Princess of Saxe-Altenburg, took the urbane and amusing young man under her wing. He not only had an apartment in one of her palaces, but soon became what he jestingly called her 'musical stoker' and played at her soirées, often in the presence of the tsar and his immediate family.

Rubinstein's professional concert career began in 1854, when he toured Europe with enormous success. In winter 1856–7 he stayed with the grand duchess in Nice, and it was during that time that they made sweeping plans for the improvement of musical education in Russia. In 1859 they founded the Russian Musical Society, whose concerts were conducted by Rubinstein, and in 1862 the St Petersburg Conservatory; Rubinstein was its director until 1867, when he resigned from both posts and made another triumphant tour through most of Europe. From 1871 to 1872 he was conductor of the Philharmonic Concerts in Vienna; one of his concerts, on 31 December 1871, included a performance of the first part of Liszt's *Christus* (with Bruckner playing the organ part) in the presence of the composer. In 1872–3 he toured the USA with Wieniawski, and for the next 15 years he was one of the most sought-after pianists in the world. He also built up a considerable reputation as a conductor. In 1887 he again undertook the direction of the St Petersburg Conservatory and in 1889 his jubilee was lavishly celebrated. At his death he was an almost legendary figure as a pianist, and the Rubinstein legend continued well into the 20th century.

When Rubinstein and the Grand Duchess Yelena Pavlovna founded the Russian Musical Society (1859) and the St Petersburg Conservatory (1862), there was only a handful of notable Russian composers, the most important, besides Dargomïzhsky, being Balakirev and his nationalist circle which included Cui, Musorgsky, Borodin and Rimsky-Korsakov (Glinka had died in 1857). Balakirev was also a fine pianist, but there were few native

Anton Rubinstein

Russian instrumentalists, and the orchestra of the Russian Musical Society consisted mainly of German musicians. By writing an article in the periodical *Vek* (1861, no.1) which inveighed against Russian musical amateurism, Rubinstein was endeavouring to argue the case in educated circles for his conservatory; however, he succeeded in alienating Balakirev's group and their staunch advocate Vladimir Stasov, who replied in virulent terms that the establishment of a conservatory would result in 'volumes of worthless compositions'.

Rubinstein had previously offended Glinka by writing an article against nationalism in music, alleging that the Russian national elements in his operas were unsuccessful (*Blätter für Theater, Musik und Kunst*, xxix, xxxiii, xxxvii, 1855). The nationalist composers were thus at daggers drawn with Rubinstein. Nevertheless, with the help of Anton, Nikolay Rubinstein founded the Moscow Conservatory, and by the end of the century Anton's vision of conservatories (and opera houses) all over Russia was to be realized, producing instrumentalists and singers of a higher quality than he could ever have foreseen. This greatly enhanced the social status of musicians, and when Anton resumed the directorship of the St Petersburg Conservatory in 1887 he again became a pre-eminent figure in Russian musical education, whose far-reaching ideas were to be the basis of music as it is still taught in Russia. Tchaikovsky was one of his earliest students.

However, Rubinstein's principal claim to international fame was as a pianist. As a young man he had admired Liszt, studying carefully his mannerisms on the concert platform. This admiration continued throughout the older man's life and, like Liszt's, Rubinstein's recitals were tremendous occasions. He was always very nervous beforehand, and his interpretations were not totally preordained; there was always an element of surprise. Such was his magnetism that he held his audiences in thrall, and they in turn formed an integral part of his music-making. Hanslick wrote ecstatically of Rubinstein's rendering of Chopin's Sonata no.2 in B♭ minor, averring that there were no sentimental fluctuations of pace in his rubatos, nor was there any affectation in his playing, though its power was 'elemental'. Even Balakirev wrote to Tchaikovsky that 'he played exquisitely a Beethoven sonata (in C major) [the Waldstein] and pieces by Chopin'.

Rubinstein's stamina was astonishing. On his tour of the USA with Wieniawski he gave no less than 215 recitals between 10 September 1872 and 24 May 1873; the proceeds of the tour 'laid the foundations of my prosperity', he wrote in his autobiography. His repertory was enormous, as is shown by the series of seven 'historical' recitals given on a tour of Europe and Russia in the 1885–6 season, ranging from Byrd, Bull, Couperin and Rameau in the first recital to contemporary Russian composers in the last, with a selection of the music of most of the major composers, including C.P.E. Bach and Weber, in between.

2. Works. Rubinstein composed assiduously during all periods of his life. He was able, and willing, to dash off for publication half a dozen songs or an album of piano pieces with all too fluent ease in the knowledge that his reputation would ensure a gratifying financial reward for the effort involved. But only the Melody in F op.3 no.1 for solo piano achieved lasting popularity (testified to by the 12 pages of arrangements of this piece, for various instrumental and vocal combinations, in the catalogue of the British Library). Some of the songs achieve a certain distinction, and in his chamber music a movement here or there (such as the Scherzo from the String Quartet no.3) sometimes rises above the commonplace. But both here and in his numerous attempts at large-scale works, there are, too often, signs of haste. As Paderewski was later to remark, 'He had not the necessary concentration of patience for a composer'. For example, good ideas in the Symphony no.2 ('Ocean') are developed in a trivial manner and this and other similar works reveal his fatal facility as a note-spinner. He was prone to indulge in grandiloquent clichés at moments of climax, preceded by over-lengthy rising sequences which were subsequently imitated by Tchaikovsky in his less inspired pieces; together with an unihibited use of the diminished 7th chord, these characteristics are lavishly displayed in all four piano sonatas. Only the second-movement Allegretto con moto, a charming little march-scherzo, from the Third Piano Sonata, Rubinstein's own favourite, is altogether free from padding and very considerable reliance upon Mendelssohn and Schumann; an instance of Chopin's influence is to be found in the scherzo of the Fourth Sonata, in which the rhythm is directly taken from the scherzo of Chopin's B♭ minor sonata.

His greatest success as a composer came in a brief middle period which started with the Fourth Piano Concerto in D minor (1864) and finished with the opera *Demon* ('The Demon', 1871, first performed in January 1875). Between these works are sandwiched two important orchestral works, *Don Quixote*, which Tchaikovsky thought was 'very interesting and well done' although 'episodic' in construction, and *Ivan IV Grozniy*, 'a wonderful piece' in Tchaikovsky's opinion; Tchaikovsky arranged both works for piano duet. *Ivan IV Grozniy* was given its first performance on 2/14 November 1869 by none other than Balakirev, who greatly admired it; Borodin commented that 'the music is good, you just cannot recognize that it is Rubinstein. There is nothing that is Mendelssohnian, nothing as he used to write formerly'. In this powerful, imaginative and perceptive evocation of Ivan's complicated personality, Rubinstein dexterously incorporates a number of contrasting themes into an atypically unconventional variant of sonata form, with a slow, magisterial, fully integrated introduction; the inevitable sequences and diminished 7ths are for once used effectively and convincingly. Nor does he indulge in bombastic orchestration: the scoring is for a standard orchestra with double woodwind plus piccolo, normal brass (including tuba), and only timpani in the percussion section.

Ivan IV Grozniy did not achieve the huge success of *Demon* or the Fourth Piano Concerto, both of which retain a precarious foothold in the repertory today. Together with its predecessors, the Fourth Concerto (the full score of which was published in 1872 in a revised and improved version) greatly influenced Tchaikovsky's piano concertos, particularly the first (1874–5), and the superb finale, with its introduction and scintillating principal subject, is the basis of very similar material at the beginning of the finale of Balakirev's Piano Concerto in E♭ major; this finale was written down after Balakirev's death in 1910 by his collaborator and friend Sergey Lyapunov, who had heard Balakirev play it many times. The first movement of Balakirev's concerto had been written, partially under the influence of Rubinstein's Second Concerto, in the 1860s.

In the decade or so after 1875, *Demon* ('The Demon'), with a libretto based on a well-known Lermontov narrative poem, received no less than 100 performances; by the end of the century, with the exception of Glinka's *A Life for the Tsar*, it had outstripped in popularity all other operas, including those of Meyerbeer to which it is partially indebted. Tchaikovsky considered that, in spite of 'much padding', *Demon* contained 'lovely things', and it certainly influenced his opera *Yevgeny Onegin*, which, like *Demon* is an opera in 'Three Acts, Seven Scenes'. The delicate style of the Russian chamber romance which epitomizes the portrayal of Rubinstein's Tamara is echoed in Tchaikovsky's portrayal of Tat'yana. In scene 3, Rubinstein's 'orientalisms' are as satisfactory as those employed in the later Symphony no.5 in G minor and the opera *Kupets Kalashnikov* ('The Merchant Kalashnikov') are unconvincing. The part of the Demon himself is one of the finest in Russian opera, and was a favourite role of Chaliapin.

The rest of Rubinstein's vast output consists of other operas including *Die Maccabaër*, popular both in Germany and in Russia, sacred operas, six symphonies, including no.2 ('The Ocean'), which he dedicated to Liszt, and with which he tinkered over a period of 29 years, finishing up with seven rather than the original four movements, violin and cello concertos, innumerable songs, chamber music including violin, viola and cello sonatas and, besides the piano sonatas, many other piano pieces.

3. PUBLICATION HISTORY. For financial reasons, Rubinstein preferred to publish his music abroad because, not only would it in consequence have increased sales, but Russia did not belong to any international copyright convention; therefore, the locations of the publishers in Germany or the Austrian Empire are given, unless the works were published only in Russia or are known to have been first published there. Often works were published both in Russia (with the copyright being ceded to the publisher for distribution within the Russian Empire) and also, more or less simultaneously, abroad.

The groups of songs, whether to German texts, or to Russian texts which included German translations in German speaking countries, were published there as 'Lieder'. In Russia, the same songs (to Russian texts) were normally published as 'Romansï'; but occasionally, if published by a Russian publisher who held world rights to the songs, the importance of the German market might dictate that settings of Russian texts with German translations were published as 'Lieder', especially if the publisher had a branch in Leipzig and had made arrangements to publish there. Because of the confused position, the English title 'Songs' is given for Rubinstein's collections.

During the course of his working career, Rubinstein's compositions were published by no fewer than 21 different firms in eight locations, as follows:

Outside Russia Berlin: Bote & Bock; Schlesinger. Cologne: Schloss. Leipzig: Breitkopf & Härtel; Hofmeister; Kahnt; Kistner; Peters; Schuberth; Senff (his principal publisher in later years); Siegel. Mainz: Schott. Pest: Rozsavölgyi. Vienna: Haslinger; Lewy; Spina; Wessely.

Within Russia St Petersburg: Bernard; Bessel'. Moscow: Gresser; Jürgenson. Bessel' and Jürgenson were his Russian publishers in later years. The latter had an important branch in Leipzig.

WORKS

STAGE

Kulikovskaya bitva [The Battle of Kulikovo] (3, V. Sollogub [Acts 1, 3] and V. Zotov [Act 2], after V. Ozerov: *Dmitry Donskoy*), 1849–50, St Petersburg, Bol'shoy, 18/30 April 1852. 1 aria *RUS-SPsc*, some vocal pts, *SPtob*, ov. (Berlin, 1865); also known as Dmitry Donskoy

Sibirskiye okhotniki [The Siberian Hunters] (romantic op, 1, A. Zherebtsov), 1852, Weimar, Hof, 9 Nov 1854, as Die sibirischen Jäger, vs (Leipzig 1893)

Sten'ka Razin (3, M. Voskresensky), 1852, inc.

Mest' [Revenge] (tragic op, 1, A. Zhemchuzhnikov, after M. Lermontov: *Hajji-Abrek*), 1852–3, unperf., music lost but for Zulima's song

Fomka-durachok [Tom the Fool] (comic op, 1, M. Mikhaylov), St Petersburg, Aleksandrinskiy, 30 April/12 May 1853, lost

Das verlorene Paradies (sacred op, 3, A. Schlönbach, after J. Milton: *Paradise Lost*), op.54, 1855–6, Weimar, Hof, 1 March 1858 (concert perf.), staged Düsseldorf, 1875 (Leipzig, 1860)

Die Kinder der Heide (4, S.H. Mosenthal, after C. Beck: *Janos, Herdsman of Hungary*), Vienna, Kärtnertor, 23 Feb 1861, vs (Leipzig, 1861); perf. in Russia from 1867 as Deti stepey [Children of the Steppes] (Moscow, 1887)

Feramors (lyric op, 3, J. Rodenberg, after T. Moore: *Lalla Rookh*), 1861–2, Dresden, Hof, 24 Feb 1863 (Leipzig, 1864)

Der Thurm zu Babel (sacred op, 1, Rodenberg), op.80, 1868–9, Königsberg, 9 Feb 1870 (concert perf.), *D-KA*; (Leipzig, 1870)

Demon (fantastic op, prol., 3, P.A. Viskovatov and A. Maykov, after Lermontov), 1871, St Petersburg, Mariinskiy, 13/25 Jan 1875, *RUS-SPtob**; (St Petersburg, 1876); subsequently pubd as *Der Dämon*

Die Maccabäer (3, Mosenthal, after O. Ludwig), 1872–4, Berlin, Königliche, 17 April 1875 (Berlin, 1876)

Néron [Nero] (4, J. Barbier, rev. Rubinstein), 1875–7, Hamburg, Dammtor, 1 Nov 1879 (Moscow, 1884)

Kupets Kalashnikov [The Merchant Kalashnikov] (3, N.I. Kulikov, after Lermontov), 1877–9, St Petersburg, Mariinskiy, 22 Feb/5 March 1880 (Leipzig, n.d.)

Sulamith (biblical representation, 5 scenes, Rodenberg, after the *Song of Songs*), 1882–3, Hamburg, Dammtor, 8 Nov 1883 (Berlin, 1884)

EDWARD GARDEN

Rubinstein, Artur [Arthur] (*b* Łódź, 28 Jan 1887; *d* Geneva, 20 Dec 1982). American pianist of Polish birth. At the age of three he was taken to Berlin to play for Joseph Joachim, who confirmed his immense promise. After lessons in Łódź and Warsaw and a first concert appearance at Łódź at the age of seven, he returned in 1897 to Berlin where his musical education was supervised by Joachim, Heinrich Barth taking charge of his piano studies and Max Bruch and Robert Kahn his theoretical instruction. In December 1900 he made his Berlin début under Joachim, playing Mozart's Concerto K488, solos by Schumann and Chopin, and Saint-Saëns's G minor Concerto, a vehicle for Rubinstein's virtuosity throughout his career. His success led to further appearances in Germany and Poland, and to his Paris début in 1904. He made his American début with the Philadelphia Orchestra at Carnegie Hall in 1906 but did not receive an enthusiastic reception, owing to his extreme youth.

By this time Rubinstein had dispensed with regular piano instruction, although he was to spend periods with Paderewski in Switzerland; natural facility aided him in greatly enlarging his repertory, and a gift for sight-reading, orchestral transcription and accompanying singers and chamber musicians, as well as his extrovert, witty personality, won him popularity in social as well as concert-hall music-making. In later years he was to recognize that his youthful exuberance, untempered by disciplined study or the prolonged influence of a mature piano master, had allowed him to give many under-prepared performances. Such immaturity was mentioned, among expressions of admiration for the evidence of natural flair and vivacity, by critics at the time of his first American tour in 1906. Appearances in Austria, Italy and Russia preceded his début in London in 1912; domiciled mainly in London during World War I, he served as a military interpreter (he spoke eight languages fluently) but was also active as accompanist to Eugene Ysaÿe. He visited Spain and South America in 1916–17, conceiving what was to be a lifelong enthusiasm for the music of Granados, Albéniz, Villa-Lobos and, especially, Falla.

Thereafter, Rubinstein pursued a similarly active career until his marriage to Aniela Mlynarski in 1932, after which he withdrew for a long period of contemplation, technical consolidation and restudy of his repertory. A new discipline balancing brilliant temperament was observed in his playing, especially during his American tour of 1937, when previously grudging critics recognized his place among the great players of the century. After spending World War II in the USA, he became an American citizen in 1946. Rubinstein continued his international concert tours with an energy that seemed increasingly phenomenal. It was not uncommon, in his 70s and 80s, for him to play in a single evening both Brahms concertos or three by Beethoven; in chamber music, he was partner to Heifetz and Feuermann (later Piatigorsky), Paul Kochanski, Henryk Szeryng and the Guarneri Quartet in the 1960s and 70s. He made more than 200 recordings, including the complete piano works of Chopin and three LP versions of the complete Beethoven concertos.

The Arthur Rubinstein International Piano Master Competition was founded in his honour in Israel in 1974 and during his elderly years he maintained an active interest in the encouragement of young pianists, including François-René Duchable and Krystian Zimerman; he also maintained support for the development of musical education in Israel. He retired from the concert stage in 1976 and the same year was awarded the United States Medal of Freedom. The first volume of his autobiography, *My Young Years*, was published in London in 1973 and the second volume, *My Many Years*, followed in 1980.

Artur Rubinstein with Daniel Barenboim

Bach, Mozart, Beethoven and principal 19th-century Romantics, played with a directness owing nothing to the Romantic rhythmic distortions still fashionable in Rubinstein's youth, all enjoyed a place in his huge repertory. As a young man, he was renowned for his ardent championship of such composers as Szymanowski, Stravinsky, Debussy, Ravel, Poulenc, Prokofiev and the Spanish and South American composers already mentioned. Chopin only gradually replaced Brahms as the composer arousing the pianist's strongest and deepest artistic instincts; yet it is above all as a Chopin interpreter that Rubinstein's place among the greatest players of the 20th century is assured. In all the piano works, from the concertos to the F♯ Nocturne op.15 no.2, which served as a favourite encore, the warmly outgoing and beneficent lyricism of his phrasing, expressed in tones of richest and most gorgeous hue, provided an ideal standard of Chopin interpretation – not necessarily flawless in virtuosity but imbued with an inimitable spirit of civilized yet passionate eloquence and aristocratic poetry.

MAX LOPPERT/R

Rubinstein [Rubinshteyn], **Nikolay (Grigor'yevich)** (*b* Moscow, 2/14 June 1835; *d* Paris, 11/23 March 1881). Russian pianist, conductor and teacher, brother of ANTON RUBINSTEIN. His talents as a pianist became apparent early on. While the family was in Berlin (1844–6) he studied the piano with Kullak and harmony and counterpoint with Dehn. When they returned to Moscow in 1846 he had piano lessons with Villoing, who toured Russia with the child virtuoso. To avoid army conscription he studied medicine at Moscow University, graduating in 1855.

In spite of his obscure social origins, this gregarious, extrovert, generous, charming *bon vivant* was welcome in all the fashionable aristocratic houses in Moscow, a city for which he had a special affection. He founded the Moscow branch of the Russian Musical Society in the 1859–60 season. In 1864 he moved to a larger house in which he and several colleagues taught various musical subjects. This establishment was granted an imperial charter as a conservatory, but initially it was humbler than that at St Petersburg. Rubinstein engaged the young Tchaikovsky as a teacher of harmony in 1866. It was he, not his brother Anton (who had been Tchaikovsky's teacher), who encouraged Tchaikovsky and performed his compositions, but in a notorious incident he attacked Tchaikovsky's First Piano Concerto at its first, private performance; later he recanted and became a celebrated interpreter of the work. In 1869 when Balakirev, who two years earlier had succeeded Anton Rubinstein as conductor of the St Petersburg branch of the Russian Musical Society, was forced to resign by the Grand Duchess Yelena Pavlovna, Nikolay generously gave Balakirev his support. It was indicative of this support and of Nikolay's extraordinary powers as a pianist that he should have given a brilliant first performance of Balakirev's enormously difficult piano piece *Islamey* only two months after its completion, despite a heavy programme of teaching, conducting and administration and his very full social life. He conducted and performed the music of the nationalist 'New Russian School' in the 1860s and 70s to a much greater extent than his brother was able to do.

Nikolay Rubinstein

Anton would not acknowledge that Nikolay was his inferior as a pianist, though the latter was not well known outside Russia. The technique of both was excellent, but whereas Anton rarely played the same piece twice in the same way (preferring to allow himself to be inspired and to carry away his enraptured audience on the spur of the moment), Nikolay's playing was much more detached and analytical. His performances emphasized salient features of the structure of a piece and revealed great clarity of detail. Nikolay, when asked why he did not compose more, replied that his brother Anton 'composed enough for three'; his own compositions are unimportant. Both brothers were vigorous, uninhibited teachers and frequently screamed at their pupils, who nevertheless adored them. Nikolay's best-known pupils were Taneyev, Ziloti and Emil Sauer. He died of consumption in a Paris hotel on his way to Nice for health reasons. It was typical of him that he ate a dozen oysters on his deathbed. A scholarship in his name was founded by his numerous friends and admirers, and Tchaikovsky composed the Piano Trio in A minor in his memory, basing the variations on (undisclosed) events in Rubinstein's life.

EDWARD GARDEN

Rubinus (i). Composer, possibly French. He is named as the composer of the song *Entre Peronne et Saint Quentin* (*Der bauern Schwanz*) in the Glogauer Liederbuch. For context and possible identity *see* ROBINET.

Rubinus (ii) (*fl* 1447–8). ?Franco-Flemish singer. *See* LE ROUGE, G.

Rubio, David (Joseph) (*b* London, 17 Dec 1934). English maker of violins, viols, lutes, guitars and harpsichords. He began to learn the guitar while at school. After taking medical degrees at Trinity College, Dublin (1957), he spent four years in Spain perfecting his guitar playing and gathering information about guitar making. He went to the USA in 1961 as solo guitarist of a Spanish dance

company. After working as a performer and researching into instrument making, he opened his workshop in New York in 1964. In 1967 he returned to England, establishing a workshop in Duns Tew, near Oxford, in 1968; in 1979 he moved to Cambridge.

In 1969 Rubio began to construct harpsichords, mainly large two-manual instruments after 18th-century French, and occasionally Flemish, models. In 1972 he produced his first viols and violins of pre-19th-century design, later adding cellos of similar type to his output. Rubio's approach to his craft is essentially historical but he also builds instruments of the violin family with modern measurements and fittings. He has also developed a new guitar with eight strings tuned from *A* to *a''* and an asymmetrical fretboard, an instrument capable of greatly expanding the repertory. Rubio's instruments of all types are admired for the perfection of their finish as well as their exceptional tonal qualities. His writings include 'The Anatomy of the Violin', *The Book of the Violin*, ed. D. Gill (Oxford, 1984), 17–47.

HOWARD SCHOTT

Rubio, Hilarion (Francisco) (*b* Bacoor, Cavite, 21 Oct 1902; *d* Bacoor, 28 Dec 1985). Filipino composer and writer on music. At an early age he learnt to play the violin, the piano and the clarinet under an Aglipayan priest. He took preparatory law courses at the Far Eastern Institute (Associate in Arts 1927) and then entered the University of the Philippines Conservatory, where he received a teacher's diploma in theory and composition in 1933. Later he taught at the university and was assistant secretary of its conservatory (1939–41). He also taught in other institutions, becoming director of the Conservatory of Centro Escolar University (1944–5). Founder-president of the Philippine Bandmasters' Association, he conducted concerts and stage performances in the Philippines and elsewhere in Asia. He also published articles on Philippine music, into which he has made dedicated research. He made four goodwill trips to Taiwan (1956–60), for which he received the Friend of China Award. Among his prizes and honours is a diploma of merit from the University of the Philippines on his retirement (1967).

WORKS
(*selective list*)

Dramatic: The Elements (ballet), 1940; Ang Konsiyerto (ballet), 1974; film scores

Orch: Florante at Laura, ov., 1933; Filipinas Kong Mahal [My Beloved Philippines], sym. ov., 1960; Sym. for Greatness, 1966; Panamin Vc Conc., 1970; San-Abel, cl conc., 1984; band works

Choral: National Heroes Day Hymn, 1934; Philippines Triumphant, 1936; To the Filipino Youth, cant., 1951; Prelude and Fugue, chorus, orch, 1960; Second Decalogue, sym. ode, chorus, orch, 1963; folksong arrs.

LUCRECIA R. KASILAG

Rubio (Calzón), Samuel (*b* Posada de Omaña, 20 Aug 1912; *d* Madrid, 15 March 1986). Spanish musicologist. In his early youth he joined the Augustinian order and studied philosophy and theology. He spent long periods in Benedictine monasteries, including Montserrat and Silos, studying Gregorian chant, and in Solesmes studying Gregorian palaeography. From 1952 to 1955 he studied sacred music and musicology at the Pontificio Istituto di Musica Sacra, Rome, where in 1967 he took the doctorate in musicology under Anglès with a dissertation on Morales. He was choirmaster and organist at the Escorial (1939–59, 1971–2) and in 1972 became professor of musicology at the Madrid Conservatory.

Rubio was the most important Spanish musicologist outside Anglès's group at the Instituto Español de Musicología, Barcelona. His work was more distinctive for its quality than its quantity; it dealt with central moments in the history of Spanish music, including a stylistic analysis of Morales, an account of essential facets of Victoria's work and a study and publication of Soler's sonatas and villancicos. All his work was characterized by thorough scholarship.

JOSÉ LÓPEZ-CALO

Rübsam, Wolfgang (*b* Giessen, 16 Oct 1946). German organist. As a child he studied the piano with Elly Hertel, and from 1963 to 1967 studied the organ with Erich Ackermann, cathedral organist in Fulda. He subsequently studied church music at the Frankfurt Hochschule für Musik (until 1969), where Helmut Walcha was his organ teacher. From 1969 to 1970 he studied at the Southern Methodist University in Dallas, Texas, in the organ class of Robert T. Anderson. Rübsam then renewed his studies with Walcha in Frankfurt. After taking his recital diploma he was from 1971 to 1974 a pupil of Marie-Claire Alain in Paris. While still a student he achieved success in competitions: in 1970 he won first prize in the National Organ Playing Competition in Fort Wayne, Indiana, and in 1973 the Grand Prix at Chartres (for interpretation). From 1972 to 1974 he was organist at Marienstatt Abbey near Hachenburg, and from 1972 assistant professor, from 1978 to 1986 associate professor, and from 1986 full professor at the Northern University of Chicago. In 1980 he was appointed organist of the University of Chicago. Rübsam has given many concerts in the USA and Europe, and his recording career is extensive. In 1975 he recorded the complete works of J.S. Bach (for Philips), and in the late 1990s began a new recording of Bach's complete works for organ and keyboard (for Naxos).

GERHARD WIENKE

Rubsamen, Walter H(oward) (*b* New York, 21 July 1911; *d* Los Angeles, 19 June 1973). American musicologist. He studied the flute in New York with George Barrère and Meredith Willson. At Columbia University, where he took the BA in 1933, his professors included Lang, Moore and Mason. He did graduate work at the University of Munich under von Ficker and Ursprung and took the doctorate in 1937 with a dissertation on Pierre de La Rue. He taught at UCLA from 1938 until his death; from 1966 to 1973 he served as chairman of the department of music. He was also a visiting professor at the University of Chicago, Columbia University and the University of Berne. Rubsamen's interests included music of the Renaissance, ballad opera, music and politics and descriptive music. He studied the secular music of late 15th- and early 16th-century Italy, and his investigations of the verse forms used by the frottola composers resulted in an important monograph on the literary-musical relationships of the period. His research in European and American libraries also produced a number of manuscript studies and articles about his archival discoveries.

PAULA MORGAN

Rubtsov, Feodosy Antonovich (*b* Ol'sha [now in Smolensk province], 17/30 Dec 1904; *d* Leningrad, 6 Nov 1986). Russian ethnomusicologist. He studied composition with Steinberg at the Leningrad Conservatory, graduating in 1931, and was accepted into the Composers' Union in 1932. From 1936 he undertook fieldwork on a number of ethnographic expeditions in Leningrad, the Vologda region, the Russian provinces of Pskov and Smolensk, and Belarus'. He was head librarian of the archive of folk music recordings at the Institute of Russian Literature (Pushkin House) in Leningrad (1945–8), a teacher at the Leningrad Conservatory (1948–85), an officer at the Leningrad Institute of Theatre, Music and Cinematography (1957–67) and chairman of the department of musical folklore at the Leningrad division of the Composers' Union (1966–84). He gained the *Kandidat* degree in 1963 with a dissertation on the similarities of intonation in the songs of the Slavs, and was appointed professor at the Leningrad Conservatory in 1978.

Rubtsov's main area of research was Slav music. Unlike other ethnomusicologists, who relied on comparative research into note sequences or rhythm in singing, he made the primary melodic turns ('popevki') with their fixed semantic characteristics his starting point. These characteristics can be highlighted by associating their contours with those found in primeval exclamations, narratives, laments and songs timed to coincide with ancient rituals. With the results of his investigations Rubtsov developed a semantic theory of cadence that was unprecedented in ethnomusicology. Resisting the customary method of dating folksongs according to their ranges, he advanced the unusual theory of there being an early stage in the development of modes when melodies consisted of sequences of three to four degrees of the scale. His work aroused a fierce controversy that did not abate until his concept was confirmed by Alekseyev's own theory of intonation in early folklore.

M.A. LOBANOV

Ruby [Rubi], **Guillaume** (*fl* 1399–1450). Franco-Flemish singer and organist. *See* LE ROUGE, G.

Ruby, Harry [Harold] (*b* New York, 27 Jan 1895; *d* Los Angeles, 23 Feb 1974). American composer and lyricist. He began a career as a pianist in cafés, nickelodeons and vaudeville, and worked as a song-plugger for Gus Edwards and Harry von Tilzer. With the fellow vaudevillian Bert Kalmar (*b* New York, 16 Feb 1884; *d* Los Angeles, 18 Sept 1947) he formed a songwriting partnership, Kalmar contributing the lyrics and Ruby the melodies. Their first success was *When those sweet Hawaiian babies roll their eyes* (1917), which was followed by many other popular comic and novelty songs, including *Three Little Words* (1930), which supplied the title of their film biography in 1950. Kalmar and Ruby collaborated on stage scores for Broadway, such as *Helen of Troy, New York* (1923), *The 5 O'Clock Girl* (1927) and *Animal Crackers* (1928, starring the Marx Brothers and including what became Groucho Marx's theme song, *Hooray for Captain Spaulding*). They also wrote musical scores and screenplays for Hollywood, including *The Kid from Spain* (1932) and *Duck Soup* (1933).

WORKS
(*selective list*)

STAGE
all are musicals, first performed in New York; librettists are listed in parentheses; all lyrics are by B. Kalmar

Helen of Troy, New York (G.S. Kaufman, M. Connelly), 19 June 1923 [incl. Helen of Troy, New York, I like a big town]
No Other Girl (A. Hoffman), 13 Aug 1924
The Ramblers (G. Bolton), 20 Sept 1926 [incl. All Alone Monday]; film: The Cuckoos, 1930 [incl. I love you so much]
Lucky (O. Harbach), 22 March 1927 [musical collab. J. Kern]
The 5 O'Clock Girl (Bolton, F. Thompson), 10 Oct 1927 [incl. Thinking of You]
Good Boy (O. Hammerstein, Harbach), 5 Sept 1928 [musical collab. H. Stothart]
Animal Crackers (Kaufman, M. Ryskind), 23 Oct 1928 [incl. Hooray for Captain Spaulding]; film, 1930
Top Speed (Bolton), 25 Dec 1929; film, 1930
High Kickers (G. Jessel), 31 Oct 1941

FILMS
lyrics by Kalmar

Check and Double Check, 1930 [incl. Three Little Words]; Horse Feathers, 1932 [incl. Everyone says 'I love you']; The Kid from Spain, 1932 [incl. Look what you've done]; Duck Soup, 1933; Hips Hips Hooray, 1934 [incl. Keep on doin' what you're doin']; Walking on Air, 1936; Everybody Sing, 1938

SONGS
lyrics by Kalmar unless otherwise stated

When those sweet Hawaiian babies roll their eyes (1917); Who's sorry now? (1923); I wanna be loved by you (1928); Nevertheless (1931); A Kiss to Build a Dream On (Kalmar, Hammerstein) (1935); What a beautiful night (1935); When you Dream about Hawaii (1937); Ain'tcha comin' out? (1939); The Egg and I (1947)

SAMUEL S. BRYLAWSKI

Ruch′yevskaya, Yekaterina Aleksandrovna (*b* Detskoye Selo [now Pushkin], 22 Aug 1922). Russian musicologist and music critic. She studied at the Leningrad Conservatory (1944–9), specializing in musicology with S.N. Bogoyavlensky and composition with M.O. Steinberg and Yu.V. Kochurov, and subsequently undertook postgraduate studies there with A.N. Dmitriyev (1950–53). In 1953 she was appointed to teach at the conservatory, becoming a reader in 1966 and professor in 1981. After gaining the *Kandidat* degree in 1963 for her dissertation *Vokal′noye tvorchestvo Yu.V. Kochura* ('The Vocal Art of Kochurov'), Ruch′yevskaya was awarded the doctorate in 1979 for the dissertation *Struktura i funktsii muzïkal′noy temï* ('The Structure and Functions of Themes in Music'). She is a member of the Russian Federation Union of Composers.

Ruch′yevskaya's area of research encompasses the fundamental problems of musical form, genre, style and the relationship between word and music, studied within a historical and cultural context over a broad range of musical material. Central to her work is her stance on the functional nature of the musical theme. She defines it as an element of the structure of the text and demonstrates that it is the interaction of the theme and its variants that causes the development of form. Her typology of structural and functional types of thematicism, which has become the academic standard with regard to the general forms of sound and zones of distinct and summary perception, also takes into consideration the rhythmic and timbral thematicism current in 20th-century music. She considers large-scale cyclic forms, for example, to be the result of the interaction of principles of structure and genre and their subsequent alteration in the process of stylistic evolution. She has also studied the theory of syntax and has devised a hierarchical system of syntactic levels. In vocal music she has demonstrated the principles of transformation of speech intonation into music, elaborated in detail the classification of melodic types and has also been the first in Russia to study opera as an integral form, as the manifestation of operatic drama within a thematic development.

As the originator of fundamental concepts and the teacher of a whole generation of musicians in Russia and other countries, Ruch′yevskaya is one of the most authoritative figures in contemporary Russian musicology. (*SKM*, ii).

NINA YUR'YEVNA AFONINA

Ruckers [Ruckaert, Ruckaerts, Rucqueer, Rueckers, Ruekaerts, Ruijkers, Rukkers, Rycardt]. Flemish family of harpsichord and virginal makers. In the 16th, 17th and 18th centuries their instruments influenced the manufacture of string keyboard instruments throughout western Europe, and during the 20th-century revival of harpsichord making their sound has been highly regarded and emulated.

I. The family. II. The instruments.

I. The family

It seems likely that the family originated in Germany: a merchant named Hans Ruckers, whose name appears in documents in the Antwerp city archives dating from 1530, is described as from 'Weyssenburg', and a German organ builder named Arnold Rucker was depicted by Dürer when he visited Antwerp in 1520.

(1) **Hans Ruckers** (*b* Mechelen, between *c*1540 and *c*1550; *d* Antwerp, 1598). He married Adriana Cnaeps in 1575; they had 11 children. Two of his sons later followed him as harpsichord makers, and his daughter Catharina married into the COUCHET family of instrument makers; her son Joannes worked in the Ruckers workshop. In 1579 Hans Ruckers became a member of the Guild of St Luke, the Antwerp arts guild, although his name appears in the guild register in 1576 and 1578; Antwerp citizenship was usually a condition of membership of the guild and since Ruckers did not become a full citizen until 1594 he may previously have lived outside Antwerp as an 'outside citizen', possibly in Schoten, where his father-in-law was a landowner. In 1584 he rented a house in the Jodestraat of Antwerp, a few metres from where Rubens lived; in 1597 he bought the property. From the marriages that his children and grandchildren made into Catholic families it may be inferred that Ruckers himself was Catholic; one of his children was baptized secretly during the short period of Protestant rule in Antwerp, and his business continued during the religious persecution which affected other builders, some of whom had to leave the city.

The work of Hans Ruckers resembles that of older builders such as Hans Bos and Marten van der Biest, and even in some respects that of Hans Grauwels, but it is not known whether he learnt his craft with any of these makers. Links between Ruckers and Van der Biest are known: Van der Biest (although he seems to have been a Protestant) was a witness at Ruckers's wedding, and a man from the Ruckers workshop joined Van der Biest in Amsterdam (where he began building after losing his property in Antwerp) after 1585. Another Antwerp harpsichord maker and member of the Guild of St Luke, Willem Gompaerts (*b* *c*1534; *d* after 1600), stood godfather to Catharina Ruckers.

Hans Ruckers built the various parts of his instruments separately and numbered them for later identification and assembly (where an instrument has parts with discrepant numbering it is likely that it was made after his time from parts of different instruments). After assembly he would finish the instrument (according to the report of a lawsuit in 1594 relating to events in 1585) by means of 'the "secret" and his craft' and by stringing, voicing and 'signing it with the usual mark' (his initials worked into the rose of the instrument). The few surviving instruments by Hans Ruckers are mostly virginals from the 1580s and 1590s (*see* VIRGINAL, figs.5 and 6), now in Berlin, Bruges, New York, Paris and New Haven (Yale University). Although he is known to have been an organ builder (he was paid for work on the organ of the St Jacobskerk and

of Antwerp Cathedral from 1591 onwards), no example built by him is known.

(2) **Joannes** [Hans, Jan] **Ruckers** (*b* Antwerp, bap. 15 Jan 1578; *d* Antwerp, 29 Sept 1642). The eldest son of (1) Hans Ruckers, he married a granddaughter of the composer Hubert Waelrant. On his father's death he became a partner in the business with his brother, (3) Andreas Ruckers (i), but in 1608 Joannes bought out his brother to become sole owner. In view of Joannes's young age, and the fact that he was not yet registered as a master in the Guild of St Luke, it is possible that Gompaerts, the family friend, was connected with the Ruckers workshop at that time. The ledgers of the guild record the entry in 1611 of 'Hans Rukers, sone, claversigmaker', evidently Joannes Ruckers; from 1616 he served the archdukes of the Netherlands in Brussels as a builder of organs and harpsichords (in 1623 he shared with Jan Breughel, Rubens and two others the privilege of being excused service in the civic guard). About 1627 his nephew Joannes Couchet joined the Ruckers workshop. In 1656 the house was owned by Joannes Ruckers's grandson, a cloth merchant, although Couchet continued the workshop after his uncle's death. His more than 35 extant instruments are now in Berlin, Brussels, Edinburgh, London, Paris and elsewhere.

(3) **Andreas** [Andries] **Ruckers (i)** (*b* Antwerp, bap. 30 Aug 1579; *d* Antwerp, after 1645). Second son of (1) Hans Ruckers. He and his brother learnt their craft from their father. In 1605 he married; he had seven children, although four died very young. His daughter Anna married the painter Jan Davidsz. de Heem in 1644. It is not known where he moved after he sold his share in the workshop to his brother in 1608, but in 1616 he seems to have lived 'bij Kerckhof, bij den scoenkramen' (now the Groenplaats en Schoenmarkt; the house has not been identified). He lived in Lombardenvest in 1619 and in 1640 he was in Huidevettersstrate, probably as a tenant. He was still alive in September 1645, and references to an Andreas Ruckers as godfather to his daughter Anna's children in 1651 and 1654 may be to him. He does not appear in the records of the Guild of St Luke, but Jan Moretus, dean of the guild, mentioned him as a member in 1616–17, and in 1619 the guild ordered a harpsichord from him. Instruments made or signed by him, dated between 1607 and 1644, are now in Antwerp, Berlin, Boston, Bruges, Brussels, Cincinnati, Edinburgh, The Hague, Leipzig, London, Munich, Nuremberg, Paris, Vermillion (South Dakota), Washington, DC, New Haven (Yale University; *see* HARPSICHORD, fig.5) and elsewhere.

(4) **Andreas** [Andries] **Ruckers (ii)** (*b* Antwerp, bap. 31 March 1607; *d* Antwerp, before 1667). The only son of (3) Andreas Ruckers (i) to become a harpsichord maker. He married Joanna Hechts in 1638, and the mention in the same year (in the records of the Guild of St Luke) of 'Rickart, claversingelmaker, wijnmeester' may refer to him. In 1639 he rented a house in Everdijstraat. His wife died of the plague in 1653, leaving him with six young children. He probably learnt his craft in his father's workshop: an inscription dated 1644 refers to his father as 'Andreas, den Ouden', an indication that they were both active in that year. At least seven instruments by Andreas Ruckers (ii) survive from the 1640s and early 1650s. They are in Boston, Copenhagen, Leipzig, London, Nuremberg, Paris and Peeblesshire, and are the last instruments made by this branch of the family.

Several other Antwerp harpsichord makers were close to the Ruckers, and were probably subcontractors to the family workshops. The Gompaert, Britsen and Hagaerts also helped the family in difficult times, such as after the deaths of Hans, Andreas (ii), and Joannes Couchet (1655).

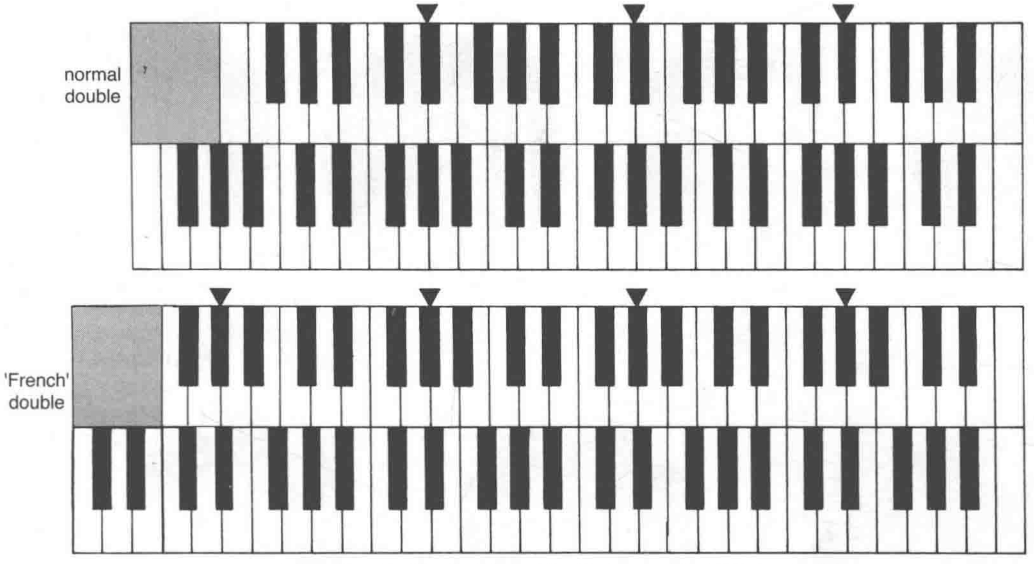
Two virginals (in Namur and New York) have roses, with the initials 'CR', that are somewhat like other Ruckers roses. They are built in the Ruckers tradition, are decorated with 17th-century features, and incorporate subsequent alterations. They are no longer thought to have been the work of Christoffel Ruckers, an organ player living around the middle of the 16th century in Dendermonde, who, however, has not been identified as a member of the main Ruckers family.

II. The instruments

The extant Ruckers virginals are, with the exception of one six-sided virginal made by (1) Hans Ruckers in 1591, all rectangular in shape with the keyboard on one of the long sides and the strings running almost parallel to the long direction of the instrument. These virginals were made in six different sizes depending on their pitch, the larger instruments being six Flemish feet (170 cm) long and the smallest two and a half Flemish feet (71 cm). The larger of these different sizes of virginal were made in two distinct types called spinetten and muselars. The spinetten had their keyboard placed towards the left-hand side of the instrument and were rather bright in sound since the strings were plucked near their ends. But the muselars, with their keyboard placed to the right (fig.1), had a round, 'plummy' sound since the strings were plucked nearer to their middle. The most elaborate virginals combined two instruments, one at octave and one at unison pitch; when the octave instrument was positioned on top of the larger, the actions would couple and play together from the keyboard of the large virginal. The octave instrument was, however, normally stored in an empty space beside the keyboard of the unison virginal from which it was slid for playing; for this reason it was called 'the mother with the child'.

Unlike the virginals, which had only one set of strings each, Ruckers harpsichords had two sets, one an octave above the other. The single-manual harpsichord had a register of jacks for each set of strings. The double-manual harpsichords were unlike such instruments found today in that the two keyboards were not aligned but were positioned to sound a 4th apart. The manuals were completely uncoupled and each activated its own two rows of jacks, thus giving four rows of jacks altogether. When one manual was being used the jacks of the other manual were disengaged. Thus a Ruckers double-manual harpsichord served as two instruments in one, playable at either of two pitches a 4th apart. The Ruckers family also built compound instruments, combining a single- or double-manual harpsichord with a small virginal filling the space normally left outside the bentside of the harpsichord (for illustration *see* HARPSICHORD, §3(i) and VIRGINAL).

The largest, 6′ virginals, most of the single-manual harpsichords, and the upper manual of the normal double-manual harpsichords must all have sounded within about a semitone flat of modern pitch. This pitch will subsequently be referred to as 'reference pitch'. The smaller sizes of virginal were made at pitches which sounded a



1. Muselar virginal, probably by Andreas Ruckers (i): 'The Music Lesson' by Johannes Vermeer, c1665–6 (Royal Collection, Buckingham Palace, London)

tone, a 4th, a 5th, an octave and a 9th above reference. The lower manual of a normal double-manual harpsichord sounded at a pitch a 4th below reference, and at least one surviving double-manual harpsichord by (1) Hans Ruckers (1612; now at Fenton House, London) was made with one manual sounding a 5th below reference pitch. The normal compass of the Ruckers keyboard is from *C/E* (short octave) to *c‴*, except that the quart virginal and the special double-manual harpsichord sounding a quint below reference both had *C/E* to *d‴* compasses. In addition, special extended-compass instruments were sometimes made, apparently for export outside Flanders. Single-manual instruments including those by (2) Joannes Ruckers (1637; now the Russell Collection, University of Edinburgh, and 1639; now in the Victoria and Albert Museum, London) and one by (3) Andreas Ruckers (i) (1636; collection of M. Thomas, London) with chromatic basses to C were probably made for export to England. Extended-compass double harpsichords with a chromatic lower-manual keyboard *G′* to *c‴* and an *F* to *f‴* chromatic upper manual were also made, and the pitch relation between the keyboards of these instruments is the reverse of that of the normal Ruckers double (i.e. with the lower manual at reference pitch and the upper manual pitched a 4th below). This type of instrument seems to have been made specially for customers in France (examples include an instrument of 1616 by (1) Hans; now in the collection of M. Nirouet, Paris; 1627 by (2) Joannes; private ownership, Switzerland; 1628 by (2) Joannes; now at Versailles Palace; and 1646 by (4) Andreas (ii); now in the Musée de la Musique, Paris). The lower-manual compass of these instruments fits the music of Chambonnières and Louis Couperin, and the upper manual duplicates early French organ pitch and compass (fig.2).

Ruckers' practice was to write a number on many of the action parts and on the case of each instrument as it was being made. The single virginals were marked with the length of the instrument in Flemish feet (6, 5, 4½, 4), the 'mother' and 'child' virginals were marked 'M' and 'k' ('Moeder' and 'kind'), and single-and double-manual harpsichords were marked 'St' ('Staartstuk'; 'tailpiece'). Underneath these marks the serial number was written, a separate serial being used for each type of instrument. The existence of these numbers has made it possible for some undated instruments to be assigned an approximate date and for the rate of production to be estimated. (3) Andreas Ruckers (i), for example, made about 35 to 40 instruments a year.

The importance of Ruckers instruments lies in their remarkable sound, which is the result of their extremely sophisticated design. The lengths, gauges and materials of the strings were chosen with great care. Both soundboard and bridges were made of good materials and were

2. Comparison of the keyboards of the normal and the extended 'French' double-manual harpsichords by Ruckers

carefully and accurately tapered to give the right thickness and stiffness in each part of the range. Also, the area of radiating soundboard was contrived to give an even balance between the bass, tenor and treble parts of the compass. The resulting sound is rich and resonant without any part of the register dominating another.

The original decoration of Ruckers instruments was rather elaborate. Block-printed paper patterns (with motifs taken from Renaissance pattern books) were placed inside the key-well (above the keys) and above the soundboard around the inside of the case. These patterned papers were also sometimes used inside the lid in conjunction with a repeating wood-grained paper on which Latin mottoes were printed (see fig.1); or sometimes the insides of the lids were beautifully painted by contemporary artists such as Rubens, Jan Breughel and Van Balen. The outsides of the instruments were painted with an imitation of marble or sometimes of huge jewels held in place by an iron strapwork. The soundboards were embellished with tempera paintings of flowers, birds, scampi, insects, snails, fruit and the like. The date was also painted somewhere on the soundboard or wrest plank.

Decorative gilded roses placed in the soundboards incorporate the initials and trade mark of the builder, and are surrounded by a wreath or spray of flowers painted on the soundboard. All the roses of the Ruckers family represent an angel playing a harp, with the initials of the builder on either side of the angel. The exact posture of the angel and the layout and modelling of the rose varies from one member of the family to the other (fig.3) and serves as one of the methods of determining the authorship of the instrument. The roses of (1) Hans Ruckers and the early type of rose used by (2) Joannes Ruckers are virtually identical, both having the initials HR; but the right wing of the angel of the former's rose is clearly visible, whereas it is missed in the rose of the latter. After joining the Guild of St Luke (1611) (2) Joannes Ruckers gradually stopped using the HR rose and began to use an array of IR roses, different designs and sizes being used for virginals, single-manual and double-manual harpsichords. The roses of (3) Andreas Ruckers (i) and (4) Andreas Ruckers (ii) are very similar to each other, but differ in numerous subtle details. A number of instruments, signed simply ANDREAS RVCKERS ME FECIT and made after the year 1636, bear the Andreas (ii) type of rose and may therefore have been made by the younger Andreas.

Ruckers instruments were justly famous in their own day, and their sound became an ideal during the 17th and 18th centuries in almost all of northern Europe. They were often altered and extended to suit later keyboard literature, sometimes by simple, even makeshift alterations and sometimes by an elaborate rebuilding process involving the replacement of all the action parts and the extension and redecoration of the case. This process was commonly applied to double-manual harpsichords, the new keyboards being aligned to allow simultaneous use of contrasting registers. In France the process was known as *ravalement*. By leaving the original soundboard almost unaltered, the beauty of the sound could be preserved. In late 17th- and in 18th-century Europe, Ruckers instruments were more highly valued than those of any other makers. Counterfeits were made with the decoration and appearance of genuine rebuilt instruments, and existing instruments of suitable kinds were modified, given a fake label and rose, and sold at an inflated price. Examples survive in the Musée de la Musique, Paris (inscribed Hans Ruckers and dated 1590; in fact by Goujon, 18th century), and at Ham House, Surrey (part of the Victoria and Albert Museum collection, London; this instrument is inscribed Joannes Ruckers and dated 1634; in fact it is of English origin, *c*1725).

Ruckers instruments are important not only for their own beauty but also because of their historical position as models for the later schools of harpsichord building. By the middle of the 18th century the constructional methods of the indigenous schools of England, France, Germany, Flanders and the Scandinavian countries were

3. Soundboard roses used by members of the Ruckers family: (a) Hans Ruckers: angel's wing present, initials have rather flattened surface, diameter 65 mm; (b)–(e) Joannes Ruckers: (b) angel's right wing missing, initials have rounded upper surface, used in all types of instruments, c1596–1616; (c) virginal, (d) single-manual harpsichord and (e) double-manual harpsichord roses used by Joannes Ruckers after c1611: (f), (g) Andreas Ruckers (i): used in all types of instruments

securely based on the principles perfected by the Ruckers family. Soundboard design, action and stringing all reflect Ruckers practice, and the timbre is clearly reminiscent of Ruckers, even though characteristic also of the musical taste of the period and region.

There are now a number of well-restored Ruckers instruments, some in almost original condition, which can be heard in public concerts and on recordings. These instruments are extremely valuable as examples showing how they may once have sounded. However, restoration is not synonymous with preservation, as it nearly always involves loss as well as gain. The realization is thus growing that certain instruments should be left unrestored, in order that their extant original features may remain intact.

For further illustration *see* TRANSPOSING KEYBOARD.

JEANNINE LAMBRECHTS-DOUILLEZ (I), G. GRANT O'BRIEN (II)

Rückert, (Johann Michael) Friedrich (*b* Schweinfurt, 16 May 1788; *d* Neuses, nr Coburg, 31 Jan 1866). German poet, philologist and translator. He studied law, philology and philosophy at WürzBurg, Heidelberg and Jena (1805–11) and taught for a time before following his literary inclinations. During the years 1812–15 he travelled widely and published four ambitious sonnet cycles. His growing reputation led to his appointment in 1815 as the co-editor, with Ludwig Uhland, of a Stuttgart literary journal. On his return trip form a year in Rome (1817) Rückert sojourned in Vienna and studied Arabic, Persian and Turkish with the celebrated orientalist Joseph Hammer-Purgstall. The experience led the 30-year-old poet to focus his scholarly and creative energies on oriental subjects. He composed a collection of poems in the oriental form of the *ghasel* and planned a counterpart to Goethe's *West-östlicher Divan*, the *Östliche Rosen* (1821), modelled on the verse of the 14th-century Persian poet Hafiz. In a review Goethe recommended the collection to musicians, and Schubert, among others, set several of its poems (including *Du bist die Ruh* and *Lachen und Weinen*).

In 1820 Rückert moved to Coburg, where he fell in love with Luise Wiethaus Fischer, who became the inspiration for the poet's greatest lyric outpouring, the several hundred poems of *Liebesfrühling* (mostly dating from 1820–21), which were published as part of his *Gedichte* in 1836. The collection quickly became a much-favoured source of lieder texts. The couple married in 1821; six children were born to them in the next nine years. Rückert turned more to the study of oriental languages and finally secured a university position at Erlangen in 1826. His main project had been the translation of the *Makamen of Hariri*, a masterful rendering of the medieval Arabic tales into idiomatic German.

In the winter of 1833–4 their three-year-old daughter Luise and their five-year-old son Ernst died. Rückert poured his grief into about 400 *Kindertotenlieder*, the bulk of which were published only posthumously (1872); five of the poems were set by Mahler. In 1835 Rückert began to render Islamic anecdotes, proverbs and poems in German verse. These were published in his next major work, *Die Weisheit der Brahmanen* (1836–8). He also continued to write his own poetry (*Haus- und Jahreslieder*) and to make translations of Middle Eastern literary works. In 1841 Rückert took up a teaching appointment in Berlin, retiring in 1848 due to a combination of failing health, an increasingly misanthropic temperament and the worsening political situation. Although his health steadily declined, he continued his lyrical and scholarly writing and translations in retirement.

In addition to his vast output of poetry, plays and numerous translations, Rückert also wrote a grammar of the Persian language and a study of Persian poetry. The revival of interest in Rückert today centres more on his

Friedrich Rückert, drawing Friedrich Overbeck, 1818

accomplishments as a linguist and translator than on his original literary creations. Although his verse enjoyed an immense popularity in the 19th century, critics then and now find much of it superficial and facile. Yet with nearly 2000 musical settings by over 800 composers, Rückert stands with Goethe, Heine and Eichendorff as one of the most frequently set poets of the century. Clara and Robert Schumann set the greatest number of his poems (over 50 works by Robert, arrayed in 20 opus numbers, including solo songs, part songs, choral works and a set of piano pieces; 5 lieder by Clara). In addition to Schubert and Mahler, other composers attracted by the directness and sincerity of his verses included Loewe, Marschner, Franz, Brahms, Strauss, Pfitzner, Reger and Berg.

RUFUS HALLMARK

Rückleitung (Ger.). *See* RETRANSITION. *See also* SONATA FORM.

Rückpositiv (Ger. 'back positive'; Dutch *rugpositief*). The little organ placed at the organist's back, in the front of the gallery; the second main manual of all major organs from 1400 to 1700. In the smaller organs of most countries it was replaced by the BRUSTWERK, the Choir organ or the Swell, while in Italy there was only ever a handful of examples. The name has varied widely; for a discussion of terminology, *see* CHAIR ORGAN.

Tonally, the Chair organ was always a contrast to the Great, firstly by being the first department to have its Mixture separated off from its BLOCKWERK into individual stops (Oude Kerk, Delft, 1548), later by having more single ranks on a slider chest, later still by having more delicate voicing and scaling (Werckmeister, *Erweiterte und verbesserte Orgel-Probe*, 2/1698); but the last characteristic had long been known, judging by Arnaut's reference to its 'sweetness' (*dulcedo*). In some areas of the Netherlands and Denmark it continued to be built into the 1870s, but early in the 18th century central German builders dispensed with the *Rückpositiv*, giving its solo, accompanimental, colouristic and contrasting functions to the OBERWERK. Despite the dangers of heavy mechanism, the Chair organ is still the most important secondary manual for all classical organ repertories.

Ructis, Ar. de. *See* RUTTIS, AR. DE.

Rudall, Carte and Company. English firm of musical instrument makers and publishers based in London, best known for their flutes. The firm was founded about 1821 as Rudall and Rose by George Rudall, a London flute player and teacher, and John Mitchell Rose, an Edinburgh-born flute maker. Richard Carte, a former student of Rudall, joined the firm in 1850, after which it became known as Rudall, Rose and Carte. In 1854 the firm absorbed the military musical instrument makers Key & Co., and became known for a time as Key, Rudall, Carte and Co. or Key, Rudall and Co. In 1871 it became Rudall, Carte and Company. It was absorbed by Boosey & Hawkes in the 1940s.

The firm made innovatory instruments of the highest quality. Rudall and Rose's early flutes were principally of the standard eight-key design, but they gained from Theobald Boehm the British rights to build flutes to his 1832 conical and his final 1847 cylindrical designs. Richard Carte recognized the superiority of Boehm's acoustical design but felt the fingering system could be improved. His 1851 Patent flute, described as having 'Boehm's Parabola and Carte's Mechanism', was an improvement on Boehm's fingering system but retained Boehm's acoustical design. This was followed by his 1867 Patent, a brilliant piece of design that combined features of the 1851 Patent flute with those of Boehm's. Rudall, Carte also produced flutes to John Radcliff's design, a modification of the 1851 Patent that was effectively a Boehm flute with fingerings little changed from the old eight-keyed simple system.

In addition to these 'crossover' models, Rudall, Carte continued to make simple system flutes in many sizes and pitches for band use, as well as standard Boehm flutes and flutes to 'Rockstro's Pattern', a modification of the Boehm system often employing very large holes and perforated key cups. The majority of the firm's flutes were made of wood, although they also used ebonite as well as silver, gold and other metals. They produced oboes, clarinets and bassoons as well as a full range of brass instruments and were for a time agents for the instruments of Adolphe Sax. Such was Rudall, Carte's success that for nearly a century virtually every orchestral flute player in Britain used one of their instruments.

The firm published a substantial library of flute music, flute methods and books on the flute. From 1853 to 1930 it published an annual *Musical Directory, Register and Almanack*, containing lists of professional musicians, descriptions of the activities of the various musical societies, lists of music published and the calendar of the Royal Academy of Music.

ROBERT BIGIO

Rudbeck [Rudbeckius], **Olof** [Olaus] [the elder] (*b* Västerås, bap. 12 Dec 1630; *d* Uppsala, 17 Sept 1702). Swedish polymath, musician and composer. He became a medical student at Uppsala University in 1648, defending his thesis there in 1652. With royal support he continued his studies at Leiden, and was appointed professor at Uppsala as early as 1658 and subsequently rector of the university in 1661. His wide-ranging talents, both practical and artistic, allowed him to excel in many pursuits: he worked as an architect, engineer, builder, land surveyor, botanist, antiquary, inventor and manufacturer. He was also skilled in sketching and painting, had a fine bass voice and performed on several musical instruments.

Music played an important part in Rudbeck's life. He was an active musician both as a schoolboy in Västerås and at Uppsala. During his career as professor he taught music and adopted the then new principles of the collegium musicum, becoming a semi-official supervisor of musical life at the university. Under his direction, the

university bought instruments and up-to-date printed music by, for example, Ahle, Briegel, Capricornus, Werner Fabricius, Hammerschmidt, Pfleger, Rosenmüller, Schmeltzer and Scheidt (the collection is mostly in *S-Uu*). He had eight public scholarships reserved for student musicians, thus constituting and ensuring a permanent ensemble. In 1682 he and Petrus Lagerlöf formed a theatrical society that performed in Stockholm in 1686, inaugurating Swedish dramaturgy. He also became involved in building a monumental organ in Uppsala Cathedral, acting as general manager and master builder of the organ casework. The first organ builder engaged was incapable of putting into practice some notable inventions by Rudbeck connected with the layout of the organ, and it was not until 1698 that he saw the magnificent instrument completed by Hans Heinrich Cahman. Contemporary accounts of performances conducted or inspired by him show that he favoured a simplified version of the rather old-fashioned polychoral style, often with the alternating vocal and instrumental groups deployed spatially. Only one composition by him has been preserved, a lament for two voices and continuo in the style of Hammerschmidt, written for the funeral of Chancellor Axel Oxenstierna in 1654 (ed. in MMS, v, 1968). Rudbeck and his principal pupil, Vallerius, were commissioned to collect and edit the tunes of the new official Swedish hymnbook, published in 1697.

BENGT KYHLBERG/BERTIL H. VAN BOER

Rude [Rudenius, Rudenus], **Johann** (*b* after 1555; *d* ?after 1615). German lutenist and composer. He compiled an extensive collection in two books of music for eight-course solo lute, *Flores musicae* (Heidelberg, 1600). Son of a Leipzig *Stadtpfeifer*, he described himself as a student of law in his lutebook, although there is at present little else known of his activities other than that he deputized for an organist at the Thomaskirche, Leipzig, in 1595. The lengthy dedication of the *Flores musicae* refers, among others, to the Elector Friedrich Wilhelm, and to Johann Ernst and August, dukes of Brunswick-Lüneburg, who may have been his patrons.

Flores musicae, which is in simple French tablature, was intended as a companion publication to Matthias Reymann's *Noctes musicae* (Heidelberg, 1598), and the majority of works are therefore intabulations of vocal compositions (a total of 171 secular works, mostly canzonettas and madrigals). Some 40 composers are represented, including Ferretti (13 pieces), Hassler and Vecchi (ten each), Marenzio (nine) and Gabrieli (six). 12 pieces are English. Although some of the intabulations are florid, Rude for the most part made exact transcriptions, introducing here and there interesting melodic and harmonic modifications. *Flores musicae* includes seven intradas, one fantasia, 30 pavan-type pieces, 21 galliards and one *chorea*. Concordances exist with the lutebook of Adrian Denss (*Florilegium*, 1594), the Pickering manuscript (*GB-Lbl* Eg.2046) and the Königsberg manuscript (now in *LT-Va* 285-MF-LXXIX, facs., Columbus, OH, 1989).

If Rude composed the 29 unidentified pieces in this collection, he cannot be regarded as of great significance, though the suite-like structure of some of the pavan types is of interest.

A *praeludium Johan Rude Franckf*, dated 1615, appears in the Schele manuscript (*D-Ha* MB/2768).

H.B. LOBAUGH

Rudel [Rudelh, Rudel de Blaja], **Jaufre** [Jofre, Jaufrê] (*fl* 1120–47). Troubadour. His reputation as the poet of 'distant love' ('l'amor de loing') is largely based on his most famous poem, *Lanquan li jorn* (PC 262.2). Attempts to uncover who Jaufre was addressing in this poem have been unsuccessful, and the *vida*'s account of his falling in love with the Countess of Tripoli is probably fictitious (for illustration *see* TROUBADOURS, TROUVÈRES, fig.1). Jaufre is called the 'prince de Blaia' and was probably one of the lords of Blaye. The earliest reference to him is found in a charter from Tenaille Abbey dated 1120 (see Rosenstein). His presence in the Second Crusade (1147) is suggested by a reference in a poem by Marcabru. From his own poems we learn that Jaufre had contact with other lords: the 'Count of Toulouse' and 'Bertrans' (PC 262.3; probably Alphonse Jourdain and his bastard son), and 'Lord Hugh the Swarthy' (PC 262.5; Hugh VII, Count of Lusigan), all of whom participated in the crusade.

The *vida* claims that Jaufre 'made many poems ... with good melodies and poor words'. Of the six poems ascribed to him, four have survived with music. His clear and simple poetic style is reflected in the melodic form. All four melodies are in *chanson* form (*ABABX*), matching the rhyme scheme (*ababx*), an exception in the troubadour repertory. The painful aspect of distant love is expressed in the unstable cadences on the repeated phrase 'de loing' in *Lanquan li jorn* (see Treitler, pp.7–9). The popularity of this melody is demonstrated by several later works which bear a strong resemblance to it, including Walther von der Vogelweide's *Allerêrst lebe ich mir werde*.

ROBERT FALCK/JOHN D. HAINES

Rudel, Julius (*b* Vienna, 6 March 1921). American conductor of Austrian birth. He began his studies at the Vienna Music Academy, but emigrated to the USA at the age of 17 and became a student at the Mannes School of Music, New York. His long association with the New York City Opera began when he joined the company as a rehearsal pianist in 1943. He made his conducting début with *Der Zigeunerbaron* in 1944, and was the company's director from 1957 to 1979. Meanwhile, in 1944, he had become an American citizen. Rudel developed the City Opera into one of the best and most enterprising companies in the USA. Working with a strong commitment to the principle of true ensemble opera, he placed an emphasis unfamiliar in New York on production values, occasionally drawing criticism for extravagance of ideas but never for dullness. The company's repertory benefited from Rudel's ability to conduct the work of composers as diverse as Mozart, Monteverdi, Janáček and Ginastera with equal skill and sensitivity. He was a guest conductor at many opera houses, including Buenos Aires, Chicago, the Metropolitan Opera, Toronto and Nice. Outside the opera house, where his gifts as an administrator have been of special value, results have been more uneven. But Rudel has enjoyed great success as musical director of the Caramoor Festival in New York state, as music adviser of Wolf Trap Farm Park for the Performing Arts near Washington, DC, and as musical director for the first four seasons of the Kennedy Center in Washington from 1971. He has conducted most of the leading American symphony orchestras (including the Buffalo PO, 1981–3) and has made guest appearances in many European musical centres and in Israel. His recordings include Handel's *Giulio Cesare* with the New York City Opera, and much-praised versions of Boito's *Mefistofele* and Massenet's *Thaïs* and *Cendrillon*. An award for young conductors was established in his honour in 1969.

BERNARD JACOBSON

Rudén, Jan Olof (*b* Helsinki, 28 Aug 1937). Swedish musicologist. He studied at Uppsala University under Ingmar Bengtsson from 1957 (fil kand 1961, fil lic 1969) and held posts at the Uppsala University library (assistant librarian 1970–72, librarian 1972–4). In 1974 he became librarian and bibliographer of the Swedish Music Information Centre, Stockholm. His work has been chiefly concerned with music bibliography, music for plucked instruments and 17th-century Swedish musical life; and he has worked on watermarks as an aid to dating. He has also prepared editions of 18th-century and earlier Swedish music for Monumenta Musicae Svecicae. Rudén became secretary of the Hugo Alfvén Society in 1990.

VESLEMÖY HEINTZ

Rudenus, Johann. *See* RUDE, JOHANN.

Ruders, Poul (*b* Ringsted, Zealand, 27 March 1949). Danish composer. As a child he was a member of the Copenhagen Boys' Choir; he studied the piano and the organ at the conservatory in Odense. He graduated from the Royal Danish Conservatory in organ playing in 1975, and initially worked as a church organist and freelance keyboard player. Although he had some lessons from Nørholm and in orchestration from Kar Rasmussen, he describes himself as essentially self-taught as a composer. Apart from a guest professorship at Yale University in 1991, and occasional lecturing, he has supported himself for most of his career chiefly through composing. After receiving the 1990 Royal Philharmonic Society award for large-scale composition for his Symphony no.1, he lived in London from 1991 to 1994; he then returned to live in Copenhagen. His music has been commissioned, performed and recorded not only in Denmark but also in London, New York, Paris and other major centres.

Ruders dates his ambition to be a composer from the age of 16, when he heard Penderecki's *Threnody for the Victims of Hiroshima* at the age of 16. His immediate response was his first published work, *Three Letters from the Unknown Soldier*, written at the age of 18. Subsequently, the influence of Penderecki has been evident, not in details of technique, but in a fondness for large-scale

Poul Ruders

orchestral gestures and effects: for example in *Thus Saw Saint John* (1984), a depiction of the Apocalypse described in Revelations, and in the component parts of the hour-long *Solar Trilogy* (1992–5). In common with other Danish composers of his generation, Ruders showed some interest in minimalism; he devised his own system of pitch organization based on English change-ringing. This is used in several of his works after 1974, including the first movement of the Piano Sonata no.2 (1982), and *Manhattan Abstraction* (1982) – the form of which is derived from the shape of the New York skyline.

Another area of interest, again shared with Danish contemporaries, was stylistic pluralism, including direct quotation and parody. *Medieval Variations* (1974) was suggested by fragments of medieval music, *Capriccio pian'e forte* (1978) by the instrumental music of Giovanni Gabrieli, the String Quartet no.3 by 14th-century motets, *glOrIA* (1981) by Monteverdi's Vespers of 1610, and the Violin Concerto no.1 (1981) by Vivaldi concertos, though the echoes of Vivaldi are juxtaposed with a Schubert quotation. Like Stravinsky, Ruders has also treated contemporary popular idioms as stylistic sources: Latin-American dance music in *Wind-Drumming* (1979), *Carnival* (1980) and *Cha Cha Cha* (1981), and rock music in *Break-Dance* (1984).

During the 1980s Ruders increasingly brought disparate stylistic elements together in single works, often intercutting and superimposing them in the manner of film and video editing; he characterized himself at this time as 'a film composer with no film'. These techniques are apparent in a series of works for large chamber ensemble, including *Four Dances in One Movement* (1983) and the dark-coloured *Corpus cum figuris* (1985). Stylistic contrasts are used to characterize the conflict between conservative and progressive ideas in Ruders's chamber opera *Tycho* (1986), based on the life of the astronomer Tycho Brache. The idea of dramatic conflict, expressed through the Nielsen-like characterization of a solo instrument set against the orchestral mass, is also significant in a series of concertos from the late 1980s: one for clarinet and twin orchestra; three more, for piano, percussion and cello, conceived as a 'Drama Trilogy'.

A landmark in Ruders's career, not least because of the success of its first performance at the 1990 BBC Proms, was his Symphony no.1 (1989). This unites – in a four-movement work with a purposefully dramatic outline – many of his earlier concerns: quotation, of Bach and an old German Christmas carol; minimalism, in the way the slow movement is based on two alternating chords and the finale on one; strong contrasts of tempo, dynamics, register and density of activity. In the years following the Symphony, Ruders largely abandoned extreme stylistic discontinuity in favour of much greater homogeneity of texture, not only in the *Solar Trilogy* but also in a further series of concertos. Works such as the Viola Concerto and the cello concerto *Anima* explore a new vein of restrained lyricism, often in textures of heterophony in which sections of the orchestra 'shadow' the soloist. But Ruders has also developed his earlier compositional system into a method (which he has dubbed 'minimorphosis') of expanding a single line beyond heterophony into increasingly complex polyphonic textures. This process is the generating force of the single-movement Symphony no.2.

During the 1990s, without returning to stylistic pluralism, Ruders expanded his compositional range in response to specific commissions. The Piano Concerto has a conventional three-movement plan, and includes some solo figuration in traditional patterns and some triadic harmonies, though not used tonally. The *Concerto in Pieces*, commissioned for a children's guide to music and a BBC festival in Birmingham, and performed with great success at the Last Night of the 1995 Proms, is a set of variations on a theme from Purcell's *Dido and Aeneas* – marking both the tercentenary of Purcell's death and the fiftieth anniversary of Britten's *Young Person's Guide to the Orchestra* (also on a Purcell theme). Also during the 1990s Ruders wrote for solo voice for the first time for several years, in a series of settings of Edgar Allan Poe – with whose darkly Romantic outlook he feels a particular affinity. These works may be seen in retrospect as studies for his first large-scale opera, *The Handmaid's Tale*, based on Margaret Atwood's novel set in a future society of misogynistic fundamentalism. With its ambitious scale and its wide range of orchestral textures and means, the opera represents – like the Symphony no.1 of a decade earlier – a summing-up of the composer's concerns to date.

Ruders is widely recognized as the leading Danish composer of his generation. An unusually high proportion of his output is for orchestra or large chamber ensemble; but he has also contributed to the repertories of the piano, the guitar (solo and with ensemble), solo percussion and several small chamber combinations. Although he has not worked in electronic studios, he has used electronic keyboards and samplers in several of his scores. Ruders has developed a flexible musical language, organized only by his own systems (which he describes as 'homespun'), freely atonal but capable of incorporating tonal references. Within this musical language, his command of idiomatic

instrumental and vocal writing, his strong sense of drama, and his readiness to explore extremes of experience, enable him to communicate with audiences directly and powerfully.

ANTHONY BURTON

Rudge, Olga (*b* Youngstown, OH, 13 April 1895; *d* Merano, 15 March 1996). American violinist and musicologist. After studying violin in the USA, London and Paris, she settled in Europe, giving numerous recitals in the major cities from about 1916. In 1920 the poet and composer Ezra Pound attended a recital in London; he became her lifelong friend. She gave premières of Pound's pieces for solo violin in Paris and Rome, and she also championed the music of George Antheil, who was Pound's protégé in the mid-1920s. Antheil composed three violin and piano sonatas for Rudge which she played from 1923 to 1926 throughout Europe, with him as her accompanist. In Italy she was a leading performer in the concerts which Pound organized in Rapallo between 1933 and 1939. In the same period, she began research into Vivaldi, resulting in a pioneering all-Vivaldi concert in Venice (29 October 1937). Together with the Italian musicologist Sebastiano Arturo Luciani, in 1938 she founded a centre for Vivaldi studies in Siena (Centro di Studi Vivaldiani) and published facsimile editions of several Vivaldi scores (1947–9). From 1932 to 1961 she was secretary of the Accademia Musicale Chigiana, Siena (founded 1932), and edited its bulletin. She was the author of numerous articles (in English and Italian) on Vivaldi, and was also an authority on Pound.

CHARLES AMIRKHANIAN, ARCHIE HENDERSON III

Rudhyar, Dane [Chennevière, Daniel] (*b* Paris, 23 March 1895; *d* San Francisco, 13 Sept 1985). American composer and writer of French birth. While still living in France, he published a book on Debussy (Paris, 1913). He emigrated to the USA in 1916, arriving not long after Edgard Varèse and Marcel Duchamp. His exploration of Rosicrucianism, Buddhism, alchemy and the Baha'i movement, and his involvement in theosophy, led him to adopt the name Rudhyar from the Sanskrit *rudra*, meaning dynamic action. In early 1920 he moved to California. Throughout the decade that followed, he remained active in modern-music circles on both coasts; he was a member of the International Composers' Guild in New York and the New Music Society in California. His *Three Paens* (1927) was one of the earliest scores published by Cowell's New Music Edition. After 1930 Rudhyar turned away from composition and musical aesthetics to astrology, a field in which he became highly regarded. After being rediscovered by Peter Garland, James Tenney and others during the 1970s, his early works enjoyed a considerable revival and he returned to composing. His musical honours included grants from the NEA (1976, 1977) and the Marjorie Peabody Waite Award from the American Academy and Institute of Arts and Letters (1978).

During the 1920s Rudhyar produced an influential series of writings exploring a spiritual approach to dissonance. His ideas were based on a trans-Asian mix of religious philosophies and his study of theosophy. He believed dissonance to be an ideal expression of American cultural diversity and posited a theory of 'tone', an elusive concept celebrating the dissonance found in pulsating sound and its intensification into surrounding space; 'tone' thus embodied sound's living, resounding spirit. His ideas were disseminated through a series of articles and summarized in two principal treatises, *Dissonant Harmony* (Carmel, CA, 1928) and *The New Sense of Sound* (Carmel, CA, 1930), which influenced composers such as Ruth Crawford, Henry Cowell and Carl Ruggles, who were concurrently implementing the 'dissonant counterpoint' of Charles Seeger. Unlike Seeger, Rudhyar

provided no specific method for composing. Instead, he articulated the impact of dissonance on the soul.

Rudhyar's music soars towards grand statement; he often gave his works titles of a spiritual or metaphysical nature. Vertically conceived, his scores feature thickly textured chords; 4ths, 5ths and 2nds were his favoured building blocks. His music, which often exhibits massive ebbing and flowing, builds the 'cumulative resonance' described in his theoretical writings. He prefaced the publication of *Paens* with the explanation that the work was 'not based ... on melodic themes and the like ... [but] founded on the building of resonances or complex harmonies ... It deals with Energies, not with so-called Form'.

CAROL J. OJA

Rüdinger, Gottfried (*b* Lindau, Bavaria, 23 Aug 1886; *d* Gauting, nr Munich, 17 Jan 1946). German composer and teacher. After attending the Gymnasium in Neuberg he began to study theology but from 1907 turned his interest entirely to music. He studied composition with Max Reger in Leipzig and church music under Wilhelm Widmann at Eichstätt Cathedral. From 1910 Rüdinger taught in Munich, first privately and then from 1920 as a member of the theory staff at the Academy of Music, where he became professor in 1938 and continued to teach until his death. From 1916 he was also a conductor of church choirs in Berg am Laim. Much of Rüdinger's music, such as the *Romantische Serenade* op.9, shows the influence of Brahms and Reger; his vocal works make use of folksongs. Of his approximately 150 compositions, the last third (from the war years) remain unpublished.

WORKS
(*selective list*)

VOCAL

Stage: Ein Hirtenspiel in Liedern, op.61; Die Tegernseer im Himmel (peasant play-op), op.100, 1933; Berchtesgadener Sagenspiel (children's op), op.102; König Folkwart (fairy-tale op); Musikantenkomödie (Singspiel)

Masses: G, op.23, chorus, org; Kleine Vokalmesse, op.26, S, A, Bar; D, op.32, S, A, Bar, org; c, op.76, chorus; C, op.115, chorus, org; F, op. 143, chorus, org

Sacred cantatas: Mit Ernst, O Menschenkinder, op.43; Dich grüss ich, Fürstinnin, op.44; Maria, du betrübtes Herz, op.70

Other works: Ps xcii, op.82, chorus, brass, perc/org; Waldkantate, op.84, solo vv, fl/vn, str trio; Sancta Maria, op.93, 1v, chbr orch; Tannenburg (orat), 1939; over 20 motets; over 60 lieder, some with orch, and folksong arrs.; choruses and choral folksong arrs., music for the theatre and cinema

WILLIAM D. GUDGER

Rudneva, Anna Vasil′yevna (*b* 3 Feb 1903; *d* 19 Oct 1983). Russian musicologist. She studied conducting, theory and composition at the Moscow Conservatory, graduating in 1930. After gaining the doctorate, she became professor at the conservatory, where she was also director of the folk choir. While a student she was a pupil of Kliment Kvitka, who was the founder of the Moscow school of folklore that later became known as the 'Kvitka-Rudneva School'. A collector of Russian folklore, Rudneva popularized traditional Russian music through her scholarly work. Her writings are devoted to the analysis of the

musical and poetical style of the Russian folksong. She examined in particular its versification, rhythm, stanza structure and modal characteristics and was responsible for identifying the *obikhod* modal sequence as a single, composite major-minor system with its own specific features and rules. Other areas of study included the problem of bar division in songs, and folk instruments. She also had a fine knowledge of old Russian *znamenniy* singing, and songs she wrote down during ethnographic expeditions were used in the compositions of Prokofiev, Shebalin and Sviridov.

NATAL'YA NIKOLAYEVNA GILYAROVA

Rudolf, Max (*b* Frankfurt, 15 June 1902; *d* Philadelphia, 28 Feb 1995). American conductor of German birth. He began his musical studies at the age of seven, and in addition to learning the organ, cello and trumpet, went on between 1914 and 1922 to study the piano with Eduard Jung and composition with Bernhard Sekles. In 1921 and 1922 he was a student at Frankfurt University and the conservatory. He had several of his chamber works performed, and he made his conducting début in March 1923 in Freiburg. Posts at the Städtisches Theater there and at Darmstadt were followed by a six-year spell as principal conductor of the German Theatre in Prague. In 1929 and 1930 Rudolf appeared as guest conductor with the Berlin PO. In 1940, after a five-year residence in Göteborg, Sweden (where he was a regular guest conductor with the Göteborg SO and Swedish RO), he left Europe for the USA, first teaching in Chicago, then moving to New York, where he conducted the New Opera Company. In 1945 he joined the Metropolitan Opera as conductor, making his début there in 1946 – the year he took American citizenship – with *Der Rosenkavalier*; he remained for 14 seasons, distinguishing himself in the Mozart repertory, and also served as its assistant manager (1950–58). From 1958 to 1970 he was musical director of the Cincinnati SO, leavening his sensitive advocacy of the standard repertory with a number of important premières. He resigned this post to head the opera and conducting departments of the Curtis Institute in Philadelphia (1970–73 and from 1981), after which he conducted the Dallas SO (1973–4) and resumed appearances at the Metropolitan Opera. During his career he was also a guest conductor with orchestras throughout the USA and Italy. His widely used textbook *The Grammar of Conducting* (New York, 1950, 3/1993) testifies to a rare grasp of the mechanics of the art.

BERNARD JACOBSON/R

Rudolf [Ruodolf] **von Fenis-Neuenburg** [von Fenis, von Neuenburg, de Neuchâtel] (*b c*1150; *d* before 30 Aug 1196). Swiss Minnesinger. He was of the aristocratic family of the Counts of Neuenburg, which had ancestors in the royal house of Burgundy. He lived at Burg Fenis, between the lakes of Biel and Neuchâtel (Neuenburg) in western Switzerland, and is mentioned several times in documents as 'Rudolf II von Fenis-Neuenburg'. Together with FRIEDRICH VON HÛSEN and HENDRIK VAN VELDEKE he belonged to an important group of Minnesinger who provided a link with trouvère song, absorbing and adopting elements of form and subject matter from Romance verse. This group laid the foundation for the period of high MINNESANG in Germany, a period that reached its zenith with Walther von der Vogelweide. The derivativeness of his technique shows most in the style of certain images and metaphors and in his adoption of certain verse forms. Rudolf's kinship with French culture comes through in the strongly intellectual tone of his songs, and particularly in his way of thinking in antitheses. Significantly, his mother and probably also his wife were of French origin, and his lands lay across border territory embracing both German and Romance languages. 25 song strophes are considered to be authentic, and are thought by scholars to belong to eight or nine lieder. No melodies survive for these songs; but three, possibly five, of the Old French and Provençal models on which he based songs provide melodies for his verse.

BURKHARD KIPPENBERG/LORENZ WELKER

Rudolph (Johann Joseph Rainer), Archduke of Austria (*b* Florence, 8 Jan 1788; *d* Baden, nr Vienna, 24 July 1831). Austrian patron of music and composer. The youngest of the 16 children born to Leopold, Grand Duke of Tuscany (later Emperor Leopold II), and Princess Maria Ludovica of Spain, he was brought to Vienna in 1792 when his eldest brother, Archduke Franz, became Emperor. His thorough education included instruction in music from the Court Composer, Anton Teyber (1756–1822). Because of his delicate health, Rudolph entered the Church and in 1819 was made Cardinal and Archbishop of Olmütz (Olomouc). It was for Rudolph's installation ceremonies in 1820 that Beethoven planned his *Missa solemnis*. As a child, Rudolph showed an exceptional talent for music, and at 15 was performing as a pianist. According to Thayer, he met Beethoven in the winter of 1803–4 and began piano and theory lessons with him, followed shortly by lessons in composition; their relationship was one marked by mutual affection and esteem. Beethoven dedicated 11 of his greatest compositions to Rudolph, among them the fourth and fifth piano concertos, the piano sonata 'Les Adieux', the 'Archduke' trio, the 'Hammerklavier' sonata and the *Missa solemnis*. In 1809 the Archduke, with Prince Kinsky and Prince Lobkowitz, established a lifelong annuity for Beethoven with the sole stipulation that the composer remain in Vienna. Rudolph used his influence on Beethoven's behalf on later occasions, including interceding in the litigation involving his nephew Karl.

Beethoven taught composition to Rudolph for more than two decades, and the Archduke composed steadily under Beethoven's tutelage, leaving a small but well-crafted body of works, three of which were published during his lifetime: the variations *Aufgabe von Ludwig van Beethoven gedichtet, Vierzig Mahl verändert und ihrem Verfasser gewidmet von seinem Schüler R.E.H.* op.1 (1819), the Sonata in A for clarinet and piano op.2 (1822) and a fugue variation in Diabelli's collection of 50 variations on his own waltz theme (1823). He composed mainly either for piano or for small ensembles including piano, and variations occupy a prominent place in his output; his sole orchestral work is an arrangement of 12 Allemandes originally composed for piano duet.

Rudolph did not venture beyond the traditional forms, genres and harmonic language of the period; a notable feature is his strong lyrical bent that prefigures the Romantic style of the following generation. Most of the autographs and manuscript copies of his works are preserved in the archives of the archbishop's palace in Kroměříž and the Gesellschaft der Musikfreunde in Vienna. Several of Rudolph's autographs show emendations and suggestions in Beethoven's hand. His other interests included engraving and collecting music and art: his collection of music and books was bequeathed to the Gesellschaft der Musikfreunde in Vienna, the institution of which he became the first *Protektor* in 1814.

WORKS

(*selective list*)

SUSAN KAGAN

Rudolph, Johann Joseph. *See* RODOLPHE, JEAN JOSEPH.

Rudorff, Ernst (Friedrich Karl) (*b* Berlin, 18 Jan 1840; *d* Berlin, 31 Dec 1916). German conductor, composer, pianist and teacher. He grew up in an intellectual and artistic environment: his mother, Betty Pistor, had been a friend of Mendelssohn and a pupil of Zelter, while his father was a professor of law in Berlin and a pupil of Friedrich Carl von Savigny. His parents' house was frequented by representatives of the Romantic school, and Johann Friedrich Reichardt and Ludwig Tieck were among his ancestors. He studied piano and composition with Woldemar Bargiel (1850–57), violin with Louis Ries (1852–4) and piano for a short time with Clara Schumann in 1858, with whom from then on he shared a life-long friendship. He studied theology and history at the universities of Berlin and Leipzig (1859–60) and music at the conservatory in Leipzig (1859–61), mainly with

Moscheles (piano) and Julius Rietz (composition) and then in private lessons with Reinecke and Hauptmann (1861–2).

He worked as conductor and assistant of Julius Stockhausen in Hamburg, then taught and conducted at the conservatory in Cologne (1865–9), where he founded a Bach society in 1867. On the invitation of Joachim he was made professor at the Berlin Hochschule für Musik (1869–1910), where, from 1882, he headed the piano and organ class. He succeeded Bruch as conductor of the Stern Choral Society (1880–90). He conducted many concerts with the Berlin PO and also in Lisbon in 1887, and was a member of the senate of the Royal Academy of the Arts. He was also a founder of the environmental protection movement.

Rudorff's style as a composer was based on that of Schumann, Mendelssohn, Chopin, and above all Weber. The influence of Schumann is particularly clear in his early piano works and songs, although he soon developed a personal style. In his orchestral works, early piano compositions and songs he uses traditional forms but incorporates moments of Romantic unpredictability. His late piano pieces, such as op.52, display more continuous thematic development. He rigorously rejected hollow virtuosity and superficial smoothness. His fondness for detail resulted sometimes in a very convoluted melodic line, harmonic obscuration, abrupt transitions and chains of sound, and complicated rhythms. Many pieces, such as the orchestral Variations on an Original Theme op.24, met with wide appreciation during his lifetime.

A distinguished editor, Rudorff was a member of the editorial committee of Denkmäler Deutscher Tonkunst. Among other works he edited the score of Weber's *Euryanthe* (1866), parts of the Breitkopf & Härtel collected editions of Mozart and Chopin, and the letters of Weber to Hinrich Lichtenstein (Berlin, 1900).

WORKS

Orch and chbr: 3 syms., opp.31, 40, 50; 3 ovs., Der blonde Ekbert, op.8, Otto der Schütz, op.12, Romantische Ouvertüre, op.45; 2 serenades, opp.20, 21; Variations on an Original Theme, op.24; Ballade, Introduction, Scherzo and Finale, op. 15; Romance, vn, orch, op.41; Romance, vc, orch, op.7; Sextet, 3 vn, va, 2 vc, op.5; Intermezzo, orch, unpubd

STEPHANIE TWIEHAUS

Rudy, Mikhail (*b* Tashkent, 3 April 1953). French pianist of Russian birth. He studied at the Music High School in Stalino (now Donets'k), Ukraine, and at the Moscow Conservatory with Yakov Fliyer. Rudy was a prizewinner at the 1971 Bach Competition in Leipzig and won first prize at the Marguerite Long-Jacques Thibaud Competition in Paris in 1975. He was subsequently invited to take part in a 90th birthday concert for the artist Marc Chagall, and performed Beethoven's Triple Concerto with Rostropovich and Stern in Paris. In a dramatic defection in 1977, he decided not to return to Russia and has resided in Paris ever since. He made his US début in 1981 with the Cleveland Orchestra conducted by Lorin Maazel and his London début in 1988 with the LSO conducted by Michael Tilson Thomas, and a year later he was the subject of a French TV documentary. In 1990 he returned to Russia for the first time since his defection. Rudy is director of the Saint Riquier Festival in France. He is particularly acclaimed for his interpretations of late Romantic and early 20th-century music, to which his combination of poetic expressiveness and virtuosity is especially well suited. His recordings include the late works of Skryabin, the complete piano works of Janáček, all the Rachmaninoff concertos with the St Petersburg PO conducted by Mariss Jansons, the Shostakovich concertos with the LSO under Jansons and solo recitals of Liszt and Ravel. In 1999 EMI released Rudy's recording of his own piano transcription of the whole of Stravinsky's *Petrushka*.

JESSICA DUCHEN

Rudziński, Witold (*b* Siebiez, nr Vitebsk, 14 March 1913). Polish composer, musicologist and teacher. From 1931 to 1936 he studied at the Vilnius Conservatory, where his teachers included Szeligowski (composition) and Szpinalski (piano). In 1938–9 he was a pupil of Boulanger and Koechlin at the Institut Grégorien, Paris. He taught at the conservatories of Vilnius (1939–42) and Łódź (1945–7), headed the music department of the Polish Ministry of Culture (1947–8) and directed the Warsaw Opera and PO (1948–9). From 1950 to 1956 he was editor of the journal *Muzyka*, and in 1957 he was appointed professor at the Warsaw Conservatory. Among his prizes were awards for *Odprawa posłów greckich* [The Dismissal of the Greek Envoys] in the Prince Rainier competition, Monaco (1963) and *Obrazy Świętokrzyskie* [Pictures from Holy Cross Mountain] in the Grieg competition, Bergen (1965).

During the postwar decade he was one of the main Polish advocates of socialist realism in music. His socio-political views are particularly evident in his operas and cantatas, where both texts and music emphasize the values of communal effort, freedom, or the struggle for life on the land. He has a strong dramatic sense, even in his non-stage works, with vibrant contrasts of texture and pace. In the earlier works he drew on folk traditions, 19th-century idioms and Stravinsky, but by the 1960s had appropriated many avant-garde ideas. Although his lasting significance may lie in his musicological and polemical writings, his music deserves greater attention than it has generally received, especially the operas.

WORKS
(*selective list*)

STAGE

Janko muzykant [Janko the Musician] (op, 3, T. Borowski, S. Wygodzki, after H. Sienkiewicz), 1948–51; Komendant Paryża [The Commandant of Paris] (op, 3, T. Marek), 1955–7; Odprawa posłów greckich [The Dismissal of the Greek Envoys] (1, B. Ostromęcki, after J. Kochanowski), 1962; Sulamita [The Shulamite] (op, 1, Ostromęcki), 1964; Żółta szlafmyca [The Yellow Nightcap] (comic op, 3, E. Bonacka, after F. Zabłocki), 1969; Chłopi [The Peasants] (op, 4 pts, K. Berwińska and W. Wróblewska, after W.S. Reymont), 1972; Pierścień i róża [The Ring and the Rose] (children's op, 2, S. Karaszewski, after W.M. Thackeray), 1982; Jakub i Rachel (ballet, 1, Karaszewski), 1991

ADRIAN THOMAS

Rudziński, Zbigniew (*b* Czechowice, 23 Oct 1935). Polish composer. He studied English philology at the university in Warsaw (1952–3) and composition with Perkowski at the conservatory (1956–62); thereafter he was a pupil of Boulanger in Paris. In the 1960s he formed the contemporary music ensemble Ad Novum with fellow-composer and pianist Tomasz Sikorski. He was appointed to the staff of the Warsaw Conservatory in 1973.

Of Rudziński's modest output, most distinctive are those works composed between 1960 and 1970. During these years he wrote a series of bravura orchestral scherzos, beginning with his first popular success, *Contra fidem*, which was performed at the 1967 ISCM Festival. Here and in the chamber music, he uses ostinatos and heterophony to create harmony and timbral effects that recall both the gamelan tradition and the music of Bartók; also noticeable is his frequent use of pianos and percussion. His best-known piece is the chamber opera *Manekiny* ('The Mannequins'), which received nine productions and over 400 performances following its first performance in 1981. It shows Rudziński at his most reticent, notwithstanding Bruno Schulz's colourful but vicious tale of tailors' dummies brought to life.

WORKS

ADRIAN THOMAS

Rue, Pierre de la. *See* LA RUE, PIERRE DE.

Rueckers. *See* RUCKERS family.

Rüegg, Mathias (*b* Zürich, 8 Dec 1952). Swiss composer and jazz musician, resident in Vienna. He studied at the Graz Hochschule für Musik (1973–5) and from 1983 to 1990 worked closely with Ernst Jandl. Co-founder of the Vienna Art Orchestra, he has directed the Vienna Art Choir (1983–7) and given workshops in Vienna, Cologne, Hanover and Berlin. He has also initiated and directed festivals in Vienna (Das U&E dritte Traumfestival, jandl total, the Europäische Jazzfestival) and multimedia projects at the Donauseschinger Musiktage (1981) and the Wiener Festwochen (1980, 1987, 1989, 1992). In 1993 he was appointed artistic director of the Viennese jazz club Porgy and Bess, a position he shares with Renald Deppe and Christoph Huber.

Rüegg's output includes numerous jazz compositions and arrangements, theatre and film music and an increasing number of works for chamber ensemble and soloist. Well known for writing quickly, he has been influenced by a wide variety of composers, from Satie, Wagner and Verdi to Duke Ellington and Charles Mingus. Bernhard Kraller (1995) has characterized his style: 'The lively wit, unconcealed, considerable, but not loaded with meaning, light, but not lightweight, the indiscreet charm of eclecticism – Rüegg knows all about it like no other, with cunning and pleasure and whim. The sarcastic levity of the Viennese against the gravity of the West'.

SIGRID WIESMANN

Ruekaerts. *See* RUCKERS family.

Ruera (i Pinart), Josep María (*b* Barcelona, 1900; *d* Granollers, 1988). Spanish composer and conductor. He attended the Municipal School of Music and the Barcelona Conservatory, where he studied violin with Josep Munner, organ with J. Colomer and composition with Enrique Morera, Juan Lamote de Grignon and Joan Baptista Lambert. He was a member of the Pablo Casals Orchestra and conducted many instrumental and choral groups. He was director of the Municipal Music School and organist of the parish church in Granollers, where he lived from the age of 9 to his death. As a composer he received numerous prizes, including the International Exhibition Prize in Barcelona (1930), the ISCM festival prize (1936), the Casals Prize at the Floral Games in Paris (1959) and the City of Barcelona Prize on two occasions: once in 1970 for *cobla* music and once in 1971 for orchestral compositions. The city of Granollers awarded him a medal (1971) and he was elected Granollers Citizen of the Year (1972). He was an honorary member of the Union of Musicians of the province of Barcelona. His music is based on the Catalan folk style, which oscillates between harmonic concepts of popular character and neo-romantic tonal traditions.

WORKS

F. TAVERNA-BECH

Ruettino, Giovanni Battista. *See* VOLPE, GIOVANNI BATTISTA.

Ruetz, Caspar (*b* Wismar, 21 March 1708; *d* Lübeck, 21 Dec 1755). German composer and writer on church music. He was a son of Joachim Ruetz, a native of Lübeck, a pupil of Buxtehude and tutor in an orphanage at

Wismar. Caspar Ruetz received his early education from his father; he also studied the organ with the Wismar organist Hoelken and the flute, oboe and violin with a city musician, Wilken. He attended the University of Jena in 1728, studying law and theology; before completing his education at the University of Rostock in 1732, he went to Hamburg in 1730 as a private tutor. He was also a tutor, in eastern Holstein and in Azbüll near Flensburg, from 1733 to 1736. On 25 April 1737 he became the ninth Kantor and music director of the Katherineum Lateinschule in Lübeck, succeeding Hinrich Sivers, whose daughter he married the same year.

Almost all the sacred music composed by Ruetz in Lübeck is lost (one exception is a cantata, *Fürchte dich nicht*, in *B-Bc*). However, his three-part work defending and examining church music is an important document in the history of German Protestant church music at the end of the Baroque period. Each of the *Widerlegte Vorurtheile* argues persuasively for retaining music in the Protestant service and denies the validity of charges by conservative purists and especially Pietists that contrapuntal music was inappropriate for the church. The first part (1750) attempts to prove, using evidence from the Bible and writings of the Church Fathers, that church music is to be justified not only on a historical basis but because it must have been contrapuntal from biblical times. In part ii (1752) Ruetz challenged the Pietists' specific criticisms of church music. Here and in the final part (1753) he expanded on the doctrines of Baroque musical aesthetics, the concept of the Affections as they apply to good church music, which he believed differs from secular music only in its ultimate purpose but not in the means by which it obtains its musical goals. Among the many contemporary German writers influencing Ruetz were Georg Motz, whose *Die vertheidigte Kirchen-Music* (1703) took an early stand against the Pietists in favour of music, and especially Johann Mattheson. Ruetz's final volume gives considerable information about the declining state of musical life in Lübeck churches. Ruetz also wrote a valuable criticism of French aesthetic doctrines of nature imitation as proposed by Charles Batteux: this long essay, a *Sendschreiben* in Marpurg's *Historisch-kritische Beyträge*, refutes the idea that music is merely a copy of nature, insisting instead that music is the original condition.

On Ruetz's death the *Lübeckischer Anzeiger* (27 December 1755) commented that he was Lübeck's most learned Kantor. Mattheson (*Plus ultra, dritter Vorrath*, Hamburg, 1755) lamented Ruetz's untimely death and published an elaborate poem of praise in which he pictured him in heaven surrounded by the sounds of sacred music that he had so ably defended while he lived.

GEORGE J. BUELOW

Ruf (Ger.: 'cry', 'shout'). A medieval sacred acclamation in a Germanic language. Friedrich showed that it was often of one or two lines and could have been used for congregational singing at the end of the sermon, at the end of Mass or on some secular occasion. The LEISE is normally considered a more developed sub-category of the *Ruf* and comprises four lines. *Rufe* are found in German, Dutch and Czech; some can be traced to the 9th century, and many served as bases for German Reformation hymns which have been used ever since.

During the second half of the 17th century the term *Ruf* was also applied in the German-speaking lands to the single-section military trumpet signal more generally known as the CHIAMATA. By the late 18th century the term had come to indicate a simple rising arpeggio figure.

DAVID FALLOWS

Ruf, Wolfgang (*b* Radolfzell am Bodensee, nr Konstanz, 29 Aug 1941). German musicologist. He studied with Dammann and Eggebrecht from 1967 at Freiburg University, where he took the doctorate in 1974 with a dissertation on the reception history of Mozart's *Le nozze di Figaro*. After working at Freiburg as assistant lecturer, he completed the *Habilitation* with a work on 20th-century music theatre (1983) and was appointed professor at the University of Mainz in 1985; he was also an editor of the *Handwörterbuch der musikalischen Terminologie* (1984–5). In 1995 he was made department chair at the University of Halle-Wittenberg and chairman of the Georg-Friedrich-Händel Gesellschaft. His main areas of interest are 18th-century music, particularly Mozart, 20th-century music theatre and the terminology of musical genres; he is also editor of the series Schriftenreihe zur Mitteldeutschen Musikgeschichte.

CHRISTIAN BERGER

Rufer, Josef (Leopold) (*b* Vienna, 18 Dec 1893; *d* Berlin, 7 Nov 1985). Austrian musicologist. He studied theory with Wilhelm Zemanek and composition with Zemlinsky, the teacher of Schoenberg, while taking an engineering degree in Prague. After war service in the Austrian army, he studied with Schoenberg in Vienna (1919–22) and was later his assistant at the Berlin Academy (1925–33) until Schoenberg was forced to leave Germany. Rufer was also music critic for the Berlin *Morgenpost* (1928–40) and *Die Welt*. He directed the Neue Musik concert series in Hamburg with Stuckenschmidt (1923–4), and after service in the German Air Force during World War II, published the monthly journal *Stimmen* with him (1947–50); with Paul Höffer he founded and directed the International Music Institute in Berlin (1946–9). He taught theory at the Free University in Berlin (from 1950), the Berlin Hochschule für Musik (1956–69), the Darmstadt summer course (1956), and in Vienna (from 1959). He was also editor and consultant for the publishers Bote & Bock (1957–9).

Rufer was a leading Schoenberg scholar; his bibliographies, critical editions and analyses are of lasting importance and usefulness. His treatise on the 12-note system (1952), the first major work to appear on the subject, is a precise exposition of Schoenberg's own concept of his system. Rufer drew on written and oral communication with Schoenberg, who apparently helped him with the book from 1949 until his death in 1951. In the appendix to the German edition, 13 composers discuss their own use of the 12-note system; the most illuminating part of the book is Rufer's explanation of Schoenberg's concept of *Grundgestalt* ('basic shape'), which had not previously been clearly defined. In 1957 Rufer undertook the cataloguing of Schoenberg's huge musical, literary and artistic legacy in Los Angeles, which resulted in his invaluable book *Das Werk Arnold Schönbergs* (1959). In 1961 the composer's widow invited Rufer to become editor-in-chief of the complete edition of Schoenberg's works.

BRUCE SAYLOR/MICHAEL VON DER LINN

Ruff. An embellishment used in side-drumming. *See* DRUM, §II, 2.

Ruffa, Girolamo (*b* Tropea, Calabria, *fl c*1700). Italian composer. From the titles and dedications of his published works we know that he was born in Tropea, belonged to the order of the Minor Conventuals and, in about 1700, was *maestro di cappella* of Mileto Cathedral. Gaspari, referring to a passage in the introduction to Domenico Scorpione's *Istituzioni corali*, in which the author said that in 1702 he had delivered to the press an *Introduttorio musicale* 'under a different name', suggested that this was the work of the same title published as by Ruffa. Whoever its author, the *Introduttorio* is a work of considerable interest for its information on mensural and proportional notation.

WORKS

Graduali per tutte le domeniche minori dell'anno, op.1 (Naples, 1700)
Salve, 1–2vv, some with vns, and Litanie, concertate, 3vv (Naples, 1701)
Introduttorio musicale per ben approfittarsi nel canto figurato, op.4 (Naples, 1701)

BIBLIOGRAPHY

RENATO BOSSA

Ruffatti. Italian family of organ builders. The firm was founded, as 'Fratelli Ruffatti', in Padua in 1940 by the three brothers Alessio Ruffatti (*b* 14 Jan 1909), Antonio (*b* 24 Jan 1912) and Giuseppe (*b* 28 Nov 1907; *d* 27 Nov 1994); they had been apprentices to Antonio Malvestio in Padua, and in 1936 started an independent workshop. During the 1950s and 60s they built important instruments in Europe, e.g. at the Basílica at Fátima, Portugal (five manuals, 1952) and at Monreale Cathedral, Italy

(six manuals, 1967), and from the late 1960s in the USA and Canada also. As well as making large electro-pneumatic instruments, they also began to build organs with mechanical action. On the retirement of Antonio at the age of 80, the business was taken over by his sons, Piero (*b* 10 Sept 1943) and Francesco (*b* 30 Sept 1945). Over 500 organs have been manufactured for Italy, Portugal, Lebanon, Serbia, Nigeria, USA and Canada. Important instruments have been built at the Crystal Cathedral, Garden Grove, California (1982); St Mary's Cathedral, San Francisco, California (1971); Coral Ridge Presbyterian Church, Fort Lauderdale, Florida (1973); Davies Symphony Hall, San Francisco (1984); and Castel Gandolfo, near Rome (1965).

UMBERTO PINESCHI

Ruffino d'Assisi [Bartolucci, Ruffino] (*b* Assisi, ?*c*1490; *d* in or after 1532). Italian composer. A Franciscan friar, he was probably attached to the convent of the Frari, Venice. From 2 May 1510 to 2 May 1520 he was *maestro di cappella* at Padua Cathedral. He then moved to the basilica of Il Santo and remained there until 1525, when he left Padua for a post at Vicenza Cathedral. He returned to the Santo in 1531 for at least a year.

One mass, two motets, nine psalms (seven incomplete) and three secular pieces by Ruffino survive. His sacred works reveal an adventurous, forward-looking, if sometimes clumsy composer. The motets both have solemn texts and are scored for low voices: *O inexstimabile sacramentum* uses flexible homophony of the kind found increasingly in the more expressive motets of the period; *Miserere mei Domine* is more contrapuntal, with a cantus firmus in long notes in the bass part. The eight-voice psalms are all for two choirs, and predate the publication (and probably the composition) of Willaert's psalms printed in 1550. Ruffino's have tuttis and animated dialogue throughout, unlike most of the early north Italian double-choir psalm repertory, in which such devices are usually reserved for the doxology; he also treated the verse divisions with considerable freedom. The mass, based on a sequence melody, proceeds mainly by antiphonal repetition which is sometimes so overlapping as to produce a quasi-canonic texture. As in the *Miserere*, the contrapuntal sections are the weakest. Particularly in the mass, an audacious (or perhaps incompetent) harmonic style is apparent in simultaneous false relations, sounding of suspensions against their notes of resolution, and, on occasions, an extraordinary suspension and resolution of a whole chord in one choir against a different chord in the other.

Two of Ruffino's secular works are in the same volume as the two motets. *Haymè amor, haymè fortuna* is a mascherata in frottola form, with text in all voices and a dialogue opening. Jeppesen suggested that *Venite donne belle*, with its clearcut imitative style, may represent the type of Italian piece that influenced such Netherlanders as Josquin. The other piece, *Non finsi mai d'amarte*, is a canzone.

WORKS

Edition: *Ruffino Bartolucci d'Assisi: Opere sacre e profane*, ed. G. Cattin, F. Facchin and L. Bertazzo (Padua, 1991) [complete edn]

Missa super 'Verbum bonum et suave', 8vv, *I-VEaf* 218 (on chant)
Miserere mei Domine, 4vv, 1521⁶ (c.f. Tristis est anima mea)
O inexstimabile sacramentum, 4vv, 1521⁶
2 psalms, 8vv, *TVca(d)*; 7 psalms, *BGc* 1209D (inc., second choir only)
La mi fa solfare, 4vv, *VEnm* 1795
Haymè amor, haymè fortuna, 4vv, 1521⁶
Non finsi mai d'amarte, 4vv, 1526⁶
Venite donne belle, 4vv, 1521⁶

ANTHONY F. CARVER

Ruffo, Titta [Titta, Ruffo Cafiero] (*b* Pisa, 9 June 1877; *d* Florence, 6 July 1953). Italian baritone. He studied briefly with Persichini, Sparapani and Casini. In 1898 he made his début at the Teatro Costanzi, Rome, as the Herald in *Lohengrin*, and then sang at Santiago, Chile (1900), and Buenos Aires (1902). He appeared at Covent Garden in

Titta Ruffo in the title role of Thomas' 'Hamlet'

1903 (Enrico Ashton and Rossini's Figaro), but did not return, reputedly because of a disagreement with Melba. He made his La Scala début during the 1903–4 season as Rigoletto, and was then in demand at all the major European houses. In 1908 he sang at the Colón, where he remained a great favourite until he retired (1931). He was also very popular in the USA, where he first sang in 1912 at Philadelphia (Rigoletto); he then appeared frequently with the Chicago-Philadelphia Grand Opera Company in both cities (until 1926). His Metropolitan début (1922) was as Rossini's Figaro, and he remained with the company for eight seasons, singing Don Carlo (*Ernani*), Amonasro, Gérard (*Andrea Chénier*) and Tonio.

Ruffo's voice was notable for its resonance, power, range and the almost tenor-like ring of its top register, for purity and warmth, and for breath control. It also had a characteristically dark, sometimes sombre colour, particularly noticeable in Thomas' *Hamlet* and in Verdi. He was a vigorous and exuberant actor, and his singing was correspondingly dramatic and forceful, if occasionally coarse and loud. His enormous success, in operas such as *L'Africaine*, *La Gioconda*, *Pagliacci* and *Il barbiere di Siviglia*, finally brought about a complete change in Italian vocal taste for baritone singing, towards an unpolished, aggressive style, and away from the refined, classical 19th-century tradition. His numerous recordings, all refurbished on CD, give a very fair idea of the range and power of his singing and of his strengths as an interpreter, most notably as Rigoletto (in which some claim he is unsurpassed) and Hamlet.

RODOLFO CELLETTI/ALAN BLYTH

Ruffo, Vincenzo (*b* Verona, *c*1508; *d* Sacile, nr Pordenone, 9 Feb 1587). Italian composer and *maestro di cappella*. Between 1520 and 1534 he was trained in the Scuola degli Accoliti of Verona Cathedral, where from 1531 he was one of 12 *cappellani accoliti*. He was presumably taught there by Biagio Rossetti, organist at the cathedral and master of the school. After 1531 his name was accompanied by the honorific 'Don', showing that he had received presbyteral orders. He was not resident in Savona in 1528 as has been suggested. Documents record departures from Verona in 1534 and again in 1541, although his whereabouts, and the date of his return, between these two years are unknown. Ruffo was hired as *maestro di cappella* at Savona Cathedral on 27 October 1542, but he was forced to leave the post when the cathedral was destroyed by the Genoese a year later. Soon thereafter (in 1543 or 1544) he became musico to Alfonso d'Avalos, Marquis of Vasto and governor-general of Milan, in whose service he probably remained until the Marquis's death in 1546. Documents of 1555 reveal that in that year Ruffo was married and the father of two sons aged 16 and 19.

Between 1547 and 1563 Ruffo was again in Verona, where in 1547 he was an unsuccessful candidate for the post of *maestro di musica* at the Accademia Filarmonica. In 1551–2 he took over this post from Jan Nasco, and by 1554 he had also assumed the position of *maestro di cappella* at Verona Cathedral. Among his students there were Giammateo Asola, probably Marc'Antonio Ingegneri, who later taught Monteverdi, and perhaps Andrea Gabrieli. The numerous secular compositions that Ruffo wrote during this period arose from the patronage of the Accademia Filarmonica, then one of the most ambitious amateur musical organizations in Italy, and also demonstrate his connections with patrons in Mantua, Genoa and Brescia.

Between 1563 and 1572 Ruffo was again in Milan, as *maestro di cappella* at the cathedral. During this period he was directly influenced by Cardinal CARLO BORROMEO, Archbishop of Milan, whose active efforts on behalf of the Counter-Reformation are directly reflected in Ruffo's sacred compositions written after this time. In 1565 Cardinals Borromeo and Vitellozzo Vitelli held in Rome a famous trial of sacred compositions by several composers, to see if texts could be set to music in a way that would render the words intelligible, a trial for which Palestrina's later biographer, Baini, supposed that the *Missa Papae Marcelli* had been written. Although there is no documentary proof regarding the performance of Palestrina's work on this occasion, letters during the weeks preceding the trial from Borromeo to Nicolo Ormaneto, his vicar in Milan, show that Borromeo had commissioned Ruffo to write a mass 'which should be as clear as possible'. His response is evident in the published masses of 1570 and many subsequent masses which were written expressly to render the texts as intelligible as possible, and, as he explicitly stated, in accordance with the wishes of Cardinal Borromeo, who was permanently resident in Milan after 1565.

After 1572 Ruffo held less important posts. Between 1573 and 1577 he was in charge of music at Pistoia Cathedral. He was again in Verona between 1578 and 1580, although his post there is not known, and his last appointment was in the small Friulian town of Sacile, where he died, according to his memorial stone, 'in extremum usque senium'.

In both sacred and secular music Ruffo can be considered one of the most prolific and adaptable composers of the period 1540–80. Before 1563, the turning-point of his career, he wrote more madrigals than sacred works, and in 1564 published his only collection of instrumental compositions. After 1563 he abandoned secular music entirely in favour of religious compositions on Latin texts, a sign of his explicit conversion to Counter-Reformation ideals. Ruffo wrote at least 260 madrigals, many of them in the new *note nere* notation of the 1540s, giving them considerable rhythmic flexibility and liveliness. They remain harmonically conservative, however, showing little use of chromatic degree-inflection. Wtorczyk considered Ruffo's work to be an important link in the development of the madrigal between the generation of Festa and Willaert and that of Andrea Gabrieli. His *Capricci in musica a tre voci* (1564), textless compositions apparently intended for instrumental performance, are studded with technical and notational difficulties, and are the earliest known instrumental pieces to be described as 'capricci'.

Ruffo's sacred music shows a long and complex development from the early to the later works. His motets of 1542 and a single mass of that year show him to have mastered the complexities of imitative polyphony as practised by the generation of Gombert and Clemens, and the 1555 motet collection continues this traditional approach, with the six-part pieces in the collection making extensive use of cantus firmus techniques. The masses of 1557 include three imitation-masses based on well-known motets by Jacquet of Mantua and Richafort. After 1563 Ruffo's style changed drastically under the influence of Cardinal Borromeo and the post-Tridentine ideals that he pursued, and the masses of 1570, experimental works for four voices, are almost entirely written in a homophonic style to make the text as clear as possible. In his later masses and psalms he attempted to leaven this strict style with touches of contrapuntal writing, to achieve musical interest while maintaining a high degree of clarity. In his motets, however, he remained relatively unconcerned with intelligibility of text, though these pieces are less intensely contrapuntal in style than the earlier motets had been; the same is true of his later works in lesser liturgical forms such as the responsories and *falsobordoni*.

WORKS

SACRED

Il primo libro de motetti, 5vv (Milan, 1542); ed. in SCMot, xix (1987)
Motetti, 6vv (Venice, 1555); ed. in SCMot, xx (1987)
Messe, 5vv (Venice, 1557); 2 ed. in RRMR, xxxii (1979)
Magnificat, 5vv (Venice, 1559) (the Magnificat mentioned in *EitnerQ* is dated 1539, probably wrongly)
I sacri et santi salmi che si cantano a compieta, 4vv (Venice, 1568)
Missae quatuor concinate ad ritum concilii mediolani, 4vv (Milan, 1570); 2 ed. in RRMR, xxxiii (1979)
Messe … nuovamente composte, secondo la forma del concilio tridentino (?1572, lost; Brescia, 1580); 2 extracts ed. in AMI, i (1897); 1 mass ed. in Musica liturgica, i/1 (Cincinnati, 1958); 1 ed. in RRMR, xxxiii (1979)
Il quarto libro di messe, conforme al decreto del Sacrosancto Concilio di Trento, 6vv (Venice, 1574)
Salmi suavissimi et devotissimi conformi al decreto del Sacro Concilio di Trento, 5vv (Venice, 1574); 1 ed. in AMI, i (1897)
Li Magnificat brevi et aierosi … con tutti li falsi bordoni, 5vv (Venice, 1578)
Sacrae modulationes vulgo motecta liber primus, 6vv (Brescia, 1583)
Sacrae modulationes vulgo motecta, liber secundus, 6vv (Brescia, 1583)
Li soavissimi responsorii della Settimana Santa, 5vv (Milan, 1586[5])
Missae Boromeae, 5vv (Venice, 1592)
Missa 'Alma Redemptoris mater', 1542[3]; ed. in RRMR, xxxii (1979)
Works in 1544[3]; 1547[25]; 1553[16]; 1559[1]; 1564[4]; G. Asola: Secondo libro delle messe (Venice, 1586), ed. in Antologia polifonica, i (Rome, 1924); 1588[2]; 1591[1]

For full list of motets and other sacred works see Lockwood (1970)

SECULAR

Li madrigali a notte negre … libro primo, 4vv (Venice, 1545)
Il primo libro de madrigali cromatici con la gionta di alquanti madrigali del medesimo autore, 4vv (Venice, 1552)
Il primo libro de madrigali, 5vv (Venice, 1553); ed. in SCMad, xxv (1988)
Il secondo libro de madrigali, 5vv (Venice, 1553[28])
Madrigali scielta seconda, 5vv (Venice, 1554[29])
Madrigali, 6–8vv, con la gionta de 5 canzone a diverse voci (Venice, 1554); ed. in SCMad, xxvi (1987)
Il terzo libro de madrigali, 5vv (Pesaro, 1555[31])
Il secondo libro de madrigali, 4vv (Venice, 1555)
Opera nova … intitolata Armonia celeste, nella quale si contengono 25 madrigali … composti con dotta arte et reservato ordine … libro quarto, 5vv (Venice, 1556)
Capricci in musica, a 3, a commodo de virtuosi (Milan, 1564/R)
Works in 1544[22], 1549[30], 1549[31], 1551[10], 1555[25], 1555[27], 1557[17], 1559[16], 1560[10], 1562[6], 1562[7], 1562[22], 1563[7], 1584[15], 1588[20], 1589[12]

LEWIS LOCKWOOD/ALEXANDRA AMATI-CAMPERI

Ruffolo [Ruffulo], **Lucretio** (*b* Guastalla, probably after 1550; *d* after 1612). Italian composer. His *Primo libro de madrigali* (Venice, 1598) for five voices is dedicated to Ferrante II (called 'Ferando' in the dedication), Duke of Guastalla from 1579 to 1630 and Seigneur (later Duke) of Molfetta; Eitner deduced erroneously that this referred to Prince Fernando Gonzaga (see *EitnerQ*). Ruffolo's *Terzo libro de madrigali … con un dialogo* (Venice, 1612) for five and seven voices is dedicated to Cesare Gonzaga. His other known surviving works are two motets (in RISM 1606[6] and 1609[15]) and two manuscript works (in *D-Mbs*).

PIER PAOLO SCATTOLIN

Rufilo [Rufolo], **Matteo** (*fl* 1561–3). Italian composer. His first extant work, *Il primo libro de madrigali a cinque voci* (Venice, 1561), is dated from Naples, and dedicated to Cesare Gonzaga, founder of the Mantuan Accademia degli Invaghiti and Prince of Molfetta from 1557 until 1575. Rufilo's *Primo libro de madrigali a quattro voci* (Venice, 1563) is dated from Ariano, near Salerno. This latter volume demonstrates his ability to handle current musical styles. Some pieces, such as *Perche Philli*, are written in a simple chordal style with lively rhythms; others show a proficiency in counterpoint. A small group of compositions from this book reveals that Rufilo was sympathetic to the progressive tendencies in contemporary madrigal writing. The setting of Petrarch's *Solo e pensoso*, with its strikingly angular opening motif, is advanced for its date, particularly in the use of unusual melodic intervals and unfamiliar changes of harmony. It is tempting to speculate that Rufilo may have known and admired the later work of Rore.

IAIN FENLON

Ruge [Rugge, Rugi, Ruggi, Rouge, Romano], **Filippo** (*b* Rome, *c*1725; *d* ?Paris, after 1767). Italian composer and flautist. He may possibly have sojourned in London when Walsh began publishing five sets of his chamber pieces for flute (1751–4). By 1753 he and his wife, a singer, had settled in Paris. His name appears in the Paris press for the first time in March of that year when he performed

one of his own flute concertos as a soloist in the Concert Spirituel. The programme included a symphony by 'Romano', undoubtedly of Ruge's composition as well. At this time he and his wife performed in the famous musical salon of La Pouplinière. After 1755 Ruge organized a series of concerts at his home in the rue Plâtrière, where he also taught music. In July 1755 he published *Au dessert*, a set of six vocal duos, and in August of the same year he took out a *privilege général* of ten years for instrumental compositions. The following year saw the publication of *Sei sinfonie* op.1, the fourth of which contained a programmatic movement called 'La tempesta'. This symphony and a later one entitled 'La nova tempesta', or 'La tempête suivie du calme', published separately by Venier in 1761, were performed with considerable success at the Concert Spirituel. It is possible that between 1757 and 1761 Ruge entered the service of the Marquis of Seignelay; a manuscript collection discovered near the ruins of the Seignelay château contains some 40 flute compositions by Ruge, as well as a thematic catalogue in his hand giving the incipits of 111 symphonies and overtures, including five of his own and one by his son. Evidently Ruge brought a considerable repertory of Italian music with him from Rome; this music was the repertory of most of his concert appearances, and was further disseminated with the publication, in collaboration with Venier in 1757, of *Sei sinfonie nuove de vari autori italiani* (by Conforti, Crespi, Galuppi, Jommelli, Latilla and Mazzoni). After his last known composition, *Duetti a due flauti traversi o due mandolini o due violini*, published by Grangé in 1767, historical notices of him cease.

Ruge was an important agent in the diffusion and popularization of Italian music and musical style in 18th-century France. His symphonies are typical of the Italian pre-Classical tradition evident in the works of G.B. Sammartini; the Mannheim school mannerisms then coming into vogue are largely absent. The usual fast–slow–fast order of movements is maintained, with slow movements often attractively lyrical. In the flute works, lyricism again prevails over technical display. Although there are few contemporary references to Ruge as a flautist, his appearance as soloist at the Concert Spirituel implies technical prowess of a high order.

WORKS

printed works published in Paris unless otherwise stated

Orch: 6 Concs. in 6 Parts, fl, str, bc, op.3 (London, 1753); 6 sinfonie a 4, hn ad lib, op.1 (1756), nos.4 and 6 ed. in The Symphony 1720–1840, ser. D, ii (New York, 1984); Sinfonia 'La nova tempesta', D, no.2 in 6 sinfonie de vari autori, op.12 (1761); Sinfonia, D; Minuetto amoroso, G, op.5, *F-Pc*; incipits to 4 other sinfonie, *c*1757, see LaRue, *BrookSF*

Chbr: 6 Solos, fl/vn, bc (hpd/vc) (London, 1751); 6 Sonatas in 3 Parts, 4 for 2 fl/vn, b, 2 for 3 fl, op.2 (London, 1752); [12] Sonatas or Duets, 2 fl/vn, op.4, 2 sets (London, 1753–4); 2 sonate, 2 fl, b, cited in Breitkopf catalogue, 1763; Duetti, 2 fl/mand/vn (1767); Sonata, fl, b, *B-Bc*; Sonata da camera, vn, b, *A-Wgm*; 2 suonate, fl, b, *D-KA*; Trio, 2 fl, b, *KA*; *c*30 sonatas, fl, b, several trios, 2 fl, b, several fl duets, many minuets etc., fl, b, *c*1750–67, all in *US-SFsc*

Vocal: Au dessert, duetti, 2 S, 2 fl/vn ad lib (1755); L'après souper, duetti, 2 S, 2 fl/vn ad lib (*c*1762), incl. 6 canzonette, 1v, b/gui; Questa è la prima volta, arietta *US-SFsc*; Canzona, 2vv, *F-Pn*; It. airs, 1753, *Pc*

BARRY S. BROOK, SUSAN KAGAN

Rugeles, Alfredo (*b* Washington DC, 1949). Venezuelan music administrator, composer and conductor. He graduated from the Escuela Juan Manuel Olivares in Caracas (1976), where he studied with Fedora Alemán (singing), Alberto Grau (choral conducting) and Yannis Ioannidis (composition). He furthered his studies at the Robert-Schumann-Hochschule, Düsseldorf, receiving diplomas in composition and orchestral conducting (1979); while in Europe he participated in numerous international composition and conducting workshops. During the 1970s he was heavily involved in instrumental and choral ensembles as a composer, performer and conductor. He sang with and conducted the Schola Cantorum in Caracas and founded and directed the ensembles Grupo Instrumental Universitario Simón Bolívar and Kai-yumei, both of which performed a mainly Latin American traditional folk repertory. In 1976 he wrote *Canto a la paz* for *a cappella* chorus, one of his best known works. Rugeles was appointed professor of orchestral conducting and composition at the Instituto Universitario de Estudios Musicales (IUDEM) in Caracas in 1983. He has continued to be one of the most active conductors in his country, giving the premières of many works by contemporary Venezuelan composers, especially as director of the ensemble Nova Musica and as music director of the orchestra of the Teatro Teresa Carreño. He has also occupied a series of music administrative posts, including that of representative of the Venezuelan branch of the ISCM, through which he has had great impact on the country's musical life. In 1991 he became director of the Circuito Sinfónico Simón Bolívar, an institution dedicated to the development and diffusion of music in Venezuela, in particular organizing the major Festival Latinoamericano de Música in Caracas. Awards for Rugeles's music have included the National Composition Prize (1979) for *Somosnueve* for chamber ensemble and the Premio Muncipal de Música (1985) for *Tanguitis* for piano.

Rugeles's acoustic language draws on common 20th-century idioms. The use of accumulating layers, stark sectionalism, and alternation between functional harmony and pandiatonicism are shown in *El ocaso del héroe* (1982) and *Oración para clamar por los oprimidos* (1989). Pointillism and aleatory techniques are clearly developed in *Puntos y líneas* (1977) and the incorporation and modification of various popular styles are demonstrated well in *Tanguitis* (1984). Of his electronic pieces, *Hace veinte años (Homenaje a Los Beatles)* (1988) in particular shows his use of collage technique.

ERICK CARBALLO

Rugeri [Ruggeri, Ruggieri, Rugieri]. Italian family of violin makers. Francesco (*b* *c*1630; *d* Cremona, 28 Oct 1698). He was thought to have been the earliest pupil of Nicolò Amati, but there is no historical evidence to support this theory. His labels do not mention his teacher nor is his name recorded on the census returns of the Amati household. Francesco and his sons all referred to themselves as 'il Per' or 'detto il Per' on their labels; this nickname is found in virtually every legal and religious document regarding the family from 1669 onwards, and was probably used to distinguish their family from the numerous other Rugeri families living around Cremona.

While Francesco's status relative to Nicolò Amati was inferior during his lifetime, his best instruments are highly respected today and are almost equal in value to those of Amati. He copied the Amati style with care and elegance, using several patterns, but his models show less curvature to the upper and lower bouts and have a slightly squarer C-bout more reminiscent of Stradivari's approach. The edges tend to be less rounded and the soundholes usually have a greater slant to them. The heads are bold, with a deeper throat and a much shallower cut in the volutes. His instruments date mostly from the 1670s and 80s. He is known to have inserted copies of Nicolò Amati's label into his instruments, so he may at times have exported his own work as that of the master. As early as 1685 a well-known player from Modena laid complaint that the violin he had purchased for 12 pistoles as an Amati was in fact a Rugeri, worth three pistoles at the most: on the removal of the Amati label, another of Rugeri had been found underneath.

After 1670 Francesco was assisted by his sons Giovanni Battista (*b* Cremona, 2 July 1653; *d* Cremona, 14 Dec 1711), Giacinto (*b* Cremona, 15 May 1661; *d* Cremona, 2 June 1697) and Vincenzo (*b* Cremona, 30 Sept 1663; *d* Cremona, 4 May 1719). In addition to their violins, the patterns of which varied as much as those of the Amati family, the Rugeris made a relatively small number of violas, but a large number of cellos. At first, the cellos were of the large dimensions that were standard in the 17th century; their effectiveness depends largely on how well their size has been reduced. Beginning in the early 1670s, Francesco experimented with the form of his cellos and seems to have been the first Cremonese maker to produce the smaller, more manageable size of instrument still in use today, shortly before Andrea Guarneri and about 20 years before Stradivari. This was the family's most important contribution to the craft of violin making.

Vincenzo Rugeri was the most prolific maker of the family after his father. He established his own business by 1690, but after his father's death Vincenzo appears to have become less active, and, suffering from the decreasing demand for new violins from the Cremonese market and from the competition of the Stradivari workshop, the volume of work tapered off after about 1710. Vincenzo was an excellent craftsman, whose work bears much the same relationship to Francesco's as the elder Giuseppe Guarneri's does to his father Andrea's. Whereas Francesco Rugeri and Andrea Guarneri worked in quite a robust manner, at least to the same extent as Nicolò Amati, the sons of each showed more delicacy, particularly with deeper fluting near the edges, and narrower purfling set closer to the border of their instruments. However, the delicacy of Vincenzo Rugeri's instruments turned to weakness, and the splendid golden and orange-red varnishes were sometimes replaced by a dull brown. According to a contemporary source, Vincenzo's son Francesco (*b* Cremona, 15 July 1704) was also an instrument maker.

Rugghio di leone (It.). *See* STRING DRUM.

Ruggi, Francesco (*b* Naples, 21 Oct 1767; *d* Naples, 23 Jan 1845). Italian composer and teacher. He was a pupil of Fenaroli at the Conservatorio di S Maria di Loreto, Naples. In 1795 he was appointed honorary *maestro di cappella straordinario* of the city of Naples. He composed three operas for Naples: *La felicità compita* (1794), *L'ombra del Nino* (1794) and *La guerra aperta* (1796); and another for Milan: *Il Sofì Trippone* (1804). This last work (autograph score in the Ricordi archives, Milan) was successful, but the libretto is said to have contained political allusions of which Ruggi had been unaware, a deception that caused him to give up the stage. He thereafter devoted himself exclusively to teaching and to the composition of sacred music, including oratorios and cantatas (many of his works are in the Naples Conservatory library). In 1805 he became *maestro di cappella* in the Regina Coeli convent, Naples; he taught singing to the daughters of Joachim Murat, King of Naples from 1808 to 1815.

Ruggi became one of the best-known contrapuntists of his time, and in 1825 he and Pietro Raimondi succeeded Tritto as counterpoint teachers at the Conservatorio di Musica. The same year he was appointed to the Reale Società Borbonica. On the retirement of Furno in 1835, Ruggi became teacher of *partimento*, continuing to teach counterpoint during the absences of Donizetti and Raimondi. On Donizetti's resignation in 1838, Ruggi was left as sole master of counterpoint and *partimento*. Among his pupils were Carafa and Petrella (but not Bellini, as is sometimes asserted).

GIOVANNI CARLI BALLOLA/ROBERTA MONTEMORRA MARVIN

Ruggieri [Ruggeri], **Giovanni Maria** (*fl* *c*1690–1720). Italian composer. His activity as a composer was apparently centred in Venice. In the preface to his op.1 he called himself a 'dilettante', and the librettist of his first opera, *La Clotilde*, complimented him in the preface as being 'distinguished among dilettantes, the equal of the most celebrated professors of the art'. Virtually nothing is known about him personally. Documents in the Museo Civico Correr, Venice (Fondo Zangirolami, busta III, 'Ca

seggiato Dorsoduro', pp.144–6), indicate that he owned several dwellings, and he may have been in the service of the patrician Domenico Contarini, to whom he (or a namesake) addressed a business letter in 1695 (also *I-Vmc* Cod.Cic. 2519/42). The early phase of his musical career is represented by four collections of trio sonatas, both *da camera* and *da chiesa*, published between 1689 and 1697 as opp.1–4. Op 2 is lost. The surviving sonatas display considerable inventiveness and contrapuntal skill. In 1696 Ruggieri embarked on a career as an opera composer with some success, judging from the number of his operas and their revivals: *Armida abbandonata* was produced at least five times between 1707 and 1715. Some attention was devoted by later writers to his *Elisa* (1711), regarded by them as the earliest comic opera produced in the Venetian territory (see Allacci and Scherillo). As a church composer he exerted an influence on Vivaldi, who went so far as to borrow extensively from Ruggieri's Gloria in D for his own two Glorias (Talbot). The Vivaldi literature further mentions Ruggieri as the reviser of a libretto for that composer (*L'inganno trionfante in amore*), which is not impossible but appears to be undocumented.

WORKS

OPERAS

drammi per musica in three acts, first performed in Venice, unless otherwise stated

La Clotilde (G. Neri), S Cassiano, carn. 1696; as Amar per vendetta, S Moisè, 28 Nov 1702

La Mariamme (L. Burlini), SS Giovanni e Paolo, aut. 1696, arias *B-Bc*

La saggia pazzia di Giunio Bruto (L. Lotti), SS Giovanni e Paolo, 26 Nov 1698

Milziade (Lotti), SS Giovanni e Paolo, carn. 1699, arias *I-CCc*

Armida abbandonata (F. Silvani, after T. Tasso: *Gerusalemme liberata*), S Angelo, 10 Nov 1707, arias *D-MÜs* and *GB-Lbl*

PIERO WEISS

Ruggiero (It.). A melodic-harmonic scheme used in the 16th and 17th centuries for singing poetry and for dances and instrumental variations. It belonged to the repertory of musical formulae, suitable for any text with a certain metrical form, on which Renaissance poet-singers improvised melodic embellishments to the accompaniment of an instrument (usually the lute or the *viola da braccio*). In Italy, where it achieved great popularity, the Ruggiero scheme was used to sing stanzas primarily in *ottava rima*, the metre of epic poetry. As Einstein suggested, the name itself probably derives from the first line of a famous stanza from Ariosto's *Orlando furioso* ('Ruggier, qual sempre fui, tal esser voglio', xliv.61). In spite of the wide diffusion of this melodic formula, our knowledge of its musical content appears irremediably fragmentary. Like many other arias for singing poetry, the Ruggiero was transmitted orally and therefore its history in the 16th century was essentially an unwritten one. The sources that do record pieces labelled 'Ruggiero' also record the variations inherent in any oral tradition. It is difficult to isolate a 'Ruggiero melody' because of the numerous variants; only the bass line has survived in a relatively stable form. The *Aria di ruggiero* most probably circulated as a discant tune (associated with a standard bass) whose 'original' can be postulated, embedded in the different versions of this aria that co-existed in the oral musical culture of the Renaissance.

Ex.1 shows a simple keyboard setting of the Ruggiero formula from an Italian manuscript of the early 17th century. The bass progression appears here in the form that became standard in the 17th century. Throughout its history, the Ruggiero melody, with or without its characteristic bass, retains some fundamental features: it is in the major mode (mostly G), in duple meter, and develops in four short-breathed phrases, the cadential articulation of which defines the progression I–V–V–I. It appears, with no title, as early as 1553 in Diego Ortiz's *Trattado de glosas*, together with other 'Italian tenors' that serve as a basis for viol variations. The formula is probably older than this, however, and may have originated in the vocal repertory of the early 16th century. Many of its distinctive features are discernible in a frottola published by Antico in 1520 (ex.2; a transcription in keyboard tablature had already appeared in 1517 in

Ex.1 *Rugiero, I-Bc* Q34

Ex.2 Ranier: *Me lassarai tu mo* (*Frottole libro quarto* (Antico, 1520)

Antico's *Frottole intabulate da sonare organi*). In the extant sources the title 'Ruggiero' appears late in the century; it accompanies a number of instrumental settings transmitted in manuscripts from the end of the 16th century to the first decades of the 17th century, including *GB-Cu* Dd.4.23, Dd.5.20, Dd.14.24; *GB-Lbl* R.M.24.d.3; *I-Bc* Q34; and the Thysius Lutebook. Notwithstanding a few variants, each of these settings is clearly based on the bass progression used by Ortiz, and the discant parts also show unmistakable analogies with the *Trattado de glossas*. The same melodic profile is still recognizable in later collections that, significantly, report the Ruggiero tune without accompaniment: examples are the 'rugier di Gio. Battista Francese' in *HR-Zaa* I.a.44 (violin tablature) and two texted settings published in the *laude* books of Ignazio De Lazzeri (*Laudi e canzoni*, 1654) and Matteo Coferati (*Corona de sacre canzoni*, 1675, under the title *Aria dell'Ortolano, o Ruggieri, o Donne me chiamano il maturo*).

The identity of several pieces labelled 'Ruggiero' may at times be dramatically obscured by a number of details diverging from the version shown in ex.1. It seems, however, that local variants, especially in the context of an oral tradition, were less important than the overall structure, the harmonic goals and the rhythmic profile of the composition. Vincenzo Galilei's 1584 set of six lute variations (in *I-Fn*) illustrates well the extent to which the Ruggiero formula could undergo extensive transformations without loosing its identity (another set, attributed to the lutenist Santino Garsi and closely related to Galilei's appears in the Cavalcanti Lutebook, *B-Br* II 275). The melodic contour, but not the overall harmonic design, of the bass noticeably diverges from its 16th-century counterparts, and only in the fifth variation does it take on the form that was to become standard in the 17th century. Similarly, we have to wait until the fourth variation to detect a version of the Ruggiero tune similar to that of Ortiz or Coferati.

The 'Rugier glosado de Antonio' in Venegas de Henestrosa's *Libro de cifra nueva* (1557) and the 'Ruger' in *GB-Lbl* Roy.App.74 are unrelated to the formula given by Ortiz. The music of both recalls an arrangement for voice and vihuela by Valderrábano of Ariosto's famous text (*Silva de sirenas*, 1547). The same melody surfaces in several madrigals on Ariosto's stanzas. It was surely a favourite aria for singing *ottave rime* (Haar, 1981); but whether it ever circulated with the title 'Ruggiero' remains uncertain.

In the 17th century, with the development of the monodic style, the *aria di ruggiero* found its way into printed collections of vocal music, where it continued to serve as formula for strophically set texts. Solo songs and duets composed on the Ruggiero music may be found among the works of D'India (1609), Antonio Brunelli (1613), Dognazzi (1614), Cifra (1615, 1617, 1619), Puliti (1621), Rontani (1622), Ghizzolo (1623), G.B. Fossato (1628), Massenzio (1629), Annibale Gregori (1635) and Caspar Kittel (1638). The popularity of the Ruggiero is confirmed by its presence in many Italian guitar books as well as in an increasing number of instrumental variations written in this period: by Kapsberger (1604) for chitarrone; by Bargnani (1611), Brunelli (1614), Salamone Rossi (1623), Buonamente (1626), Frescobaldi (1634), Tarquinio Merula (1637), Kindermann (1653), Agostino Guerrieri (1673) and G.B. Vitali (*c*1680) for ensemble; by Macque (*GB-Lbl* Add.30491), Ercole Pasquini (*I-TRc*), Mayone (1603), Trabaci (1603), Frescobaldi (1615–16, 1624, 1634, 1637) and Bernardo Storace (1664) for keyboard. Anonymous sets also survive in several manuscripts from the first half of the 17th century (see Apfel, 1977, and Silbiger, 1980). Some settings for lute and for five-course guitar would seem to indicate that the Ruggiero was also used as a scheme for dance; it usually appears in pairs alternating duple and triple metre, such as *ruggiero* and *ruggiero in tripla* (Benedetto Sanseverino, 1622) or *ruggieri* and *corrente di ruggieri* (Giuseppe Rasponi, 1635 and *I-Fn* Magl.XIX.105).

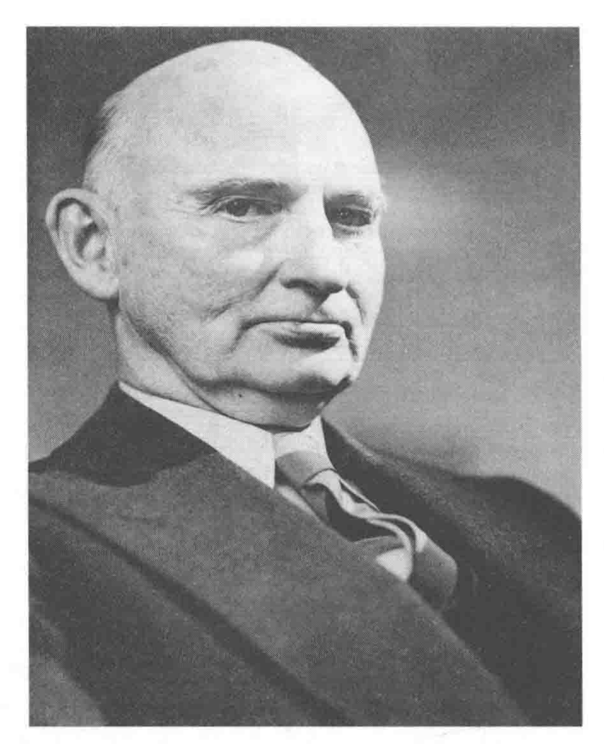
GIUSEPPE GERBINO and ALEXANDER SILBIGER



Ruggles, Carl [Charles] **(Sprague)** (*b* East Marion, MA, 11 March 1876; *d* Bennington, VT, 24 Oct 1971). American composer. He was an associate in the 1920s and 30s of Ives, Varèse and Cowell, and with them he strove for a new, radical spirit in music. His nontonal, polyphonic works have, however, little in common with anything composed by his colleagues.

1. LIFE. Ruggles was a descendant of one of Massachusetts's oldest and most remarkable families, consisting of

notable settlers and revolutionary patriots as well as the respected loyalist Timothy Ruggles (1711–95), the dissenting president of the 'Stamp-act Congress' of 1765. Also prominent in England, the family can be traced back to 15th-century Staffordshire and the noted 17th-century playwright George Ruggle. A later American matrilineal line stems from Charlemagne.

His childhood, spent on a peninsular farm near a small Buzzards' Bay fishing village, Marion, Massachusetts, was largely shaped by a tyrannical grandfather, a sensible and stabilizing grandmother, a weak-willed father, who eventually squandered his portion of the family inheritance, and a musical but short-lived mother, who affectionately sang Ruggles many tunes which he learned to play by ear, first on a home-made cigar box violin, and then a real one given to him by Charles Cook, the lighthouse keeper on nearby Bird Island. He soon progressed to violin lessons with a German-born bandmaster and itinerate music teacher, George Hill, who lived in the neighbouring town of New Bedford. Soon after the death of his grandfather and mother (by 1890), he and the rest of his family (including a younger brother and an older sister) moved to the Belmont area near Boston. In his late teens, while working in theatre orchestras, he began to attend Boston SO concerts and to play in chamber groups with members of the orchestra. He continued violin lessons with Felix Winternitz, and claimed that he had him play once for Kreisler. The supposed outcome was a plan that he should study in Prague, taking composition with Dvořák, but the project fell through on the death of the financial sponsor. Ruggles then had private lessons in theory with Josef Claus and in composition with John Knowles Paine. He struck up a friendship with Alfred de Voto, pianist of the Boston SO, who accompanied him in performances of some early songs (these were destroyed by Ruggles not long afterwards, but two survive and were published by C.W. Thompson and Arthur P. Schmidt). His first name appears on both scores as Carl, instead of his legal name Charles, because, he later explained, of his great admiration for German music and many of his professional musician acquaintances of that ancestry; it became his permanent appellation. About the turn of the century Ruggles was working as an engraver for the Boston music publisher F.H. Gilson, where he met Henry Gilbert. From November 1902 for a year he wrote music criticism for the *Belmont Tribune* and the *Watertown Tribune*, and near the end of this phase he enrolled in Barrett Wendell's English literature course at Harvard University. In 1906 he gave some music club lectures on modern music, praising Wagner, Franck, d'Indy and, above all, Debussy. One such organization was the Chadwick Club in Lawrence, where he briefly resided. It was through the club that he met a local 26-year-old singer, Charlotte Snell, whom he married in 1908, a year after they had both relocated in Winona, Minnesota.

In Winona both Carl and Charlotte taught at the soon defunct Mar d'Mar School of Music. Shortly thereafter, Carl founded the Winona SO, conducting, among other things, light classics and several operas in concert form. Before long he was working on an opera of his own, *The Sunken Bell*. Hoping to interest the Metropolitan Opera in the work, he settled in New York in 1917, and there he received support from private patronage, gave composition lessons, and started an orchestra at the Rand School

Carl Ruggles

of Social Science, becoming also director of its chorus in 1920 but leaving his position there in 1921. The song *Toys* was written in 1919 for the fourth birthday of his son Micah; printed in 1920, it was his first mature work to be published. Also in New York, Ruggles met Varèse, whose International Composers' Guild provided a platform for the works that he now produced more rapidly than at any other period: *Angels* for muted brass was presented by the guild in 1922, *Toys* in 1923, *Vox clamans in deserto* for soprano and small orchestra in 1924, the orchestral suite *Men and Mountains* also in 1924, and *Portals* for string orchestra in 1926. The last two were published in Cowell's New Music Edition (NME), *Men and Mountains* as the first issue (1927). Ives, a subscriber to the NME, was impressed by the strength of Ruggles's piece, and after their meeting (probably in 1929) the two composers developed a deep mutual friendship and respect. When Ives's *Lincoln, the Great Commoner* was published in the NME in 1932, Ruggles designed the cover (he had begun to paint some years earlier). In 1932 Ruggles's biggest composition, *Sun-Treader* for orchestra, was given its first performances under Slonimsky in Paris and Berlin. It was published in the NME (1934) and played again at the 1936 ISCM Festival (*Angels* had been given at the festival of 1925). Ruggles first heard the piece only in 1965, and then from a recording; the American première did not take place until 1966.

From the 1920s onwards Ruggles spent most summers in Vermont, where he settled in 1924, moving into an old schoolhouse in Arlington. His last teaching post was as director of a composition class at the University of Miami (1938–43). (Armed with a glowing recommendation from his Arlington neighbour and friend, the writer Dorothy Canfield Fisher, he had also, in 1932, attempted, unsuccessfully, to join the faculty of the newly formed music

department of Bennington College, near Arlington.) These were the years of his last important compositions, *Evocations* for piano and *Organum* for orchestra. Thereafter he continued, as always, to revise his scores and he embarked on some new compositions – during the 1950s he mentioned a work for piano and large orchestra as well as several piano pieces with flower titles – but he completed only a textless hymn tune, *Exaltation* (1958), composed as a memorial to his wife. Most of his creative energy was now going into painting. Yet these late years saw his work as a composer officially honoured: he was elected to the National Institute of Arts and Letters through Ives's insistence (1954), made an honorary DMus of the University of Vermont (1960) and given a Brandeis University Creative Arts Award (1964); his 85th birthday was declared 'Carl Ruggles Day' in Vermont; and in 1966 there was a Ruggles festival at Bowdoin College, Maine.

2. WORKS. As it appears in his eight published compositions, the Ruggles style is both well defined and highly distinctive. Though *Angels* has many chords that can feasibly be related to diatonic triads (in the final version it begins and ends 'in' A♭ major), Ruggles's structures are not tonal; indeed, his harmonies and melodies are usually intensely chromatic. He was aware of the work of the Second Viennese School and had a particular regard for Berg, but his handling of atonality owes little to any example and had been developed before he could have known any serial music. Similarly, his hardy independence made him resistant to influences from his friends Varèse and Ives.

Writers close to Ruggles (Seeger and Cowell) stressed his way of writing melodies so that no note was repeated until a large number (seven to ten) of others had been sounded, for which purpose he regarded octave transpositions as equivalent. Occasionally this results in a full 12-pitch-class succession (at the opening of *Evocation no.2*, for example), but Ruggles's method is not serial. Gilbert has drawn attention to the importance of three-note sets in generating both melody and harmony in *Evocations*, *Sun-Treader* and *Organum*. As an instance of this, ex.1 shows the predominance of the set of a tritone plus a semitone (octave displacements treated as equivalent) in the top part of the two opening phrases of *Sun-Treader*; note that only the last two set forms are disposed so that the melodic expression of a tritone is avoided. The same set occurs prominently in *Evocation no.2*, *Organum* and other pieces.

The first phrase of *Sun-Treader*, heard over a regular pounding in the timpani (somewhat reminiscent of Brahms's First Symphony), is typical of the mounting declamations of heroic striving that are common in Ruggles's music. Here it recurs, sometimes in altered form, as an initiator of fresh departure throughout the

Ex.1 *Sun-Treader*

single-movement work, which bounds to its conclusion through several such reopenings. The other principal material of *Sun-Treader* is, again, characteristically, more involuted, narrower in melodic interval, quieter and more richly polyphonic. These two types of music are developed, generally in alternation, as the work presses forward. Of its two main sections, the second may be viewed as a shortened and varied recapitulation.

Other works of Ruggles have forms similar to that of *Sun-Treader*; both *Lilacs* and *Organum* come to a definite halt before starting on a recapitulatory section, and *Portals* is comparable in its separate development of powerful rising phrases and spiral descents. All of these are much shorter than *Sun-Treader*, which, at about 17 minutes, is by far the longest of Ruggles's compositions. *Lilacs*, the middle movement of *Men and Mountains*, provides a moment of relative stillness between *Men*, a declamatory invocation with horns forward, and *Marching Mountains*, which is as rugged as its title. When Ruggles revised *Men and Mountains* in 1941 he added a new ending to *Marching Mountains*, scaling it down by retrograde from the peak at which it had originally finished (there is a retrogradation on a larger scale in *Sun-Treader*).

Despite his admiration for Debussy, Ruggles did not use the orchestra primarily as a resource for colour; rather his aim was the clearest and boldest presentation of the features that were most important to him: line and polyphony. Of his two major non-orchestral works, the *Evocations* are texturally simpler than, for example, *Sun-Treader*, but their style is not specifically 'pianistic' (despite improvements resulting from editorial collaboration with his friend, the pianist John Kirkpatrick); indeed, they were all orchestrated by Ruggles. The slow harmonies of *Angels* have an apt distant glow when heard on muted brass, yet the piece was originally made available for any other group of like instruments – strings and clarinets were alternatives suggested (the third published version (1960), however, withdraws those options). Instrumentation was thus a secondary matter: in Ivesian terms, Ruggles was less concerned with 'manner' than with 'substance', and it was to strengthen and intensify that substance that he laboured so hard and long in composition and revision.

Ruggles also shared Ives's reverence for the great English and American poets of the Romantic period. His beautiful settings of Browning and Whitman in *Vox clamans in deserto* show this, as do his titles and epigraphs. 'Sun-treader' was Browning's epithet for Shelley, and *Men and Mountains* carries an inscription from Blake: 'Great things are done when men and mountains meet', while the words of Whitman written above *Portals* have a wider reference in the work of one who persistently strove for the sublime and the ecstatic: 'What are those of the known but to ascend and enter the Unknown?'

PAUL GRIFFITHS, MARILYN J. ZIFFRIN/ROBERT McMAHAN

Rugi, Filippo. *See* RUGE, FILIPPO.

Rugieri. *See* RUGERI family.

Rühling, Johannes (*b* Borna, bap. 30 Aug 1550; *d* Groitzsch, 2 April 1615). German organist and arranger. He spent his entire life in Saxony, specifically in the Leipzig area. From 1572 to 1575 he held an organ post at Geithain, later at Döbeln, and in 1582 at Groitzsch, where he also served as town clerk. He published *Tabulaturbuch auff Orgeln und Instrument* in Leipzig in 1583. This anthology of 143 folios, printed in 'new' German organ tablature, contains 85 motet arrangements, most of which have Latin titles, though five are in German. It includes pieces by Lassus (15), Clemens non Papa (13), Crecquillon (5), Wert (4), Senfl (2), and one each by Arcadelt, Josquin, Gombert, J. Regnart, Richafort, Verdelot, J. Walter and a number of regional figures (see *MGG1*), as well as anonymous pieces. The pieces are arranged according to the church calendar. Coloration is absent, so that 'each organist can employ and conveniently use his own additions'. The measures are barred; five-part writing prevails. A second book was promised in the foreword, but it never appeared. Rühling's tablature provided a collection of motets frequently performed on church organs in Saxony at the time, but otherwise holds no great historical significance. A transcription of the title-page, and a detailed index of the contents, is in *BrownI*.

CLYDE WILLIAM YOUNG

Rühm, Gerhard (*b* Vienna, 12 Feb 1930). Austrian composer, poet and pianist. He studied at the Vienna Music Academy (until 1952), where his teachers included Seidlhofer (piano), and privately with Hauer (1953–4). After spending time in the Lebanon, he frequently turned to Eastern, East Asian and Indonesian music for inspiration. Inclined to transcend the divisions between artistic media, he developed a style of poetry that shares much with music and the visual arts. He taught free graphics and exotic arts at the Hochschule für bildende Künste, Hamburg (1972–95) and was one of the founders of the Wiener Gruppe, the other members of which include Friedrich Achleitner, H.C. Artmann, Konrad Bayer and Oswald Wiener.

Rühm has described the border between music and language as 'auditive poetry'. His compositions move between serial techniques – setting out from whole-tone and 12-note procedures – and more radical reductions in material (such as 'one-tone music'). After 1978 the majority of his compositions have been written using a technique he calls the 'transformation method', in which notes on the piano are assigned to particular letters, so that syllables, regarded as spoken units, form chords; in this way texts are set 'in music'. Variations are made to the music as appropriate to the nature of the text. Using unconventional notation, he has also developed various forms of 'visual music' to be imagined in silence. Many of his songs, the song cycle *wiener lieder* and the operetta *der schweissfuss* can be considered to verge on this genre.

SIGRID WIESMANN

Ruhnke, Martin (*b* Köslin, Pomerania [now Koszalin, Poland], 14 June 1921). German musicologist. After army service and subsequent captivity as POW (1939–49), he studied musicology with Blume at Kiel University, taking the doctorate there in 1954 with a dissertation on Joachim Burmeister. From 1954 to 1960 he was an assistant lecturer at the musicology institute of the Free University, Berlin, where he completed the *Habilitation* in musicology in 1961 with a work on the history of the German *Hofmusikkollegien* in the 16th century. A university lecturer until 1964, he was appointed professor of musicology at the University of Erlangen-Nuremberg, and emeritus professor in 1986.

Ruhnke has been a member of the Musikgeschichtliche Kommission since 1955 and a member of the committee of the Gesellschaft für Musikforschung since 1965; he succeeded Blume and Fellerer as president (1968–74). His research has centred on music history, theory and performing practice; he has edited two volumes of Blume's writings. He has also studied the life and work of Telemann: he became general editor of the collected works in 1960 and was himself editor with Hans Hörner of Telemann's *St Luke Passion* of 1728. He was also editor of the Stäblein Festschrift (1967) and president of the Telemann-Gesellschaft (1991–7).

Ruiz (Hurtado), Federico (*b* Caracas, 8 Feb 1948). Venezuelan composer. He studied composition with Primo Casale, Vicente Emilio Sojo and Evencio Castellanos at the José Angel Lamas Conservatory in Caracas (graduated 1974). He also studied contemporary composition techniques and electro-acoustic music with Ioannidis and Eduardo Kusnir.

A versatile composer, his output includes symphonic, choral and chamber works, electro-acoustic music and music for film and theatre. He has won several national and regional prizes in composition in Venezuela, including the José Angel Lamas National Prize for orchestral music. Parallel to his work as a composer, he was the director of the Cantaclaro vocal ensemble, through which he promoted Venezuelan and Latin American traditional and urban popular genres (1976–94). His style synthesizes the different influences in his training, namely the European historical and modernist traditions, the Venezuelan school of nationalism led by Sojo, and Latin American popular idioms.

CARMEN HELENA TÉLLEZ

Ruiz, Irma (*b* Buenos Aires, 24 April 1938). Argentine ethnomusicologist and teacher. She studied music at the Municipal Conservatory of Music and anthropology at the University of Buenos Aires. In the late 1960s she abandoned an intended piano career for ethnomusicology which she studied at the Instituto Nacional de Musicología (INM). With Jorge Novati, she then began a systematic study of indigenous music in Argentina. From 1971 she was in charge of the ethnographic music section at the INM, becoming chief of the scientific-technical division in 1981 and serving as the director of the institute (1983–5, 1993–7). From 1984 she edited various publications and organized the Argentine musicology days, which led to the creation in 1985 of the Asociación Argentina de Musicología (AAM), of which she served as vice-president (1985–8) and president (1989–94).

In 1987 she promoted the annual AAM conference, together with the musicology days. Since 1983 she has been an official researcher for CONICET (Consejo Nacional de Investigaciones Científicas y Técnicas). She taught in the department of anthropology, University of Buenos Aires (1978–83), and since 1987 has been teaching the anthropology of music in the department of arts at the same institution. A visiting professor at the University of Granada, she has received numerous research grants from INM, the OAS (Organization of American States), CONICET and the University of Buenos Aires. Her studies of aboriginal music reveal a musico-anthropological approach and focus on Argentine ethnic groups (especially the Mbyá-Guarani) and others from Paraguay, Bolivia and Peru. She has also investigated the history of tango.

GERARD BÉHAGUE

Ruiz, Juan. *See* ARCIPRESTE DE HITA.

Ruiz, Matías (*d* Madrid, before 12 Sept 1708). Spanish composer. From no later than 1668 (see Jambou) he was a *licenciado* and *maestro de capilla* of the Convento Real de la Encarnación at Madrid. He taught in the 1670s at

Madrid, where his best-known pupil was Vaquedano. In 1675 Ortiz de Zárate rated him with Carlos Patiño as the most active composer of Latin sacred music at Madrid. He was a contender for the post of *maestro de capilla* of the royal chapel won by Cristóbal Galán in 1680. In 1779 Iriarte classed him with Morales, Guerrero and Victoria in a list of the 12 outstanding religious composers in Spanish history. Of his sacred music, the unaccompanied motet *Adiuva nos*, for Ash Wednesday, is stark and austere. His soulful setting of an excerpt from Lope de Vega's *La Dorotea, Barquerillo nuebo* had a wide dissemination and a copy survives in Mexico City. Other vernacular works are extant in Bogotá, Guatemala and Sucre, evidence of the popularity of his works in Central and South America.

ROBERT STEVENSON

Ruiz Armengol, Mario (*b* Veracruz, 17 March 1911). Mexican composer. Born into a family of actors and singers of zarzuela, he was strongly influenced by folk music from an early age. As a child he played various wind instruments, later studying the piano at the Conservatorio Nacional de Música. He embarked on a career as a folk musician, conducting his father's orchestra, and in 1931 he joined the radio station XEW (then the principal Mexican radio station) as a pianist, becoming well-known as an arranger and accompanist of singers, among them Jorge Negrete and Pedro Vargas. He subsequently studied harmony and composition with Rolón (1936) and Halffter (1948).

While his arrangements of folksongs (notably *Tengo miedo*, *Ausencia*, *Estoy enamorado*, *¿Por qué llorar?*, *Aunque tu no me quieras*, *¿Por qué te vas?* and *Muchachita*) have been broadcast widely, Ruiz Armengol has also composed works in a classical style, characterized by an impeccable, imaginative use of traditional harmony and the incorporation of melodic phrases from urban Mexican music. His highly idiomatic piano works – usually comprising short pieces grouped under generic titles such as *Miniaturas* or *Estudios* – are also distinguished by a jazz-influenced style.

RICARDO MIRANDA-PÉREZ

Ruiz de Alegría, Dionisio Preciado. *See* PRECIADO, DIONISIO.

Ruiz de Ribayaz, Lucas (*b* Santa María Ribarredonda, nr Burgos, probably before 1650). Spanish guitarist, harpist, composer and priest. He studied for the priesthood at the collegiate church of Villafranca del Bierzo, where he later became a prebendary. In his *Luz y norte musical* he stated that he began his musical studies after his ordination while in the service of the Counts Lemos and Andrade and their patron Don Fadrique of Toledo, Marquis of Villafranca. Other statements in this book imply possible affiliations with the Spanish court. He also mentioned having visited 'remote and overseas provinces' – undoubtedly a reference to his trip to Peru in 1677 with his patron, the Count of Lemos. The count's entourage at the time included not only Ruiz de Ribayaz but also the distinguished theatre composer Tomás de Torrejón y Velasco, the finest composer in South America during the 18th century.

Ruiz de Ribayaz is known only through his *Luz y norte musical para caminar por las cifras de la guitarra española y arpa, tañer, y cantar a compás por canto de órgano; y breve explicación del arte* (Madrid, 1677), which contains detailed introductory tutors for the Baroque guitar and two-course harp, theoretical chapters on general musicianship and an appendix, 'Ecos del libro', containing compositions in tablature for both instruments. In the guitar tutor he advocated the Spanish tuning for the five-course guitar – *A/a-d/d'-g/g-b/b-e'* – and also quoted extensively from the text of Gaspar Sanz's *Instrucción de música sobre la guitarra española* of 1674. The 'Ecos del libro' includes guitar pieces by Sanz and harp pieces by Andrés Lorente and Juan del Vado as well as a number of unidentifiable pieces presumably composed by Ruiz de Ribayaz himself. The pieces are in dance forms characteristic of the late 17th-century Spanish Baroque style and predominantly of Iberian origin (*folia*, *jácaras*, *canario*, *passacalles*, etc).

ROBERT STRIZICH/CRAIG H. RUSSELL

Ruiz de Robledo, Juan (*b* ?Segovia; *d* ?Berlanga, after 1644). Spanish composer. He was a choirboy at Segovia Cathedral and later spent 34 years as *maestro de capilla* at León and Valladolid; he was at Valladolid by 1627 and was also a canon there. In 1644 he became prior of the collegiate church at Berlanga. Under his direction choral music at León and Valladolid reached a high standard. According to his own account in his *Laura de música eclesiástica* (Madrid, 1644), any benefice holder at León who sang off key or with poor enunciation was automatically liable to be punished, while at Valladolid any prebendary who could not pass a singing test after one year of study was denied bread and wine.

Ruiz's surviving music is contained in his *Misas, psalmos, Magnificas, motetes, y otras cosas tocantes al culto divino* (Madrid, 1627), which, though marked 'ex typographia Regia', was never printed (manuscript copies are located at *E-Bc*, *Mn*, *V*, *VAc* and elsewhere). It includes seven masses, nine settings of the *Magnificat* and 49 other works; all show that Ruiz was a master of eight-part writing for two antiphonal choirs. His *Laura de música eclesiástica* uses, on the title-page, the word 'impresso', but it also survives only in manuscript; two 17th-century copies are in the Real Monasterio, El Escorial; a third, dating from the 19th century, is in the Biblioteca Nacional, Madrid. The *Laura* is chiefly a treatise on matters of liturgical practice, but it also contains an extended defence of music against those who claim that it is purely a mechanical art, without decency, gravity or sound rules.

BARTON HUDSON

Ruiz Espadero, Nicolás (*b* Havana, 15 Feb 1832; *d* Havana, 30 Aug 1890). Cuban composer, pianist and teacher. He was born to a wealthy and cultured family, and was first taught music by his mother; it is claimed that he composed acceptable pieces from the age of three or four. He was later taught by Julian Fontana, Juan Miro and Fernando Arizti. In 1854 he met Gottschalk, whose performances helped gain recognition for his works, and with whom he established a long-lasting friendship. Ruiz Espadero was also active as a pianist, choir director and concert promoter. His compositions became well known in Spain and Cuba, and he was also recognized as a teacher; among his pupils were Gaspar Villate and Ignacio Cervantes. He transcribed and edited a number of Gottschalk's works, contributing a foreword (dated 1872) in which he explained some of the stylistic and aesthetic theories he had shared with Gottschalk, and their support of nationalistic expression in music.

Ruiz Espadero's music is in Romantic style and shows some nationalistic influences. Tieles Ferrer (1994) points out that his compositions are divided between those of national character and those of more European style. Among the nationalistic works are those based on Creole rhythms or melodies, such as the *Canto del guajiro* op.61 (1874) for piano; those modelled on romantic Cuban songs, including the *Barcarolle* op.18 (1850) and the Scherzo op.58 (1866), both for piano; and those based on nationalistic Cuban songs, such as the *Canto del esclavo* op.21 (1856) and *Melodía* (1859). He also wrote symphonies, including *Sur la tombe de Gottschalk* op.68 (1870), chamber music, songs and many short piano pieces. His works were published in Cuba, Spain, France, the USA and Germany.

VICTORIA ELI RODRÍGUEZ

Ruiz-Pipó, Antonio (*b* Granada, 7 April 1934; *d* Paris, 17 Oct 1997). Franco-Spanish composer and pianist. He studied the piano at the Academia Frank Marshall in Barcelona with Larrocha (1948–51) and in Paris at the Ecole Normale de Musique (1952–62); his composition teachers included Montsalvatge and Manuel Blancafort. Between 1962 and 1976 he completed recital tours of Europe, America and Japan. He taught at the Ecole Normale de Musique (from 1970) and, after taking French citizenship, at the Ecole Nationale de Musique et Danse, Châteauroux (1982–97). His other activities included founding the Nuits Musicales de Bonaguil summer festival in 1963 (artistic director, 1976–97), working as a music editor and programme planner for Spanish and French Radio (1972–92), and serving as a guest lecturer at the Vienna Music Academy and at conservatories in Paris, Prague and Amsterdam. He composed in a conservative style rooted in Spanish tradition. The influence of Stravinsky and Bartók is particularly evident in his works of the 1960s and 70s, which use the simplicity and stylistic alienation of neo-classicism to create a melancholic mood. He is best known for his solo guitar music, which derives from the *vihuela* tradition. His honours include the International Music Prize of the City of Zaragoza (1973) and the Padre Antonio Soler Composition Prize.

WORKS
(*selective list*)

Vocal (for S, pf, unless otherwise stated): 2 Songs: Debajo de verde, Alamillos (anon), 1949; A los verdes prados (L. de Vega), 1950; 2 Songs: Un brazo de la noche, Erguete mía (F. Rukkers. *See* RUCKERS family.

Rull. *See* GANGAR.

Ruloffs, Bartholomeus (*b* Amsterdam, bap. 29 Oct 1741; *d* Amsterdam, 13 May 1801). Dutch violinist, organist, conductor, composer and librettist. His father Reynier Ruloffs was a bassoonist; his brother Jan Pieter was a violinist at the Moses- en Aäronkerk and a timpanist in the Amsterdam Stadsschouwburg orchestra, in which Bartholomeus became a violinist in 1757. In the 1760s Ruloffs was active as a violinist at the Moses- en Aäronkerk and in 1766 he was appointed organist at the Nieuwezijdskapel. The Amsterdam theatre burnt down in 1772, and the following year Ruloffs succeeded Hendrik Chalon as conductor of the orchestra. On 15 September 1774 the rebuilt theatre was inaugurated with music by Ruloffs. In 1783 Ruloffs became organist at the Westerkerk, and in 1791 conductor of the Felix Meritis symphony concerts. In 1791 he was also appointed organist at the Nieuwe Kerk, but he left in 1793 to become organist at the Oude Kerk, where he remained until his death. In the same year he married the singer Ernestina Louisa Anderegg. He was removed from his conducting duties at the theatre in 1798, and returned only briefly in 1800–01.

Ruloffs was a leading figure in the development of musical life in Amsterdam. He conducted performances at the theatre there of operas including Paul Wranitzky's *Oberon* and Dittersdorf's *Der Apotheker und der Doktor* and *Das rothe Käppchen* (all 1796) and Mozart's *Die Entführung aus dem Serail* (1797) and *Die Zauberflöte* (1799), probably adapting and in some cases translating them himself. He also translated, and inserted his own music into, many French *opéras comiques*, including Grétry's *Les deux avares* (as 'De twee gierigaards', 1787) and *Richard Coeur-de-lion* ('Richard Leeuwenhart', 1791), Lucile Grétry's *Le mariage d'Antonio* ('Het huwelijk van Antonio', 1791), Monsigny's *La belle Arsène* ('De schoone Arsène', 1789) and Gossec's *Le tonnelier* ('De kuiper', 1792). In addition Ruloffs wrote songs, occasional music for the Felix Meritis concerts and some instrumental works.

WORKS

all printed works published in Amsterdam; some MSS in Theater Instituut Nederland, Amsterdam

Stage: 5 opéras comiques, arr. and with some new music, after F.-J. Gossec, A.E.M. Grétry, L. Grétry, P.-A. Monsigny, 1787–92; Inwyding van den Amsteldamschen Schouwburg, 1774; Komst van Willem den Eersten, Prins van Oranje, te Leyden, 1780, lost; Arlequin, herbergier en taartjesbakker (pantomime), 1785, lost; De twee standbeelden (P. Pypers), 1798, lost; De bruiloft van Kloris en Roosje (Spl), ? excerpts in Zang-album, arr. J.M. Coenen (1880)

Cants. (all lost): Jephta, 1779; De muzyk aan de leden van de Maatschappy Felix Meritis, 1792; Zangstuk voor de Maatschappij Felix Meritis, 1793; De kersnacht, 1794; Komst der herderen te Bethlehem, 1795; De gelukkige maatschappij, 1796; De mensch door deugd en verstand het voortreffelijkst schepsel, 1797; Lentezangen, 1798; De overwinning, 1799; Choorzang, 1800; Gezang op de vrede, 1801

Songs: Zangwijzen tot de nagelatene stichtelijke gezangen (B. Elikink), 1v, kbd, bc (*c*1769), collab. J.G. Meder; Muzikaale verlustiging, bestaande in nieuwe Nederduitsche gezangen, 1v, bc, insts (*c*1770); Muziekstukjes voor de proeve van kleine gedigten voor kinderen (H. van Alphen) (*c*1789)

Inst: 6 sonates, hpd, vn, vc, op.1 (*c*1766); Les récréations d'Apollon, ou Les 3 symphonies … tiré des nouveaux opéras françois (1772); Musique militaire, 2 cl, 2 hn, bn (1785), arr. as Marsch, retraite en vaandelmarsch, kbd, vn (*c*1786); Marsch, 2 cl, 2 hn, bn (1786); Marsch, 2 vn, va, b, 2 ob, 2 hn (1786); De morgenstond en grote veldslag, orch, 1793, lost

AREND KOOLE/PAUL VAN REIJEN

Rumania. *See* ROMANIA.

Rumba [rhumba]. A popular recreational dance of Afro-Cuban origin. It originated in the dances of the Kongo cult; the *columbia* and *guaguancó* were mimetic dances, danced with extensive hip and shoulder movements and improvised acrobatics, and the *rumba yambú* and *rumba de tiempó España* were imitations of old people and housewives. In Cuba the rumba is defined by its accompaniment, most often comprising *conga*, *tumbadora*, *quinto* or *salidor* drums and claves and *palitos* or *cáscara* (stick-beaten resonant object). These instruments perform in a complex duple-metre pattern using extensive syncopation and *tresillo* (dotted quaver–dotted quaver–quaver) rhythms (*see* CUBA, §II, 1(iii)). The rumba became known in a modified form in the USA as early as 1914 but it did not become popular elsewhere until it was reintroduced to the USA in a less suggestive version in 1931, and it soon spread to Europe. As a ballroom dance it is performed by a solo dancer or by a couple in the normal ballroom embrace but held slightly apart. The characteristic movement is a rocking of the hips, to a quick–quick–slow rhythm, often creating cross-rhythms with the accompaniment. The melody is often repetitive and much of the character of the music derives from the ostinato one-bar rhythmic pattern played on the maracas, claves (or sticks) and other Cuban percussion instruments. In Europe and the USA in the 1930s the rumba absorbed jazz elements; it continued as a popular ballroom dance into the 1970s and has been the model for the mambo, cha cha cha and other 'Latin American' ballroom dances. The rumba has also been used in concert music, notably by Milhaud in *La création du monde* and in the finale of his Second Piano Concerto.

WILLIAM GRADANTE, DEANE L. ROOT/R

Rumford, (Robert) Kennerley. English baritone, husband of CLARA BUTT.

Rummel. German family of musicians.

(1) **Christian (Franz Ludwig Friedrich Alexander) Rummel** (*b* Brichsenstadt, Bavaria, 27 Nov 1787; *d* Wiesbaden, 13 Feb 1849). Composer, pianist and conductor. He was educated in Mannheim, where he studied the violin with Heinrich Ritter and composition with Karl Jakob Wagner; he also received some guidance from the Abbé Vogler. From 1806 he was a military band director and from 1808 to 1813 served in the Peninsular War, during which he was taken prisoner. He married while in Spain. After the Battle of Waterloo, in which he fought, he left the army and settled in Wiesbaden where he taught until Duke Wilhelm of Nassau invited him to form and lead his court orchestra; Rummel directed it from 1815 to 1842, during which time it became renowned. At the ducal court he taught the Princess of Nassau, for whom he wrote a piano instruction book. When the ducal orchestra was disbanded in 1842, it became amalgamated with the theatre orchestra and Rummel succeeded T. Eisfeld as its director. In his last few years in this position, Rummel was often ill and Konradin Kreutzer temporarily replaced him.

Rummel was an excellent pianist and made concert tours to major cities in Germany, Switzerland, Belgium and Holland. An extremely versatile musician, he also played the clarinet and violin, in addition to teaching, composing and conducting. When he took over the direction of the theatre orchestra at the age of 55, he set out to remedy his previous lack of theatrical experience. He was meticulous in his preparation of a repertory which included operas by Halévy, Auber and Meyerbeer, and won the respect of all with whom he worked; he went to Paris to study Meyerbeer's *Les Huguenots* before he conducted it at Wiesbaden. It is doubtful whether Beethoven was as cordially disposed to Rummel as Pougin asserted in the supplement to Fétis's *Biographie universelle des musiciens*, but certainly Rummel was influenced by Beethoven. Schott wrote to Beethoven on 19 April 1824 recommending Rummel, who would soon be visiting Vienna in the company of the Duke of Nassau. On 29 May 1824, Beethoven replied that he had arranged for Rummel to visit him to show some of his compositions and that he would advise him as to which course to follow.

Rummel wrote many works for solo piano including variations and fantasias on operatic themes and, for piano duet, variations, sonatas and polonaises. He also wrote chamber music for various combinations of wind instruments, a violin and piano sonata, a clarinet concerto, and works for piano and orchestra, in addition to military band music. Rummel composed and arranged works for the orchestra at Wiesbaden, including an arrangement of Beethoven's Kreutzer Sonata; Rummel also made piano transcriptions of operatic numbers. In the *Concerto militaire* for piano and orchestra op.68, Rummel quotes a Beethoven theme which the soloist takes up in brilliant figuration. Concentration on technical display is a typical feature of his writing for piano.

(2) **Josephine Rummel** (*b* Manzanares, Spain, 12 May 1812; *d* Wiesbaden, 19 Dec 1877). Pianist, eldest child of (1) Christian Rummel. Having had piano instruction from her father, Josephine earned a reputation as a pianist through her performances in Germany and abroad. She became court pianist at Wiesbaden.

(3) **Joseph Rummel** (*b* Wiesbaden, 6 Oct 1818; *d* London, 25 March 1880). Composer, pianist and clarinettist, son of (1) Christian Rummel. His father gave him a well-rounded musical education with special emphasis on the clarinet and piano. He entered the service of the Duke of Oldenburg at Wiesbaden until in 1842 he moved to Paris where, after a period in London, he lived from 1847 to 1870. He returned to London in 1870 and remained there for the rest of his life. He was well known as a pianist and clarinettist. His large output, estimated at over 2000 works, consists mainly of arrangements of operatic excerpts for piano solo and duet. He also wrote fantasias on operatic themes, waltzes, mazurkas and studies for piano. The majority of his works were published by Escudier in Paris and Schott in Mainz.

(4) **Franziska Rummel** (*b* Wiesbaden, 4 Feb 1821). Opera singer, daughter of (1) Christian Rummel. She was taught first by her father at Wiesbaden; subsequently she studied singing in Paris with Bordogni and then in Milan with Lamperti. The Wiesbaden opera engaged her as principal singer in 1843. She toured successfully in Germany and Belgium before her marriage to the music publisher Peter Schott, in Brussels. Among her roles were Marguerite de Valois in Meyerbeer's *Les Huguenots*, Amina in Carl Blum's *Die Nachtwandlerin* and Constanze in Mozart's *Die Entführung aus dem Serail*. Some of her performances at Frankfurt (1843 and 1845) and Hamburg (1847) were favourably reviewed in the *Allgemeine musikalische Zeitung*; she was most noted for her brilliant coloratura singing.

(5) **Franz Rummel** (*b* London, 11 Jan 1853; *d* Berlin, 3 May 1901). Pianist, son of (3) Joseph Rummel. He studied with Louis Brassin at the Brussels Conservatory, where he won a first prize in 1872. The same year he made his début in Antwerp, playing Henselt's Concerto, and performed the Schumann concerto at the Albert Hall in London. During the 1876–7 season he performed in Belgium, the Netherlands, England, France and Scandinavia. He made four tours of the USA (in 1878, 1886, 1890 and 1898) and married a daughter of Samuel F.B. Morse, inventor of the telegraph. He settled in Dessau in 1893 and taught at the Stern Conservatory in Berlin.

(6) **Walter Morse Rummel** (*b* Berlin, 19 July 1887; *d* Bordeaux, 2 May 1953). Pianist and composer, son of (5) Franz Rummel. He was first taught by his father, after whose death he moved to Washington, DC, studied with S.M. Fabian and acquired US citizenship. In 1904 he returned to Berlin to study piano with Godowsky and composition with Hugo Kaun. He then moved to Paris, where he became a friend and champion of Debussy, giving the first performance of several of his pieces, including five of the *Préludes*, four of the *Etudes* and,

together with his first wife, the pianist Thérèse Chaigneau, the *Six épigraphes antiques* and *En blanc et noir*. From 1918 to 1921 he performed in joint recitals throughout Europe with the dancer Isadora Duncan. In the 1920s he lived in London, where he was an active recitalist. He made an acclaimed tour of South America in 1930 and then settled in Brussels, where he was befriended by King Leopold III. During the early 1940s he performed in Germany and the occupied countries and in 1944 took German citizenship. Rummel's recordings include striking interpretations of Bach, Chopin and Liszt. His 40 songs and numerous piano pieces, which reflect the influences of Debussy and Richard Strauss, achieved some popularity, as did his many Bach transcriptions. Rummel wrote an account of his artistic philosophy in *Credo d'un artiste* (Paris, 1950).

Rūmī, Jalāl al-Dīn (*b* Balkh, Afghanistan, 30 Sept 1207; *d* Konya, Turkey, 1273). Persian mystic, poet and religious leader. Coming from a long line of theologians, as a boy he lived in Balkh, a great centre of Islamic civilization until its devastation by the Mongols. His family narrowly avoided this event, leaving in about 1217. In 1228 they eventually settled in Konya (then known as Rūm) at the invitation of the Seljuq ruler. Jalāl al-Dīn inherited his father's position as a revered theological teacher, but in 1244 Shams al-Dīn Tabrīzī, an enigmatic dervish, appeared and profoundly changed his life. Rūmī became totally immersed in mysticism. His vast output of writings is well preserved. His *Dīvān-e Shams* contains more than 3000 poems in the *ghazal* form. The *Masnavī-ye maᶜnavī*, sometimes called 'the Qur'an in Persian', comprises some ten volumes. He composed it in a state of ecstatic inspiration, singing as he danced around the pillar in his school.

The Mevlevi Sufi order is named after Rūmī's honorific title 'Mawlānā' ('master'). His eldest son Bahā al-Dīn Muḥammad (1226–1312), better known as Sultān Veled, formalized the order from the community of Rūmī's followers. Its ritual entails melodious singing from the *Masnawī* and other poetry, the use of musical instruments and the slow, graceful 'whirling dervish' dance (*see* ISLAMIC RELIGIOUS MUSIC, §II, 5). The end-blown flute (*ney*) is emblematic of the sacred ceremony, and the *Masnavī* opens with a famous mystical allusion to the reed-flute, symbolizing the Sufi lover's quest for union with the beloved (God): 'Listen to the reed-flute, how it complains, lamenting its banishment from its home [the reed-bed]'. The anniversary of Rūmī's death is commemorated with important ceremonies at his shrine in Konya.

VERONICA DOUBLEDAY

Runchak, Volodymyr Petrovych (*b* Lutzk, nr L'viv, 12 June 1960). Ukrainian composer, conductor and accordionist. He studied the accordion, conducting and composition at the Kiev Conservatory (1979–86) and although, formally speaking, his composition teacher was Yury Ishchenko, his real mentors were the composers Stankovych and Zubyts'ky, and the conductor Fedir Hlushchenko. After serving in the Soviet army for two years, he worked as an accompanist at the Kiev Institute of Culture (1988–9) after which he joined the staff of the Kiev branch of the Ukrainian Composers' Union. He attended the Brandenburgisches Colloquium für Neue Musik for several years (1992–8) where he studied with Klaus Huber and Vinko Globokar, among others, and in 1994 was appointed guest professor at the Escola de Musica Luso-Alterna in Portugal. His works have been awarded prizes in international competitions and have been played in various festivals across Europe; meanwhile, as a conductor, Runchak has given the first Ukrainian performances of many important European works. His music follows the modernist tradition established in the Ukraine by Lyatoshyns'ky, a tradition which for Runchak involves the reintroduction of established genres (as in the *Requiem*), extrovert dramatism, multi-layered polyphony (Second Symphony), a fondness for extended instrumental techniques (*Homo ludens II*, *Whispering . . . Listening*) and a blending of folk motifs within elaborate polyphonic textures (*Holosinnya*).

WORKS
(*selective list*)

Op: Pina [The Foam] (chbr op, 2), 1984

Orch: Strasti za Vladislavom [Passions for Vladislav], elocutionist, solo accdn, brass, perc, kbds, str, rock group, video screens, 1982–88, arr. accdn, pf, 1999; In Memoriam, 1984; Sym. no.1 'Symfoniya plachiv' [Sym. of Weeping], 1985; Sym. no.2 'Svitla pechal' [Lights of Sorrow], 1985, rev. 1987; Chbr Sym. no.1, str, 1986; Sym. no.3 'Credo', 1986, rev. 1991; Conc., a sax, chbr orch, 1987; Hutsul Mosaic, trad. insts, 1987; Chbr Sym. no.2 'Canzone spirituali', vn, vc, pf, str, 1988; Chbr Sym. no.3, fls (different registers), orch of soloists, 1991; 1+16+ . . ., non conc., vn, str, 1997

Choral: Volhynian Folk Songs, 1980; The Uniqueness (triptych, M. Vinhranovs'ky, I. Drach and L. Kostenko), 1985; Nevilnychi pisni [Slavery Songs] (cant. no.2, L. Ukrainka), 1988; Hospody, Bozhe nash [Oh our Lord] (prayer dedicated to the rebirth of Ukr. Orthodox and Ukr. Gk. Catholic Churches), 1990; Na smert' Isusa [On the Death of Jesus] (ecclesiastical song, after Bible: *Luke*), spkr, female chorus, tpt, 1991; Elegy (Vinhranovs'ky), 1993; Ospivuyuche Rizdvo Hospodnie [Glorifying the Birth of Christ] (conc.-chant, after Bible: *Luke*), children's vv, chorus, 1999

VIRKO BALEY

Runcie, Constance Faunt Le Roy (*b* Indianapolis, IN, 15 Jan 1836; *d* Winnetka, IL, 17 May 1911). American composer, pianist and writer. Runcie's maternal grandfather was Robert Owen, and she grew up in New Harmony, Indiana. Her father, Robert Henry Faunt Le Roy, was an amateur flautist and composer; her mother, Jane Owen, was a pianist and harpist. In 1852, following her father's death, Runcie went to Germany with her family for six years. Her initial plans were to study the piano and harp, but she turned to composition. In 1861 she married James Runcie, an Episcopalian minister in New Harmony, and after 1871 they lived in St Joseph, Missouri; they had two daughters and two sons.

It appears that Runcie was the first American woman to compose in large forms. She is credited with a symphony, a piano concerto, a violin concerto, an opera (*The Prince of Asturia*), chamber music and 50 songs, many to her own texts. Annie Louise Cary and William Mason praised her songs, of which the most widely sung were *I've wandered far away*, *Invocation to Love*, *Das Vöglein singt* and *Take my Soul, O Lord*. William Mason once remarked to Runcie that he had thought her music was 'that of a man. It is both virile and dramatic'. Her published vocal works include *My Spirit Rests* (New York, 1882) amd *Five Tone Poems for Contralto* (New York, 1884).

According to tradition no musical composition submitted by Runcie for publication was rejected. She also wrote poetry, two novels (unpublished) and a biography of Felix Mendelssohn. She is credited with being the founder of one of the first women's clubs in the USA, the Minerva Society in New Harmony, in 1859. In 1897 an accident deprived her of her hearing, and she curtailed her activities thereafter.

CAROL NEULS-BATES

Run DMC. American rap group. The group was formed in 1982 by the rappers Run (Joseph Simmons; *b* New York, 24 Nov 1966) and DMC (Darryl McDaniels; *b* New York, 31 May 1964), and DJ Jam Master Jay (Jason Mizell; *b* New York, 1965). From the beginning of its career the group was managed by Simmons's brother, Russell, whose companies included Rush Productions and Def Jam Recordings. The group's chanted raps and hard-edged, minimal sound, produced by Larry Smith on records such as *It's like that*, *Sucker MCs* and *Hard Times*, were complemented by a gangster image that ran counter to the flamboyant styles then fashionable in hip hop. From the influence of Def Jam's co-owner, Rick Rubin, Run DMC incorporated more heavy metal guitars into their recordings. This led to their 1986 collaboration with Aerosmith on *Walk this way*. The record's impact on both rap and rock fans was enhanced by MTV's enthusiastic support for its accompanying video. During the mid-1980s the group were the biggest stars of hip hop, starring in films such as *Krush Groove*, headlining tours such as the Fresh Festival and sponsored by Adidas. They have continued to record, albeit with less spectacular success, and in 1998 their first record, *It's like that*, was remixed to become a number one single in the UK.

DAVID TOOP

Rung, Frederik (*b* Copenhagen, 14 June 1854; *d* Copenhagen, 22 Jan 1914). Danish conductor and composer, son of HENRIK RUNG. Frederik began to compose when still a child; but neither these works nor his later compositions are very remarkable. As a conductor, however, he distinguished himself, beginning his career brilliantly in the Caeciliaforening, a choral society founded by his father in 1851 which devoted itself to Italian Renaissance church music. On his father's death, Rung took charge of the choir and extended the repertory to include Handel's oratorios and Bach's church music. In 1887 he founded the Madrigalkor, a choir selected from the members of the Caeciliaforening, and this became internationally famous. From 1884 he was second conductor at the Royal Theatre (under Johan Svendsen) and from 1908 chief conductor. There he won acclaim for some outstanding performances of Wagner's and Puccini's operas. His compositions include a number of stage works, two symphonies, smaller orchestral pieces and chamber works, among them two string quartets, a piano quartet and a nonet, smaller choral works, songs and piano music.

BO MARSCHNER

Rung, Henrik (*b* Copenhagen, 31 March 1807; *d* Copenhagen, 12 Dec 1871). Danish composer, father of FREDERIK RUNG. He studied in Copenhagen and played the double bass in the Royal Orchestra. His incidental music for Hertz's tragedy *Svend Dyrings hus* (1837) won him a bursary to travel to Vienna and Rome, where he studied to be a singing teacher. Once back in Copenhagen he became chorus master and then singing teacher to the soloists of the Royal Opera. In 1851 he founded a choral society, Caeciliaforening, devoted to Italian Renaissance church music. He wrote several operas and *syngestykker* (Singspiele) as well as much incidental music for the theatre and many songs, but as a composer he

was overshadowed by his greater contemporary, J.P.E. Hartmann.

WORKS

all stage works performed at Copenhagen, Royal Opera

En bolero (op, 2, S. Beyer, partly after E. Scribe: *La xacarilla*), 18 March 1843
Stormen paa København (op, 5, T. Overskou), 21 Jan 1845
Aagerkarl og sanger (operetta, 1, H.H. Nyegaard), 18 Nov 1846
Federigo (syngestykke, 3, H. Hertz), 23 March 1848
Stella (syngestykke, 3, A. von der Recke, after Scribe: *Giralda, ou La nouvelle Psyché*), 2 Feb 1852
Flugt og fare (syngestykke, 1, Beyer), 29 April 1852
Studenterne fra Salamanca (syngestykke, 1, Nyegaard), 21 Feb 1854
Annunciatas fest (syngestykke, 1, von der Recke, after M. Carré and J. Loru: *Les trovatelles*), 22 May 1856
Incid music; many songs

ELIZABETH FORBES

Runge. German family of printers. From 1611 Georg Runge managed the press belonging to his father Christoph Runge the elder in the Berlin Minorite monastery. After Georg's death (1639) his widow and heirs carried on the business until 1644, when Georg's son Christoph Runge the younger was able to take it over. Half of the 128 musical works from Berlin (listed by Lenz) were printed on the Runge press, which was particularly active in disseminating the works of Zangius, Johannes Crüger, Hentzschel and others.

THEODOR WOHNHAAS

Rünger, Gertrude (*b* Posen [now Poznań], 1899; *d* Berlin, 10 June 1965). German mezzo-soprano and soprano. She sang at Erfurt (1924–7), then for a season at Magdeburg, and from 1928 to 1935 at Vienna, where she took part in some notable revivals such as *Don Carlos* (1931) and *Macbeth* (1933). She returned to Vienna in 1938 after a period in Berlin. Her career also expanded to include the 1933 and 1934 seasons at Covent Garden, 1937 at the Metropolitan and 1938 at La Scala, where she sang Brünnhilde in the *Ring* cycle under Krauss, and Isolde the following year under De Sabata. At Salzburg she sang Fatima (*Oberon*), the Nurse (*Die Frau ohne Schatten*), Clytemnestra (*Elektra*) and Leonore (*Fidelio*). In London her most admired role was Kundry in which she 'displayed exceptional power in a wide range of dramatic expression'. Her later career included appearances as Electra under Knappertsbusch (1940) and some postwar seasons in Berlin. Her studio recordings are few, but solos from *Don Carlos* and *Macbeth* show fine quality, both vocal and dramatic. Fragments from the Vienna Archive confirm her position among the most impressive singers of her generation.

J.B. STEANE

Runnicles, Donald (Cameron) (*b* Edinburgh, 16 Nov 1954). Scottish conductor. He studied at Edinburgh and Cambridge Universities and at the London Opera Centre. After several years' work in German opera houses he became Generalmusikdirektor at Freiburg. In 1988 he conducted a Metropolitan Opera performance of *Lulu* at short notice. A successful *Ring* cycle in San Francisco led to his appointment there as music director in 1992. He first appeared at Glyndebourne (*Don Giovanni*) in 1991 and made his Bayreuth début with *Tannhäuser* in 1992. He has directed *Ring* cycles in Vienna and worked as a guest conductor throughout Germany and America. More recently his work has expanded into the concert hall, and in 1994 he conducted Mahler's Eighth Symphony for the opening night of the Edinburgh International Festival. Runnicles is a talented interpreter of large-scale operatic repertory of the 19th and 20th centuries, and has made an acclaimed recording of *Hänsel und Gretel*.

ALEXANDER R.C. SCOTT

Runólfsson, Karl Otto (*b* Reykjavík, 24 Oct 1900; *d* Reykjavík, 29 Nov 1970). Icelandic composer, trumpeter and teacher. He trained and worked as a printer before deciding, in 1925, to devote himself entirely to music. He studied the trumpet (with Lauritz Sörensen) and the violin (with Axel Jörgensen) in Copenhagen from 1925 to 1927. He completed his studies at the Reykjavík College of Music (1934–9) with Franz Mixa and Victor Urbancic. He taught the trumpet and theory at the Reykjavík College of Music (1939–64), was conductor of the brass band Svanur (1938–60) and director of the Reykjavík youth bands (1955–70). His early compositions (including some highly popular songs) are in a traditional, late-Romantic style. The development of his mature style, which he saw as an attempt to combine traditional Icelandic folk music with European traditions, took place during his studies with Mixa in the 1930s. It is characterized by vigorous counterpoint, frequent use of ostinato patterns, and folk elements such as tritones, irregular meters, and parallel 5ths.

WORKS

(*selective list*)

Orch.: Adagio funèbre op.2, 1931–3; Á krossgötum [At the Crossroads], suite, op.11, 1939; Forleikur að Fjalla-Eyvindi [Eyvindur of the Mountains], ov., op.21, 1949, Ég bið að heilsa [Greeting], ballet, op.27, 1952; Dimmalimm, ballet for children, op.30, 1953; Sym. 'Esja', f, op.54, 1964–7
Chbr.: Íslensk rímnalög [Icelandic Rhyme Songs], op.12, vn, pf, 1940; Sonata, op.14, vn, pf, *c*1942; Sonata, op.23, tpt, pf, 1950; sonata, op.65, vc, pf, 1969
Songs, folksong arrs.

ÁRNI HEIMIR INGÓLFSSON

Runonlaulu. The singing of old poems or Kalevalaic runes in Finland. *See* FINLAND, §II, 2.

Ruodolf de Neuchâtel [von Fenis, von Neuenburg]. *See* RUDOLF VON FENIS-NEUENBURG.

Rupert of Deutz [Rupertus Tuitiensis] (*b* ?Liège, 1075–80; *d* Deutz, nr Cologne, 4 March 1129/30). Theologian, liturgist and hymnodist. He was an oblate of the Benedictine abbey of St Laurent in Liège and was educated there under Abbot Berengar (*d* 1115). His teacher in music may have been a certain Heribrand. Ordained priest in 1106, he moved to the abbey of St Michael in Siegburg about 1116 and in 1120 was made abbot of St Heribert in Deutz. His most widely distributed work, to judge from the large number of extant manuscripts, is *De divinis officiis*; it is on the liturgy and contains a number of observations on plainchant. His copious theological writings involved him in disputes with Anselm of Laon and William of Champeaux. One of them, *De Trinitate*, in the section *De operibus Spiritus Sancti* (vol.vii, chap.

16), contains a passage on music of a certain originality, finding in Old Testament citations evidence of the musical proportions usually associated with Pythagoras. There are, in addition, a number of exegetical works; a chronicle of the abbey of St Laurent formerly ascribed to Rupert is no longer considered authentic. He is thought to have written in his youth hymns in honour of St Mary Magdalen, St Goar, St Severinus and St Heribert, and Rupert himself refers to his hymn to the Holy Spirit, *Deus meus et Dominus*, which may, however, have been sung to the melody of the *Veni Creator Spiritus*. Rupert's credentials as a composer of melodies are thus not clearly established. His significance in the history of music has perhaps been magnified by his reputation as a theologian and his association with that much studied musical centre, Liège. Collected writings are in *PL*, clxvii-clxx; also ed. R.M. Haacke, Corpus Christianorum: continuatio medievalis, vii, ix, xxi–xxiv, xxvi, xxix (Turnhout, 1967–79).

LAWRENCE GUSHEE

Rupin [Rupini], **Ivan Alekseyevich** (*b* Kostroma, 1792; *d* St Petersburg, 8/20 March 1850). Russian singer and composer. He was born into a family of serfs. As a youth he sang in a local choir, but was later sent to Moscow to study singing with the celebrated Italian castrato Pietro Muschietti. Liberated from his serfdom he moved to St Petersburg, where he gave singing lessons and became well known as a performer, adopting the professional name Rupini. For a while he took lessons in harmony and musical theory with T.V. Zhuchkovsky (1785–1838), a composer and sometime director of the imperial theatres. In 1832 he collaborated with Zhuchkovsky on an iopera-vaudeville *Imeninï blagodetel'nogo pomeshchika* ('A Charitable Landowner's Nameday'); in the same year he published at St Petersburg a *Muzïkal'ny al'bom severnogo pevtsa* ('The northern singer's album of music'), which contained works by Alyabyev, and later produced a collection of his own romances. Entitled *Le bouquet* (St Petersburg, 1839), this contained his song *Rïtsar'* ('The Knight'), to a poem by Pushkin, three settings of works by F.A. Koni, and *Videniye* ('The Vision') to a poem by A.I. Polezhayev. Rupin was appointed chorus master of the Italian opera in 1843.

Rupin is known particularly for his collection of 12 Russian folksongs, *Narodnïye russkiye pesni*, published in the years 1831 and 1833 in St Petersburg. This collection is remarkable among the others produced during the first half of the 19th century, since it prints each song in two forms. The first version consists of the solo line accompanied by simple harmonies for the keyboard or guitar; the second is an arrangement of the song for three-part choir. A modern edition by T. Popova was published in Moscow in 1955.

GEOFFREY NORRIS

Rupp, Franz (*b* Schongau, 24 Feb 1901; *d* New York, 27 May 1992). American pianist of German birth. He entered the Akademie der Tonkunst in Munich at the age of 14, where he studied with August Schmidt-Lindner. He first visited the USA at the age of 20 as accompanist to the violinist Willy Burmester. Among the singers for whom he played were the baritone Heinrich Schlusnus, Sigrid Onegin, Lotte Lehmann, Maria Stader and Gigli; later he played exclusively for Marian Anderson for 25 years. He also accompanied instrumentalists, including Morini, Feuermann and Georg Kulenkampff. With Kreisler he recorded the complete violin sonatas of Beethoven, and with Kakaya Urakawa the sonatas of Beethoven, Brahms and Mendelssohn. He gave solo recitals, and appeared as a soloist with various German orchestras under such conductors as Furtwängler; he was also active as a chamber musician and as a harpsichordist in Baroque music. Rupp settled in the USA in 1938, and taught lieder and chamber music for seven years at the Curtis Institute.

PHILIP L. MILLER

Ruppe, Christian Friedrich [Christiaan Frederik; Christiaan Fredrik] (*b* Salzungen, Saxe-Meiningen, 22 Aug 1753; *d* Leiden, 25 May 1826). Dutch composer and theorist of German birth, brother of FREDRICH CHRISTIAN RUPPE. His father, a carpenter, built instruments and was the organist at Wildprechtroda. In 1773 Ruppe enrolled at the University of Leiden. By 1784 he was active as a merchant, and in his publications opp.4 and 5 he described himself as an 'Amateur de musique'. After a period in Germany, in 1787 Ruppe again enrolled at the university, this time as a music student. He became organist of the Lutheran congregation in Leiden in 1788. Ruppe's own edition of his Sonatas op.8 includes a privilege of 29 July 1790 entitling him to publish his compositions for 15 years; it lists many works that are now lost, including keyboard concertos, French and Italian arias, and quartets. On 18 October 1790 he was appointed *kapelmeester* of the University of Leiden. He founded a religious choral society, Tot Meerder Oefening, in Leiden in 1800. Although he began to teach courses on music in 1802 and wrote a book on the theory of 'modern' music (1809–10), it was not until 14 May 1816 that King Willem I appointed him lecturer in music, with the stipulation that he continue his activities as music director of the university.

Ruppe was well known in the Netherlands during his lifetime for his theoretical treatise and voluminous compositions. Much of his surviving work is chamber music, written in a clear Viennese Classical style that is simple but expressive; the later compositions show a more Romantic attitude. He also wrote keyboard sonatinas (perhaps written for private students), cantatas performed in churches in Leiden and The Hague, children's songs, keyboard character studies inspired by current political events and odes for the university, all reflecting his various activities.

WORKS

printed works published in The Hague, Amsterdam, Rotterdam, Leiden or Haarlem

VOCAL

Galatée (oc, after J.P. Florian), Leiden, 1804, only lib extant

Cants.: Muziek voor het kerstfeest, 1796; Muziek voor het paasch feest, 1797; Gezangen voor het feest van den 19 December 1799; Q. Horatii Flacci odae IV et alia ode (1803), incl. S. Speyert van der Eyk: Cantata in pacis festo, pubd separately (1802); De hoop der zaligheid, 1809; Vrije naarvolging der Latijnsche hymnen (H. Hillebrand) (1810); Jezus in Gethsemané, 1813; Op den winter,

1813; Koor voor godsdienstige zanggenootschappen (Ps xxxiii) (1822); others, listed in Doove and Knödler, in *NL-L*

PAUL VAN REIJEN

Ruppe, Friedrich Christian (*b* Salzungen, Saxe-Meiningen, 18 Feb 1771; *d* Meiningen, 14 Aug 1834). German violinist, keyboard player and composer, brother of CHRISTIAN FRIEDRICH RUPPE. In 1786, when his father died and Salzungen was devastated by fire, he left to study theology at Eisenach and supported himself by giving keyboard lessons. Half a year later he came under the patronage of Duke Georg I of Saxe-Meiningen, who provided for his education in music theory and violin playing, as well as in public finance (in Jena). After further studies in Weimar, Dessau and Wörlitz he was appointed both an administrator and a musician at the court in 1798; he gave piano concerts and played the violin in the orchestra. His compositions, which were not well known outside Meiningen, include *Leiden und Tod Jesu* and *Der verlorene Sohn* (oratorios), *Der Sieg der Tugend* (unfinished opera), *Friedenscantate* (1814), a keyboard concerto with choir and various chamber works, of which a trio for piano, clarinet and bassoon (Offenbach, *c*1821) and a sonata for piano, violin and cello ad lib (Kassel, n.d.) were published.

BARRY KERNFELD

Ruppel, Karl Heinrich (*b* Darmstadt, 5 Sept 1900; *d* Munich, 8 Sept 1980). German critic and writer on music. In his formative years he was strongly influenced by his friendship with the young Erich Kleiber, who taught him music while he attended the Darmstadt Gymnasium. Until 1923 he studied literature, music and art at the Darmstadt Technische Hochschule and at the universities of Frankfurt, Freiburg and Munich. From 1928 to 1944 he worked as editor of the *Kölnische Zeitung* literary supplement, and from 1932 with the paper's editorial staff in Berlin as chief theatre and music critic. He spent five years from 1945 as artistic director of the Württemberg State Theatre in Stuttgart. In 1950 he became chief music critic of the *Süddeutsche Zeitung* in Munich, to which he contributed for more than 25 years. Ruppel's carefully weighed judgments and elegant prose epitomize the best of German music criticism. He was invariably sympathetic, but did not lightly give praise. His writings are thoroughly informed and display sound judgment, based on long experience and enhanced by clear structure and fluent expression. He wrote the libretto for Mihalovici's opera *Die Heimkehr* (1953) and the scenario for Mihalovici's ballet *Thésée* (1964).

HANS PETER KRELLMANN

Ruppenthal, Stephen (Cranston) (*b* Berkeley, 3 June 1949). American composer and performer. He studied composition and electronic music with Strange and musicology with Lou Harrison and Vernon Read at San Jose State University (BA in trumpet performance, 1973; MA in musicology, 1975). His thesis, *A History of the Development and Techniques of Sound Poetry in the Twentieth Century in Western Cultures*, constituted the first comprehensive documentation of the genre in English. Most of his compositions have been inspired by ritual ceremonies of traditional non-Western cultures. His works employ speech, synthesizers and improvisation in slowly evolving, rhapsodic formats with gestures stimulated by graphic notations of Ruppenthal's own design. He submits the voice and other acoustic sound sources, including conventional orchestral instruments, to a wide gamut of analogue and digital electronic modification. Another aspect of his work is the incorporation of jazz elements. He first

performed with the Electric Weasel Ensemble in 1975, and has since appeared with that and other groups in the USA and abroad. From 1978 to 1982 he taught at the Center for Experimental and Interdisciplinary Art at San Francisco State University and was director of the electronic music studio there in 1981–2. Ruppenthal is the author of *Vocable Gestures: an Historical Survey of Sound Poetry* (with Larry Wendt, 1977) and several articles on avant-garde composers for this dictionary.

CHARLES AMIRKHANIAN

Ruppli, Michel (*b* Coulommiers, 3 July 1934). French jazz, blues and popular music discographer. He attended the University of Paris and the Ecole Normale Supérieure des Télécommunications and from 1960 worked as an electronics engineer. At the same time he began to compile important discographies of recording companies and labels of the postwar era (sometimes in collaboration with Bill Daniels and Bob Porter) based on his research into the record companies' ledgers and files; these contain detailed information on thousands of recording sessions and are far more complete and accurate than earlier discographies. Ruppli has also contributed discographies of individual musicians to *Jazz hot*.

Ruprecht. German family of organ builders. The family relationships have not been established. Hieronymus Ruprecht (*fl* 1626–61) built organs at St Laurentius, Cologne (1626–7); Mönchengladbach-Rheindalen (1633); Adenau (1639); Halver, Westphalia (1652–5); and Linnich (1661). Johannes Ruprecht worked in Boppard from 1658 to 1675. In 1676 he produced an organ for the Minorite church in Kleve; Conrad Ruprecht (*fl* 1656–1706), who worked both in Anholt and in Boxmeer, the Netherlands, built an instrument in 1656 for the Minorite church in Duisburg (Rhine) and another in 1698 for St Martinus, Doesburg (Netherlands). No instrument by the Ruprecht family has survived.

The specifications used by the family remained fairly close to those of the 16th-century Rhenish-Belgian school, comprising relatively simply distributed diapason choruses, a group of wide-scaled 16′, 8′, 4′, 2⅔′, 2′ and 1⅓′ stops, and a small number of reed stops such as Trommet, Crummhorn and Schalmei. Of the stops used by this school, only the five-rank Nachthorn and the pedal stops (2′ Flauto and 8′ Trommet) were evidently never used by the Ruprecht family.

HANS KLOTZ

Ruprecht, (Josef) Martin [?Stephan] (*b* ?Vienna, *c*1758; *d* Vienna, 7 June 1800). Austrian composer and tenor. He was a member of Katherina Schindler's troupe that gave a guest season at the Kärntnertortheater, Vienna, in 1776. In 1778 he became a founder-member of the German National Singspiel company, appearing as Fritz in the première of Umlauf's *Die Bergknappen* (which had to be postponed for nearly a month owing to his illness) and later in most of the new productions, including his own *Was erhält die Männer treu?*. He sang with the Italian Opera following the closure of the Singspiel company in 1783 and joined the re-formed German company again in 1785. In 1788 he left the Opera, and shortly afterwards joined the court chapel ensemble, of which he remained a member until his death. He was considered a talented singer, though a rather ordinary actor.

Of his compositions, equal merit and importance attach to his Singspiele and his songs, six of which were published by Artaria in 1785. Evidence for the performance of only four of Ruprecht's Singspiele can be traced; it seems likely that *Die Wette* was not performed, and that *Der Irrwisch* and *Der Derwisch*, both mentioned by Pollak-Schlaffenberg, are the product of confusion with Umlauf's *Das Irrlicht* and the Schack, Gerl and Henneberg *Der wohltätige Derwisch* respectively. Gerber named *Die natürlichen Wunder* and *Elmire* among Ruprecht's works; the former cannot be traced, and the latter, presumably identical with Goethe's *Erwin und Elmire*, given at the Burgtheater on 20 April 1794, was not (according to Hadamowsky) set to music.

WORKS

Singspiele (first performed in Vienna unless otherwise stated): Die Wette (1), 1777, ?unperf., *A-Wgm*; Was erhält die Männer treu? (2, L. Zehnmark), Burg, 1 May (? 30 March) 1780, *Wn*; Die Dorfhändel, oder Bunt über Eck (2, P. Weidmann), Kärntnertor, 15 Nov 1785, *Wn*; Das wütende Heer, oder Das Mädchen im Turme (3, after C.F. Bretzner), Kärntnertor, 1 June 1787, *Wn*; Der blinde Ehemann (J.F. Jünger), Freihaus, 21 Oct 1794; Die natürlichen Wunder, *c*1795, and Elmire, cited in Gerber

Lieder: 6 Lieder für das Pianoforte (Vienna, 1785), 3 ed. in DTÖ, liv, Jg.xxvii/2 (1920/*R*), 1 ed. in Friedlaender, i/2; 12 Gesänge, pf acc. (Vienna, *c*1789), 2 ed. in Friedlaender, i/2

PETER BRANSCOMBE

Rupsch [Ruppisch, Rupff], **Conrad** [Konrad] (*b* Kahla an der Saale, 1470; *d* Altenburg, July 1530). German musician. He was attached to the Elector of Saxony's Hofkapelle from its foundation by Friedrich der Weise in 1491. During the celebrations marking the succession of Philip the Fair in Mechelen in 1494 Friedrich attended a meeting of the prince's chapel at which Weerbeke, Pierre de La Rue and Alexander Agricola were present. This contact with Netherlandish music exerted on Friedrich (and hence on his Kapelle) a decisive influence that is clearly visible in the Jena choirbooks. Heinrich Isaac stayed in Torgau on several occasions between 1497 and 1500 and is mentioned in the accounts along with the Kapellmeister Adam von Fulda and Rupsch. Hofhaimer was also employed at that time by the Saxon court to teach organists. After the death of Adam von Fulda in 1505 Rupsch took over the direction of the Kapelle (Adam Rener's appointment as Hofkomponist followed in 1507). Also in 1505 he was ordained priest; two years later he was given a prebend at the collegiate church of St Georg in Kahla. In 1514 the reformist Georg Spalatin was appointed court chaplain and Rupsch's immediate superior. Rupsch came into direct contact with the Reformation movement and the radical group of *Schwärmer* (enthusiasts) headed by Andreas Bodenstein von Karlstadt in 1520; he is said to have given up his entire fief the following year. That was evidently a temporary measure, as in 1522 he married. In October 1525 Rupsch and Johann Walter (i) travelled to Wittenberg to advise Luther on musical matters during his completion of the German Mass. If, as Blankenburg has suggested, the famous *Geystliches Gesangk Buchleyn* of 1524 was the work of the Hofkapelle, Rupsch must have played a large part in its production. Within two years of Friedrich der Weise's death in 1525 his successor, Johann der Beständige, dissolved the Kapelle despite Luther's protestations, defending his decision by saying that Rupsch was pressing for retirement as the choristers spent their time 'idly and uselessly'. The dissolution of the Kapelle brought Walter into great financial crisis, which was only partly eased by his receiving a vacant prebend at St Georg. To save him from ruin, Rupsch bequeathed part of his income to Walter in February 1530.

Like Nicolas Mayoul, his counterpart in Mechelen, Rupsch was not essentially a composer. That was partly why, on Adam von Fulda's death, Friedrich separated the post of Hofkomponist from that of Kapellmeister. There is however a motet by Rupsch, *Cognoscimus Domine*, in *D-Rp* B 220–22. Another motet, *Maria salve virginum*, survives in *D-LEu* 1494 (the Apel Codex; motet ed. in EDM, 1st ser., xxxiii, 1956) and anonymously in *I-VEcap* 758. This piece, with its undeveloped homophony, shows remarkably little sign of Rupsch's years of exposure to the great music of the Netherlands, but it is possible that the person who commissioned the collection stipulated that its form be that of the Italian *laude*. It was Rupsch who added the text *Haec dicit Dominus* to Josquin's motet *Videte omnes populi/Nymphes, nappés* (published in Hans Ott's *Novum et insigne opus musicum*, 1537[1]). The hymn *Nun bitten wir den heiligen Geist*, which appears in *A-Wn* 18810 under Rupsch's name, is the work of Walter.

CLYTUS GOTTWALD

Ruremund, [Remunde, Ruremunde, Endoviensis], **Christoffel van** (*b* ?Eindhoven, ?1475–1500; *d* London, 1531). Dutch printer. He worked in Antwerp from 1523 to 1531, becoming a member of the Guild of St Luke in 1524. Of the 40 books known to have been printed by him, the majority were for the English market, including an important series of liturgical books 'ad usum ecclesie Sarum' – a series which helped to establish Antwerp as a rival to Paris for liturgical music printing. This series includes *Manuale* (1523), *Processionale* (1523), *Hymnorum cum notis opusculum* (1524), *Psalterium cum hymnis* (1524), *Breviarium* (1525), *Missale* (1527) and *Horae Beatae Mariae Virginis* (1530). All his liturgical music was printed by double impression, with black notes on red staves. He also printed missals for the dioceses of Tournai and Utrecht. Ruremund had two sizes of type with Roman neumes, which may both have originated from Paris, and one with Gothic neumes (used for the Utrecht Missal of 1527), which he seems to have acquired from Jan Severszoon of Leiden, who used it in a Utrecht missal of 1514. The smaller of the two Roman faces, found in Ruremund's publications from 1528 onwards, was also used by Symon Cock for his first music publication of 1539.

In addition to liturgical books, Ruremunde published an English translation of the New Testament, an English almanac and William Lyndwood's *Provinciale seu constitutiones Anglie*, and was the first Low Countries printer to print Reformation books for the English market. Many of his books were printed for Peter Kaetz and Francis Birckmann, booksellers in London. In 1531 Ruremunde himself visited London where he was arrested for selling English New Testaments. He was sent to prison where he died. His widow Catharine continued to manage the business in Antwerp from 1532 to 1546. Her publications were similar to those of her husband and included some reprints of his books.

SUSAN BAIN

Ruse. Town in northern Bulgaria, on the Danube. In 1914 the Rusenska Operna Druzhba (Ruse Opera Society) was founded, as well as the first symphony orchestra. The opera society formed the basis of the Narodna Operna Ruse (Ruse National Opera), which opened on 27 November 1949, with a performance of *La traviata*; the existing Darzhaven Simfonichen Orkestar (State SO, 1949) and an opera choir became part of the company, and Konstantin Iliev was musical director, 1949–52. The Ruse company presented opera and ballet, and over the years became one of the best in the country. Besides Iliev, the conductors included Dobrin Petkov, Romeo Raychev, Dimitar Manolov and Georgi Dimitrov; the directors included Dragan Kardzhiyev, Mikhail Hadzhimishev, Stefan Trifonov and Yevgeni Nemirov, as well as Tsvetana Andreyeva and Veselina Manolova, who, having studied in Czechoslovakia, contributed a different style. The repertory includes Italian, German, Russian and Bulgarian operas. As well as the regular season between September and July, the Martenski Muzikalni Dni (March Musical Days) festival is an additional stimulus to the high standard of performance and wide repertory. The Ruse Opera used the National Theatre until 1956, when it moved to a reconstructed building with 670 seats, where three or four performances are given each week.

MAGDALENA MANOLOVA

Rush, George (*fl* London, *c*1760–80). English composer, harpsichordist and guitarist. According to Dibdin, he travelled and studied in Italy before emerging as a theatre composer in London. His greatest success came with two English operas performed in 1764 at Drury Lane Theatre, where Rush may have played in the orchestra. *The Royal Shepherd*, with a libretto devised by Richard Rolt from Metastasio's *Il re pastore*, was staged on 24 February 1764. Intended as competition to Arne's *Artaxerxes*, playing at Covent Garden, it was all-sung and required an enlarged orchestra. The overture was popular as a concert piece, in part because of the still exceptional use of timpani. It was published both for orchestra and in harpsichord reduction, the latter reprinted as late as the end of the century. Rush's second opera, *Capricious Lovers*, was staged on 28 November 1764, the libretto devised by Robert Lloyd from Favart's *Le caprice amoureux, ou Ninette à la cour* (a parody of Goldoni's *Bertoldo*). Rush's setting was reduced to a two-act farce and performed as an afterpiece from 2 March 1765. Rush composed the music (now apparently lost) for *The Statesman Foiled* by Robert Dossie, introduced as an afterpiece at the Haymarket Theatre on 8 July 1768. Several numbers of *The Royal Shepherd* were retained and at least one song rewritten by Rush when it was restaged as a pasticcio, *Amintas*, by G.F. Tenducci and T.E. Carter at Covent Garden on 15 December 1769.

Rush was also active in instrumental music. He supplied overtures to both parts of the programme of Signora Gambarini's benefit concert, advertised 21 January 1760. On 22 March 1770 he conducted and performed his works at a concert for the Lord Mayor, Sir William Beckford. His published series of concertos, of which the first (in F) was especially popular, suggests that he was successful as a harpsichordist. Rush's instrumental works are 'advanced' and pre-Classical, and reveal a blend of national styles. Although Dibdin and the *ABC Dario* categorized Rush's operas as too Italian for English tastes, these works must be granted a historical niche in a period of transition from the ballad opera to the age of Dibdin.

An extended visit to Holland, perhaps under the patronage of Sir Joseph Yorke (Baron Dover), minister to The Hague, was postulated by Roscoe; the notion is given credence by the publication of several works there.

WORKS

published in London unless otherwise stated

STAGE

The Royal Shepherd (R. Rolt, after P. Metastasio), Drury Lane, 24 Feb 1764, vs (1764), ov. (*c*1764) ed. in The Symphony 1720–1840, ser. E, i (New York, 1984); adapted as pasticcio Amintas, Covent Garden, 15 Dec 1769, with addl music by G.F. Tenducci, S. Arnold, P. Guglielmi and T.E. Carter, vs (1770)

Capricious Lovers (R. Lloyd, after C.-S. Favart and C. Goldoni), Drury Lane, 28 Nov 1764, vs (1764), ov. (*c*1764)

The Statesman Foiled (R. Dossie), Haymarket, 8 July 1768, lost

RONALD R. KIDD

Rush, Loren (*b* Los Angeles, 23 Aug 1935). American composer. He studied composition with Robert Erickson (1954–60) and attended San Francisco State University (BA 1957), the University of California, Berkeley (MA 1960) and Stanford University (DMA 1969). He has served as associate music director of KPFA-FM, Berkeley (1957–60), director of the Performers' Choice concerts (San Francisco Bay area) and founding director of the San Francisco Conservatory Artists Ensemble (1967–9, later the New Music Ensemble). His appointments have included teaching posts at the San Francisco Conservatory

(composition department chair, 1967–9) and Stanford (1968–9), and the associate directorship of Stanford's Center for Computer Research in Music and Acoustics (CCRMA, 1975–85). Among his honours are the Prix de Rome (1969–71), a Guggenheim Fellowship (1971), and commissions from the Fromm Foundation (1964) and the San Francisco SO (1973).

In its delicacy of texture and elegance of construction, Rush's early music resembles the style of other Webern-influenced American and French composers. Many early works are in open form: *Hexahedron* (1962–3) presents the pianist with a choice of routes through its structure; *Nexus 16*(1964) dispenses with measured and synchronized ensemble attacks. An interest in historical precedent is clear in *Dans le sable* (1967–8), which refers to Barbarina's cavatina in the fourth act of Mozart's *Le nozze di Figaro*. In 1970 Rush began to employ amplification to increase the dynamic range of his compositions. Increasingly sophisticated computer programs allowed him to process intonation, attacks, spatial placement and timbral manipulations of pre-recorded material with a new degree of complexity. Later works, such as *Song and Dance* (1975), are dominated by rhythmic organization. Others use digital processing to refine *musique concrète* (*The Digital Domain*, 1983) or to generate pure tuning systems, incorporated as taped sound into music played by conventional forces. He has continued to intensify his study of intonation and acoustics, working closely with the performers for whom his music is intended.

CHARLES SHERE

Rushing, Jimmy [James Andrew; Mr Five by Five] (*b* Oklahoma City, OK, 26 Aug 1902; *d* New York, 8 June 1972). American jazz and blues singer. He was born into a musical family and learnt the violin, the piano and singing. He appeared in the Midwest, in California and in a touring show, before singing with Walter Page's Blue Devils (1927–9) and Bennie Moten's Kansas City Orchestra (1929–35). With these important bands he developed a mature singing style derived from the blues and completely idiomatic to the rhythms of jazz, an uncommon accomplishment even for experienced black singers in the late 1920s. He first achieved renown with Count Basie's band from 1936, his excellent intonation and robust yet sensitive manner perfectly complementing the group and helping to shape its identity. One of his finest recordings with Basie was *Good Morning Blues* (1937, Decca). He remained with the band until 1950, and thereafter worked with his own group and as a soloist, making foreign tours with several bands, including those of Basie, Buck Clayton, Eddie Condon and Benny Goodman, and performing in New York with Zoot Sims (1971–2).

JAMES DAPOGNY

Rushton, Julian (Gordon) (*b* Cambridge, 22 May 1941). English musicologist. He studied at the GSM (1959–60), at Cambridge University with Leppard and Ridout (BA 1963, MusB 1965) and at Oxford University with Westrup, where he took the doctorate (1970). While at Oxford he also had private composition teaching with Wellesz and Goehr. He was appointed lecturer at the University of East Anglia (1968–74) and then at Cambridge (1974–81) before becoming West Riding Professor of Music at Leeds University (1982). He has also taught at the University of Western Ontario (1991) and Bar-Ilan University, Israel (1991–2). He is chair of the management committee of the Teaching and Learning Technology Programme (1992–), chair of the editorial committee of Musica Britannica (1993–), honorary professor at the University of Keele (1994–) and was president of the RMA (1994–9). He was a founder member of the editorial board of *Music Analysis*.

Rushton's main areas of interest are the music of Berlioz, opera (particularly Mozart and Gluck) and analysis, and he has also written on British composers. His handbooks to major works by Mozart, Berlioz and Elgar are characterized by clarity of thought and expression and demonstrate his ability to assimilate a wide range of historical, analytical and contextual information into an accessible and convincing argument. He has done more than any other writer to explain the uniqueness of Berlioz's musical style without losing a sense of wonder in its originality of musical expression. He has contributed articles to *The Viking Opera Guide*, *The New Grove Dictionary of Opera* and *International Dictionary of Opera*. He is general editor of the Cambridge Music Handbooks and a frequent reviewer for both specialist and non-specialist music journals and for *The Independent* and the *Times Literary Supplement*.

ROSEMARY WILLIAMSON

Rushworth & Dreaper. English firm of organ builders. It was founded in Liverpool by William Rushworth. The firm became Rushworth & Dreaper at the beginning of the 20th century when Rushworth absorbed the Dreaper brothers' music retail business. After World War I the company was able to offer first-class work at competitive prices, securing the contracts for new organs at Christ's Hospital chapel, Horsham (5 manuals, 1931), and the Church of the Holy Rude, Stirling (1940). They also produced the 'Apollo' model reed-organ. Some new organs were built in the 1970s and 80s with advice from Lawrence Phelps and under the direction of Alastair Rushworth, who studied with Dirk Flentrop in the Netherlands.

STEPHEN BICKNELL

Rusignolo (It.). *See under* ORGAN STOP (*Vogelgesang*).

Ruspoli, Francesco Maria (*b* Rome, 5 March 1672; *d* Rome, 12 July 1731). Italian patron. After inheriting the fortunes of his father (Alessandro, Count Marescotti) and his great-uncle (Bartolomeo Ruspoli), he became, as Marquis of Cerveteri, one of the richest men in Rome. He was 'acclaimed' as Olinto Arsenio in the Arcadian Academy on 27 May 1691, and in 1707–11 he hosted its meetings in one of his gardens. He began to sponsor oratorios and serenatas in 1701, and within a few years started to emulate the lavish productions of Cardinals Pamphili and Ottoboni. Like them, he sponsored a weekly 'academy', for which Handel wrote more than 50 cantatas when he stayed at Ruspoli's residence in 1707–8. Ruspoli's best-known production was Handel's *Oratorio per la Resurrezione di Nostro Signor Gesù Cristo* (text by C.S. Capece), which was performed with splendid scenery by five singers and 45 instrumentalists on Easter Sunday 1708. It aptly followed two works performed during Holy Week, both with texts by Cardinal Ottoboni: *Introduzione all'Oratorio della Passione* (music by P.P. Bencini) and *Oratorio per la Passione di Nostro Signore Gesù Cristo* (music by A. Scarlatti).

In July 1708 Ruspoli volunteered to support a regiment of 1200 men to protect the papal realm from the encroaching Austrian army. In gratitude the pope named him Prince of Cerveteri on 3 February 1709. Ruspoli subsequently employed a *maestro di cappella*: Caldara served him from March 1709 to May 1716, Gasparini from July 1716 to May 1718. By 1710 a theatre had been built in his residence, but only during Carnival 1711 was it used for operas (both by Caldara). In October 1713 Ruspoli purchased the Palazzo dei Caetani on the Via del Corso and moved there. In 1717 he sold an unused theatre to Count Antonio Alibert, and by the end of 1718 he had terminated his contracts with Gasparini and the five instrumentalists he employed. Yet he remained active in opera productions. Gasparini continued to live in a house on property owned by Ruspoli until 1720, and was virtually the only composer heard at the Teatro Alibert during the seasons of 1718–20. His *Asianatte* (1719) was dedicated by Alibert to Ruspoli's wife, and in the dedication Alibert seems to imply that Ruspoli played a role in the operation of his theatre. In 1721 Ruspoli apparently shifted his support to the Teatro Capranica; here Giovanni Bononcini's *Crispo* was dedicated to his wife, and, in his dedication to Ruspoli of Alessandro Scarlatti's *Griselda*, Federico Capranica related that the drama (originally by Zeno) 'derives from Your Excellency yourself', which presumably means that Ruspoli chose and reworked the text. Ruspoli's activities as patron during the last decade of his life have not yet been investigated.

LOWELL LINDGREN

Russell. English family of organ builders and organists. Hugh Russell (*b c*1738; *d* 1825) was probably trained by

George England and was said to have been a pupil of Samuel Green. He collaborated with John England from 1778 to 1785; they built new organs for the London churches of St Michael Queenhithe, and St Mary Aldermary, where Hugh and his sons Timothy (*b* 1782; bur. Tenterden, Kent, 1858) and WILLIAM RUSSELL (i) were organists. Hugh's independent career began with work on the organ in the chapel of St James's Palace (1785), and he went on to maintain or rebuild, with extended key compasses, many of the organs in the major London churches. His new organs were characterized by carefully voiced, musically balanced choruses, using George England's techniques but with greater refinement.

Timothy presumably learned the trade from his father, the first acknowledgement of his collaboration being on the name-plate of an organ, built in 1809 for St Peter and St Paul, Cork (now in Kinsale). Until the death of William in November 1813, the family was very productive, building organs in all parts of England as well as Ireland, but his death and the effect of the Napoleonic Wars on the economy seems to have reduced their activities until 1823, when large organs were built for Commissioners' churches at Holy Trinity, Newington Butts (Southwark, London; 1824) and three in Islington (1828–9). John Abbey worked at this time for the Russells but, not long after Hugh's death, Abbey went to Paris at the request of Sébastien Erard. Timothy continued to build organs in a relatively small way. The manuscript of J.H. Leffler (compiled from *c*1800 onwards; private collection) appears to lean heavily upon information supplied by the Russell family; of their work, about 90 new or completely rebuilt organs have so far been traced.

MARTIN RENSHAW

Russell, David (*b* Glasgow, 1 June 1953). Scottish guitarist. He grew up on the island of Menorca and first learnt the guitar with his father. At 16 he studied with Hector Quine at the RAM. He won the Julian Bream Prize two years in succession and graduated in 1974 with a scholarship from the Ralph Vaughan Williams Trust. A grant from the Spanish government (1975) enabled him to study with José Tomás in Spain. He won the Ramírez Competition, Santiago de Compostela (1975), the Andrés Segovia Prize, Palma de Mallorca (1977), and the Tárrega Prize, Benicasim (1977). He made his Wigmore Hall and New York débuts in 1981 and has since given recitals throughout Europe, the USA, Canada and South-east Asia. Composers such as Santórsola, Morel and Assad have written for him. Among his many recordings are the complete works of Francisco Tárrega. Russell has established a reputation as one of the most expressive guitarists of the generation following Bream and Williams. His immaculate technique and sensuous tone, his warm, outgoing presence on the concert platform and a repertory which invariably introduces less familiar guitar composers as well as the standard repertory, have endeared him to a wide international audience.

GRAHAM WADE

Russell, George (Allan) (*b* Cincinnati, 23 June 1923). American jazz composer and theorist. He played the drums in local clubs while a student at Wilberforce University High School. During a long illness in 1945–6 he formulated the basis of his 'Lydian concept', a system of composition based on grading intervals by the distance of their pitches from a central note. After his recovery he wrote scores for Dizzy Gillespie, including *Cubana Be/ Cubana Bop* (one of the earliest works to combine jazz and Latin influences), and for Buddy DeFranco (*A Bird in Igor's Yard*) and Lee Konitz (*Ezz-thetic* and *Odjenar*); meanwhile he also studied composition with Stefan Wolpe. From 1950 he consolidated and refined his ideas on music theory, publishing them as *The Lydian Chromatic Concept of Tonal Organization* (1953, 2/1959), which was immediately received as the first major contribution by a jazz musician to the field of music theory. Works followed on an increasingly large scale, establishing Russell, along with Gil Evans, as a leading postwar jazz composer; he combined advanced jazz idioms with an unusually rigorous concern for structure, harmony, and the balance between composition and improvisation. In 1958–9 he taught at the Lenox (Massachusetts) School of Jazz, and about the same time he took up the piano, which he played in his own jazz sextet (1960–61); among the group's sidemen at various times were Don Ellis, Eric Dolphy, Chuck Israels, and Steve Swallow. In 1963 Russell moved to Europe and taught at Lund University in Sweden and the Vaskilde Summer School in Denmark, then in 1969 returned to the USA to join the faculty of the New England Conservatory. During the mid-1970s he ceased to compose and worked on a second volume of *The Lydian Chromatic Concept*. Russell made several recordings of his compositions in the late 1970s and early 80s, including an album as the leader of the Swedish Radiojazzgruppen (1977) and two with his own big bands in New York (1982–3). Among his many honours are composer awards from the magazines *Metronome* and *Down Beat*, the Oscar du Disque de Jazz, two Guggenheim fellowships, three NEA grants, and the National Music Award.

WORKS

Ballets: The Cromatic Universe, 1963; The Net, 1968; Encounter Near Venus, 1975

Jazz works (for jazz band, unless otherwise stated): Cubano Be/ Cubano Bop (?1947); Ezz-thetic, jazz group (1948); A Bird in Igor's Yard, cl (1949); Odjenar, sextet (1949); Lydian M–1, jazz ens (1955); Ballad of Hix Blewitt, jazz ens (1956); Concerto for Billy the Kid, sextet (1956); The Day John Brown was Hanged, qnt (1956); Knights of the Steamtable, sextet (1956); Ye Hypocrite, Ye Beelzebub, sextet (1956); All about Rosie, jazz group (1957); Stratusphunk, sextet (1958); Jazz in the Space Age (1960); Now and Then (1965); Takin' Lydia Home, sextet (1965)

Many arrs. for jazz ens. of works by other composers, incl. D. Baker, C. Bley and M. Davis

Principal publisher: Russ-Hix

JAMES. G. ROY, JR./CARMAN MOORE/J. BRADFORD ROBINSON

Russell, Henry (*b* Sheerness, 24 Dec 1812/1815; *d* London, 9 Dec 1900). English composer, pianist and singer. He first appeared on stage at the age of three and sang with Robert Elliston's children's opera troupe; after his voice broke he studied composition with Rossini and Bellini in Italy (some sources claim that he won the Naples Conservatory prize for the best musical composition of 1833). He returned to England and for a short time was chorus master at the King's Theatre. In 1834 or 1835 he sailed to Canada to begin a career of solo concerts, but the rigours of the Canadian wilderness soon prompted him to settle in Rochester, New York, where he became organist and choirmaster of the First Presbyterian Church and a teacher at the Rochester Academy of Music. His first song, *Wind of the Winter Night*, was published in New York in 1836 and in autumn that year he made his New York début as a singer. He toured the USA as a composer and performer, first with Vincent Wallace, then in 1837–41 singing and accompanying himself at the piano in programmes consisting almost entirely of his own compositions, and enjoyed tremendous popularity. He was one of the few major singers of the time to present such unassisted entertainments; even Jenny Lind had supporting singers and instrumentalists. He was particularly active in Boston and New York, where his music and performing style created considerable controversy among the cultural élite. In the early 1840s he returned to England and made his London début, but by 1843 he had again travelled to the USA; the young Stephen Foster heard him in Pittsburgh in 1843. In 1844 or 1845 Russell returned permanently to England, where he was active as a singer until the early 1860s and continued to compose almost to the end of his life.

Russell claimed to have written the music and some of the words for over 800 songs. A more realistic figure is about 250, including 75 or so written in the USA and 46 reissued with new lyrics and titles by English poets. About half of his works are simple ballads, derivative of Italian opera in harmony and accompaniment; they often have rather static melodies which allowed Russell to perform them in a speech-song manner. He also composed rousing songs about travel and several descriptive multi-sectional pieces similar to Italian operatic scenes. Some of Russell's songs were written as statements for social reform; these include *The Maniac* concerning the 'barbarous' conditions of private mental institutions, *The Gambler's Wife* on the plight of a deserted mother and child and *The Indian Hunter* on racial intolerance. He later involved himself in the immigration movement through such works as *A Life in the West* and *The Emigrant's Farewell*, while his songs based on Stowe's novel *Uncle Tom's Cabin* were outcries against slavery. *A Life on the Ocean Wave*, chosen in 1889 as the march of the Royal Marines, *I'm Afloat, The Old Sexton* and *Cheer! Boys, cheer!* were popular into the 20th century.

Russell had two sons, Henry Russell (1871–1937), an opera impresario in the USA and England, and the conductor Sir Landon Ronald.

JOHN A. STEPHENS/R

Russell, Oswald (*b* Kingston, 16 Aug 1933). Composer and pianist of dual Jamaican and Swiss nationality. He studied piano with Ena Helps (Kingston, 1938–51), Eric Grant (RAM, 1951–6), Jacques Février (Ecole Marguerite Long, Paris, 1957–8), Edward Steuermann (Juilliard School of Music, 1959–62) and Louis Hiltbrand and André-François Marescotti (Geneva Conservatoire, 1964–8). He taught piano, keyboard harmony and improvisation at the Jamaica School of Music (1963–4), the Institut Jaques-Dalcroze in Geneva (from 1973) and the Geneva Conservatoire (from 1974). He taught piano at the Kinshasa Conservatory in Zaire (1961) and has taught piano improvisation at the conservatories of Lausanne, Fribourg and Neuchâtel.

His piano playing earned him the first prize from the Geneva Conservatoire (1965) and first prizes in both jazz and classical improvisation at the Lyons International Competition (1967). His compositions range from ballet music, film music (*Les vielles lunes*, 1969, directed by Daniel Fahri and shown at the Cannes film festival), music for productions at the Théâtre des Marionettes in Geneva (1970–86) and songs for church use (in collaboration with the Ecumenical Council of Churches). An account of his life is contained in D. Russell: *Oswald Russell: un océan d'amour à l'occasion de son 60e anniversaire* (Geneva, 1993).

WORKS

OLIVE LEWIN

Russell, Pee Wee [Charles Ellsworth] (*b* St Louis, 27 March 1906; *d* Alexandria, VA, 15 Feb 1969). American jazz clarinettist. After studying several instruments he took up the clarinet. He played in Texas with Jack Teagarden (1924) and in St Louis with Bix Beiderbecke (1925–6), then in 1927 moved permanently to New York, where he performed and recorded first with Red Nichols and later with a wide variety of important jazz musicians, including Louis Prima (1935–7). From 1937 he played intermittently for three decades with Eddie Condon, frequently in dixieland clubs in New York, and later on tour (1964, 1967). When not with Condon, Russell continued to work with leading dixieland musicians, notably Bobby Hackett (1938–9) and Bud Freeman (1939–40), though late in life he experimented with new styles, for example appearing with Thelonious Monk at the Newport Jazz Festival in 1963. From the late 1950s he also toured with dixieland groups led by George Wein.

Russell's unique, complex style involved seemingly effortless variations of intentionally unorthodox timbres,

growls alternating with hard attacks, and softly articulated notes held with a slow, almost sour, vibrato. He often improvised lines composed of greatly contrasting rhythmic values (unlike the successions of quavers preferred by contemporary clarinettists) and unusual choices of pitch; by playing imperceptibly behind the beat he often gave a weighty quality to individual notes. His playing encompassed and was conditioned by the popular music of the 1930s, and is heard to best advantage on his highly individual performances of that repertory, such as *Baby won't you please come home* (1928, HRS).

JAMES DAPOGNY/R

Russell, William (i) (*b* London, 6 Oct 1777; *d* London, 21 Nov 1813). English organist and composer. He was the son of Hugh Russell, a London organ builder and organist at St Mary Aldermary, Bow Lane. At the age of eight he studied the organ with William Cope, organist of Southwark Cathedral, William Shrubsole, and later with John Groombridge, organist of Hackney. From 1797 to 1800 he studied composition with Samuel Arnold. From 1789 to 1793 he was the organist of the chapel in Great Queen Street, Lincoln's Inn Fields, and, after deputizing for some time at St Mary Aldermary, in 1798 he was appointed organist of St Anne's, Limehouse, at an annual salary of £45. From 1800 to 1804 he was pianist and composer at Sadler's Wells Theatre, where he worked with Charles Dibdin the younger and composed pantomimes in the popular style of the day. In 1801 he acted as accompanist to Braham, Elizabeth Billington and Nancy Storace at Covent Garden. On 1 April 1801 he was appointed organist of the Foundling Hospital; he continued as organist of St Anne's and probably held other posts simultaneously with the help of deputies.

In 1808 Russell matriculated at Magdalen Hall, Oxford receiving his degree as an external student there at about the same time. In 1809 he inspected the organ at Covent Garden (which had been restored after its destruction by fire), and soon became much in demand as an organ inspector, even for his father's instruments. After his death at the age of 36, benefit performances of his works, including his oratorio *Job*, were organized by Samuel Wesley and other friends for his widow at the Foundling Hospital. His music library was sold in 1814: some of it is now in the British Library.

Russell was considered by his contemporaries to be an admirable player of keyboard instruments. His obituary in *The Monthly Magazine* (1814) stated 'As a performer of the pianoforte and organ he has few equals', and Wesley praised him highly in his memoirs (*GB-Lbl*). He pioneered organ improvements, which were carried out by his father. The new pedals and extended tonal features are exploited in his voluntaries, which represent his most forward-looking compositions; many of them are large-scale, multi-movement works reflecting his fine technique and profound interpretations. He was also noted for his oratorios, in which he combined classical style with the contemporary English melodic idiom.

WORKS

all printed works published in London

SACRED VOCAL

The Redemption of Israel (orat), ?1804, *GB-Lcm*; Job (orat), Foundling Hospital, 1814, ed. S. Wesley (1826)

Anthems: The Redeemer gave the word (1795, rev. 1797); Hear o thou shepherd of Israel (1797); Lord thou hast been our refuge, 1803, London, Library of the Thomas Coram Foundation; Man that is born of a woman, 1808, *Ob* [funeral anthem for F.H. Barthélemon]; Then were there brought unto him little children (1809); Psalms, Hymns, and Anthems, for the Foundling Hospital (1809)

Jubilate, D, acc. orch, 1796, *Lcm*; Mass, c, 1806, *Lcm*; Ky, Gl, 1808, *Ob* [BMus exercise]; Mass, D, 1808–11, *Ob*; Morning and Evening Service, A (1829); Morning and Communion Service, E♭, *Ob*

STAGE

all first performed in London; pantomimes, unless otherwise stated

The Highland Camp, Sadler's Wells, 1800

Harlequin Phaeton, or Chaos, 1800, *Ob*, ov. (1800)

Moses and Mammon, or The Widow and the Lawyer, 1801, *Lbl*

The Wizard's Wake, Sadler's Wells, 1802, *Lbl*, ov. (1802)

St George, or The British Champion, 1802, *Lbl*, ov. (1802)

The Great Devil, or The Robber of Genoa, 1802, *Lbl*, ov. (1805)

Rugantino, or The Bravo of Venice (melodrama), CG, 1805

The Wild Islanders, or The Court of Pekin (ballet), Drury Lane, 1805, ov. (1805)

Adrian and Orrila, or A Mother's Vengeance, CG, 1806, ov. and incid music (1806)

Harlequin and Time, CG, 1806

The False Friend, or Assassin of the Rocks (melodrama), The Circus, 1806

Contributions to at least 9 other pantomimes

OTHER VOCAL

Odes: To Harmony, ?1799, *Lbl*; On St Cecilia's Day (C. Smart), ?1800, *Lcm*; To Music, ?1801, ov. *Lcm*, ?frag. *Lbl*; To the Genius of Handel, ?lost

Glees: In rosy bow'rs (after 1808), *Cu*; By winding streams, Come melancholy, Drink drink about, Far from the world, Hark the bugle horn, Let me awhile on earth, Lone Minstrel: all *Lbl*

Hamlet's Letter to Ophelia, a Canzonet (1800); The British Soldier, acc. orch (1801); 6 songs from W. Scott: *Rokeby* (1813)

Arrs.: 60 Welsh Airs (1803) [collected by W. Bingley]

INSTRUMENTAL

Orch: Ov., A, 1808; Org conc., 1810; sym., 1810; Duetto harpo, conc., 2 hp, orch, 1812: all *Ob*

Org: 12 Voluntaries, org/pf (1804); 12 Voluntaries, org/pf (1812); Tantum ergo, in Select Organ Pieces, ed. V. Novello (1840); Pastorale, March, in Short Organ Melodies, ed. V. Novello (1848)

CHARLES CUDWORTH/GILLIAN WARD RUSSELL

Russell, William [Wagner, Russell William] (ii) (*b* Canton, MO, 26 Feb 1905; *d* New Orleans, 9 Aug 1992). American composer, record producer, jazz musician and historian. He studied at the Quincy (Illinois) Conservatory, Culver-Stockton College (Missouri), privately with Max Pilzer (New York) and at Columbia University

Teachers College (New York). During the 1930s he became acquainted with Cowell and Cage (who later programmed many of his works) and, over eight years, composed his complete oeuvre. To avoid any association with Richard Wagner, he adopted his first name, Russell, as a surname when Cowell published his Fugue (1931–2), a work first performed on the same programme as the première of Varèse's *Ionisation*. From 1934 to 1939 he toured with the Red Gate Shadow Players, a Chinese shadow puppet play troupe, playing Chinese percussion instruments.

A collector of early jazz recordings, Russell co-founded the Hot Record Exchange in 1935. During the 1930s his writings appeared in *Jazz Hot* and *Jazzmen* (New York, 1939). In the early 1940s he moved to New Orleans to hear and record local jazz musicians. After founding the American Music record label (1944), he completed an historic series of over 60 jazz recordings, some of which have been re-released on CD. He became the curator of the jazz archive at Tulane University in 1958. In his later years he wrote an unpublished book on Jelly Roll Morton and played and recorded extensively with the New Orleans Ragtime Orchestra (1967–91). His music, primarily for percussion ensemble, is a joyful integration of American avant-garde experimentalism, American vernacular music and jazz. *Made in America* (1936, rev. 1990), for found objects, mutates rhythmic mechanization with an infectious swing, exhibiting one of the earliest known uses of rhythmic phasing. Works that appropriate classical European forms (such as the Trumpet Concerto and the Prelude, Chorale and Fugue) parody traditional styles, while demonstrating the dignity of percussion instruments.

WORKS

3 Dance Movts, str qt, 1931; Fugue, 7 perc, pf, 1931–2 [pt of Prelude, Chorale and Fugue]; 3 Dance Movts, 3 perc, pf, 1933 [rev. with Tango as 4 Dance Movts (1990)]; Ogou badagri (ballet), 5 perc/chbr orch/(chbr ens, 4 theremin)/orch, 2 pf, 1933; 3 Cuban Pieces, 4 perc, 1935; Made in America, 4 perc, 1936, rev. 1990; March Suite, 3 perc, pf, 1936, rev. 1984; Tpt Conc., tpt, 4 perc, pf, cel, 1937, rev. 1990; Chicago Sketches, 3 perc, pf, 1940; Music for Minsky, dancer, chbr orch, 1940; Prelude and Chorale, 7 perc, pf (1985) [pt of Prelude, Chorale and Fugue]

Recorded interviews in *US-NHoh*

JOHN KENNEDY

Russell & Tolman. American firm of music publishers. George D. Russell (*b* Boston, 1822; *d* Roxbury, MA, 3 Feb 1910) was initially a clerk in the music shop of the instrument dealer and publisher George P. Reed (*b* Boston, *c*1814; *d* Boston, 18 March 1890), who had established his business in Boston in 1838. In 1849 Russell became a partner in the firm, which in 1855 became a founding member of the Board of Music Trade. From 1856 to 1858 he had another partner, Nathan Richardson, and published Reed's former catalogue. He also formed a brief partnership in 1858 with Fuller (possibly Francis Fuller, a piano maker, or William Fuller, an instrument maker). Russell & Tolman was formed in 1858 from combining the catalogues of Reed & Russell and Russell & Richardson with that of Henry Tolman (*b* Boston, 15 Jan 1821; *d* Cohasset, MA, 20 Nov 1888), who had operated his own firm dealing in musical instruments and umbrellas since 1846 and publishing since 1849. Russell & Tolman became one of the most important music publishers in the USA in the 19th century, issuing a great quantity of American popular music, marches, polkas and comic songs, as well as the works of established American composers such as G.F. Root; they also dealt in music and pianos. The firm maintained close business ties with the Chicago firm of Root & Cady and printed some of their first publications. After the dissolution of Russell & Tolman in 1862, Tolman took over the catalogue and continued until 1870 as Henry Tolman & Co., though he sold his sheet music plates to Root & Cady in 1868; he became sole publisher from 1862 to 1868 of the *Boston Musical Times* and in 1865 was elected vice-president of the Board of Music Trade. Russell was joined by his brother Joseph M. Russell in 1863 to form G.D. Russell & Co., a similar publishing and dealing business, which also undertook printing work. The firm continued to operate, later with other partners, for 14 years, when the brothers separated, their catalogue was taken over by Oliver Ditson. By 1883 a company named Russell Brothers was active in the city, and G.D. Russell remained in business until his retirement in 1888.

GERALDINE OSTROVE

Russian and Slavonic church music.

1. Introduction. 2. Russian church music: monophonic chant and its notation. 3. Russian church music: polyphonic music. 4. The southwestern tradition: Belorussia, Ukraine and Carpathian Rus′. 5. Bulgarian church music. 6. Serbian church music.

1. INTRODUCTION. The Slavs as an ethnic group are divided into eastern Slavs (i.e. Russians, 'Little Russians' or Ukrainians, and 'White Russians' or Belorussians), western Slavs (Poles, Czechs, Slovaks and Lusatian Sorbs) and southern Slavs (Bulgarians, Serbs, Croats and Slovenes, as well as Montenegrins and Macedonian Slavs).

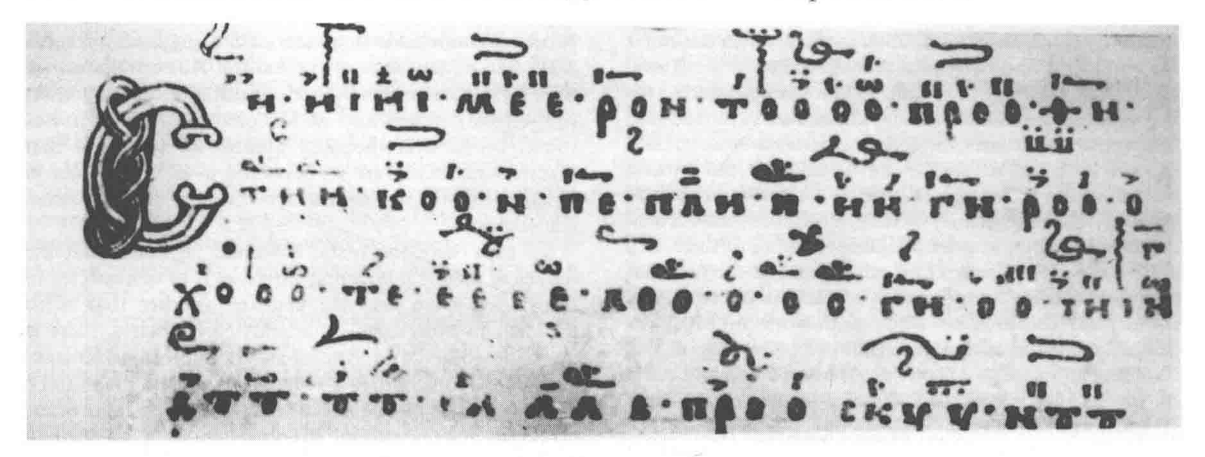
The eastern Slavs and some of the southern Slavs (except for Croats and Slovenes) accepted Christianity in its Eastern Orthodox form. The remaining Slavonic groups were converted to Roman Catholicism, although some of them had contacts at various times with Eastern Orthodoxy through the intermediary role of Greek missionaries. Within this article only the Eastern Orthodox Slavs will be discussed, that is, those who accepted the Christian religion from the Greeks and the accompanying ritual in its Greek form but translated the services into the Old Church Slavonic language, the root of all Slavonic languages. This language evolved over many centuries. After the 11th century it became Church Slavonic with strong regional variants so that one may speak of various national recensions of Church Slavonic as it is recorded in written documents.

In the discussion of Slavonic church music, the term 'Russian' will be used to describe all the eastern Slavs and

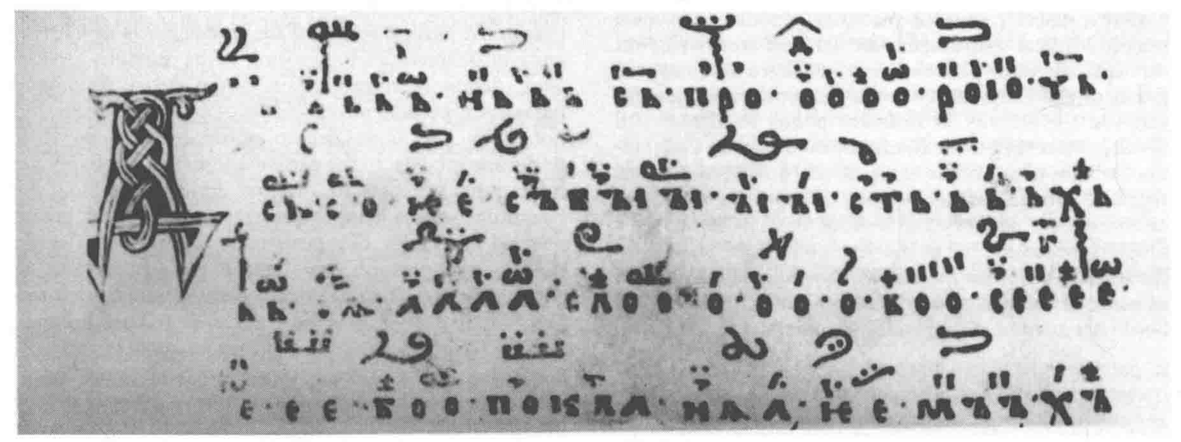
their music up until the late 15th century, when the chant tradition split into two main branches, that of the Grand Duchy of Muscovy and that of the southwestern area including Kiev, Galicia and Carpathian Rus′. The tradition of the latter area after the split is discussed in a separate section (§4), but it should be noted that the earliest developments were centred on the area now known as Ukraine. The later history of Russian church music is also inextricably bound up with Ukraine, owing to the area's close links with Western Europe and also to the fact that several of the most important composers of church music came from the area to study and work in Moscow. Similarly, the discussion of Serbian chant will cover not only Serbia, but also Montenegro, Macedonia and parts of Bosnia-Hercegovina, in whose histories the Serbs played a significant role.

One trait common to all Eastern Orthodox Slavs with regard to church music is that they practise only vocal music. Musical instruments are banned from religious services. The term 'church music' will here designate the music of the Christian rite. The Slavonic ethnic groups received Christianity at different points in history. All Slavs, however, view the Byzantine missionaries Constantine (who as a monk was named Cyril) and Methodius as the first apostles of Christianity among the Slavs. All celebrate their memory and honour them as saints. This mission, which started in the year 863, is also viewed as the starting-point for literature in any Slavonic language, as some of the first poems and translations of liturgical books are attributed to the Holy Brothers.

2. RUSSIAN CHURCH MUSIC: MONOPHONIC CHANT AND ITS NOTATION. Christianity penetrated Russia probably as early as the 9th century, although it is customary to refer to the year 988 as the official date for the christianization of Russia: the date at which the ruler of the Kievan Rus′, Prince Vladimir, accepted the religion. With the advent of Christianity into Russia came also Greek missionaries and church dignitaries. Such Greeks occupied important positions in the ecclesiastical hierarchy during the next few centuries. Byzantine missionaries were already involved in the christianization of the Slavs in the 9th century, with the mission of St Cyril and St Methodius to Moravia in 863. From this it is generally assumed that the liturgical books were available in a Slavonic translation considerably before the conversion of Russians. According to the Russian *Primary Chronicle* there was a particularly intense period of active translation and copying of books in Russia during the first half of the 11th century: during the reign of Yaroslav the Wise (1019–54) who founded the Cathedral of Kiev, which was presumably equipped with all necessary service books at its foundation in 1037 (although these earliest sources do not survive).



The earliest surviving Slavonic musical manuscripts date from the late 11th century and more particularly the 12th. In their typology these manuscripts are faithful translations of the liturgical books of the Greek Orthodox Church (heirmologia, stichēraria, triōdia, and some of the earliest collections of the *kontakia*); they are notated with neumes.



There is no longer any doubt about the Byzantine origin of the neumatic notation in early Russian musical manuscripts. After lengthy investigations by Russian scholars in the 19th century, Preobrazhensky had by 1909 found evidence that proved the Byzantine origins of the Russian neumes. He demonstrated, though on a limited scale, the dependence of the earliest Russian chants on their Byzantine mode. By juxtaposition of the same texts (the Greek original and its Slavonic translation) it was found in an overwhelming number of examples that identical neumes were to be found at crucial places in Byzantine musical manuscripts and in their Russian translations.

To start with the texts, it should be noted that the degree of identical meaning varies, as is to be expected in translation from one language to another that is so different in inflection and accent. Nevertheless, there is great flexibility and conscious adaptation of Russian Church Slavonic words so that they emulate their Greek equivalents. As for the notational similarities, these occur especially at a few specific structural points: at an opening melodic formula or a cadential formula. This suggests that in the earliest stages of the transmission of Christianity into Russia, melodies sung at the religious services were definitely Byzantine in origin, even if lengthy passages, especially in the middle of a verse or hymn, did not show the same degree of dependence on their Byzantine models. In the early manuscripts, probably the most difficult neume to interpret is that resembling the Byzantine *ison*, as it appears in extended segments, giving a visual impression of a prolonged recitation on a single tone (a phenomenon that has no real counterpart in contemporary Byzantine documents). Although this interpretation is possible it is more plausible to consider such a usage as belonging to a transitional stage in the process of evolution of the notation, when the meaning of a sign was not fixed and it could have more than one interpretation.

The neumes in most manuscripts are exceedingly close to an early stage of the Coislin system of the Palaeo-Byzantine form of notation (the Coislin system, named after a manuscript collection in France, is the most widespread of two systems in the earliest form of Byzantine neumatic notation). However, the few surviving kondakaria contain a mixed notation, in two superimposed rows, with a distinct predominance of signs that have been identified as belonging to the less common Chartres system of Palaeo-Byzantine notation. Before the modern advances in the study of Byzantine music there was a school of thought that presumed that the neumes in the kondakaria represented an 'original' Russian notation that was therefore named kondakarian notation. There is, however, supporting evidence for the identity of Greek and Slavonic melodies; the best example shows a text in Greek language (in the Slavonic transliteration) and its notation, together with the Slavonic translation of the same text using an almost identical sequence of neumes about the text (fig.1).

The possibilities for transcription of these earliest examples into modern notation are limited. This is not due to any scarcity of sources. In fact, for the period from the late 11th century to approximately the mid-15th, at least 70 manuscripts and fragments are at present known. The problem lies in the earliest stages of Byzantine notation, which have to be understood before the Russian sources can be transcribed. While in specific instances some of the earliest Byzantine musical manuscripts may be tentatively transcribed without assistance from later documentation, the majority of them are ambiguous, and

1. *An almost identical sequence of neumes for the same hymn in (a) Greek and (b) Slavonic versions from an early Slavonic musical manuscript, the so-called 'Blagoveshchensky kondakar' (RUS-SPsc Q.n.I.32, ff.84r–v)*

this is reflected in studies of Russian church music and its notations for the period up to the 15th century.

Part of the problem is the characteristic conservatism of the scribes of Russian musical manuscripts. Once it was received from Byzantium the notation was faithfully copied for centuries with no changes in the neumes; in Byzantium, however, where the neumes were not viewed as a sacrosanct aspect of the text, a change in notational principles took place, so that the neumes had a more precise meaning: this is now known as Middle Byzantine notation (*see* BYZANTINE CHANT). However, owing to the retention of the older, imprecise signs, the transcription of early Slavonic sources presents great difficulties, and any attempt requires complex methodologies for tackling the individual hymns.

This problem of comprehension is not only important for a grasp of the traditional ritual melodies, but also for insights into some of the original Slavonic creations, which date as far back as the 9th century. As did all other Christian churches, the Russian Church acquired saints and martyrs whose memories were honoured on special feast days, with new hymnody. Some 12th-century manuscripts already contain hymns in honour of early Russian saints. Most of these hymns emulate the structure of better-known hymns to traditional saints, while a few are distinct copies of Greek hymns. Among such examples are the earliest poem in the Church Slavonic language in honour of St Demetrius (probably written by one of the Holy Brothers) and hymns honouring St Boris and St Gleb (sons of Prince Vladimir of Kiev).

The stages of evolution of the neumatic notation in Russian manuscripts from the 12th to the 16th centuries are not yet fully understood. The conservatism of retaining identical signs for centuries with only a gradual change in the *ductus* of the handwriting may be attributed to the association of neumes with texts that were not subject to change. Yet there were other factors that created obstacles to our understanding of the notation: considerable reduction of direct contacts between the Kievan Rus' and Byzantium due to the conquest of Constantinople (1204) during the Fourth Crusade and the establishment of the Latin Empire (overthrown 1261) in the former Byzantine capital; furthermore, Russian lands, already fragmented, were invaded by Tatars in the first half of the 13th century, bringing to an end the further development of the Kievan state. However, peripheral areas frequently maintain old traditions more faithfully than the centre of the tradition, and Russian sources preserve documentation of some aspects of Byzantine tradition since lost in Byzantium itself.

In the course of the 14th century new centres of religious and cultural activities appeared. Of great importance for later developments were the centres of Moscow and Novgorod, the tradition of the latter going back several centuries. Russian scholars have maintained that some kind of notational and melodic change took place in the

14th and 15th centuries, but the nature of the change has yet to be established. Curiously, in contrast to the two preceding centuries, which were rich in musical documentation, the number of sources dating from the 14th century drops to insignificant proportions; only in the second half of the 15th century does the number of (surviving) Russian sources start to grow, reaching large numbers – more than 1000 manuscripts – in each of the 16th, 17th and 18th centuries. A study of facsimiles of manuscripts dating from the 14th and 15th centuries confirms the change in handwriting, but most of the basic neumes are recognizable and identifiable (fig.2). However, a comparative study of Byzantine sources of the same period suggests that by the 14th century the links between the two notations had become rather tenuous and even nonexistent for a growing portion of the hymn repertory. In the absence of steady contacts and left to their own devices it seems likely that, in an environment dominated by a process of oral transmission, the singers may have introduced variants that contributed to the total separation of Russian tradition from its Byzantine roots.

There can be no doubt that with the gradually increasing number of manuscripts in the 15th century there arose a need for the classification of neumes and their names, since the earlier terminology and meaning of neumes appears to have become extremely loose if not extinct. To satisfy such needs, in the mid-15th century the first so-called *azbuki* (literally 'alphabets') appeared, listing

2. A later example of the Coislin type of Palaeo-Byzantine notation in a 15th-century Dogmatic hymn (RUS-SPsc Q.I.No.94, f.231)

neumes and giving new Slavonic names for some of them, while retaining somewhat modified but still recognizable Greek names for a few. This may also be the period in which the terms *znamya* and *kryuk* made their appearance as designations for 'signs' in neumatic notation (thus *znamennaya notatsiya* means 'sign notation' and *kryukovoye pis'mo* 'hook-like sign writing'). Through the conflation of these terms the designation *znamennïy raspev* appeared, meaning 'chanting by signs', sometimes known in English as 'znamennïy chant'.

Developments in Russia during the second half of the 15th century, in music as in other fields, were almost certainly associated with the downfall of the Byzantine Empire in 1453; this created a new situation in which Russia was to find itself as the only powerful defender of Orthodox Christians in eastern Europe.

Scholarly investigation of the *azbuki* made considerable strides at the end of the 20th century, and such books have become more precisely datable. Six are believed to date from the 15th century, approximately 40 more from the 16th century, and a number of these catalogues are of later date. Probably the greatest difficulty for the study of these sources is that they do not always agree among themselves, either in their terminology or in the meanings ascribed to individual neumes. To complicate matters further, it appears that some neumes may have had different meanings in different 'modes' (Russ.: *glas*). There are also indications that some were only in regional use and were unknown in other areas. Some of the new Russian names for the neumes are descriptive either of the shape of the sign (*pauk*, 'spider'; *dva v chelnu*, 'two in a boat') or, in rare instances, of the melodic turn.

If there is any one period of Russian history during which the change in meaning of neumatic notation took place and the elements of Russian indigenous melodies made inroads into the body of religious chant, the 16th century seems the most likely time. By that period Russian neumatic notation no longer had any link with its Byzantine roots and there was a proliferation of new notational systems and terminologies totally unrelated to former traditions. Among the manifestations of the new attitude are the growing numbers of reference to singers and listings of their names and activities. In more than one way developments in Russia resemble events in the late Byzantine Empire when numerous *maistores* and virtuoso singers took not only to composing new pieces but also to recomposing the traditional repertory for the religious services. Even the Byzantine practice of TERETISMATA has its counterpart in 16th-century Russian *anenayki* and in the correspondingly increased length of some of the hymns. One can as yet only hypothesize in this field: that, for example, the melismatic embellishment of originally simple melodies may have led to the establishment of *bol'shoy raspev* ('great chant'), which made its first appearance in the late 16th century.

By the time of Ivan the Terrible (ruled 1533–84) and his concentration of rule in Moscow there were already references to whole schools of singers being transferred from Novgorod to Moscow, and to the establishment of an imperial chapel. Ivan was himself a composer: at least two hymns are known to have been written by him. By 1589, with the establishment of the Russian patriarchate in Moscow, the Patriarchs had added a 'patriarchal choir' to their retinue.

New variants in the types of chanting made their first appearance during the 16th century. Besides the standard, traditional znamennïy chant there are also references to the 'demestvennïy chant', which some scholars associate with specially trained, skilled singers: precentors, known as *domestiki* (Gk.) or *demestvenniki* (Russ.). One of its main characteristics was apparently its profusion of melismas, and the evolution of a peculiar system of signs most of which originated in the metamorphosed neumatic notation of past centuries. There are also references to the so-called Kazan′ chant and notation, associated primarily with the singers of Ivan the Terrible. Yet for all practical purposes our understanding of Kazan′ chant remains slight.

In the process of melismatic elaboration – *bol′shoy raspev* – extensive melodic formulae were associated with certain neumes (a procedure known as *popevki*, belonging probably to the 16th and 17th centuries). In time these formulae were classified and assembled into collections, some of which were known as *fitnik* (from their previous shorthand notation using the Greek letter *theta*, pronounced *fita* in Russian) or *kokiznik* (from *kokiza*, another term for independent extended melismas, although scholars disagree about its precise meaning). Individual melodic formulae received their own names (e.g. *kobïla*, 'a mare'); and the art of musical composition consisted in the euphonious matching and weaving of such melodic figures. At this period other parts of the liturgical repertory contrasted sharply with *bol′shoy raspev*. There was *malïy raspev* ('small chant') which consisted of abbreviated melodies with far fewer melismas and with recitative patterns on a single note. The recitative pattern was much more characteristic of what came to be known as *grecheskiy raspev* ('Greek chant') which emerged in the middle of the 17th century – the outcome, some believe, of an extended stay by some Greek singers in Moscow in the 1650s. Opinions are divided about the origin of the term *bolgarskiy raspev* ('Bulgarian chant') which also made its appearance in the mid-17th century. Some scholars see it as an import from Bulgarian lands, others deny this. The term *Kiyevskiy raspev* ('Kievan chant') now seems to have come into use late in the 17th century. It has been claimed that these may be the oldest melodies which became adapted to the musical taste of Ukraine (see also below, §4). The characteristics of 'Kievan chant' are the use of contrasting sections, alternating between the recitative and melodic segments, reminiscent of Ukrainian folk music patterns.

A new development in the 16th century was the staging of some aspects of the services in the manner of liturgical drama. The roots of at least one of these dramas (if that term is applicable) seem to lie in Byzantine cathedral practices that never acquired the pomp and elaborate setting enjoyed by liturgical drama in western Europe in the Middle Ages. Besides the best-known example, *Peshchnoye deystvo* ('Play of the furnace', dealing with the story of the three men in the burning fiery furnace), there are records of other *deystva* (literally 'actions') such as *Shestviye na oslyati* ('Procession on the donkey' for Palm Sunday) and *Deystvo strashnogo suda* ('Play of the Last Judgment'). The impact and tradition of these last two *deystva* was apparently of limited duration, and by the mid-17th century they had been banned by imperial decree.

One peculiarity of Slavonic musical manuscripts is that neumes are written not only above the vowels and individual syllables but also above some mute letters. This phenomenon, already noted by philologists, suggests that the two signs concerned, which are not nowadays pronounced, did at least have sufficient length to be indicated by neumes in the earliest stages of the Old Slavonic language. It was during the 16th century in particular that a practice known as *khomoniya* prevailed. It consisted in transliterating mute letters into the vowels 'e' and 'o'. The new pronunciation caused the deformation of words; this led to calls for reform of text and music, which happened in the mid-17th century.

In Byzantine notation, and the early Russian notation based on it, the neumes are intervallic: that is, they designate the interval between one note and the next but give no indication of precise pitch. If this interpretation was still correct at the end of the 15th century, by the end of the 16th century the neumes in Russia had acquired a new meaning: each sign designated a specific pitch rather than an interval. The process of change from relational to pitch-specific notation is not at present clear. The codification of this new interpretation may be clearly seen in the first of several notational reforms which were to take place during the 17th century. This first reform is associated with Ivan Shaydur, a singer active in Novgorod and possibly Moscow. His reform is usually dated *c*1600, although a later date may be more likely. Shaydur's reform consisted in adding special signs (stylized letters) to neumes, spelling out as a mnemotechnic device the particular pitch to which the neume referred at that point. The concept of a gamut encompassing the notes of the melodies seems to have emerged with this reform. To Shaydur (or a musician in his circle) may perhaps be attributed the concept of dividing the tonal range into four groups of three notes, each separated by a semitone from the next trichord. These trichords are identical in structure, yielding the gamut in ex.1. This system strongly resembles the Western hexachord system, from which it was probably derived. Each trichord received a special name: from the lowest upwards, 'simple', 'dark', 'light', and 'three times light'. For some of the trichords, notes in identical positions received additional signs. These signs were written in red ink and therefore received the designation *kinovarnïye pometï* (i.e. cinnabar signs for pitch). Later on, further signs were added to simplify printing in one colour; these were known as *priznaki*, but their use was relatively short-lived.

Another well-known singer, Fyodor Khristyanin, from the late 16th century, composed a set of hymns (gospel stikhira), which were notated in pre-reform notation. At least a partial transcription of some of these melodies has been possible by means of comparative studies (Brazhnikov). Surprisingly, they reveal certain melodic features

zhnikov was furthermore inclined to attribute to Fyodor Khristyanin the 'invention' of *bol'shoy raspev* (see above). Whoever invented it, it was certainly the result of a trend that must have ripened over several decades of growth in native practices.

The transmission of the reformed notation with red signs presented problems for copyists as it did for the intended printing of Russian liturgical books. These problems, together with abuses of singing in churches during the first half of the 17th century, led to the second reform, associated with the name of Aleksandr Mezenets, which took place about 1670. The abuses mentioned appear to have resulted from the protraction of services by additions and embellishments to traditional melodies. To remedy this protraction, singers had adopted the practice of starting the next hymn before the preceding one had ended. At its gravest, several hymns supposed to follow one another may have been chanted at more or less the same time. Whether this practice was a genuine distortion or an emulation of the polyphonic practices that were already infiltrating as far back as the 16th century is still a matter for speculation. From the mid-1650s onwards the possibility of a new reform of singing practices came under public discussion several times. Reform was made doubly problematic by the presence on the patriarchal throne from 1652 to 1656 of Nikon, an advocate of polyphony. To the orthodox clergy of Moscow polyphony smacked of Roman Catholicism and the very acknowledgment of it represented a threat to the purity of the faith if not a symbol of Roman supremacy. Reaction against patriarchal preferences led, among other things, to a schism within the Russian Church itself, establishing on the one hand the official Russian Church and on the other the schismatic groups. Among the latter the best known are the 'Old Believers', this term in fact embracing more than one group. All of them were, however, united in their opposition to the introduction of polyphony and in claiming zealously that they were preserving melodies of the liturgical repertory unspoilt.

The work of the reform commission took place shortly after the lands of the Ukraine were joined to Russia in 1654. This is significant, since the Ukrainian lands were for a long time in contact with Polish lands and were acquainted through them with the western European polyphony, both religious and secular.

The reforms of the mid-17th century dealt with texts as well as music. *Khomoniya* was banned, and orders were issued to correct liturgical books containing vowels instead of mute letters. Simultaneously the melodies were adjusted to fit the new pronunciation. Mezenets and his commission were concerned with preserving and clarifying the neumatic notation. The Old Believers, however, were ultimately the ones to transmit this type of notation into the 20th century. Though Mezenets' reform changed the added signs from red to black to facilitate printing, the earliest printing dates only from 1772. A few more refinements, including some additional signs, are attributable to Mezenets, whose reforms coincided with the time at which western European staff notation, primarily from Poland, was beginning to be accepted in Russia. The late 17th century and parts of the 18th formed a transitional stage in which the two notational systems coexisted and were occasionally used side-by-side. While the official Russian Church gradually accepted the five-line staff notation, neumes continued to be used primarily in monastic communities, and particularly among certain sects that regarded the use of Western notation as a symptom of Russia's abandonment of the principles of Eastern Orthodox Christianity and its 'conversion' to Roman Catholicism. By the 19th century the use of neumes had become an anachronism; the practice came to an end barely a century after the final reform that aimed to render the neumatic notation clear and easy to use. Transcription of the reformed neumatic notation of the 17th and 18th centuries has been facilitated by the existence of lists of neumes together with their melodic meanings (fig.3).

During the last quarter of the 17th century there appeared several treatises on music, among them the *Musikïskaya grammatika* ('Musical Grammar') attributed to Nikolay Diletsky (*c*1630–1680 or 1690). Besides a discussion of notation this treatise describes what must be interpreted as modes and provides the earliest known description of major and minor scales in any European musical treatise (see Jensen, 1992). Theoretical and notational problems are also discussed in a *Klyuch* ('key') by Tikhon Makarevsky, also written before 1700.

While monophonic melodies continued to be copied in subsequent centuries, the acceptance of modern staff notation during the reign of Peter the Great (1689–1725) and the favouring of polyphony shown by the official church made the monophonic traditions increasingly

obsolescent in Russia from the 18th century onwards. Only the Old Believers, still to be found in Russia as well as in Canada and in the USA, still adhere to monophonic chanting (though occasionally intermingled with elements of 'folk polyphony'). Attempts at restoring unison singing in the beginning of the 20th century in Russia were shortlived; and so far they have made no impact on the Russian Orthodox celebration of services.

3. RUSSIAN CHURCH MUSIC: POLYPHONIC MUSIC. Some Russian scholars believe that polyphony was practised in Russian church music before the 16th century. Their view rests solely on the practice of polyphonic singing in Russian folk music. The earliest documented references that carry implications of polyphonic singing date from about the middle of the 16th century. Uspensky has suggested that the term *strochnoye peniye* (from *stroka* meaning 'line', therefore 'line-singing') refers to such a practice. These references mention such singing on feasts and holidays when religious processions played an important role. Since the processions would imply the participation of large numbers of people, and folk-singing may have been a part of such celebrations, some scholars suggest that at least one of the idioms of the Russian polyphonic church music may actually have been derived from folk music.

There is no doubt that sophisticated polyphonic practices penetrated into Russia from the West, primarily through Poland and the Ukraine. The much more refined style of this music represents a separate strain which, at a later date, may have merged with indigenous practices, creating the blend that came to be known as Russian polyphonic church music. The existence of some native polyphonic singing may indeed have facilitated the penetration of Western elements, contributing to the official acceptance of part-singing in place of unison chanting. However, a clear distinction between these two styles, folk polyphony and a 'learnt' polyphony, has yet to be firmly established.

There was more than one way in which Western music could reach Russia. An important trading centre, Novgorod, had maintained contacts with central European cities. Novgorod is mentioned as one of the most important musical centres, and Ivan the Terrible had even moved singers from there to Moscow. The amount of polyphony practised there in the 16th century, however, is still unknown. Polyphonic music was certainly composed and performed in Poland during the 16th century; Polish ties with western Russia and involvement in Russian politics were strong in the late 16th and early 17th centuries. Western polyphonic styles, and five-line staff notation, were certainly already well known in Russia by 1654 when the merger of Ukrainian lands and Muscovy took place, and when Nikon sat on the patriarchal throne.

Demestvennïy chant, as was pointed out earlier, was evidently practised by skilled singers who excelled in their knowledge of music. Some of the earliest polyphonic scores in Russia seem to be settings of this type of chant written out in neumatic notation for two or three voices of more or less the same ambitus (fig.4). They are problematic in that the voices sometimes create dissonant intervals, particularly parallel 2nds and 4ths. In the absence of clef indications, one school of thought favours experimenting with transpositions of some of the parts in order to obtain more euphonious chords and progressions. The other justifies the dissonances by referring to the raw

harmonic progressions found in early organum of the 11th and 12th centuries.

Most of the polyphony believed to date from before the mid-17th century is essentially for two or three voices. Even in the late 16th century there are technical terms for singers which seem to designate the pitch-range of their voices: for example *verkh* or *verkhnik* ('peak' or 'highest') and *niz* and *nizhnik* ('lowland' or 'the one who is below'). These terms alone would suffice for two-part settings. In compositions for three voices the term *put'* ('way' or 'road') is found, and may perhaps designate a sort of cantus firmus, although in practice the melody given to *put'* was often highly embellished. In some instances the term *demestvo* instead of *put'* may be found. If demestvennïy chant indeed refers to the skill of its singers, then *demestvo* may logically imply a skilful leader of singing assigned to lead the 'way' by singing the traditional melody which, as practice permitted it, could be embroidered.

In the second half of the 17th century the use of Western staff notation became much more prominent. From this time there survive useful manuscripts known as *dvoznamenniki* which contain parallel notation of melodies in neumes and on the staff – a sort of 'Rosetta stone'. As mentioned above, the knowledge of neumatic notation diminished rapidly after 1700 and, although manuscripts were still copied in the 18th century, it was used only by small groups of people, mostly dissenters from the official Russian church.

In the last quarter of the 17th century several composers of polyphonic church music appeared, among them Nikolay Diletsky and Vasily Titov (active between 1680 and 1710). Their works have much in common technically and stylistically with German choral music of this period (for example, that of Schütz). Besides settings for one choir in four parts, polychoral compositions began to proliferate. In such polychoral works for two and three choirs (i.e. for 8 and 12 voices; in one extreme case for 48) the typical features are frequent use of imitation and of sequential progressions. The *partesnïye kontsertï* ('concertos for many parts'), of which more than 500 may survive, abound with highly effective exchanges between individual choruses.

Simultaneously, another musical genre made its appearance. This was *kant* (plural *kantï*, obviously related to 'chant'); it comprised settings of chant, usually for three voices, syllabic and in block chords. Some examples suggest a Polish origin for this genre (possibly as a by-product of influence from the Lutheran chorale). A few even have Polish texts transliterated into the Cyrillic alphabet. The earliest *kantï* have religious texts. Shortly thereafter secular texts were being used; the secular *kant* became highly popular, and there emerged a sub-type known as 'panegyric kant' which flourished in the time of Peter the Great. Secular *kantï* remained popular during much of the 18th century.

The period between the activities of Titov and the second half of the 18th century has not yet been investigated sufficiently to provide a clear picture of the developments of church music. Conscious attempts were being made during the reign of Empress Anna (1730–40) to lure Italian composers to Russia. Contrary to the traditional belief that Italians arriving in Russia found a musical wasteland, the Italians evidently found not only a receptive audience at the court, but also an established practice of polyphony in the church.

During her reign (1762–96) Catherine the Great maintained contacts with western European scholars and philosophers, and surrounded herself with Italian musicians. The interchanges that brought Baldassare Galuppi (1706–85) to St Petersburg and took Maxim Berezovsky (1745–77) to study and work in Italy in 1765 brought music of a highly Italianate style into the Russian church. The most influential figure in this development was Dmytro Bortnyans'ky (1751–1825), who after ten years in Italy returned to become musician-in-ordinary to Crown Prince Paul and eventually director in the imperial chapel. He wrote well over 100 works for use in religious services, including at least 35 choral concertos with texts derived from the Psalms. Despite publication by the Russian church of four volumes of znamennïy chant in 1772, and of an *Obikhod* (similar to a *Liber usualis*) in 1778, Bortnyansky did not make great use of traditional melodies.

Despite Emperor Paul's edict of 1797 banning the singing of concertos during services, there were many abuses in the next half-century (including a setting of the words of the Cherubic Hymn to one of the choruses from Haydn's *The Creation*). The edict did not stop Bortnyansky writing his own concertos. In 1816 he was appointed to censor the compositions submitted for performance in Russian churches. Thus, for the last decade of his life Bortnyans'ky had supreme control over church music in Russia. He overshadowed a number of other competent composers of religious music, such as Artemy Vedel' (1767–1806), Stepan Degtyaryov (1766–1813) and Stepan Davïdov (1777–1825).

Bortnyans'ky's successor as director of the chapel was Fyodor L'vov (1766–1836) who is mainly remembered as an administrator, though he did write a booklet on Russian church music in 1834. He was succeeded by his son, Aleksey L'vov (1798–1870), who served as director of the chapel from 1836 to 1861. After the period of Italian musical influence there then began a period of German influence. Pyotr Turchaninov (1779–1856) was still writing in an Italianate style, and enjoyed great popularity after official approval of his music had been granted in 1831. L'vov, on the other hand, deeply influenced by the Romantic music of his time, fostered a style that closely resembled that of the German chorale. The melodies used by the imperial chapel were in fact abridged versions of traditional tunes, and L'vov harmonized them in his own style. When the text or melody got in the way of his concepts he introduced choral recitatives on a single note. By comparison with the music of Bortnyans'ky and Turchaninov, that of L'vov is much richer harmonically and carries the cantus firmus in the top voice. He may be viewed as the creator of a specific style which Gardner has designated the 'St Petersburg School' of Russian church music. Closely related in style were the works of Gavriil Lomakin (1812–85), G.F. L'vovsky (1830–94), M.A. Vinogradov (1810–88), Ye.S. Azeyev (1851–1918) and those of Aleksandr Arkhangel'sky (1846–1924) who was the first to introduce female voices into the choir in the 1880s.

Furthermore, L'vov, in collaboration with Vorotnikov and Lomakin, organized the work on an edition of the *Obikhod* which was published in 1848 and which became mandatory for all churches in Russia. The settings for four voices provided in this edition rapidly came into use throughout Russia. L'vov is credited with raising the standards for performance of church music which so deeply impressed Berlioz in 1847.

In the late 1830s Glinka was associated for a short time with the imperial chapel. He wrote a few works in Italianate style. However, he soon became convinced that Russian church music must be harmonized in modal harmony, not in the major and minor keys. Glinka had intended to study the modes and 'church scales' with Dehn when he embarked on his last trip, during which he died. N.M. Potulov (1810–73), often described as a follower of Glinka's ideas, harmonized all the melodies published in the Synodal edition of 1772. His harmonizations were very simple, in a strictly chordal style without dissonances and modulations.

The 1860s saw the beginnings of scholarly study in the history of Russian church music and a new awareness of a specifically Russian musical idiom fostered by 'The Five'. L'vov's successor as director of the chapel, N.I. Bakhmet'yev (1807–91), is seen nowadays as a reactionary in the face of these movements. He resigned his post, apparently in protest against the publication of Tchaikovsky's *Liturgy of St John Chrysostom* (op.41, 1878). Tchaikovsky's publisher, Jürgenson, did not seek approval from the imperial chapel but from the Holy Synod of the Russian Church. After publication litigation ensued which led to the downfall of Bakhmet'yev.

Although Bakhmet'yev was succeeded by Balakirev, who served as director of the chapel (1883–95) and in

turn brought Rimsky-Korsakov to be an assistant, the importance of the St Petersburg school was waning. The fact that certain composers, including Aleksandr Grechaninov (1864–1956) were writing a more modern style of church music in both St Petersburg and Moscow did not arrest the decline.

Already a new school was developing. Its main vehicle of performance was the Synodal choir in Moscow under the leadership of V.S. Orlov (1856–1907) and Stepan Smolensky (1848–1909). The most significant composers of Russian church music during the two decades before the 1917 Revolution were all associated with the Moscow school, among them Aleksandr Kastal'sky (1856–1926) and Pavel Chesnokov (1877–1944). Kastal'sky revised Potulov's settings, and established a style that allowed the cantus firmus to migrate through all voices and used a type of modal harmony which approximated to the style of Russian folksongs. Others associated with this style were A.B. Nikol'sky (1874–1943) and Vasily Kalinnikov (1866–1901). Above them all towered Rachmaninoff whose *Liturgy of St John Chrysostom* and *All-night Vigil* are now ranked as the highest artistic achievements in the realm of Russian church music.

Under the influence of the Moscow school, the Holy Synod prepared a new edition of the *Obikhod* in 1915, yet with the two revolutions of 1917 ending in the establishment of the Soviet Union, church music lost the exalted position that it had enjoyed for centuries. While some composition of church music may have been going on in the Soviet Union, no information about it is at present available. The Russians in the Diaspora, spread all over the world, mostly perpetuate the style of Bortnyans'ky and L'vov with only an occasional bow towards Kastal'sky and Chesnokov. Several Russian church choirs have achieved renown in western Europe and in the USA. Among those who tried to foster a revival of Russian church music in the mid-20th century and whose works are of more than passing value are Alfred J. Swan (1890–1970) and Johann von Gardner, the latter much better known as a scholar.

After the collapse of the Soviet Union in 1991 numerous performing groups were formed; as little religious music was printed under the Communist regime, one of the most pressing tasks for the cultivation of church music in Russia was the publishing of scores. Composers who formerly were hesitant to write music for the Russian rite began to create works suitable for such use, although most congregations seemed eager to use old and well-known music from the pre-Revolutionary years.

4. THE SOUTHWESTERN TRADITION: BELORUSSIA, UKRAINE AND CARPATHIAN RUS'. In the late 15th century Muscovy took over Novgorod and Pskov, and the Novgorod recension of the *znamenniy* chant was adopted in Moscow. At the same time the ecclesiastical jurisdiction was divided, also contributing to the divergence of the neumatic chant tradition into two main branches: the northern (referred to as 'Russian', i.e. Novgorod–Moscow) and the southwestern ('Rusyn', i.e. Kiev, Galicia, Carpathian Rus'). The northern branch spread throughout the Grand Duchy of Muscovy, and the southwestern tradition developed separately from it in the areas under Polish–Lithuanian rule and the Kingdom of Hungary, where Rusyn clergy and cantors from these areas interacted. After the Mezenets reforms of the mid-17th century, the texts in Rusyn manuscripts often differ from those in Russian sources because the reforms did not directly affect Old Church Slavonic texts in Rusyn areas.

In both traditions, as well as the chants that were always written down (whether in neumatic or staff notation) there were also chants that were known through oral tradition, including both developed melodies (generally for Ordinary parts of the liturgy) and simple recitation formulas (applied to liturgical texts chanted by the priest or deacon, and to the psalms). The chants that developed the most distinctive regional differences were naturally those sung from memory: *prokimny*, the hymn *Bog Gospod* ('God the Lord'), and *samohlasni stikhiry*, often on the text 'Gospodi vozzvakh' ('Lord, from the depths'). Many melodies traditionally sung from memory were included in the early staff-notated versions of the liturgical books. In Russian books, the Rusyn variants of these chants are marked 'kiyevskiy', because they came to Muscovy along with Kievan cantors in the 1650s after the city of Kiev came under Muscovite rule. However, they are not necessarily specifically Kievan; only those chants marked 'kyivskyy' in Rusyn sources are from Kiev, especially from the Monastery of the Caves.

The greatest change in the development of southwestern chant occurred at the end of the 16th century, when Western influences began to penetrate from Poland. Neumatic notation became insufficient to record the resulting innovations in church music, and five-line staff notation, also introduced from Poland, began to be more widely used. Its rapid spread through Galicia and Carpathian Rus' was made possible because so many young Rusyns studied in Italy and learned music according to solmization, the prevailing method of training there, and brought the knowledge back with them. Furthermore, the 1563 printing in Niasviž (Belorussia) of the Calvinist book *Katachizm . . . 2 molitwami, psalmami y piosnkami* ('Catechism with Prayers, Psalms and Hymns') was written in staff notation, further preparation for the widespread use of the system in southwestern Rus'.

The new staff notation was based on the western European mensural tradition, with some variants. At the time of its introduction in Galicia it was called *irmolohiyna nota* (*irmoloy* music), because it was associated with the newly-developed anthology of liturgical chant, the *irmoloy*. (In the Russian tradition the *irmoloy*, or heirmologion, was not an anthology but simply a collection of *irmosi*.) This staff notation later became known as *kyivs'ke znamya* (Kievan signs) or *kvadratna notatsiya* (square notation). The oldest known example of a Rusyn liturgical manuscript using Kievan square notation is the Supraśl *Irmoloy* (dated variously between 1593 and 1601), which is considered a landmark in Rusyn music history, and there are numerous preserved manuscript *irmoloyi* with this notation from the 17th and 18th centuries. One of the most important scribes of these books was the Carpatho–Rusyn cantor, Ioann Juhasevych Sklyars'ky (1741–1814). The first printed book to use staff notation was the L'viv Irmologion of 1700; this preceded music printing in Russia by nearly three-quarters of a century.

Another factor in the musical development of the southwestern Rus' was the 1596 church union, the promulgation of which was assisted by the importation of choral polyphony. The church musicians on both sides of the religious controversy adopted polyphony, the

Orthodox as a measure to counteract the 'temptations' of the uniate Catholic service. While both preserved the old tradition of monophonic chant, both also accepted Western innovations. In the large cathedral services during the 17th century, trained choirs performed polyphonic 'spiritual concertos' by Ukrainian composers. The chants of the *irmoloy* were no longer congregational in these large city churches and instead were sung only by the choir or cantor. This style of liturgical music performance was adopted first by St Petersburg and by Moscow, and it became standard practice in Russian Orthodox churches, where the congregation sang only in the Lord's Prayer and the Creed, if at all. It is clear that organized polyphonic choral singing existed in Carpathian Rus′ at least as early as 1831, when the Belorussian Konstanyn Matezons′ky (*d* 1858) founded the Uzhhorod Greek Catholic Cathedral choir.

Only the Old Believers in Russia and the village churches of Galicia and Carpathian Rus′ kept alive the monophonic chant tradition, with concessions to 'folk polyphony'. The Carpatho-Rusyn chant became known as prostopěnije (plainchant), and gradually incorporated many elements of local folk melodies. The *prostopeniye* was recorded in staff notation in a 1906 collection by Ioann Bokšaj; this includes chants from both oral and written traditions: chants from *irmoloyi*, some chants from the Moscow synodal publications, some Galician melodies, some with local folk character, and even some liturgical texts given to tunes of *kolyadky* (carols, originally secular). The improvisational polyphonic style in Galicia was called *samoyilka*, *samoylivka* or *yerusalymka*. The intervals used were parallel 3rds, 5ths and octaves from the melody, with occasional bass pedals and stock cadential formulas. The *samoyilka* style was applied to melodies from oral transmission whose origin is unknown, to melodies reminiscent of the written chant, and to composed melodies. The structure of *samoyilka* melodies differs from that of most chants in *irmoloyi* in that they can be divided into lines of repetitive phrases with a tendency towards symmetry, making them easier for congregational singing than most chant.

The original practice of congregational singing continues to the present day in the southwestern Rusyn tradition, including the diaspora churches of Old Believers and Carpatho-Rusyn Greek Catholics and Orthodox in the USA and Canada.

5. Bulgarian church music. The Bulgarians were apparently the first among the Slavs to accept Christianity as a state religion in 865. Their proximity to Constantinople, capital of the Byzantine Empire, fostered close ties with the Greek Orthodox Church and its ritual. Yet in spite of this and known cultural developments in medieval Bulgaria the existing documents about music and chant are sparse and fragmentary. As study of the 13th-century Bologna Psalter progresses, in which some segments of the Slavonic text contain Byzantine neumes, more may become known. Similarly, the Zographou Trefologion (or 'Draganov Minej', in the monastery library of Zographou, Mount Athos) contains neumatic notation that has not yet been studied critically. There are also records of Bulgarian inscriptions in Byzantine musical manuscripts. The Slavonic manuscript known as the Synodikon of Boril contains musical examples, but in Greek with Byzantine neumes. This is not a direct source of information for church music in Bulgaria.

The Bulgarians claim as their own one of the most outstanding Byzantine musicians of the 14th century, Joannes Koukouzeles, whose mother was evidently of Slavonic (but not necessarily Bulgarian) origin. One composition attributed to him is customarily referred to as 'Polyeleon Bulgara' (presumably 'Bulgarian woman'), a title that some scholars have interpreted as a tribute to his own mother. Its dating and attribution are as yet uncertain, and all the works of Koukouzeles survive in Greek.

From the downfall of the Bulgarian medieval state in 1396 to the liberation from the Turks in 1877–8, the main centres of religious activity under Turkish domination were the monasteries. The absence of any records of musical activity in such circumstances is understandable. It is again in the monasteries that the first signs of cultural revival were to take place, including the writing of hymns in Bulgarian and the notation of their melodies in late Byzantine neumes. One such prominent centre was the monastery of St John of Rila, south of Sofia, where in the late 18th and early 19th centuries a whole school of singers came into existence around a neophyte monk who has been called the first Bulgarian musicologist.

Following the Chrysanthine reform of Byzantine neumatic notation in the first quarter of the 19th century (which spread rapidly through its use in printed books) the Bulgarians were the only other group besides the Greeks to accept this reformed notation not only for church music but also for secular melodies.

With the growth of the national liberation movement in the 19th century, the public libraries played a distinctive role in nationalist cultural activities. From the middle of the century a number of libraries sponsored choral groups which participated actively in religious services in their communities, gave concerts of secular music and cultivated folk music. Conductors of these choruses represent at the same time the first modern composers of Bulgarian church music to accept polyphonic settings. At first many such settings were simple arrangements of traditional melodies, hitherto transmitted only orally. Relying on a relatively recent tradition from the late 17th century and the 18th suggesting the existence of a specifically Bulgarian chant, the main body of church music in use in Bulgaria became divided into 'Damascenian melodies' (presumed to have been written by John Damascene (*c*675–*c*749) but in fact mostly simply transferred from 18th- and 19th-century Greek manuscripts) and Bulgarian chant.

The first conductor and arranger worthy of mention is Ianko Mustakov (1842–81). Of greater significance were Nikolay Nikolayev (1852–1938) who was active in Sofia, and Atanas Badev (1860–1908) who, with a number of his contemporaries, combined composition of religious music with the study of folk music. In the first half of the 20th century the most talented and probably the best composer of church music in Bulgaria was Dobri Khristov (1875–1941).

6. Serbian church music. Although the Serbs accepted Christianity perhaps as early as the 10th century, the first references to the practice of church music come from the Serbian medieval state ruled by members of the dynasty of Nemanjides (late 12th century to 1371). Chanting is mentioned specifically in the Lives of rulers and of saints – a literary genre cultivated particularly after 1219, when the Serbian archbishopric was made independent of the Greek church in Byzantium. This latter event, the work

of St Sava (*d* 1235), prompted a wave of religious activity, including the founding of monasteries, the copying of manuscripts and the fostering of church music. Despite the absence of any Serbian musical manuscripts before the 15th century it is possible to infer the existence of religious poetry and services composed for the feasts of Serbian saints. These contain clear indications that hymns were to be sung either in a particular mode or emulating the melodic patterns of well-known traditional hymns.

The earliest mention of musicians of more than local reputation in medieval Serbia dates from the last decades of Serbian independence, just before the total conquest by the Turks in 1459. With the exception of 'domestik Kyr Stefan the Serb' these singers were Greeks who had also been active in Byzantium: Joakeim the monk of the Harsianites monastery (in Constantinople) had also the title of 'domestik of Serbia'; even Manuel Chrysaphes (*fl c*1440–63) resided for a while in Serbia. In the second half of the 15th century the names of Isaiah the Serb and Nicolas the Serb were recorded as composers of religious music. The works of all of these composers are notated in Byzantine neumes with Greek or Slavonic texts, or both. They survive in a few Byzantine manuscripts and bilingual fragments. Stylistically there is no difference between these chants and the melodies known from contemporary Byzantine sources. Medieval Serbian church music thus emulated the style of Byzantine models, although specifically Serbian variants of some chants did exist.

As in Bulgaria, the Turkish domination had cut short cultural growth by almost totally eliminating the educated class of people. Religion became intertwined with the idea of nationality, and church music was viewed as one of the manifestations of national spirit, in the latent struggle for survival. Some scattered records concerning chanting are available from the period of Austrian rule in northern Serbia (*c*1719–39). At that time closer ties were being established between the Serbian population that had settled in Austria (after retreating from the Turks) and Russian religious centres, especially that of Kiev. While the Serbs retained the tradition of monophonic chanting for some time in the Austrian lands, a new blend of church music, presumably incorporating traditional and also perhaps Russian melodies, was gradually formed. This may be the origin of the so-called Karlovac chant (named after the town of Sremski Karlovci, the seat of the Serbian archbishop who was the spiritual leader of Serbs in Austria). The only other cultural and spiritual centre in which a more or less uninterrupted religious life was maintained among the Serbs was Chilandar monastery, Mount Athos (founded by Nemanja and his son Sava in 1198).

A number of musical manuscripts were copied in the late 18th and the 19th centuries. These contained brief theoretical treatises on music (mostly adaptations of the Greek papadikē) and a large collection of hymns and chants in honour of Serbian saints. Among them is an interesting collection of chants by the well-known Greek musician Petros Peloponnesios, which was copied in the early 1770s (now in *US-NH*); it includes a number of hymns presumably by him but set in the Serbian recension of Church Slavonic. These late 18th-century documents are all notated in late Byzantine neumes. Melodies tend to be melismatic, and their structure still follows the contemporary Greek melodies, which were by then considerably changed from their medieval prototypes. This body of chant thus represents a new stage in the evolution of Serbian chant that has nothing in common with the melodies collected and published at the turn of the 20th century either in melodic outlines or in the structure of the hymns. The latter melodies are now viewed as the third stage in the evolution of Serbian monophonic chant. The disparity of these melodies raises the question of their origin, which as yet remains uncertain.

With the beginning of gradual liberation from the Turks (starting in 1804 with the first Serbian insurrection), other variants came to the fore in addition to the Karlovac chant. Among these, Belgrade chant and Zadar chant (named after a city on the Dalmatian coast) enjoyed considerable popularity. After some individual and rather unsystematic attempts at recording these melodies in modern western European notation, the studious labours of Stevan Mokranjac (1856–1914) as collector and editor of a great number of melodies are a milestone. His edition of the *Osmoglasnik* (i.e. *oktōēchos*), published in Belgrade in 1908, became a classic in this field. Monophonic traditions of chanting still continue in Serbia at the present time, though mostly restricted to a few monasteries and smaller churches, whereas in the cathedrals and larger churches polyphonic music now prevails.

Polyphonic settings of Serbian church music appeared rather late, in the mid-19th century. The first person to compose four-part settings of functional church music was Kornelije Stanković (1831–65) who wrote two liturgies (1851–2), besides collecting melodies of Karlovac chant, most of which still remain unpublished. Probably the greatest Serbian composer of church music was Stevan Mokranjac. By the early 20th century Serbian composers were composing music for liturgical purposes. The main followers of Mokranjac, most of whom were eclectics, were Stevan Hristić (1885–1958), Kosta Manojlović (1890–1949) and Marko Tajčević (1900–1984). These three composers wrote effective church music, combining originality and erudition. Since 1945 fewer composers have shown an interest in church music, but avant-garde composers such as Ljubica Marić (*b* 1909) and Vlastimir Nikolovski (*b* 1925) have used traditional Serbian chants, though in works unsuitable for religious services.

BIBLIOGRAPHY

This bibliography is designed to give comprehensive coverage for Russian, Bulgarian and Serbian church music and their notations. It is intended to serve not only the foregoing article but also a range of other articles in the same field which carry only short selective bibliographies and are cross-referred to this bibliography for further material.

A Russian church music: (i) Reference (ii) Bibliography and critical surverys of literature (iii) Catalogues of musical manuscripts (iv) Facsimile editions of manuscripts (v) Musical editions (vi) Studies and monographs (vii) Discography. B Rusyn church music: (i) Reference books (ii) Catalogues of musical manuscripts (iii) Music editions (iv) Studies. C Bulgarian church music: (i) Catalogues of musical manuscripts (ii) Facsimile editions of manuscripts (iii) Studies. D Serbian church music: (i) Bibliography (ii) Studies. E Slavonic neumatic notations.

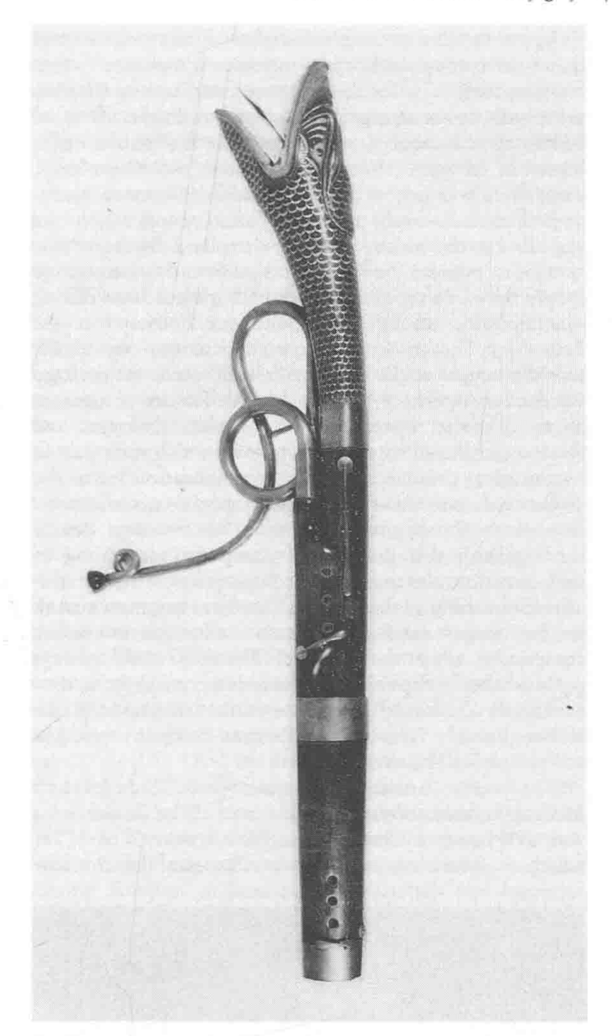
MILOŠ VELIMIROVIĆ (1–3, 5–6; bibliography with IRENE LOZOVAYA and GREGORY MYERS), LEONORA DECARLO (4)



Russian bassoon (Fr. *basson russe*, *serpent-basson*, *serpent-droit*, *ophibariton*; It. *serpentone*). A variety of upright serpent made in three or four sections, two of which, in a more massive form, resemble the butt and wing joint of the bassoon. The bell section is generally made in two parts, a straight wooden joint fitting into the butt, often capped by a brass flared bell or a painted dragon's head as illustrated here (the dragon's head variety was also called ophibariton). Many instruments of the dragon's head type were made at Lyons by such makers as Sautermeister, Jeantet and Tabard during the second quarter of the 19th century. The instrument is completed by a curved swan-neck crook. Six finger-holes and either three or four keys are normal, while in compass and playing technique it in no way differs from the serpent, except that it is much more convenient to hold.

Its origin may be found in Régibo's serpent, which was announced in Framery's *Calendrier universel musical* for 1789 in the following terms:

> J.J. Régibo, Musicien à la Collégiale de St. Pierre à Lille, vient d'inventer un serpent nouveau qui est fait de même qu'un basson; il se démonte en trois parties et est plus fort que le serpent ordinaire, et plus aisé à jouer; il a la même embouchure, est du même diapason et même gamme. Il a été présenté à MM. du Chapître dans une musique à grande symphonie, et a fait l'admiration des auditeurs par son effet; ils l'ont reçu dans leur musique ordinaire. Ceux qui veulent s'en procurer peuvent s'adresser à l'auteur, rue Pétérinck, Paroisse St. Pierre à Lille. Le prix est 3 louis.

Although this is evidently the starting-point of the countless varieties of upright serpent that became so popular and widespread during the first half of the 19th century, nothing further has been discovered about Régibo's instrument. Obviously it can have met with no success in Paris, since the first upright serpent found there is the Piffault serpent (1806), which bears no resemblance whatever to a bassoon; it was not until considerably later that bassoon-like serpents appeared in any quantity.

It is possible that Régibo's serpent was more encouragingly received further east, whence it seems to have

Russian bassoon, 1833 (Schweizerisches Landesmuseum, Zürich)

reached Paris, after Waterloo, in Prussian military bands. It appears to have been popular in Belgium, though, to judge from surviving specimens, not before the 19th century.

Different countries seem to have favoured certain types of upright serpent. Thus in Germany the russian bassoon and Streitwolf's chromatic bass-horn are found; Belgium preferred the russian bassoon and the tuba-Dupré, France favoured the Forveille serpent and the russian bassoon, while England held exclusively to the bass-horn.

Russian Federation (Russ. Rossiiskaya Federatsiya). Country largely in Asia, with its capital at Moscow. It is the world's largest country in area, reaching from the Gulf of Finland to the Pacific, and from the Arctic to the Black and Caspian seas, covering 11 time zones.

During the three centuries of Romanov rule (from 1613) the Russian Empire expanded to take in much of eastern Europe and northern and central Asia. The 1917 Revolution replaced the Romanovs with a Soviet republic headed by a series of strong leaders (Lenin, Stalin) whose views affected all spheres of society including music. The empire was reconstituted as the Union of Soviet Socialist Republics (USSR) which, following territorial gain after World War II (including the absorption of the Baltic States), grew to a total of 15, of which the Russian Soviet Federal Socialist Republic was by far the biggest and itself included a number of smaller autonomous republics. Liberalization in the late 1980s led to the break-up of the Soviet Union into its constituent parts. In this way the Russian Federation was shorn of areas, partly Russian-speaking, such as Ukraine and Belarus, that had been closely linked with Russia for many centuries.

For further information on countires formerly part of the USSR, see articles on the following Baltic States: ESTONIA, LATVIA and LITHUANIA; as well as those from the former Soviet CENTRAL ASIA: AZERBAIJAN, KAZAKHSTAN, KYRGYZSTAN, TAJIKISTAN, TURKMENISTAN and UZBEKISTAN; and BELARUS, GEORGIA, MOLDOVA and UKRAINE.

I. Art music. II. Traditional music.

The 20th century: (i) The pre-Revolutionary period, 1900–17 (ii) Political background to the Soviet period (iii) Music of the Soviet period.

1. 988–1730.

(i) Sacred music. Russia adopted Christianity in 988, when, according to legend, Prince Vladimir chose the Eastern Rite for the greater beauty of its services. This choice, together with the country's geographical position, ensured that Russia would develop independently from the West for centuries to come. In the Russian Church, Byzantine chant evolved into *znamennïy raspev* (znamennïy chant), which was notated in *kryuki* (neumes). This notation served as an aide-mémoire rather than a precise indicator of pitch until changes in the early 17th century, and so the recovery of chant melodies from manuscripts before this time is not possible, although a large number of chants were carried over into later neumatic and modern-notation manuscripts. Znamennïy chant was monodic and, in accordance with canon law, always sung without instrumental accompaniment. The chant melodies were organized into eight *glasï* (the system of *osmoglasiye*); 19th-century scholars assumed that these were analogous to Gregorian or Byzantine modes, but they were later established to be collections of melodic formulae. In the 20th century chant scholars in Russia also suggested that an indigenous polyphonic tradition emerged in the mid-17th century; however, there is no consensus on how to transcribe the music of this alleged tradition, since even the later neumatic notation lacks clef signs and indications of relative duration, and there are no documented rules for combining voices. The non-indigenous tradition of polyphonic church music that came to Russia from Poland via Ukraine is, on the contrary, well documented and preserved in a readily comprehensible Western notation. This imported tradition, known as *partesnoye peniye* (part singing), dates back to 1652, when the new style was demonstrated by a group of Ukrainian singers who had been invited to Moscow. From this Western practice emerged a new genre of liturgical music, the sacred concerto; Nikolay Dilets'ky and Vasily Titov were the leading exponents,

and a composition manual for the genre survives, the *Grammatika musikiyskogo peniya* of Dilets'ky. (*See also* RUSSIAN AND SLAVONIC CHURCH MUSIC.)

(ii) Secular music. Little is known about secular music in Russia during the Middle Ages. Pictures of *skomorokhi* (similar to jongleurs) can be found in chronicles, but none of their music was notated in any form. Although the Russian Church believed the *skomorokhi* to be inspired by the devil, and accordingly persecuted them, they are known to have been employed at the court of Ivan the Terrible (1533–84). The main centres of *skomorokhi* activity were Novgorod (which enjoyed free-city status) and, from the 16th century, Moscow. From the time of Ivan the Terrible, Russians made increasing contact with the West, and Russian music came under Western influences. Portative organs and other keyboard instruments became popular as royal presents, and they were evidently used: we know, for example, that organ playing was popular at the court of Aleksey Mikhailovich (1645–76). Westerners hired by the Russian court brought other musical novelties: Gutovsky, for example, was printing music at the Russian court from as early as 1677. Instrumental music was used in ceremonial contexts (although, again, nothing is known of its nature), and military bands were formed around the middle of the century. In 1672 the first court theatre was established, and music played a significant role in its productions. From the late 17th century the court regularly invited foreign musicians, and this grew to a steady stream during the reign of Peter the Great. The first secular music to survive in notation was the new genre of partsong, known as *kant*, which emerged during this period. For Peter, the cultivation of European-style musical entertainments was a mark of civilization, and in 1718 he introduced regular balls (*assamblei*) where the Russian nobility were obliged to dance the newly learnt minuet. Large military bands featured in the celebrations of Peter's victories, and the aristocracy began to employ instrumental musicians.

2. 1730–1860.

(i) Opera. The first opera ever presented in Russia was Ristori's *Calandro*, performed in Moscow, in 1731, by a touring Italian troupe. Soon an Italian operatic company was established at the Imperial Court in St Petersburg; for their inaugural production in 1736, they presented Araja's *La forza dell'amore e dell'odio*, recruiting Russian musicians for the choir and orchestra, a practice that was maintained thereafter. In time, the company began to perform new operas in the Russian language: the first of these, again with music by Araja, was *Tsefal i Prokris* ('Cephalus and Procris') by Sumarokov, performed in 1755, by which time there was a sufficient number of trained Russian singers for such enterprises. The Imperial Court and, increasingly, the higher nobility paid their foreign musicians handsomely and accorded them dignified status. Consequently many European musicians, especially Italians, took up positions in Russia, remaining for years, or often for the rest of their lives. The most senior position of court Kapellmeister was occupied by a string of distinguished composers: H.F. Raupach (1758–62), Vincenzo Manfredini (1762–5), Galuppi (1765–8), Traetta (1768–75), Paisiello (1776–84), Giuseppe Sarti (1784–6) and Cimarosa (1787–91); Martín y Soler held positions of court composer (1790–94) and inspector of the Italian Court Theatre (1800–04).

Many families among the higher nobility established their own theatrical and operatic companies (often training their serfs for this purpose), and several theatres were built to house regular productions. In the 1750s an Italian entrepreneur, Locatelli, ran the first public opera house in Moscow, but the enterprise was short-lived, since there was not yet sufficient public interest in opera, even though Locatelli presented comic operas which had appealed to the widest audience elsewhere. By the 1780s, however, interest had grown significantly, enough to justify the opening of several public opera houses during that decade; among the new opera houses was the Petrovsky Theatre in Moscow, which was one of the world's largest at the time, with 1000 seats. Aside from the Italian opera, presented by the Italian companies alone, all other operas included spoken dialogue, and these were played by singer-actors who also took part in non-musical dramas; increasing specialization led to the division of companies into distinct operatic and dramatic troupes at the beginning of the 19th century. But in tandem with this division of companies according to specialization, the number of companies was also gradually diminishing as the Imperial Theatres began to absorb the best singers (and actors) from the foreign and native companies; since the Imperial Theatres could always outbid other companies for the services of singers, they eventually destroyed all competition, leaving only one Italian, French, German and Russian company based at each Imperial Theatre.

One early Russian-language opera, Sokolovsky's *Mel'nik-koldun, obmanshchik i svat* ('The Miller who was a Wizard, a Cheat and a Matchmaker') of 1779, which enjoyed a run of three decades, established a new

1. Portrait believed to be Praskov'ya Ivanovna Kovalyova (Zhemchugova), 1790s (Ostankino Estate Museum, Moscow); Zhemchugova was the leading performer with the serf opera company of Count Nikolay Sheremet'yev, whom she married in 1801

operatic genre in Russia, namely, a comedy of everyday life with spoken dialogue, often incorporating the melodies of popular Russian songs; the genre established itself firmly through a series of successful operas written in the 1780s and 90s. A new generation of operatic composers, including Pashkevich, Fomin and Bortnyans′ky, came to prominence at this time, and Catherine the Great's personal enthusiasm for opera lent their activities further support; indeed, she even penned several librettos which were duly set to music (for example, Pashkevich's *Fevey* of 1786 and *Fedul s det′mi* ('Fedul and his Children'), by Fomin and Martín y Soler, of 1791). Russian operatic companies had to compete with German, French and English companies (both touring and resident), and were strongly influenced by their rivals' repertories. Perhaps the most consequential influence came in the form of Kauer's *Das Donauweibchen*, first performed in Russia in 1808; the success of the German version gave rise to *Lesta, Dneprovskaya rusalka*, a Russian-language adaptation, and this in turn spawned three sequels and prepared the way for many other Russian-language operas with fairy tale plots and spectacular stage effects. The leading composers of such operas were Catterino Cavos, an Italian émigré who directed the Russian opera company at court from 1798 to 1840, and Verstovsky, who based several operas on latter day Slav epic-style plots, the most popular being *Askol′dova mogila* ('Askold's Grave'), first staged in 1835 (Verstovsky was also a composer of vaudevilles). In 1836 the first through-sung Russian opera was staged, Glinka's historical drama, *A Life for the Tsar*; it was hailed by critics as the first truly national opera and has since become a traditional season-opener. Nevertheless, foreign-language opera remained more popular among Russian audiences, for although the Imperial Russian company featured many distinguished singers, such as the bass Osip Petrov and the mezzo-soprano Anna Petrova, foreign companies could boast of even greater luminaries, such as Rubini, Patti or the dancer Filippo Taglioni.

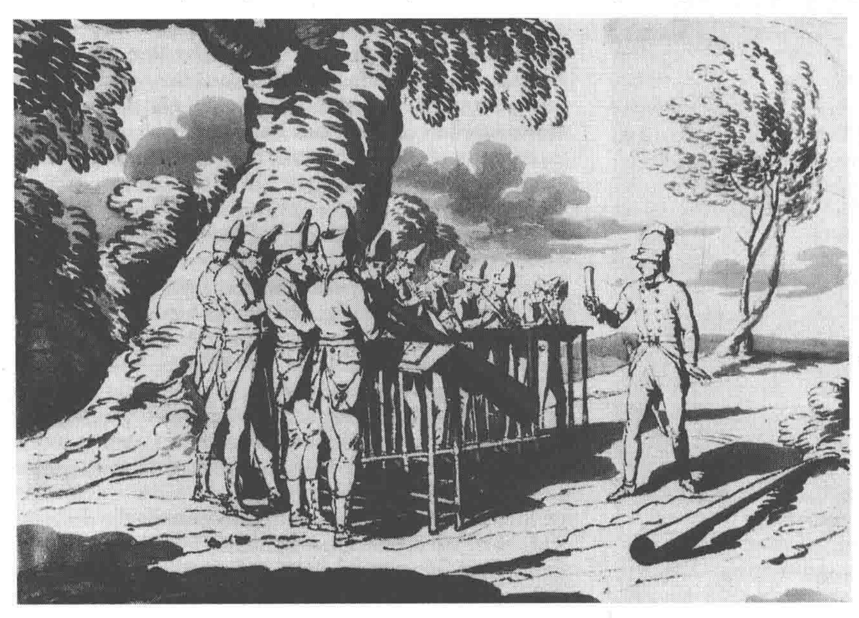
(ii) Concert life. The first public concert in Russia took place in 1746, and by the end of the century public concerts had become commonplace. Nevertheless, the greater number of concerts were still private, taking place at court and in the homes of the aristocracy, such as the many sumptuous palaces lining St Petersburg's Nevskiy Prospekt (admittedly, the invitees at private concerts would have constituted a large part of the potential audience for such music). Foreign musicians dominated concert life, although the first Russian virtuosos began to appear in the 1780s and 90s: the violinist Khandoshkin, for example, or the singer Sandunova. Over the course of the following decades, amateur musicians and music lovers from the aristocracy, well travelled and well connected, were able to attract Europe's most eminent performers to St Petersburg and Moscow: John Field (1802–21), J.N. Hummel (1822), Lipiński (1820s and 30s), Sontag (1830), Henselt (1838–89), Vieuxtemps (1838, 1845–52), Liszt (1842, 1843), Clara Schumann (1844), Berlioz (1847) and Pauline Viardot (1843–6, 1853).

Aside from orthodox orchestral and choral forces, soloists and chamber musicians, another type of ensemble, now long consigned to oblivion but then very popular in Russia, was the *rogovaya muzïka* (horn music); the first such ensemble in Russia was formed in 1751 by J.A. Mareš, a Czech musician, and such concerts remained a constant feature of concert life until the 1830s. The musicians played brass instruments with a design peculiar to these ensembles, producing a tone which was reputedly of great beauty, with one drawback: each instrument could play only one note. Excessive rehearsal time was required to achieve the necessary degree of coordination, and accordingly these orchestras were usually staffed by serfs or soldiers, who were in no position to demand hourly rates. A succession of modifications to the instruments' design provided players with a maximum of four notes by the end of the century, without significant damage to the timbre (since the timbre was the raison d'être of these orchestras, the range of possible modifications was limited). Contemporaries wrote enthusiastic accounts of horn orchestras consisting of anything between 40 and 130 players; since players often used more than one instrument in a given piece, the number of instruments in the orchestra could reach 300, according to these accounts. The repertory most commonly consisted of dance music, but extended more ambitiously to arrangements of popular overtures, or, occasionally, of entire symphonies.

In 1802, the newly formed St Petersburg Philharmonic Society began to organize grand concerts with large orchestral and choral forces, including a number of Handel oratorios, Haydn masses and Mozart's Requiem; and in 1824 they gave the first complete performance of Beethoven's *Missa solemnis*. The construction of a railway between St Petersburg and Pavlovsk, the site of the Tsar's summer residence, led, in 1838, to the opening of an important new public concert hall which also served as the Pavlovsk terminus. Series of concerts given by Johann Strauss (ii) in 1856–65 and again in 1869 established the Pavlovsk concert hall as one of the most fashionable venues for the St Petersburg gentry and nobility. Within the confines of St Petersburg, summer concerts in the various parks became popular during this period. From 1842 until the late 1850s, the university orchestra presented an annual concert series, introducing a wide repertory to the inhabitants of the capital, including many new works.

(iii) Domestic music-making. From the mid-18th century Moscow and St Petersburg saw a swift rise in sales of printed music and musical instruments, especially keyboards, guitars and harps; by the 1760s the ranks of music teachers in the cities had expanded greatly, and teachers for the most popular instruments were able to make a comfortable living. In 1751 an amateur musician, Teplov, published the first printed collection of Russian music, entitled 'Idle Hours Away from Work, or A Collection of Various Songs'; these pioneering settings of Russian poetry display some skill in fitting poetic metres into regular musical phrases (the composers of earlier partsongs were not so successful in setting the less congenial hendecasyllables of their chosen verses).

The music publishing business became an established part of commerce in the 1770s, adding to the sales of foreign sheet music; new music was often anthologized in various music lovers' periodicals, which remained popular throughout the following century. In 1798 a sufficient amount of music was circulating to prompt the opening of the first musical lending library in St Petersburg. The ability to compose songs became a mark of the cultivated gentleman around the beginning of the 19th century, and



2. 'Scene from Act 3 (Susanin's hut) of Glinka's 'A Life for the Tsar', Bol'shoy Theatre, St Petersburg, 27 November/9 December 1836: watercolour by Grigory Gagarin

this proliferation of musical activity inevitably yielded some composers of distinction, such as Alyab′yev and Varlamov, and even Glinka's roots belonged to this culture. The term 'romance' was used to distinguish these songs, which began to acquire a distinctive repertory of harmonic and melodic devices, from their 18th-century predecessors.

(iv) Sacred music. Italian composers employed by the court were not restricted to the composition of operas, but also provided liturgical music for Russian Orthodox services. Galuppi and Sarti, together with their Russian students, unsurprisingly brought stylistic features of Italian opera to the liturgy; occasionally, we even find melodies borrowed from Spontini and Gluck. The most distinguished indigenous composers of the time were the Ukrainians Bortnyans′ky and Berezovs′ky, both of whom studied in Italy. In the late 18th century they refashioned the style of the choral concerto, which was now a cycle of three or four classically patterned movements. The new liturgical music was, however, largely restricted to the more important churches of St Petersburg and Moscow, since smaller churches in the cities and provinces lacked sufficient forces of expert singers; accordingly, the now traditional three-part chant harmonizations remained the norm.

From the beginning of the 19th century the focus of all developments in Russian sacred music was the Court Chapel Choir, officially founded under this name in 1760, but descended from a court choir originally created in 1479. The Cappella choir was much in demand for its high performance standards, and it was often invited to participate in operatic productions and concerts. Both

3. Russian horn band: pen and ink with wash, early 19th century (British Museum, London)

categories of sacred music – the annual cycle of chant arrangements and larger occasional works – were written mainly by directors of the Court Chapel Choir (such as Bortnyans'ky from 1796 to 1825, or Aleksey L'vov from 1837 to 1861). The melodies of znamenniy chant had by this stage all but disappeared from practice, having been gradually replaced by so-called *bolgarskiy* (Bulgarian) and *grecheskiy* (Greek) chant; the melodies of these repertories followed more regular structures than those of the znamenniy type. In 1816 the Court Chapel Choir directorship was granted exclusive control over the publication and performance of liturgical music; the express purpose was the elimination of the more blatantly operatic elements from sacred music, but it effectively gave the Court Chapel Choir's composers a monopoly over sacred music.

3. 1860–1900.

(i) Music education. Largely through the activities of the brothers Anton and Nikolay Rubinstein, Russian musical life was professionalized during this period. The solicitations of Anton Rubinstein won musicians the status of 'free artists' and thus gave them a respectable place in the social hierarchy. In 1859 Anton Rubinstein had founded the Russian Music Society (RMS) under the patronage of Grand Duchess Yelena Pavlovna, and the next year saw the inauguration of the society's music classes. This activity was institutionalized in 1862 as the St Petersburg Conservatory, and various eminent foreign musicians were appointed as the conservatory's first professors. The foundation of Russia's first conservatory was greeted with hostile polemics from Stasov (who was soon to become the ideologist of The Five); he argued that the Western educational model that had inspired Rubinstein's conservatory threatened to undermine the indigenous development of a Russian national music. Stasov's protest notwithstanding, the success of the St Petersburg institution led in 1866 to the foundation of a second conservatory, in Moscow, placed under the directorship of Nikolay Rubinstein; among its first appointments was Tchaikovsky, who had just graduated from the St Petersburg Conservatory. By 1871, even a member of The Five had defected to the conservatory system, namely Rimsky-Korsakov, who in spite of his lack of formal training, accepted an invitation to teach at the St Petersburg Conservatory. Each composer was eventually seen as founder of a compositional school: Tchaikovsky's Moscow school, which included Taneyev, Kalinnikov and Rachmaninoff; and Rimsky-Korsakov's St Petersburg school, which included Glazunov, Lyadov and Ippolitov-Ivanov. Higher instruction on the piano was by far in greatest demand in the new conservatories, and the revenue generated by the piano departments allowed other departments to continue without material worries; prominent among the two conservatories' piano professors were Anton Rubinstein and Yesipova, and soon the first generation graduates, Ziloti, Safonov Rachmaninoff and Goldenweiser. The RMS quickly extended its educational programme to the provinces and outlying territories; new music schools were established in Kiev (1863), Saratov (1865), Khar'kiv (1871), Tbilisi (1871) and Odessa (1886), all of which were accorded the status of state conservatories in the years immediately prior to the Revolution.

The new conservatories' fees were high, enabling the critics of the RMS's policies to protest that these institutions were effectively closed to talented members of the lower social strata. Balakirev had shared Stasov's misgivings at the advent of Western institutions in Russian musical life, but he now decided to make the best of the new circumstances, and together with the choral director Lomakin he founded the Free School of Music in 1862, with the purpose of providing inexpensive musical education to all (in some cases, students were allowed to study free of charge). The school's finances were always strained, since Balakirev was unable to win the support of enough wealthy patrons; the syllabus was soon restricted to vocal tuition and classes in the rudiments of music theory, and the institution had ground to a halt by the end of the century. Nevertheless, the idea of music education open to all survived the demise of Balakirev's school and was soon embodied in the so-called People's Conservatories, founded in both St Petersburg and Moscow, in the wake of the 1905 uprising, through the offices of Rimsky-Korsakov, Lyadov, Taneyev, Auer and other distinguished musicians. Apart from the State Conservatories and the People's Conservatories, many private schools had been established in the two cities; some of these survived the post-Revolutionary exodus and the nationalization process, such as the school founded by the Gnesin sisters in 1895, which continued to produce many important virtuosos throughout the Soviet era.

(ii) Concert life, music business and patronage. The foundation of the RMS by Anton Rubinstein in 1859 completely transformed the musical life of the two capitals. Both the St Petersburg and Moscow branches of the RMS established programmes of orchestral and chamber music, with up to 20 concerts a year in each city. The programmes combined the established Western classics – Beethoven, Mendelssohn and Schumann in the view of Russians at this time – with new Russian works; there was also a growing interest in the revival of (Western) Baroque music. In the 1886–7 concert season, Rubinstein presented a series of ten piano recitals designed as an education in music history, running from Baroque to contemporary works; the entire series was given in both St Petersburg and Moscow, and the recitals featuring Chopin and Schumann were received with particular enthusiasm. During the same season, Rubinstein conducted a parallel series of historical symphony concerts, and in the following season gave a new series of 53 lecture-recitals on the piano's repertory.

While the activities of the RMS were initially heavily dependent on state subsidies and aristocratic patronage, the 1880s saw the rise of wealthy industrialists as major sponsors of music (and the other arts), among them M.P. Belyayev, Mamontov and Morozov. Belyayev, for example, sponsored the annual series of concerts devoted exclusively to Russian music from 1885 onwards (and set up a trust, so that the series could continue after his death), and from 1891 he also funded a series of quartet evenings each year. In addition to his direct contributions to concert life, Belyayev also established a music publishing house and provided large sums for annual composition prizes (the Glinka Prize and the chamber music prize, both open to Russian composers only). Belyayev also gave direct assistance to the careers of particular favourites, such as Glazunov, Skryabin and several minor composers of string quartets. His publishing house was only one of several major new music publishers to emerge in the late

19th century, and several smaller firms were purchased by their larger competitors. Stellovsky was the first such enterprise, established in 1850 and eventually absorbed by Gutheil in 1886; it published recent music by Glinka, Dargomïzhsky and Serov, but also took on the burden of preserving older Russian music by publishing Khandoshkin, Cavos and others. In 1869 the publishing house of Bessel was established and soon became the normal outlet for the works of The Five; Jürgenson was established in 1861, and became Tchaikovsky's favoured publisher.

Towards the end of the 19th century, there was a marked increase in folksong research, and this scholarly work soon made its mark on concert life. In 1887, an orchestra of folk-style instruments was created by Vasily Andreyev, who took the simple three-string balalaika as his starting point, building instruments in four sizes to cover the normal orchestral pitch range; he later added modified versions of other folk instruments and assembled them in sections, after the standard orchestral model. Andreyev's orchestra performed arrangements of folk and classical music, and their virtuosity won them the respect of Rimsky-Korsakov (who contemplated using balalaikas in one of his operas) and Glazunov (who wrote several pieces for the orchestra). A Russian folk choir was established by Pyatnitsky, who collected folksongs and arranged them for his singers, whom he trained to emulate the vocal production of peasant singers. Neither of these enterprises was designed to replicate folk models, and indeed peasants who heard their own songs performed by Pyatnitsky's choir declared that they were unrecognizable.

(iii) Opera. In the second half of the 19th century opera became central to the output of many Russian composers: Rimsky-Korsakov wrote 15, Rubinstein 13, Tchaikovsky ten, Cui ten, while Serov, Musorgsky and Borodin made smaller but nonetheless significant contributions to the art. This tendency resulted more from artistic imperatives than from the prospect of commercial success, since Russia offered only the two Imperial Opera Houses, the Mariinsky in St Petersburg and the Bol′shoy in Moscow, both under the same directorship; the choice of repertory was influenced by the court (Nicholas II notoriously rejected Rimsky-Korsakov's *Sadko*) and by commercial considerations, and on both counts Russian opera fared badly against its French and Italian rivals. The Italian opera company closed in 1885, but this was not due to any lessening of public enthusiasm for Italian repertory; on the contrary, demand had persisted for so long that the Russian Imperial companies were now sufficiently expert to satisfy demand for Italian works. In 1888 and 1889 Wagner's *Ring* cycle was given its Russian première by a German company conducted by Carl Muck; the first Russian-language production took place in 1902 and by all critical accounts deserved the acclaim it won from the public.

The scene was significantly enlivened by the re-emergence of private companies around the turn of the century; prominent among these was Mamontov's Private Russian Opera (established 1885) and Zimin's Opera (established 1904). The private companies lacked the resources of the Imperial Theatres and the quality of their musical performance varied greatly, but they were more flexible in their selection of repertory, and their productions more adventurous. It was Mamontov, rather than the Imperial Theatres, who discovered the talent of Chaliapin; it was Mamontov also who commissioned set designs from the most progressive Russian artists (Vrubel′, Korovin, Goncharova, Bilibin) for productions which brought Rimsky-Korsakov his belated celebrity as an operatic composer. Diaghilev's Saisons Russes would later capitalize on these achievements in Paris, where the public was full of admiration for Chaliapin's acting, the stunning avant-garde sets and Rimsky-Korsakov's music. Within Russia, opera spread from the two capitals to the provincial centres of Kiev (1867), Odessa (1887) and Khar′kiv (1880).

(iv) Musical politics and criticism. Before the 1860s music criticism was largely an occasional pastime of aristocratic music lovers like Ulïbïshev, author of the first Russian monograph on Mozart, or Odoyevsky, who wrote pioneering articles on Glinka and Russian folksong. The next generation of critics, headed by Stasov and Serov, invested much more effort and ardour in their writing. Serov is remembered for the first Russian example of motivic analysis (in an essay on Glinka's *A Life for the Tsar*), and for his passionate promotion of Wagner (whom he met several times). Stasov, the ideologue of The Five, set himself the task of issuing propaganda for the cause of Russian musical nationalism. The Five, in Stasov's polemics, were presented as the only true friends of Russianness and progress in music, and Stasov issued denunciations of many other prominent figures in Russian musical life, including Anton Rubinstein and the RMS, his former friend Serov, Laroche for his advocacy of Tchaikovsky, and the younger critics Ivanov and Koptyayev. Cui, who was also an eminent critic, consistently followed Stasov's line, as did Rimsky-Korsakov in a few articles (which he later regretted). Stasov's posthumous influence was immense, largely shaping Soviet historiography of Russian 19th-century music; even Western accounts fell under his shadow, and accordingly a distorted picture of Russian music was perpetuated.

Musical journals, sold on the strength of their sheet music supplements, had been published in Russia since the late 18th century; the most long-lived of these was the *Nuvellist* (1840–1906). Journals without such supplements were short-lived, until the pattern was changed by the steady success of the *Russkaya muzïkal′naya gazeta* (1894–1918, edited by the music historian Findeyzen). Interest in Skryabin, Stravinsky and Prokofiev prior to the Revolution led to a specialist journal, *Muzïka* (1910–16), devoted to modernist currents in music.

(v) Church music. The Court Chapel Choir's effective monopoly control over church music ended in 1879, when it lost a legal suit against the publisher Jürgenson, who had independently published Tchaikovsky's music for the liturgy. Nevertheless, until the close of the century, Tchaikovsky remained the only prominent composer outside the Court Chapel to have made a substantial contribution to liturgical music (within the Chapel, Rimsky-Korsakov composed 32 arrangements of chant melodies). In the 1890s, however, there was a surge of interest in church music centred around The Moscow Synodal School of Church Singing; director Kastal′sky called for the revival of znamennïy chant with new harmonizations supposedly derived from Russian folksong (although they were in fact drawn from the harmonic style developed in the middle of the century for piano accompaniments to folksongs). Rachmaninoff's *Vsenoshchnoye bdeniye* ('All-Night Vigil'; 1915) is the most celebrated work to draw upon these innovations; others,

such as Grechaninov or Tcherepnin, looked towards Western concert settings of liturgical texts, and introduced the organ and orchestra into sacred music. Further development was rendered impossible by Bolshevik policy towards the Church.

4. THE 20TH CENTURY.

(i) The pre-Revolutionary period, 1900–17. At the beginning of the 20th century, Russian music was no longer essentially divided along the nationalist and Europe-orientated lines that had defined much 19th-century Russian aesthetic debate. The end of the last century had been dominated by figures such as Tchaikovsky and Glazunov, both of whom had straddled this divide. However, nationalism saw a resurgence with a second generation such as Lyadov and Lyapunov; the beginning of the century also saw Balakirev's return to composition and Rimsky-Korsakov writing a series of operas that must be counted among his most important work. These composers were all based in St Petersburg. In the 19th century, Moscow was generally considered culturally backward when compared with its northern counterpart. But by the year 1900 Moscow had developed into a significant musical centre in its own right: crucial to this renaissance was Sergey Taneyev, a composer who was, more importantly, a teacher and mentor to a particularly gifted generation of composers – Medtner, Rachmaninoff and Skryabin. These figures must be counted as the most significant musicians of the so-called Silver Age, a term applied to the period 1890–1920 and its mainly symbolist and latterly futurist literature and art.

The combination of nationalist techniques with harmonic idioms which, while having their roots in Russian 19th-century music, were also associated with European Impressionism (Debussy's *Pelléas et Mélisande* was performed in Russia in 1907), breathed new life into the St Petersburg school. Such leanings can also be observed in Lyadov's late orchestral works in which make-believe, apocalyptical or mythical narratives are conjured up by a language of increasing sophistication, but which still has folksong and 19th-century models at its basis. Likewise, in Rimsky-Korsakov's late operas, whole-tone and octatonic scales are interweaved in his recounting of the fantastic, the supernatural and searches for the unattainable. By this time, Wagner's ideas – if not necessarily all aspects of his music – had made considerable inroads into musical thinking in Russia and, beyond that, had affected the work of a whole range of the country's artists. The last decades of the St Petersburg school did not purvey a nationalism of the type proposed by Stasov in the 1860s: it had become atrophied, decadent and self-referential – but not necessarily aesthetically worse off for it. While *Boris Godunov* and *Prince Igor* were concerned with survival of the state and the tragic results of the relationship between the ruler and the ruled, Rimsky-Korsakov's last two operas treated similar subjects but in two very different ways: *Kitezh* mysticized the survival of

Russia while *The Golden Cockerel* satirized the rulers of a supposedly imaginary state. Rimsky's pupils such as Nikolay Tcherepnin, Steinberg and others, formulated an Impressionist language that has received little attention outside Russia. His most important pupil, Stravinsky, initiated his stylistic development with a neo-classicism somewhat similar to that of Glazunov's middle-period works (in the early Piano Sonata and Symphony), before being attracted by this latter-day nationalism and Impressionism as well as assimilating some aspects of Skryabin's late language.

Although a classicist at heart, Taneyev was acutely aware of his pupils' need to be exposed to the most advanced musical tendencies, even if he did not necessarily approve of them. He thus broadened their outlook and unwittingly fostered a modernist environment. The Moscow school associated with Taneyev embraced composers as diverse as Rachmaninoff, Medtner, Catoire, Glière and Stanchinsky, but the most important figure of the first two decades of the century was unquestionably Skryabin, who had been a protégé of Taneyev's. He later eclipsed all other Russian composers and came to represent the modernist musical faction of Moscow (if not all Russia) alone. Skryabin's influence affected the development of nearly every Russian composer of the first half of the 20th century. That composers attempted to write music exactly as he had done more than a decade after his death demonstrates that he had become an idol during the early Soviet era. But his influence had begun to take effect during his own short life: it can even be seen in works by essentially conservative composers such as Glière, Lyadov, Medtner and Vasilenko. More importantly, elements of Skryabin's style became discernible in the early works of Prokofiev and Stravinsky, both of whom arguably subsequently developed creative personalities as strong as that of Skryabin. It was his example that inspired many musicians from Moscow and St Petersburg to experiment with atonality.

Lourié is emblematic of the breaking down of the previous duality inherent in Russian music: born in St

5. Title page of Rimsky-Korsakov's 'The Golden Cockerel' (Moscow: Jürgenson, 1908)

Petersburg, he studied with Glazunov but soon became a follower of Skryabin. Likewise, the Moscow-born Vasilenko was influenced by ancient Russian chant and Impressionism, thus bringing his music closer to the mores of the St Petersburg school. This tendency reached an apotheosis in Glière's Third Symphony; even though he was really a composer of Moscow orientation, Glière combined nationalist epos with Wagnerian leitmotif narrative, Impressionist orchestration and Skryabinesque harmonies. Certain musicians who had an especial influence on the development of music in the Soviet era – including those composers of the Moscow school named above and the pianist-composer Goldenweiser, and the critics Zhilyayev and Lamm – were all educated and first gained recognition during the 1910s. In later years they represented a lifeline to the professionalism, artistry and aesthetic morality of the pre-Revolutionary era which the RAPM and then the hardline elements of the Composers' Union would label élitism and, as such, attempt to destroy.

(ii) Political background to the Soviet period. Apart from the renaming of ensembles such as the former court orchestra (which became the Petrograd State SO), the abdication of Nicholas II and the formation of the provisional government in February 1917 made little impact on the lives of most musicians, since few were politically engaged. However, this was not to be the case when the Bolsheviks seized power on 7 November later that year in Petrograd. The importance allocated to the arts was reflected in the appointment of Anatoly Lunacharsky as head of the Ministry of Education (abbreviated as Narkompros) the following day. The Bolsheviks needed not only to educate a largely illiterate population but also to indoctrinate it with Marxist principles – a task they believed might be more easily rendered through the medium of art, and in particular drama. Lunacharsky's brief therefore extended to a root and branch reorganization of Russian artistic life along nationalized lines. The new government began taking control of artistic institutions immediately after the Revolution, so that it could have greater jurisdiction over the cultural sphere. The Mariinsky and Bol'shoy theatres were transferred into state ownership on 22 November 1917, and their doors were opened for the first time to thousands of workers who were given free tickets by their factories and trade unions. Within a year the conservatories and private music schools were also nationalized, and concert halls, ensembles, publishing houses, libraries, archives and instrument manufacturers soon followed suit.

A highly educated and cultured man who retained his post until 1929, Lunacharsky was to play a crucial role in mediating between an often hostile and mistrustful artistic intelligentsia and Bolshevik leaders, with whom he also did not always agree on matters of cultural policy. He had more eclectic tastes than Lenin, who was an extreme conservative when it came to the arts; but both recognized the need for cultural continuity, at least in the short term. They were in agreement, therefore, on the question of preserving the old repertories, since they believed that revolutionary art needed to be created on the foundations of the old culture. More problematic was the future of the opera houses, which Lenin objected to as bastions of 'landlord culture', but Lunacharsky's more pluralistic approach and the unexpected popularity of opera with the new audiences helped to ensure its survival.

After Narkompros had been organized into departments, Lunacharsky appointed the composer and futurist-sympathizer Lourié to assist him in running its music division (MUZO). Its mission was to bring music to the masses, and to this end it started to promote concerts on an unprecedented scale and sponsored the formation of many new chamber ensembles. Musical events were accompanied by copious amounts of educational materials and were held in factories as well as concert halls for the benefit of thousands of workers and military personnel. MUZO also formulated extensive regulations governing opera house repertories and the contents of concert programmes, which had to be submitted for approval, and it endeavoured to monitor the activities of all those involved in the music business by requiring reports and formal requests for all planned events. Despite the euphoria of the first months after the Revolution, many prominent musicians balked at such measures, particularly since living conditions at the end of World War I were already very difficult. Rather than comply with these new ideological strictures, many (including Rachmaninoff, Koussevitzky, Prokoviev and Chaliapin) chose to emigrate. Conditions deteriorated still further when the country descended into civil war, and funds for proletarian musical enterprises had to be redirected.

Because the country was embroiled in war during the early Bolshevik years, the political leadership was less concerned with cultural matters and the situation in the arts was chaotic and undisciplined (music was even less of a priority for the new Soviet government than literature and drama). Lenin's and Lunacharsky's gradualist approach to the creation of communist culture was strongly challenged by the militant proletarian culture group Proletkul't, which categorically rejected pre-revolutionary, bourgeois art forms in favour of a new art to be created by the workers. Representatives of 300 organizations met at the first Proletkul't congress in October 1920, provoking Lenin to speak out against its attempts to 'isolate itself as an exclusive organization' in a Party Resolution. In a speech he gave that month, he stated forthrightly that one could become a communist 'only when one enriches one's mind with the knowledge of all the wealth created by mankind'. Friction also arose between Lourié and the majority of the Russian musical intelligentsia, who were already unenthusiastic about cooperating with the new regime and who resented the increasing bureaucratization of their activities. (Lourié was replaced by the Proletkul't composer B. Krasin in 1921 and emigrated a year later.) The authority of Narkompros was further threatened by the establishment of a union for all those who worked in the arts, VSERABIS (All-Russian Union of Workers in the Arts). The conference that Lunacharsky convened at the end of October 1920 produced an important Party Resolution designed to reinforce state control over the arts, insist on the necessity of the artistic legacy of the past in creating the new socialist culture and outlaw groups with autonomous ambitions. The Soviet government's cultural policies found their greatest champion in Boris Asaf'yev, a Petrograd-based critic, musicologist and composer who wrote regularly for the Narkompros journal *Zhizn' iskusstva* ('The life of art') and worked tirelessly as a musical populist. He was one of the few members of the musical intelligentsia to embrace the Revolution, and was

later to play a prominent political role in Soviet musical life.

By the end of the Civil War in 1921, the social and economic situation in Russia was so catastrophic that Lenin was forced to introduce the New Economic Policy as a survival measure. Along with the private enterprise and free trade that was now permitted came a degree of freedom for the arts, which now began to flourish again, albeit in a climate of greater financial restraint now that generous state subsidies had been withdrawn. Although Lenin continued to maintain his hostility towards artistic revolutionaries such as the futurists, and although a committee, Glavrepertkom, was formed in 1923 to oversee concert and theatre repertories, the party relaxed its control over cultural life to a considerable degree. Lunacharsky's permissive stance was echoed by Bukharin and Trotsky, and this new position of relative tolerance was confirmed by a Party Resolution in 1925. With the new capital, Moscow, emerging as the centre of the avant garde, this was a time of widespread experimentation in the arts, particularly in the theatre. The musical scene was also considerably enriched by renewed contacts with the West, which resulted in the Russian premières of works by leading modernist composers such as Schoenberg, Berg and Hindemith. Russian music and Russian musicians also began to be heard in the West again. Bruno Walter, who was among the distinguished foreign conductors who visited Moscow and Leningrad in the early 1920s, famously made Shostakovich's international reputation by conducting his First Symphony in Berlin in 1927. Within Russian musical circles, however, factionalism continued in the fierce confrontations between two new groups which were established in Moscow in 1923. The liberal and relatively Western-orientated Assotsiatsiya Sovremennoy Muzïki (Association for Contemporary Music), or ASM, allied itself with the modernist cause, while RAPM, the Russian Association of Proletarian Musicians, was in many ways the heir to Proletkul't in its condemnation of decadent bourgeois ideology, but proclaimed that mass song should be the basis of proletarian music. Consensus was difficult to achieve even within these groups, which themselves gave way to factionalism, but RAPM temporarily gained the upper hand in December 1928, when the first Five-Year Plan was announced. With the abolition of NEP came the 'Cultural Revolution', spelling the end of artistic freedom and the removal of Lunacharsky from his post.

With the country back on an almost wartime footing for Stalin's accelerated industrialization programme, the Soviet government needed the country's artists to promote the party line more than ever. The militant Marxist stance of RAPM thus came into favour. Dissenting views were still expressed, such as can be found in Our Musical Front, a collection of papers presented to a conference in Leningrad in 1929, but they were not sufficiently powerful to challenge RAPM's hegemony. Under a barrage of virulent attacks on the pages of its mouthpiece *Proletarskiy muzïkant* (which replaced the earlier *Muzïka i Oktyabr'* and *Muzïkal'naya nov'*), conditions became too inhospitable for the ASM and its journal, *Sovremennaya muzïka*, to survive, despite various conciliatory ploys. A similar fate befell independent musicians who tried to reach a position of accommodation with RAPM; their journal *Muzïkal'noye obrazovaniye* folded in 1930. Such manoeuvres soon became academic in any case. The behaviour of the leaders of RAPM had become so dictatorial and high-handed that they eventually alienated the party, which signalled its intention to intervene more directly in affairs of culture with the foundation of a Department for Culture and Propaganda (Kul'tprop) in 1930. The Central Committee was able to respond to the insubordination of RAPM by summarily liquidating it, together with all other proletarian artistic organizations. With the Resolution 'On the Reconstruction of Literary and Artistic Organizations', issued on 23 April 1932, the party at one stroke put a stop to dissent and factionalism in the arts and ushered in a new era of ideological conformity by announcing the creation of single unions. With most attention focussed by the party on the written word, owing to its potency as propaganda, the Union of Writers was the first to be established, and a high-profile Congress of Writers was held in 1934, at which the all-important doctrine of SOCIALIST REALISM was promulgated. Russian musicians were less organized and lacked a figurehead of status such as Gor'ky represented for writers, but Lunacharsky's successor, the party functionary Andrey Bubnov, immediately convened a lengthy meeting with composers to thrash out the question of how best to unite forces and serve the needs of the government. In the aftermath of all the recent acrimonious exchanges with RAPM, the majority of Russian musicians welcomed the creation of the Union of Composers, believing mistakenly that consolidation would be concomitant with greater artistic freedom. In fact, the outcome was just the opposite.

With the inauguration of the Union of Composers' journal *Sovetskaya muzïka* in 1933, this became the single major forum for the debate of musicological and ideological issues that did not challenge the party line. Defining what exactly the party line was with regard to musical compositions was no easy task, as was acknowledged in the first issue of *Sovetskaya muzïka*. Socialist realism demanded from Soviet writers 'the truthful and historically concrete depiction of reality in its revolutionary development'. In musical terms, this amounted in practice to the composition of patriotic, uplifting scores, preferably with a topical or folkloric content, written in a straightforward, accessible idiom. Stylistic experimentation was henceforth branded as 'formalism', and condemned along with the 'decadent bourgeois' music of the West which could no longer be performed or studied. The price of survival in this new climate of cultural isolation was capitulation and compromise or complete silence. Yet the clampdown was not immediate, nor was the situation unremittingly bleak in all respects. Prokofiev chose to return to Russia in 1933 (settling permanently there in 1936), and the 28-year-old prodigy Shostakovich's opera *Lady Macbeth of the Mtsensk District* was at first a phenomenal success both nationally and internationally. First staged in January 1934, it was certainly no exemplar of socialist realism as understood by Party officials, however, and this was belatedly recognized in the infamous *Pravda* editorial 'Muddle Instead of Music', published after Stalin attended a performance of the opera at the Bol'shoy Theatre in January 1936. This was the first time that a Soviet artist had been attacked in so public a manner, and the vicious and deliberately high-profile attack on *Lady Macbeth* for its 'formalism' in the Soviet Union's flagship newspaper was aimed not only at Shostakovich but at all Soviet artists unwilling to conform.

Since this was at the time of the purges, fellow members of the Union of Composers hastened to endorse the unsigned editorial by denouncing Shostakovich, in an effort to ensure their own survival; not even the composer's closest friends risked defending him. At this stage there were two separate political bodies overseeing the activities of Soviet composers: the music section of Department of Culture and Enlightenment (Kul'tpros), set up under the aegis of the Central Committee as the successor to Kul'tprop in 1935, and the All-Union Committee for Artistic Affairs which took over from Narkompros in January 1936, shortly before the *Pravda* editorial appeared. The latter was headed by the former Proletkul't leader Platon Kerzhentsev, who took a leading role in the campaign against formalism in the arts, and who may well have been the author of 'Muddle Instead of Music'. Shostakovich engineered his rehabilitation with the composition of his successful 5th Symphony a year later, accepting its description by a critic as 'A Soviet Artist's Reply to Just Criticism'. By awarding Shostakovich one of the newly instituted Stalin Prizes for his Piano Quintet in 1940, the party indicated that this process was now complete.

Surveillance and censorship were relaxed during World War II, when attention was deflected elsewhere, but the party reasserted its authority in 1946 as part of its overall drive to restore discipline. A new campaign against formalism and 'bourgeois degeneracy' among the artistic intelligentsia was led by Andrey Zhdanov, who had first come to prominence at the Congress of the Writers' Union in 1934 and had been appointed head of Kul'tpros in 1938. Three Party resolutions on literature, theatre and film were first published in 1946, then in February 1948 came Zhdanov's attack on dissonance and atonality in music, with the opera *The Great Friendship* by Muradeli (first performed in March 1947) serving as the pretext. Shostakovich was once again singled out for particular excoriation, along with Prokofiev, Khachaturian and Myaskovsky and other leading lights of Soviet music, and was forced to apologize publicly at the First All-Union Congress of Composers held from 19 to 25 April 1948. (Asaf'yev played an important role in formulating and enforcing the Party line at this time.)

Throughout the 1930s, the Union of Composers had been a loosely run conglomerate of relatively autonomous chapters set up regionally and in certain major cities (there were 28 chapters by 1945). Owing to a certain amount of confusion as to what exactly the purpose of these chapters should be, who should belong to them and who should run them, there was a considerable amount of reorganization in the early years, particularly in Moscow. It was in order to streamline activities that the government instituted an Organizational Committee (Orgkomitet) of the Union of Composers in 1939 and charged it with creating a centralized leadership. The group of leading composers who were in charge of the Orgkomitet resumed their activities after the war, but were replaced by party functionaries at the 1948 Congress. Among them was Tikhon Khrennikov, who was to retain the post of general secretary until after the demise of the Soviet Union itself.

The repercussions of the 1948 Resolution for the composers it named were severe, and extended to critics and scholars who had discussed their music in a positive light. With the Union of Composers now organized into a ruthless bureaucratic machine, Soviet musicians were subjected to greater ideological surveillance than ever before. It was not until the death of Stalin in 1953 that the pernicious Zhdanov era came to a close, although its chief architect had died in 1948. Signs that controls were to be loosened came in November 1953, when an important *Pravda* article seemed to encourage individualism and experimentation. Evidence of greater artistic freedom was provided the following year, when Shostakovich was given the ultimate accolade of being made a 'People's Artist of the USSR', and the première of his 10th Symphony was extensively discussed at the Union of Composers. The cultural 'thaw' began in earnest with Krushchyov's speech to the 20th Party Congress in February 1956. Greater tolerance of diversity of opinion at the Second Congress of Composers, which took place in April 1957, paved the way for certain aspects of the 1948 Resolution to be formally revoked. As a result of the new Resolution published in May 1958, the censured composers were rehabilitated and previously banned music restored to the repertory.

Contacts with the West now resumed after decades of cultural isolation. In addition to an international Tchaikovsky Competition, set up in Moscow in 1958, certain musicians were now permitted to travel abroad. Musical life in the Soviet Union was also considerably enriched by the signing of cultural agreements with other countries, which led to visits by foreign orchestras, soloists and composers. Soviet audiences were suddenly exposed to a wealth of new music. As a general rule, Western music that was religious, atonal or complex was neither performed, published nor allowed as a subject of study. Composers of Shostakovich's generation had been able to acquaint themselves with such music before and immediately after the Revolution, but for younger composers access to scores of non-Soviet music was highly limited. The music of Schoenberg and his contemporaries was, in particular, expressly forbidden, due to its 'bourgeois' and 'formalist' qualities, so the visits in the late 1950s and the 60s of such figures as Glenn Gould, Luigi Nono, Leonard Bernstein and Pierre Boulez were highly significant. Gould's legendary performances of music by Webern, for example, were a revelation, as were the scores by Stockhausen and Boulez imported by Nono. Copland and Britten were among the many contemporary composers who also made visits to Russia during the Thaw, but by far the most significant was made by Russia's own leading modernist, the 80-year-old Stravinsky, who returned to Russia for the first time in 50 years in the spring of 1962 at Khrennikov's invitation. The previously acrimonious relationship between Stravinsky and the Soviet musical establishment was suspended, and the composer was given an enthusiastic welcome (which included an audience with Krushchyov himself). As well as the concerts of his music, Soviet composers were able to attend meetings with Stravinsky, in which he staunchly defended dodecaphony and other 20th-century avant-garde styles and composers.

While the private performance of contemporary Western music within the confines of the Union of Composers was now sanctioned, public exposure to the latest developments in Western contemporary music remained strictly controlled. A clear sign that the period of the Thaw was coming to an end was the débâcle surrounding the première of Shostakovich's 13th Symphony, which

included politically risqué settings of Yevtushenko's *Babiy Yar*, in December 1962, when the authorities attempted to ban the performance. When Brezhnev replaced Krushchyov as Soviet leader two years later, the reverberations of his more repressive policies were to be felt acutely in the cultural sphere, beginning with the closed trials of the writers Sinyavsky and Daniel in 1966. The invasion of Czechoslovakia in 1968 confirmed a new period of ideological control and the emergence of a vociferous new dissident movement, supported by international human rights groups. In music, the change in party policy was reflected at the Fourth Congress of the Union of Composers in December 1968, where there was a renewed emphasis on socialist realism, but repressive measures were less severe than for other creative artists (this was later attributed by some to Khrennikov's skilful political mediation). It was writers who felt the brunt of retrenchment most acutely during this period, with Brodsky and Solzhenitsïn being arrested and then forcibly sent into exile, and others submitted to compulsory psychiatric treatment.

Musicians were also subject to various forms of persecution, however. The now immense bureaucratic machinery of the Ministry of Culture and the music section of the Central Committee's ideology department maintained a rigid control of musical life by imposing censorship on concert repertories and controlling the issue of visas to artists invited to perform abroad. Several prominent performers found these conditions intolerable and eventually defected. Rostropovich and Vishnevskaya, for example, decided to live abroad in 1974 after being prevented by the State Concert Office (Goskontsert) from fulfilling numerous foreign engagements; they were stripped of their Soviet citizenship in 1978. Others fought to be able to leave under a new policy permitting Jews to emigrate to Israel. As a result of the new campaign against musical experimentation and bourgeois ideology, meanwhile, many 'non-official' composers found it difficult to arrange performances of their works or find employment, and were subjected to a steady stream of criticism. The task of censorship became harder as the works by the avant garde began to be performed abroad, but international recognition tended to arouse greater hostility from Soviet officialdom. Alfred Schnittke, for example, was banned from travelling to the West to attend the premières of 19 of his new compositions between 1964 and 1984.

In such conditions, ingenuity and fearlessness were called for. The première in 1974 of Schnittke's radical First Symphony, for example, was a landmark event. Conducted by Gennady Rozhdestvensky, it took place in remote Gor'kiy (now Nizhny Novgorod) in order to circumnavigate the Ministry of Culturem which would not allow the work to be performed in Moscow. Official permission was given by Rodion Shchedrin, who in 1973 had taken over from the more conservative Georgy Sviridov as head of the Composers' Union of the Russian Federation (the largest constituent member of the nationwide Union of Composers). Rozhdestvensky also conducted the important first performances of works by Schnittke, Denisov and Gubaydulina (the three leading members of the avant garde) at the Moscow Conservatory's great hall in 1982, and was one of a number of prominent performers and conductors (others included Gidon Kremer, Tat'yana Grindenko, Natalya Gutman, Oleg Kagan, Mark Pekarsky and Aleksandr Lazarev) who played an important role in promoting 'unofficial' music during this period.

Events such as the foundation of the annual 'December Evenings' concert seried by Sviatoslav Richter and the holding of the first International Music Festival (sponsored by the Union of Composers) in Moscow in 1981 served to demonstrate a certain liberalization in the late Brezhnev years, but the so-called era of stagnation only truly came to a close under Gorbachyov, who became Soviet leader in 1985. As well as 'perestroika', which constituted a belated attempt to eradicate the corruption and complacency that was rife at every level of the system, Gorbachyov introduced the policy of 'glasnost'' which opened up Soviet society to an unprecedented degree. As the government began to relinquish its control over artistic life, Khrennikov was now forced to move with the times, and non-official composers were finally permitted to travel abroad. Performances of previously banned music were also now allowed to take place, and musical life in Russia was also enlivened by the return of artists such as Ashkenazy and Rostropovich, whose visits provoked a great deal of media interest.

In 1990 the Association of Contemporary Music reformed in Moscow in order to champion the cause of the current avant garde, as its predecessor had done. The new openness in Soviet society led to a vote of no confidence in the leadership of the Union of Composers at its 8th Congress in 1991, but Khrennikov managed (through vote-rigging, according to some detractors) to maintain his position of authority on the new committee elected to replace it. The Union of Composers survived the demise of the Soviet Union in 1992, but had become financially unviable by 1995, along with its publishing house Kompozitor, owing to the abrupt curtailment of the previously generous government subsidies and years of embezzlement by corrupt officials. Numerous new musical institutions, ensembles and publications were founded in the early 1990s, while those already in existence either folded or began shedding associations with their Soviet past by renaming themselves, among them the journal *Sovetskaya muzïka*, which became *Muzïkal'naya akademiya*. With economics rather than politics now playing the significant role in artistic life, musicians lead a precarious existence in the conditions of post-Soviet Russia.

(iii) Music of the Soviet period.

(a) The early Soviet era, 1917–32. The years that preceded the Revolution were marked by the deaths of several major figures: the leaders of the nationalist movement (Balakirev, Lyadov and Rimsky-Korsakov) died within a few years of each other while Moscow musical circles lost their mentor, leading light and rising star (respectively Taneyev, Skryabin and Stanchinsky) in the space of several months. The list of those who emigrated during the period 1914–22 is equally extensive: Stravinsky, Prokofiev, Medtner, Tcherepnin, Grechaninov, Vïshnegradsky, Obouhow and later Lourié, Glazunov and Lyapunov left Russia. Others, including Catoire and Ippolitov-Ivanov, all but ceased composing. In any other country, the loss of figures of this stature within this space of time would have signalled the end of any significant musical activity. That Russian music survived not only this but also a decimation by the artistic policy of modernists in 1932 makes its continued existence all the more astonishing. What is less recognized is the fact

that the Revolution had little effect on the stylistic detail of musical composition.

Links between political life, artists and artistic ideologues proliferated, as did semi-official artistic organizations. The meeting that occurred between Lunacharsky and Lourié in 1917 and that led to the latter's official appointment is typical of the rapprochement between the nascent communist government and many of the more advanced artists and musicians. Lunacharsky supported serious creative work in any field: it has been said that 'because of him, Russian art succeeded in weathering the terrible years of famine and civil war' (Yu. Yelagin, 1951). But conditions prevalent during the eras of War Communism, Civil War and the New Economic Policy made even staging a concert a task of significant difficulty: after having settled in Paris, Sabaneyev wrote that 'at that time, hungry and ragged conductors and musicians assembled in icy concert halls – the temperature was between seven and ten degrees below zero – and with gloves on their frozen hands' (Sabaneyev, 1930, p.472).

In the early Soviet period the traditions of the Moscow school were continued by Anatoly Aleksandrov, Feinberg and Myaskovsky, and those of Skryabin in particular by Krein, Roslavets, Lourié and many others. Many of these composers became prominent figures in the Association of Contemporary Music (ASM), formed in 1923. The ideals of this organization were comparable with those of the Vechera Sovremennoy Muzïki (Evenings of Contemporary Music) that had been promoted by Derzhanovsky and others in the first decade of the century. But the ASM was not merely a continuation of Mir Isskustva values – it was a relevant, progressive and contemporary Soviet organization. Its western and modernist orientations have been exaggerated: a large proportion of the organization's concert programmes were all-Russian and not particularly modernist. Although Stravinsky had left Russia during the course of World War I, during the early Soviet era he was not ostracized as he would be in later decades: *Petrushka*, *The Rite of Spring*, *The Wedding*, Symphonies of Wind Instruments and *Oedipus Rex* were all heard in Leningrad in concerts, many of which were organized by the ASM. In addition to this, Bartók and Hindemith visited Leningrad and performed their own works to audiences already familiar with Schoenberg's *Gurrelieder*, Chamber Symphony and Five Orchestral Pieces. In 1927 Berg visited the city for the Russian première of his opera *Wozzeck* and was impressed by the 'excellent musical preparation and theatrically strong performance'. The ASM therefore provided composers and the public with access to music from Western Europe.

But these occasional concerts devoted to the work of foreign composers and Russian modernists such as Roslavets, by dint of their novelty, attracted attention of both a positive and negative nature. At the time, it was easy for the proponents of 'proletarian music' to level criticisms of extreme élitism or anti-nationalism at the organization; in doing so the ASM's detractors ensured support from party members who had tangible power but no real interest in the arts. In fact, the modernist consequences of Lunacharsky's and Lourié's directorships made this reaction all the more probable; that this reaction took on political clothing is hardly surprising given the historical context. These criticisms and the resultant changes had famously far-reaching effects on the composition of music in Russia. They were also responsible for certain composers' disappearance from public view: once-prominent composers such as Roslavets, who held a large number of official positions and who was even a committed Marxist, became 'non persons' and were expunged from the official history of Soviet music for about 60 years.

The artistic climate engendered by symbolism and futurism was palpable right into the late 1920s; most of the music written in the first decade of Soviet rule has strong audible links to that of the pre-Revolutionary era and that of Skryabin in particular. The first two and a half decades of the 20th century were arguably the richest years of Russian music; the rises of Stravinsky, Prokofiev and then Shostakovich testify to the fertile and lasting heritage of Russian culture of the Silver Age. It is indeed ironic that, considering the subsequent enforced cultural isolation of the country, many of the concerns that have shaped the development of 20th-century music as a whole can be said to have had their beginnings in Russia during the period in which Skryabin had so great an influence. Microtonality (in the works of Lourié and Vïshnegradsky) and electronic music, often written for purpose-built instruments such as the theremin, were both explored in Russia during this fecund period. Additionally, experiments with total serialism and extended modal concepts and the first known uses of a prepared piano (by Ilÿa Satz and Leonid Polovinkin) occurred in this era.

During the early Soviet era, Skryabin's revolutionary, apocalyptic and essentially optimistic vision had great appeal and resonance for artists working in a society that in many senses was post-apocalyptic, revolutionary in political and social terms, and that initially engendered optimism in large parts of the creative community and intelligentsia. After Stalin's rise to power and inexorable annihilation of his political enemies, after the dissolution of independent writers', artists' and composers' organizations and with the onset of peremptory censorship and the *Yezhovshchina*, Skryabin's vision must have seemed naive and irrelevant. Not surprisingly, when Shostakovich claimed that Skryabin 'is our bitterest enemy', he was not speaking solely of his own musical preferences. By the later 1920s it was not only modernist tendencies that became dangerous: any music displaying what could loosely be termed symbolist tendencies – which Soviet musicologists would later term 'subjective' qualities – became the victim of proletarian criticism for not being easy enough to comprehend. Open nationalism, rather than the *narodnost'* permissible within a Soviet context, also became inadvisable: the significant Jewish School of the Kreins, Gnesin, Veprik and others was forced to abandon its roots and thus disappear; life was also made difficult for Ukrainian composers such as Lyatoshyns'ky. However, many composers, including Lourié, had abandoned hardline modernist aesthetics in the early or mid-1920s, when there was no political compunction to do so. Roslavets had written in a quasi-tonal manner in 1926 long before any party resolution on the arts, but despite this turnaround (and a public apology for having set 'decadent' text) the ranting Viktor Bely, a vociferous proponent of socialist realism, is said to have burnt copies of works by Roslavets. Paradoxically, it has been argued that socialist realism was in fact a logical continuation of the 'totalitarianism' of the Russian avant garde.

(b) Socialist realism and retrenchment, 1932–53. After about 1930 the fate of Russian music came to depend on

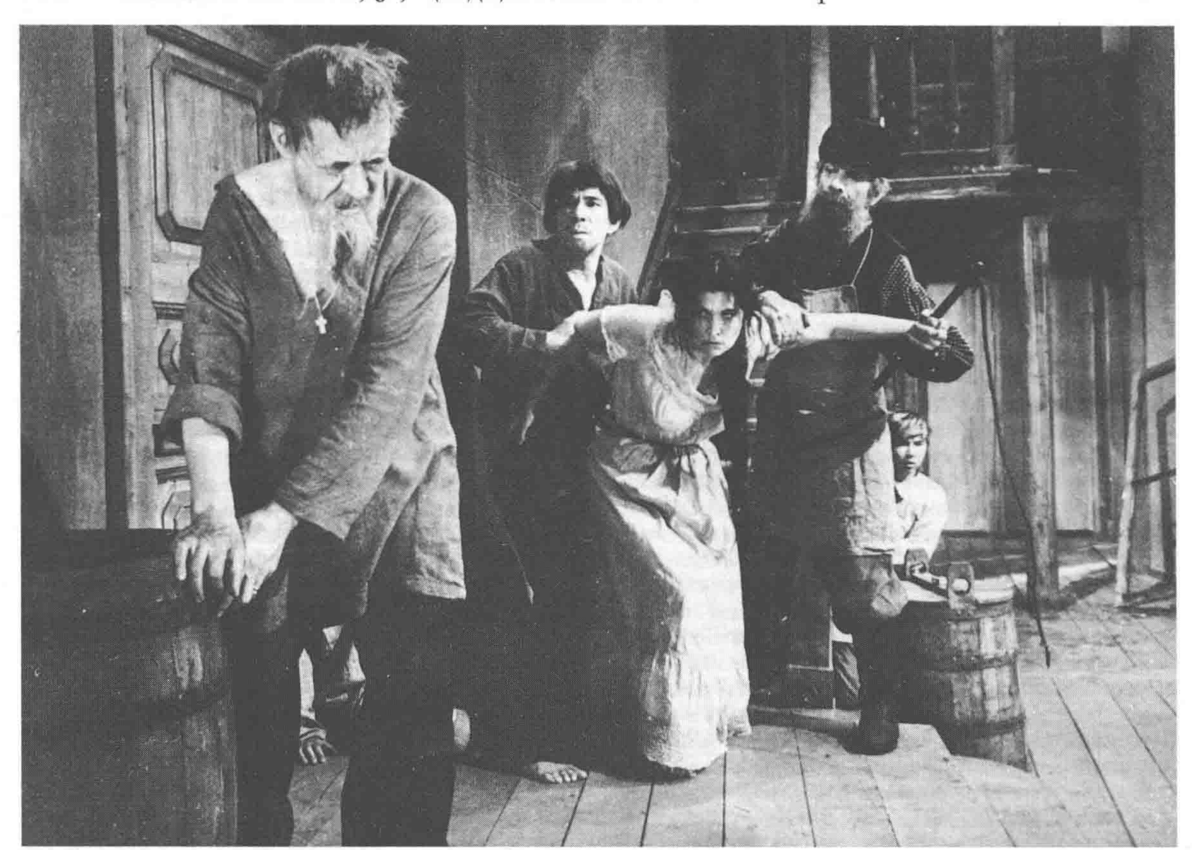
two quite different forces. The first of these stemmed from the so-called Leningrad school of Vladimir Shcherbachyov. He taught composers such as Gavriil Popov and Vladimir Deshevov, and during the later 1920s he fostered interest among his composition pupils in neo-classicism, Les Six, Hindemith, Stravinsky and Prokofiev. Although this movement had only slight origins in Russian music, its significance lay in that it nurtured the talent of Shostakovich during the 1920s. The second influence came from the proletarian groups such as the RAPM, whose relentless sectarianism at the end of the 1920s not only brought about the downfall of the ASM but also, more significantly perhaps, instigated the 1932 party resolution on the arts. Ironically, the ideologues of those proletarian groups abolished by the resolution actually gained the upper hand in the subsequent formulation of the doctrines of socialist realism. The Union of Soviet Composers was formed in 1932 with the intention of providing a non-partisan professional organization for composers and writers on music. The union established fora for composers in which new works could – and should – be discussed; these became a tool of censorship, creative assassination and alienation directed against all but those who conformed. The Composers' Union was also in a position to gain employment and commissions for composers, and even to act as employer itself. At worst, the musical result of this is demonstrated in many a work by Kabalevsky and Khrennikov and a few by Shostakovich and Prokofiev; often an unappealing hybrid of classicism, Russian nationalism, propagandizing and Soviet-style ethnicity, socialist realism as manifested in music is notable for its pallor and condescending simplicity. In more general terms, the changes brought about by the establishment of the Composers' Union and heralded by the metamorphosis of communism into a materialist rather than idealist concern were manifold in the sphere of music. In stylistic terms, the genres of song symphony (which frequently incorporated revolutionary songs) and *narodnaya muzïka* (inspired by Russian folk music or that of another Soviet republic) sprang into being alongside a considerable growth in the areas of applied music.

As the 1930s progressed, composers who had already, in 1917, adjusted themselves to not dissimilar musical conditions were faced with another, more serious set of propositions. Many composers who in the 1920s had freely experimented with modernist techniques turned to teaching, ethnomusicology (and *narodnaya muzïka*), film music or in fact any form of 'applied' music-making considered of sufficient material benefit to warrant sanction from ideologues. The survival of chameleon-like, gifted but ideologically 'movable' characters such as Kabalevsky and Asaf'yev lay with their willingness to be members of the ASM, and only subsequently to become mouthpieces of Zhdanov. Fortunately, very few composers are recorded to have actually been killed in Stalin's purges. Sollertinsky and Zhilyayev were killed, and Mosolov imprisoned and sentenced to eight years' hard labour; only Glière's personal intervention in the form of a letter to Kalinin, the Soviet president, reprieved him.

The first signs that the party was serious in its intention to castigate artists who ignored the tenets of socialist realism came with the appearance of the subsequently famous article 'Muddle Instead of Music' in *Pravda* on 18 January 1936. The article was probably written at the behest of Stalin who had witnessed a performance of Shostakovich's opera *Lady Macbeth of the Mtsensk District*; it criticized the dissonance of the music, its lack of immediate comprehensibility and also what were referred to as 'pornographic' qualities. Many of his colleagues were reluctant to leap to his defence; those that did paid with loss of reputation. That this was the first such an attack on a composer is emblematic of Shostakovich's unique position. He was singled out for more public praise and vilification than almost any other Russian creative artist. When hounded by the state, he became a kind of martyr; when the apparatchiks lauded him they were rewarded with scepticism from the artistic élite as well as a from a much wider public; his politically motivated detractors took several decades to realize that they could not gain the upper hand. Equally, when 'official' composers sat down to write music extolling the party, they mostly found it rather hard to avoid the influence of those figures they had attacked so virulently – Shostakovich, Prokofiev and Myaskovsky.

Prokofiev returned to live in Russia just as the effects of the 1932 resolution were becoming evident: he arrived with his family in 1936 after nearly two decades abroad. It has been suggested that a combination of homesickness and political naivety influenced his decision. Nonetheless, he was treated as a celebrity and was rewarded with as much time as he needed to compose. The war and the comparatively relaxed artistic situation – the authorities gave far less attention to musical matters than they had in the 1930s – stimulated Prokofiev and several others to write some of their finest works. These were often non-programmatic 'subjective' works; the continuation of this trend, the resumption of Soviet 'normality' in the postwar period and the rise of the ideologue Zhdanov led to a clamp down of a greater magnitude than that of 1936. On 10 February 1948 the resolution 'On the Opera *The Great Friendship* by V. Muradeli' decreed that all music should be subjugated to the dictates of Stalinist Marxist-Leninism. The work of Myaskovsky, Popov, Prokofiev, Shebalin and, of course, Shostakovich was singled out for its formalism and 'anti-democratic tendencies'. The ramifications for these composers were loss of earnings through commissions and teaching posts, lack of performances and, in Prokofiev's case, a setback for his already frail health. For all musicians it represented an intensification of the witch hunts that had commenced in the 1930s and further isolation from the rest of the musical world.

Better-known figures aside, many composers adopted a monumental style derived in part from the *Kutchka* and applied this to heroic subject matter from Russia's real or mythical past. Shaporin, for example, had previously been an associate of literary figures ranging from Benois and Blok to Mayakovsky; his major works of the period – the opera *The Decembrists* and the oratorio *On the Field of Kulikovo* – exemplify the way in which composers could safely approach subject matter of the Tsarist era. While his style has been derided as 'Borodin inflated to the dimensions of Mahler', he had clearly not forgotten some of the experience of harmonic adventure he gained in the 1920s. Occasional waywardness, however, was perhaps overlooked in the light of approved subject matter.



That composers had a difficult time during the Soviet era is well documented. Those who learned their craft in the 1920s and before were faced with few choices: they

could either alter their style of writing, give up composition and focus on some other sphere of activity, or write 'for the drawer', keeping to themselves any works they wrote, in order to avoid criticism and ostracism from the Composers' Union. This last choice was the most difficult of all to make for practical reasons and was not taken by many. With no means of publication (which only resulted from official sanction) no commission and no composition-related employment, a full-time composer would have no livelihood. So many composers found a curious middle path that has its roots in pre-Revolutionary symbolism. Among the requirements of the doctrines of socialist realism was simplicity and approachability of style. The surface simplicity of the most impressive works by Shostakovich and Prokofiev frequently obscures an implicit layer of complex allusion. In the works of lesser composers, simplicity was unfortunately not only a surface feature but also the sum of the artistic thought. But the relative simplicity of the works that Goldenweiser, Lyatoshyns'ky, Roslavets, Shebalin and many others wrote in the 1930s and beyond may similarly hide suggestions of the complexity that characterized their previous compositions.

One of the most consistent and internationally recognized achievements of the Soviet state was the impressive standard of training offered by its higher educational establishments. Nowhere was this more evident than in the conservatories that produced a stream of world-class instrumental virtuosos. Unfortunately, the musicologists, critics and composers trained in the same institutions were fettered with ideological concerns that would not so obviously affect the work of, say, a violinist. That composers were rigorously taught counterpoint and orchestration is usually self-evident in their work. The training of performers had a direct effect on the writing of music: many works written by Russian composers (and especially those of the Soviet era) are considered 'undernotated' by Western critics who are unaware of the intricacies of the traditions of performing and especially interpretation that formed the backbone of the Soviet educational system.

(c) Thaw and the end of the Soviet Union, from 1953. The dominance of Shostakovich was consolidated during the last two decades of his life partly as a result of the death of Stalin and the resultant thaw under Krushchyov: the first performances of many of his most important works written 'for the drawer' during the 1930s and 40s and the revival of once dangerous masterpieces such as the Fourth Symphony greatly enhanced his status. His influence became ubiquitous; it is most obvious in the works of his close friends Basner and Tishchenko, and can be detected in the works of many more surprising figures. His overbearing presence tempted other composers to turn consciously away from his example and they made themselves conspicuous in doing so. The arrival of Andrey Volkhonsky from Paris at the Moscow Conservatory, visits to Russia by Nono (with scores from Darmstadt composers), Gould (who described and demonstrated 12-note technique in a lecture to students of the Moscow Conservatory) and Stravinsky (who represented a living link to Russia's pre-Revolutionary, pre-socialist realist past), and the development of the Kiev avant garde served as catalysts to this trend. However, perhaps the most significant influence came from one immigrant, 'unofficial' composer who was resident in Moscow, Philip Herschkowitz. He acted as mentor to and taught privately almost all of Russia's nascent avant garde. But he did not teach them the serial techniques of his teacher Webern; he gave them a highly disciplined and thorough grounding in counterpoint as employed by Palestrina and Bach, and would analyse the works of Beethoven, other 'classical' composers and only occasionally Mahler. Schnittke's First Symphony, with its symbolic première in 'closed' Gor'kiy in 1974, was the first public announcement of this new beginning and was the expression of one of the primary paths Russian music would take after Shostakovich. This work demonstrates the way in which Schnittke and many of his contemporaries managed to 'incorporate a Shostakovichian symbolism . . . into new musical languages that borrowed little or nothing from the sound of his music' (McBurney, C1998). A more intimate herald of this stylistically mercurial trend came in another part of the Soviet Union – Ukraine – with Sil'vestrov's *Drama* of 1971. Many composers associated with the Ukrainian avant garde of the 1950s and 60s were pupils either of Lyatoshyns'ky or of musicians he had taught; this movement served as a great encouragement to Russian composers unsure of the political repercussions. In Russia the modernist revival of the 1960s, spearheaded by Denisov, Gubaydulina and Schnittke, represented in some senses a reawakening of the spirit and sensibilities of the 1920s. Denisov was one of the first people in 1970s Russia to take an interest in composers such as Roslavets. This period also witnessed the overshadowing of genuinely gifted composers of a conservative bent – Frid, Tishchenko and Weinberg, to name but three – by the now 'official' modernism of Shchedrin who, by acting as court jester to Khrennikov, could write faintly risqué works in the 1960s and thereafter without jeopardizing his precious career.

The death of Shostakovich in 1975 did not automatically signal an end of his dominance; it actually continued to operate for at least two decades, as had that of Skryabin earlier in the century. As the reputations of modernists such as Denisov, Gubaydulina and Schnittke – all pupils of Herschkowitz – grew beyond the confines of the Soviet Union in the 1970s and 80s, official composers such as Ėshpay and Kabalevsky continued to write much as before. After the fall of the Soviet system in 1991, the appearance of new folklore trends, neo-romanticism and neo-nationalism suggests that many composers appeared content to compose in a manner that would have been approved by the ideologues of the 1930s and 40s. The deaths of the some of the most significant hitherto 'non-party' composers – such as Karetnikov, Schnittke and Denisov – in the mid-1990s and the emigration of many with any reputation outside Russia (Suslin, D.N. Smirnov, Firsova, Gubaydulina, Shoot, Korndorf, Vustin and Raskatov) not only deprived the country of many of its most significant musical personalities but also, ironically, left the country in a situation parallel to that of the 1917 revolution. However, a number of composers with experimental or modernist leanings did remain in Russia at the end of the century (these include Khanon″, Belimov, Bakshi, Knayfel', Tarnopol'sky, E.N. Artem'yev and D.V. Smirnov). The most significant composer to emerge from Russia since the 1980s was Galina Ustvol'skaya: she had been writing since the 1940s but, owing to her reclusive character and the religious but rebarbative nature of her music, she had been mostly unknown in the Soviet era.

6. Still from the 1967 film (directed by Mikhail Sapiro) of Shostakovich's 'Katerina Izmaylova', his revised version of 'Lady Macbeth of the Mtsensk District', with Aleksandr Sokolov as Boris Timofeyevich and Galina Vishnevskaya in the title role; 'Lady Macbeth' was withdrawn from the stage on party orders in 1936, and the work was not approved for production again until 1963

The politically astute, such as Shchedrin, Andrey Petrov (the leader of the St Petersburg Composers' Union for over 30 years), Dmitriyev and, perhaps not so surprisingly considering the rise of the nationalist nostalgia for Russia's Soviet past, Khrennikov, all thrived, even if they were largely ignored by their more ethical colleagues and regarded with faint amusement abroad. The nostalgia for Russia's past informs a whole range of compositional attitudes, ranging from the exquisitely crafted evocations of Sil'vestrov to Sviridov's *ersatz* and reactionary nationalism. The sudden availability of religious subject matter led to its becoming fashionable with composers of every persuasion; even erstwhile Union officials such as Ėshpay suddenly discovered their latent spirituality in the 1990s.

Later Soviet music was dominated by the figure of Shostakovich, both as martyr and privately unwilling mouthpiece of Soviet music. That his influence should loom large is not surprising considering the magnitude both of his musical achievements and of his worldwide public status. The fact that he was the only composer who remained in Russia to achieve the status and position of artistic influence that Skryabin had until 1930 is paradoxical because in many respects he was the composer most dissimilar to Skryabin in terms of output, philosophy, aesthetic character and technique. The large number of composers directly or indirectly influenced by Skryabin made all the more probable the opposition he engendered on the part of the proletarian groups and the reaction against his aesthetic by the Leningrad modernists and Shostakovich. Those who turned away from Skryabin's and Shostakovich's influences did so because of their pervasive nature. In this sense, the course of 20th-century Russian music can be seen as more complex and more continuous (in terms of ongoing reaction of opposing forces) than has been suggested by the mythology of watersheds, be it the supposed watershed of 1913, with *The Rite of Spring*, or that of 1917, with the Revolution. The most important break with the past came in 1932 with the defeat of the Silver Age – as symbolized musically by Skryabin – by the forces of materialism (including the material and very real forms that the repercussions of straying from the Composers' Union line could take), proletarianism and the new Soviet music under the perhaps unwilling leadership of Shostakovich. The fallout from the end of Shostakovich's influence was still in play at the end of the 20th century.

Alongside this paradox of and fundamental shift between two opposing personalities, one overriding characteristic has become identifiable, namely that Russian music – and particularly that of the 20th century – has a tendency not to be 'only' music. The examples of Skryabin and Shostakovich provide the most well-known and at the same time contrasting examples of this tendency towards various forms of symbolism. This inextricable binding up of life and art is perhaps surprising not only for these two composers but also for many others who appeared to excel in the writing of symphonies, concertos, string quartets and sonatas. These conventional genres

were increasingly regarded by many outside Russia as reactionary. But these were genres in which composers could enunciate that which could not be expressed more openly; it is no coincidence that it was the composition of symphonies that elicited the most suspicion from politicians and that it was works in this genre that in a sense acted as musical signposts at many of the key points in Russian 20th-century history. What the various key figures of 20th-century Russian music had in common was a desire to express and symbolize their personal beliefs in the medium of essentially classical genres.
